The organization of the Federal reserve board has been materially changed. As the bill passed the House it provided that this board, which is to control the whole system, should be composed of the Comptroller of the Currency, two members of the Cabinet, and four other members appointed by the President. Of the four appointive members not more than two were to be members of any one political party. The very mention of political parties in this connection suggested partisan control. If one party should go out of power and another come in, the incoming President would find two members of his own political party—appointed because they were members of that party—on the Federal reserve board. Upon appointing his Cabinet he would have two more, immediately giving the incoming party four votes out of the seven in control of the banking system of the country.

Two changes in the bill have rendered such a condition extremely improbable, if not impossible. In the first place, the amended bill makes no provision for appointing men or excluding men because they belong to this or that political party,

The members of the Federal reserve board ought to be appointed, and under this bill may be appointed, with as little thought of party control as are the justices of the Supreme Court. In the second place, the amended bill provides that only one member of the Cabinet, instead of two, shall be a member of the Federal reserve board. There are to be five appointive members, each appointed for 10 years, instead of four with eight year terms. An incoming President will not have immediate control. In fact, he will be three years in office before he will appoint four out of the seven members, and unless he should appoint a Comptroller of the Currency he will appoint during his whole term only three out of the seven members. This change in the bill practically takes the Federal reserve system out of politics.

In addition to this the powers of the Federal reserve board have been limited, as pointed out by the gentleman from Virginia [Mr. Glass]. To compel one Federal reserve bank to rediscount the discounted paper of another will now require five affirmative votes in the Federal reserve board, instead of merely requiring the presence of five members who, as I understand the original bill, might consent to such compulsory re-discounting merely by refraining from a vote against the

In other respects also the powers of the board are limited by the amended bill. It can not, as provided in the House bill, remove at pleasure the officers of the Federal reserve banks nor the directors of class B, except for cause stated in writing.

The bill in its new form provides for a sounder currency than when it passed the House. It then required that the new bank notes should be supported by a reserve of 331 per cent in gold Now, that reserve must be 40 per cent in or lawful money. In its old form the bill made no provision for redeeming the notes in gold. The present bill makes them redeemable in gold at the Treasury of the United States. It would be better still if the issuing banks, as well as the Treasury, were compelled to redeem them in gold instead of gold or lawful money, but the provision for any redemption in gold is a decided improvement. The bill in its new form also by inserting two or three brief clauses defines somewhat more clearly the commercial paper eligible for rediscount, and thereby adds somewhat to the not too secure safeguards against inflation.

Other changes in the bill make it more just and equitable

toward small banks. Instead of requiring member banks to invest 20 per cent of their capital in the stock of the Federal reserve banks, the bill, as it now stands, requires the investment of 6 per cent of the capital and surplus. The rights and privileges of such State banks and trust companies as may apply for membership in the new system are not left wholly undefined, as they were in the unamended House bill. Last of all, the bill is very considerably improved by a provision to take care, at least in part, of the 2 per cent bonds which are now the basis

of bank-note circulation.

I believe that the Senate improved the House bill and that the Senate bill was decidedly improved in conference. Doubtless time will bring out defects in the bill that will call for correction, but the currency it provides will vary in quantity as the volume of business rises and falls. The medium of exchange will have a real relation to the volume of exchanges. It is a better bill than it was, and I expect to vote for it.

Mr. GLASS. Mr. Speaker, how much time have I remaining? The SPEAKER. The gentleman from Virginia has 28 min-

utes and the gentleman from California 13 minutes.

Mr. GLASS. Mr. Speake Alabama [Mr. Underwood]. Mr. Speaker, I yield to the gentleman from

Mr. UNDERWOOD. Mr. Speaker, I desire to congratulate the members of the Banking and Currency Committee of this House and of the Senate on accomplishing a result that many Congresses and many committees have attempted in the last 20 years and failed in. More than 20 years ago there was pending in this House a bill known as the Carlisle currency bill that sought to bring about a rational and reasonable currency reform. That bill was followed by what was known as the Walker bill when Mr. Reed was Speaker of this House. That bill also met its fate; and later on the bill known as the Fowler bill was reported to the House only to go down to defeat.

Many of the principles that are contained in this bill were principles of the bills that I have mentioned, but all of them failed, in my judgment, for one fundamental reason. Each of the bills that sought reform, to revise the inefficient currency system that we now have on the statute books, sought to do so by giving the great banking interests of this country the control of the currency system of the country. The American people were opposed to placing the money of the country in the hands of the discount bankers of America. It was natural

that they should. A large majority of the people are borrowers of money, but few are lenders of money, and it was not natural to require that the men who are compelled to borrow money should put in the hands of the men who loaned the money the power to control the finances of the Government.

The great banking system of England is often referred to as a bankers' control system. That system has been the evolution of many years, and yet our relatives across the water were wise enough in establishing the control of the Bank of England to make it a part of their system that the discount banker, or the man who lends money, shall not control the issue of that money or the expansion of the money. [Applause.]

The Bank of England, which is a bankers' bank, has not a member on its board of directors who is a discount banker. The Bank of England is controlled by the great merchant classes of England, the borrowers of money and not the lenders of

The rock on which our friends on the Republican side have broken when they have attempted to pass their monetary legislation through this House in the last 16 years has been the fact that they have attempted to put the control of the system that they advocated in the hands of the men who loan the money and not in the hands of the representatives of the people who

borrow the money. [Applause.]

Therefore I congratulate the wisdom of this committee in recognizing that fact and in the beginning establishing a Government control of this system that would represent the borrowers of money and enable the people of America to secure the medium of exchange at reasonable rates of interest at all times. I think that that is probably the greatest reform that has been worked out in this bill, and yet a reform that will not endanger any banking interest; for were this Federal reserve board that is organized for the purpose of protecting the rights of the American people to be so drastic in its management of this system or so unwise as to abandon the field of safe banking it would but wreck the system and injure the people that it is supposed to represent. Therefore I believe that this board will carefully and safely manage this system, not only in the interest of the American people and low interest rates, but also will have the wisdom to see that the great banking interests of the country are properly safeguarded and protected. We have heard in recent years of a Money Trust.

ficult to define what a Money Trust is or where it exists, but we do know that there has been at various times a control of the surplus money of this country in the hands of a few men, and that has largely grown out of the fact that the law upon the statute books forced the reserves of this country, or a great majority of them, to go to one great city in America, to be assembled in banks that you could count on the fingers of your two hands, and necessarily that brought about the con-

trol of our financial system by a few men.

One of the great reforms accomplished in the bill is the taking of the reserves out of the reserve centers and scattering them to at least eight regional reserve banks, possibly more, placing them in banks that will be under governmental supervision, where the country bank or the local bank would be assured in time of stress and time of peril of being able to vitalize and utilize its reserves that are held for emergency purposes

The other great reform, and one that has been needed in this country for a half century, is in the fact that at last we are to have a currency that will respond to the business needs of the country. We are to have an elastic currency that will enable the people of this country, when money is demanded to transact business, to go to the machinery that is provided by this bill, to go to an institution that is authorized by law to give them the currency that the business needs of the country demand and to retire it when it is no longer needed in cir-

The difficulty which the great business men of the country have labored under for many years has been that they have had to go hand in hand to the owner of money and ask as a privilege to transact business. This bill provides a machinery by which legitimate business needs may have the money with which to transact business as a matter of right and not as a

matter of privilege.

With these reforms written on the statute books, I have a firm conviction that the great banking interests of the country will accept this bill, that it will be a real boon to the people of the United States, that it will relieve any stringence that may exist in monetary circles to-day, that it will oil the wheels of commerce, that it will promote business enterprise and encourage business development. I believe that the era of dull times and inactivity of business will pass away to-morrow, when the President of the United States signs this bill. [Applause on the Democratic side.] I believe that the passage of this bill carries to the American people a promise of prosperity, business success, employment for labor, and better times throughout the country. There is no better time when we could put this great measure on the statute books than the day before that day which marks the celebration of the coming of the Prince of Peace. [Applause.] There is no better time on which the great party to which we owe allegiance could send forth this message of prosperity and good will to the great business interests of the country, to the man who toils in the mine, who works in the field, than the opening of a new year—a new year that will proclaim for the American people an expansion of business ideas, which will undo the fetters of commerce, which will add to the development of our commerce beyond the seas, and which, in my judgment, will not only bring commercial and business success but will write next November at the polls a verdict in favor of the party to which we owe allegiance, because we have fulfilled our pledges and we have kept the faith. [Applause on the Democratic side.]

Mr. HAYES. Mr. Speaker, I yield to the gentleman from Wyoming [Mr. MONDELL].

Mr. MONDELL. Mr. Speaker, I would suggest to my friend from Alabama [Mr. Heflin] that a man does not need a glass eve to see the mice and crickets in this measure, the perils and pitfalls it contains. I can not in three minutes catalogue, much less discuss, the many fundamental and fatal features of the One of them is that provision which places upon the American people the enormous burden that ought to be borne by the bankers of final responsibility for the redemption of the notes that are to be issued. Another is the provision of the bill under which the organization, the Federal board, that is to control all the banking credit of the country may be a purely partisan board, and is likely to be such. Another is the provision under which that board, so constituted, has such vast powers that it becomes in effect a great partisan, political, central banking institution. So much for some of the faults of commis-One of the fundamental errors of omission is the fact that there is no adequate provision in the bill for the retirement of notes, and, therefore, there is a serious threat and danger of inflation. Another, that it does not adequately provide for farm loans, in that there is absent from the bill a provision contained in the bill when it passed the House for savings departments in national banks.

These and many more reasons are all sufficient to justify a vote against the bill. But there are other reasons, Mr. Chairman. The question of the currency is a nonpartisan one and it should be so treated, but the majority willed to treat it as a partisan question. They took it into a secret and binding caucus, which, by confessions of men on the other side, was largely controlled by the President and members of his Cabinet. It came to the floor with every Member on that side caucus bound, and not a vote has been or will be taken in this House on this bill which reflects the free and untrammeled action of Members on that side. It follows, therefore, that a vote for this bill is not only a vote in favor of all the faults and defects of the measure, but it is also an indorsement and approval of all of the vicious and unjustifiable partisan methods of consideration, which are largely responsible for the faults of the measure.

The SPEAKER. The time of the gentleman has expired.
Mr. HAYES. Mr. Speaker, I yield to the gentleman from
North Dakota [Mr. Norton].

Mr. NORTON. Mr. Speaker, I am confident that it is most pleasing to almost every man in this Chamber that after many long and tiresome days, weeks, and months of preparation, discussion, and debate this epoch-making legislation is to be given to the country. I wish to take this opportunity to express to the members of the Committee on Banking and Currency who during all these long months past have so unsparingly in and out of season devoted their time and best efforts to the construction of this legislation my congratulations on the final conclusion of their work. I think that it is only fair to say that the members of this committee have done a great service to this House and to the country.

The approval of this measure by Congress and by the President and the complete success of its provisions in the business and commercial life of the Nation, I trust, will be the rich and proud reward of these gentlemen, and especially of the able chairman of the committee, for their fidelity to the duties in this great work intrusted to them by this House. [Applause.]

this great work intrusted to them by this House. [Applause.]
I have no hesitancy in saying that in my judgment this bill in its present form is a better bill than when it passed this House three months ago. And had free and open discussion and con-

sideration of this bill been permitted on the floor of this House, and had not the free will and action of many Members on the majority side been restrained and stifled by the indefensible secret-caucus system employed by that side of the House, the bill would go to the country affording more real relief and benefit to those who toll in field and shop than it will bring to them in its present form. I want to say now that I intend to support this measure. [Applause.] I intend to support this measure. [Applause.] I intend to support this measure of the banking business of the country in the keeping of the people of the country and takes this control away from the money barons of the country. I intend to support this bill because I believe that under its provisions the banking business of the country will in the future be conducted in a way more to serve and accommodate the people and the business of the people of the country, rather than, as it is now, largely conducted to serve primarily as an instrument and means of greed and profit for bank officials and bank stockholders.

I am much pleased that the bill, in its present form, contains more liberal provisions for the country banks and for those engaged in agricultural pursuits than it contained when it was first sent from this House to the Senate. And I am particularly gratified to find that the Senate has seen fit to adopt an amendment to the bill similar to the amendment I offered in the House of Representatives on September 16, extending the time of the maturity of notes which may be rediscounted from 90 days to 6 months. This amendment unquestionably makes the measure of more genuine service to the farmers of the North, the South, the East, and the West. But I hope that this Congress will not rest its labor and its effort in this direction with this amendment or with this bill, but that this measure will soon be supplemented by legislation providing for and establishing a system of rural credit banks, so much needed in this country to-day, and concerning which I expect to have the privilege of addressing this House at another time.

In view of the fact that for several years past all of the leading political parties have agreed that our banking and currency system has been outgrown and is unsuited for the business and commercial needs of our country, and have promised, through their party platforms, the enactment of a better system, I was very much amused in listening to the gentleman from Alabama [Mr. Heflin] who first spoke. His argument reminds me very much of those old-time Mother Hubbard dresses—it covered so much and touched so little. [Laughter and applause.] The gentleman, in his partisan enthusiasm and in his exuberant oratory, forgets the fact that this legislation is not at all solely due to the Democratic Party. The real work, culminating in this legislation, was initiated long before his party had its present majority in this House.

The National Monetary Commission, which builded the real foundation for this measure, was provided for by the act of May 30, 1908. This commission expended nearly \$300,000 in studying and making comparisons of the different banking and currency systems of the leading nations of the world, and made its most exhaustive and valuable report and recommendations to the Sixty-second Congress. No one can honestly and fairly contend that this House and this Congress in framing this legislation has not made much and good use of the work done and the report made by the National Monetary Commission, and profited greatly from the debates and discussions of this subject in the Sixty-second Congress. A large majority of the Republican Members of this House in this Congress have at all times been just as honest and just as desirous as Members on the Democratic side to place upon our statute books the best possible banking and currency legislation that can now be devised by the best intelligence and experience of our country. Thus it ill becomes anyone on that side to now seem to forget the origin and real first effective work done toward the final accomplishment of this legislation.

While gentlemen here may differ as to the wisdom and ultimate success of particular features of this legislation, nevertheless there comes a time when patriotism overshadows partisanism, and I am confident that I now voice the sentiment of practically every man in this Chamber when I say it is my wish and hope that when this great legislation goes to the country to-morrow the predictions made a few moments ago by the leader of that side, the gentleman from Alabama [Mr. Underwood), and those made on Saturday by the cheerful and charming Speaker of this House, will come to pass and the whole country will prosper, bloom, and blossom roselike under its influence and its effect. [Applause.]

Mr. HAYES. Mr. Speaker, I yield to the gentleman from Ohio [Mr. WILLIS].

Mr. WILLIS. Mr. Speaker, I have listened with a great deal of interest to the prophecies and rhapsodies coming from the other side of the Chamber, but the difficulty about those prophecies is that the prophets do not agree. The gentleman from Pennsylvania [Mr. Palmer] said a little while ago that when this bill passed this House it was a good bill, and then when it passed the Senate it was a better bill, and yet standing right there at the reading desk just a few hours ago the gentleman from Virginia [Mr. Glass], in charge of this bill, said that when it passed the Senate not only was it not a better bill but the enactment of it into law would have been a "calamity" and would have resulted, to quote his exact words, "in a perfect saturnalia of inflation." Mr. Speaker, I believe the chairman was stating the truth with reference to this legislation.

Section 16 of this bill contains enough unsound financial provisions to bring industrial and financial calamity upon the country; or, as the chairman of the Committee on Banking and Currency has stated, sufficient to lead "to a perfect saturnalia of inflation," as he so eloquently and aptly described when referring to the provisions of the Senate bill. It is to be observed that the essential provisions of section 16 remain in the conference report substantially as they were in the bill passed by the Senate. This section 16 as it stands in the conference report in part is as follows:

Sec. 16. Federal reserve notes, to be issued at the discretion of the Federal reserve board for the purpose of making advances to Federal reserve banks through the Federal reserve agents as hereinafter set forth and for no other purpose, are hereby authorized. The said notes shall be obligations of the United States, and shall be receivable by all national and member banks and Federal reserve banks and for all taxes, customs, and other public dues. They shall be redeemed in gold on demand at the Treasury Department of the United States, in the city of Washington, D. C., or in gold or lawful money at any Federal reserve bank.

There are at least four provisions in the portion of the section quoted which are fraught with the gravest consequences to the financial prosperity of the country. First, it is stated that these notes are to be issued "at the discretion of the Federal reserve board." It will be seen by referring to section 10 that this Federal reserve board is a partisan organization. In the bill which passed the House it was provided that not more than one of the four appointive members of the Federal reserve board should be selected from any one Federal reserve district, and not more than two of them should be of the same political It should be noticed that this provision relative to a bipartisan board has been stricken out of the House bill, and in the measure that is now before the House it is provided that the Federal reserve board shall consist of five members to be appointed by the President of the United States, by and with the advice and consent of the Senate, with two additional members in the persons of the Secretary of the Treasury and the Comptroller of the Currency. From this provision of the proposed law it is quite evident that all seven members of the Federal reserve board will be members of the same political party. At any rate, there is nothing in the law to prevent it, and it is not overstating the case to say that as this law must be interpreted in view of the action of the Senate in striking out the provision in the House bill which provided that not more than two of the appointive members should be of the same political party, it is clear that the purpose of the legislation now proposed to be enacted is to make this Federal reserve board a partisan organization.

Now, then, considering section 10 in connection with section 16, let us see what results we obtain. Here we have a board of seven men, all appointed by the President and undoubtedly all of the same political party. Now, what power have they under the terms of section 16? Quoting again from this section, it is found that Federal reserve notes are to be issued "at the discretion of the Federal reserve board." So far as this proposed legislation is concerned, there is absolutely no limitation upon the amount of notes which may be issued. Herein resides the possibility of inflation. Of course it is admitted that provision is made for a reserve fund of 40 per cent, together with the commercial paper put up as collateral, but I submit this, Mr. Speaker, that it is unwise, unsound, and will prove to be disastrous legislation to give to any board such immense power over the control of the circulating medium of this country as is contemplated in the portion of section 16 which I have just quoted. There ought to be in this bill somewhere a positive limitation upon the amount of circulating medium which can be issued. To omit such a salutary provision is to invite the financial disaster which has always followed in the wake of an inflated paper circulation. It certainly is a most interesting coincidence that now, as always in the past, in the face of threat-

ening financial disaster—when news is coming in from every quarter of the closing down of mills, of the organization of the armies of the unemployed, of the actions of various municipalities in taking emergency steps to furnish employment to workingmen now out of employment but who heretofore have been busily employed in the mills and factories and mines—at such a time, in the face of an undoubted industrial lethargy, it seems most peculiar that the party in control of the Government should resort to the same measure to which it has always resorted under such occasions, namely, that of inflation of the currency.

What we want in this country at the present moment is not more paper money, but more busy mills. Not more importation of foreign products, but better production at home at better wages, with better protection for our own farmers, our own laborers, and our own markets. Not inflated credit, but more men at work here in America at good wages to furnish a market for the farmers' products. The resort to such financial nostrums as are illustrated by this bill will be only a temporary stimulant and in the end will work much harm to the producers of the country. This, then, is my first serious objection to this bill—that it puts into the hands of seven men appointed for political purposes the power to say what the amount of the circulating medium of this country shall be. The financial life of our people is too great a stake to rest upon the mere edict of any such body of men, however able and distinguished they may be.

In the second place it is provided in this section 16 that "said notes shall be obligations of the United States." I object to this provision, Mr. Speaker, because there is no good reason why these notes which are to be issued to the Federal reserve banks and are to be circulated by them for their profit should not be the obligations of the banks instead of the obligation of the United States. These few lines of section 16 disclose the whole purpose of this legislation. Shorn of its verbiage it amounts simply to this: That the credit of the United States is to be loaned to a certain special class for the benefit of that class. Is there any good reason why the credit of the great Government of the United States should be loaned to these Federal reserve banks which would not apply equally, well to other classes and business organizations of this country? If the Government of the United States is to go into the business of loaning its credit to various persons, corporations, and associations, why should it not loan it to the farmers and workingmen of the country as well as to certain special

favorites known as Federal reserve banks?

In my judgment the provision which undertakes to saddle the obligation of redeeming these notes upon the Government of the United States, thus making them in fact direct obligations of the Federal Government, is entirely unjustifiable. I believe that if the American people understood that the effect of this legislation was to saddle upon their shoulders the obligation of redeeming the notes issued by this Federal reserve board to Federal reserve banks they would rise up almost to a man and oppose this legislation. Since these notes are to be issued to the Federal reserve banks for the profit of those organizations they ought to be the obligations of those banks. It ought to be the duty of the banks to redeem the notes. No such obligation and no such duty should rest upon the shoulders of the Government of the United States.

It is provided in the third place, in section 16, that those notes so issued "shall be receivable for all taxes, customs, and other public dues." By this it means that the Federal Government, while assuming greater obligations and greater burdens, is deprived of the only source of gold revenue which it has. In other words, while the financial burden of the Federal Government is increased, its ability to carry that burden and discharge that obligation is decreased. It surely can not be maintained that this is sound financial legislation.

In the fourth place, it is provided that while these notes of the Federal reserve banks shall be redeemable "in gold on demand at the Treasury Department of the United States in the city of Washington, D. C.," that they may be redeemed "in gold or lawful money" at any Federal reserve bank. Why this distinction? If the notes are to be made redeemable in gold at the hands of the Government of the United States, why should not the Federal reserve banks, for whose benefit and profit the notes are to be issued, at the same time be required to redeem their obligations in gold? But they are given the special privilege of redeeming their notes in "gold or in lawful money." It seems to me, Mr. Speaker, that these four objections lodged against section 16 are insuperable. If we enact such legislation as is provided in this section, we are flying in the face of all the facts of the financial history of this country and of the rest of the civil-

Early in the discussion of this measure we heard much about the important provisions that were to be inserted in it for the benefit of the farmers of the country. In other words, a system of farm loans and cooperative credits was to be installed. And yet we find that the body at the other end of the Capitol has stricken out the provisions in the House bill relative to savings department by national banks, and although section 24 has been inserted, giving authority to such banks to make farm loans for a period of five years, the section is couched in such terms that when considered in connection with other provisions of the pro-posed law it is very doubtful whether the farmer will receive any benefits whatever, notwithstanding the much-heralded accommodation which was to be extended to him through the mediumship of farm loans.

This bill accomplishes practically nothing for the benefit of the farmers and the laborers, the real producers of the country, but is framed in the interest of the special few. It certainly can not be claimed that the slight problematical and merely speculative benefits which may accrue to the masses of the people will be a sufficient recompense for the immense burden which they must assume in becoming responsible for the redemption of all this paper money which is to be issued at the discretion of the Federal reserve board. It is the same old story. When the tariff bill was pending we were told that the farmer and producer were to be benefited, and yet, as a matter of fact, when the legislation was finally enacted it appeared that substantially everything which the farmer produced was put upon the free list or else the rates were greatly reduced, put upon the free list or else the rates were greatly reduced, and yet he was still required to buy in a market that in some instances was highly protected. The laborer, who was to enjoy immense benefits under this tariff legislation, finds himself thrown out of work, his hours of labor greatly reduced, or his wages cut down. So in this proposed legislation, which was widely heralded as a panacea for the real or fancied industrial and financial evils of the Republic, it appears that the farmers and wage earners of the country receive practically no benefit from it and vot at the same time they are compelled to bear from it, and yet at the same time they are compelled to bear the towering burden of becoming responsible for the redemption of this great volume of notes to be issued by the Federal reserve board to the Federal reserve banks for the benefit of those

Mr. Speaker, this debate seems to have been seized upon as an oportunity for gentlemen to explain their position who have been reported in the press as stating heretofore that they would vote against this bill. The gentleman from South Carolina and the gentleman from Kansas [Mr. NEELEY] were reported in the newspapers as being loud in their pronouncement they would never support such legislation as is indicated in this measure

Mr. NEELEY of Kansas. Mr. Speaker

The SPEAKER. Does the gentleman from Ohio yield? Mr. WILLIS. I regret that I have not time to yield to my

Mr. NEELEY of Kansas. That is a misstatement.
Mr. WILLIS. And now we come to the final stage, and those gentlemen crawl in under the flap of the tent and propose to support this bill. I shall not support this bill, Mr. Speaker, because it represents a rejuvenation and a revivification of the ideas of inflation and unsound finance that were shot to death in the campaign of 1896. [Applause on the Republican side.] am further opposed to this bill, Mr. Speaker, not only because there rests in it the possibility of dangerous inflation, but also for another reason I have not time fully to discuss, and that is because it illustrates the policy of the party in power to strike down and stab to death the nonpartisan civil service of this

I have already called attention to the fact that the Federal reserve board is a political organization, all seven of its members, so far as this legislation is concerned, being of the same political party, the board not being a fair bipartisan one, as was provided in the bill as it passed the House, requiring that not more than two of the members should be of the same political party. In order that there may be no question upon this point I quote the following from section 11 of the original House bill:

Of the four members thus appointed by the President not more than two shall be of the same political party, and at least one of whom shall be a person experienced in banking.

This salutary provision is stricken out in the pending bill, and section 10 provides, in part, as follows:

Sec. 10. A Federal reserve board is hereby created, which shall consist of seven members, including the Secretary of the Treasury and the Comptroller of the Currency, who shall be members ex officio, and five members appointed by the President of the United States, by and with the advice and consent of the Senate.

From this it can be clearly seen that, so far as the pending bill is concerned, the Federal reserve board is to be a partisan organization, and when it is considered that this board has the financial destiny of the Republic in its hands it can readily be seen how questionable is the wisdom of reposing such vast authority, without limitation, in the hands of a board all of whose members may be of one political faith. It is uureasonable and unfair, and, in my judgment, when the people understand it

they will not approve it.

If there is any place in the Government service where the governmental employees ought to be under civil-service rules, it surely would be in the case of employees who are conducting a great banking enterprise such as is proposed in this bill. The great banking enterprise such as is proposed in this bill. The thing which ought to count in the public service is efficiency, not political opinion. Yet it will be seen by referring to the fifth paragraph of section 4, which states the powers of the Federal reserve bank, that it has full authority to appoint employees without any regard whatever to civil-service requirements. So far as this proposed legislation provides, there need be no examination-appointments can be made solely because of political preference. Furthermore, the Federal reserve banks have complete authority to dismiss at pleasure any of their employees. The paragraph to which I have referred is as follows:

Fifth. To appoint by its board of directors such officers and employees * * as are not otherwise provided for in this act, to define their duties, require bonds of them and fix the penalty thereof, and to dismiss at pleasure such officers or employees.

But if such power is unwise, undesirable, and dangerous in the management of the affairs of Federal reserve banks, it surely is much more unwise and much more dangerous when given and exercised as a power of the great Federal reserve Subsection (m) of section 12 in the original print or subsection (1) in the present bill is as follows:

Subsection (1) in the present bill is as follows:

Subsec. (1). To employ such attorneys, experts, assistants. clerks, or other employees as may be deemed necessary to conduct the business of the board. All salaries and fees shall be fixed in advance by said board and shall be paid in the same manner as the salaries of the members of said board. All such attorneys, experts, assistants, clerks, and other employees shall be appointed without regard to the provisions of the act of January 16, 1883 (vol. 22, U. S. Stat. L., p. 403), and amendments thereto, or any rule or regulation made in pursuance

From this it will be seen that all the immense force of clerks and employees under the control of the Federal reserve board are to be appointed and removed absolutely without reference to merit. Why should not these employees be under the civil service? Why should these positions be parceled out as prizes to hungry office seekers? Why in this great financial institution should not all the employees be under the protecting arm of the civil service? There can be no satisfactory answer to these questions. The fact is, as illustrated by this legislation, as by other legislation recently had, that the purpose of the present administration seems to be to destroy the competitive civil-service system so far as possible. Even in the collection of the income tax, where special skill would be required, and where, if any place, the rules of the civil service ought to apply, yet there, even, appointments are to be made as reward for political services. The provisions of this original section (m) have excited much comment in the country, and as expressing the attitude of thoughtful, patriotic men who are giving attention to the subject of nonpartisan civil service I insert here a letter from the National Civil Service Reform League:

NATIONAL CIVIL SERVICE REFORM LEAGUE, New York, December 20, 1913.

To the Members of the House of Representatives:

To the Members of the House of Representatives:

On behalf of the National Civil Service Reform League, I earnestly urge that paragraph M of section 11 of the pending currency bill be eliminated.

This is the section which provides that all employees of the Federal reserve board be appointed without complying with the requirements of the civil-service law. It is true that this plan was modified by an amendment that it shall not prevent the President from placing such employees in the classified service. It is sufficient to say as to this that its effect is deceptive. According to the earlier provisions of paragraph M, appointments must be made without regard to the civil-service law or any rule or regulation under it, so that the mere inclusion of the employees in the classified service may be quite ineffective.

The facts are that the Senate, by an eleventh-hour amendment, has attempted to deprive the President of authority to order that the employees of the board shall be appointed through examination. These subordinate places are all to be treated, initially at least, as unclassified offices. The effect is only to subject the administration of the new act to the most serious menace possible, namely, the influences of partisan politics in the entire organization of the subordinates of the board. It will be impossible to keep these influences out if the places are in the unclassified service. Everyone knows this to be true. The adoption of the amendment, in other words, will expose the new currency and banking system of the country to the corrupting and extravagant influences of the spoils system. Nothing could be more surely fatal to the success of the spoils system. Nothing could be more surely fatal to the success of the spoils system than this, as the history of the old United States Bank clearly shows.

For the great majority, if not, in fact, for all, of the places not the slightest difficulty will be encountered in securing efficient men of prac-

tical experience without political ties and obligations through examinations conducted by the Civil Service Commission, with the aid of the experts which it can employ. If any exceptions are necessary, it would be within the President's power to make such exceptions by Executive order under the civil service law. This power to classify offices or put them in the unclassified service should be left to the President, as has been the practice under the civil service law for 30 years.

For these reasons the league therefore urges that if an opportunity is given you register your opposition to this dangerous provision and vote against its adoption by the House.

Respectfully, yours,

Respectfully, yours,

Respectfully.

ROBERT W. BELCHER, Secretary.

These prominent citizens who sent this letter understand, and the country generally will soon understand, that legislation of this character will undermine and finally destroy the merit system and bring about a return of the times when "to the victor belong the spoils."

If you note it, gentlemen, in this bill all the employees proposed to be appointed are to be appointed not upon merit as shown by examination under civil-service rules, but for political reasons. I am opposed to such legislation and shall vote against this bill. [Applause on the Republican side.]

Mr. HAYES. Mr. Speaker, I ask the gentleman from Virginia [Mr. Glass] if he is going to close with one speech? I have but one more speaker.

Mr. GLASS. Mr. Speaker, I yield five minutes to my col-

league from New York [Mr. FITZGERALD].

The SPEAKER. The gentleman from New York [Mr. Fitz-

GERALD] is recognized for five minutes. [Applause.]

Mr. FITZGERALD. Mr. Speaker, I join with many upon both sides of the House in congratulating the members of the Committee on Banking and Currency upon the happy ending of their labors. I share with many of those gentlemen who find it possible to support this bill the pleasure they enjoy, because, in their opinion, it takes from the community which I represent the possibility of accumulating moneys there for purely

sent the possibility of accumulating moneys there for purely speculative and reckless gambling purposes.

The great metropolis of this country is represented in this House by 22 Members of Congress. Twenty of them are Democrats, one a Republican, and one a member of the Progressive Party. It is a community of nearly 5,000,000 people. Sixty-five per cent of our imports come through its port. A large percentage of the commodities going from this country pass through its port. That metropolis has an annual budget of almost \$200,000,000. It has a funded debt of \$300,000,000,

greater than the public debt of the United States.

Its manufactures exceed the manufactures of the New England States, and recent statistics of the Bureau of the Census disclose that the increase alone in manufactures during the past five year in the city of New York exceed the total manufactures of the city of Philadelphia five years ago. Its building operations aggregate \$200,000,000 annually. It is the great financial and commercial center of the New World, and it nec-It is the great essarily requires and demands a very great amount of capital for the legitimate trade and business that is there carried on. Speculative moneys have undoubtedly been used in the city of New York, and pyramiding has taken place. If reserves which should have been retained in . ther portions of the country have been sent there and enabled such speculative transactions to have been indulged in, it has not been entirely the fault of the banking interests of the city of New York, but such conditions are due just as much to the men controlling banking throughout the United States, who found it profitable to send their reserves to New York for investment, practically as call loans, and to receive 2 per cent interest on such money, knowing all the time that it could only be used for call loans in the speculative market. Whatever benefits the commerce and the business of the entire country naturally benefits and helps our great community; whatever is an injury to legitimate enterprise and business and commerce in the United States, injures and hurts the commerce and prosperity of the great financial metropolis of the country.

The 20 Democratic Representatives from the city of New York and the 33 Democratic Representatives from the entire State of New York join with the rest of their Democratic brethren in rejoicing and congratulation that, after years of effort, after years of helplessness and inability on the part of others, it has been the privilege of the Democratic Party, under the lead of a great Democratic President, to enact a banking and currency bill that not only meets universal commendation from members of our own party, that not only has the approval of the business and financial interests of the United States, but is welcomed and acclaimed by the spokesmen of the Progressive Party and by the more intelligent members of the Republican

Party. [Loud applause on the Democratic side.]
The SPEAKER. The time of the gentleman from New York [Mr. FITZGERALD] has expired.

Mr. HAYES. Mr. Speaker, I now-yield the balance of my time to the gentleman from Illinois [Mr. Mann]. [Applause.] The SPEAKER. The gentleman from Illinois [Mr. Mann] is

recognized for four minutes.

Mr. MANN. Mr. Speaker, I know how distasteful it is to the other side of the House to have the truth told at this time. [Laughter on the Democratic side.] We have now had Democratic control in the country for a little more than nine months. That control has already cast its malign influence over two great countries. Mexico-[Laughter on the Democratic side.]

The SPEAKER. The House will be in order.

Mr. MANN. Mexico lies prostrate and bleeding, and the only response which it receives is laughter on the Democratic side of the House. America lies prostrate, its men out of employment, its factories closed, its industries without orders, its stocks depreciated, its money boarded, with men everywhere seeking employment, and millions of them out of employment now. And what do you offer? You offer the same thing which has always been offered in every case of hard times. You propose to revive business by inflating the currency, with no method provided for the redemption of the notes issued except voluntarily. There never has been a time in the history of our country when hard times struck the country that you people did not propose an inflation of the currency.

We said when you passed the tariff bill that talk would not determine its results. We left it to the proof. You now, in mad haste to inflate the currency, admit the bad results which come from your tariff bill, and the only man in the House who has not heard of the conditions in the country is the distinguished Speaker of the House. [Laughter on the Republican side.]

Talk here will not affect the result. After passing one bill, which has failed, you now stake your chances on reviving the industries of the country through the inflation of its currency. That scheme in the history of the world has never proven successful, and the rule will not be varied now.

We accept the challenge of the gentleman from Alabama [Mr. UNDERWOOD] and will note the result in the November elections, when this side of the House will again have an unwieldy ma-[Applause on the Republican side.]

The SPEAKER. The gentleman from Virginia [Mr. Glass] has three minutes left.

Mr. GLASS. Mr. Speaker, in the three minutes remaining of this discussion I want to make a reference to the charge that this currency bill embodies dangerous inflation, and to remark that it comes with exceeding ill grace from that side of the House.

When this bill was under consideration in another branch of the Congress the same charge was brought by a distinguished Republican Senator, and the amount of inflation that he figured out was \$1,800,000,000. Two days thereafter he had to admit that he had made a miscalculation of \$500,000,000 in that simple sum! [Applause on the Democratic side.] The Republican Party was committed to the Aldrich scheme of currency revision. but intelligent, practical bankers exposed the fact that it embraced possibilities of inflation amounting to \$6,000,000,000! [Applause on the Democratic side.] Then we were treated just now to the one-minute gush of the Wyoming geyser. [Laughter on the Democratic side.] He is still "harping on my daughter," and talking about "caucus rule," and the exclusion of the Republican conferees, forgetting the fact that when the Vreeland-Aldrich bill was passed by a Republican Congress the Democratic conferees were excluded. I remember that fact distinctly. because I was one of them. I was not admitted to the room until Senator Aldrich on the one side and Representative Vreeland on the other had completed the draft of the bill. Then I was asked in and had it handed over to me. [Laughter on the Democratic side. l

Then, again, they talk about the political aspects of the proposition-political appointees on the board-when, as a matter of fact, the only measure proposed by Republican Senators as a substitute for this measure contemplated turning the entire reserve-banking business of the country over to politics. [Applause on the Democratic side.]

The SPEAKER. The time of the gentleman from Virginia

has expired. All time has expired, and the question is on agree-

ing to the conference report.

Mr. GLASS. Mr. Speaker, I ask for the yeas and nays.

The SPEAKER. The gentleman from Virginia [Mr. GLASS]
demands the yeas and nays. Those in favor of taking the vote by yeas and nays will rise and stand until they are counted. [After counting.] Evidently a sufficient number have arisen, and the Clerk will call the roll. Those in favor of agreeing to the conference report will answer "yea"; those opposed will answer "nay." and there were-yeas 298, nays 60,

Mr. HAMMOND with Mr. FORDNEY. Mr. HELM with Mr. Fess.

Mr. Hoxworth with Mr. Hughes of West Virginia. Mr. Jones with Mr. J. R. Knowland. Mr. Moss of Indiana with Mr. Kreider. Mr. Peterson with Mr. Mott.

Mr. SHACKLEFORD with Mr. PORTER.
Mr. SMITH of New York with Mr. Roberts of Nevada.
Mr. STRINGER with Mr. SELLS.
The SPEAKER. While the Clerk is figuring up the vote the Chair desires to announce that it requires a quorum to be present when the bill is signed.

Mr. MANN. Theoretically.

The SPEAKER. Theoretically, but the Chair does not want to take any chances.

Mr. MANN. I am sure that no one would raise the question. The result of the vote was then announced as above recorded. [Applause.]

On motion of Mr. GLASS, a motion to reconsider the vote whereby the conference report was agreed to was laid on the

Mr. GLASS. Mr. Speaker, I ask unanimous consent to take from the Speaker's desk concurrent resolution of the Senate No. 12, providing for the printing of the act.

The SPEAKER. The gentleman from Virginia asks unanimous consent for the present consideration of Senate resolution 12, which the Clerk will report.

The Clerk read as follows:

Senate concurrent resolution 12.

Resolved by the Senate (the House of Representatives concurring), That there be printed for the use of Congress 80,000 copies of the Federal reserve act in pamphlet form, to be apportioned as follows: Thirty-five thousand copies for the use of the House of Representatives, 20,000 copies for the use of the Senate, 5,000 copies for the use of the Committee on Banking and Currency of the Senate, 5,000 copies for the

use of the Committee on Banking and Currency of the House, 5,000 copies for the use of the document room of the Senate, and 10,000 copies for the use of the document room of the House.

The SPEAKER. Is there objection to the present considera-on of this resolution? [After a pause.] The Chair hears tion of this resolution? [After a pause.] The Ch none. The question is on concurring in the resolution.

Mr. MANN. Mr. Speaker, I notice that the resolution provides for 80,000 copies—35,000 for the use of the House and 20,000 for the use of the Senate. In all these resolutions it is customary, and I think entirely proper, to give the House twice as many copies as is given to the Senate. I suggest to the gentleman from Virginia that he have the resolution amended so as to make it 85,000 copies, of which 40,000 copies shall be for the use of the House instead of 35,000 copies

Mr. GLASS. Mr. Speaker, I move that that amendment be

incorporated in the resolution,

The SPEAKER. The gentleman from Virginia moves to amend the resolution by making the whole number 85,000 copies, of which 40,000 shall be for the use of the House.

The amendment was agreed to.

The concurrent resolution as amended was agreed to.

CHANGE OF REFERENCE.

By unanimous consent, the Committee on Appropriations was discharged from further consideration of the bill (H. R. 10405) to promote the erection of a memorial in conjunction with the celebration of the centenary of the Battle of Plattsburg during the year 1914, in commemoration of the one hundredth anniversary of McDonough's victory in the naval battle fought in the War of 1812, the last naval engagement between English-speaking people, and the same was referred to the Committee on the Library.

HOUR OF MEETING TO-MORROW.

Mr. UNDERWOOD. Mr. Speaker, I ask unanimous consent that when the House adjourns to-day it adjourn to meet at 2.30 o'clock to-morrow afternoon.

Mr. FITZGERALD. Why not come in at the usual hour?

We want to finish the District bill.

Mr. MANN. I hope the gentleman from New York will not object to that. We can not finish the District bill to-morrow. Members will be getting ready to go home to-morrow, and it will be impossible to finish it. I do not think that we will make any progress by meeting at 12 o'clock.

Mr. UNDERWOOD. Mr. Speaker, I renew my request.

The SPEAKER. The gentleman from Alabama asks unanimous consent that when the House adjourns to-day it adjourn to meet at 2.30 p. m. to-morrow. Is there objection?

There was no objection.

ADJOURNMENT OVER THE HOLIDAYS.

Mr. UNDERWOOD. Mr. Speaker, I desire to move the adoption of the privileged resolution which I send to the Clerk's

The Clerk read as follows:

House concurrent resolution 26,

Resolved, That when the two Houses adjourn December 23, 1913, they stand adjourned until 12 o'clock meridian on Monday, January 12, 1914.

Mr. MANN. Mr. Speaker, I think that the date for the reassembling of Congress would be altogether too late, except for one thing. I think we can afford, under the circumstances, to take this long adjournment in order to give the President a chance to get a rest, which I think he needs.

The SPEAKER. The question is on agreeing to the concur-I think we can afford, under the circumstances, to

rent resolution.

The concurrent resolution was agreed to.

THE LATE REPRESENTATIVE PEPPER.

Mr. HAUGEN. Mr. Speaker, I have the solemn duty to announce to the House the death this morning of Mr. I. S. PEPPER, a Member of the House of Representatives from the State of Iowa. Thus ends the life of a worthy young man, with years of useful, patriotic service, and universally loved and respected. At some future time I shall ask that a day be set aside that proper respect may be paid to his memory.

I now offer the following resolutions, which I send to the desk and ask to have read.

The Clerk read as follows:

House resolution 359.

House resolution 359.

Resolved, That the House has heard with profound sorrow of the death of Hon. I. S. PEFFER, a Representative from the State of Iowa; Resolved, That a committee of 18 Members of the House, with such Members of the Senate as may be joined, be appointed to attend the funeral;

Resolved, That the Sergeant at Arms of the House be authorized and directed to take such steps as may be necessary for carrying out the provisions of these resolutions, and that the necessary expenses in connection therewith be paid out of the contingent fund of the House;

Resolved, That the Clerk communicate these resolutions to the Senate and transmit a copy thereof to the family of the deceased.

The SPEAKER. The question is on agreeing to the resolutions

The resolutions were agreed to.

The Chair announced the following committee: Messrs, Con-NOLLY OF IOWA, KIRKPATRICK, LLOYD, DOOLITTLE, ASHBROOK, TAVENNER, RUSSELL, LOBECK, THOMAS, BUCHANAN OF Illinois, HAUGEN, KENNEDY of Iowa, Good, PROUTY, TOWNER, WOODS, SLOAN, and SLEMP

The Clerk read as follows:

Resolved. That as a further mark of respect this House do now

The SPEAKER. The question is on agreeing to the resolu-

The resolution was agreed to; and accordingly (at 10 o'clock and 59 minutes p. m.) the House adjourned until to-morrow, Tuesday, December 23, 1913, at 2 o'clock and 30 minutes p. m.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the several calendars therein named, as follows:

Mr. WEBB, from the Committee on the Judiciary, to which was referred the bill (H. R. 6143) relating to the maintenance of actions for death on the high seas and other navigable waters, reported the same with amendment, accompanied by a report (No. 160), which said bill and report were referred to the House Calendar.

Mr. CLAYTON, from the Committee on the Judiciary, to which was referred the bill (H. R. 4545) to amend an act entitled "An act to codify, revise, and amend the laws relating to the judiciary," approved March 3, 1911, reported the same without amendment, accompanied by a report (No. 162), which said bill and report were referred to the House Calendar.

Mr. FERRIS, from the Committee on the Public Lands, to which was referred the bill (H. R. 10258) authorizing the Secretary of the Interior to sell to the city of Lawton, Okla., a tract of land to be used for watershed and water-supply purposes, reported the same with amendment, accompanied by a report (No. 159), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. RAKER, from the Committee on the Public Lands, to which was referred the bill (H. R. 11006) authorizing the disposal of a portion of the Fort Bidwell Indian School, Cal., reported the same without amendment, accompanied by a report (No. 161), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

CHANGE OF REFERENCE.

Under clause 2 of Rule XXII, the Committee on Invalid Pensions was discharged from the consideration of the bill (H. R. 5866) granting a pension to Henry P. Niebuhr, and the same was referred to the Committee on Pensions.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. HAMILTON of Michigan: A bill (H. R. 11169) providing for the erection of a public building at the city of St. Joseph, Mich.; to the Committee on Public Buildings and Grounds.

By Mr. HOWARD: A bill (H. R. 11170) to divest the shipment of garden, agricultural, grass, and other seeds used in agricultural or horicultural pursuits of their interstate character, and to provide penalty for adulteration, misbranding, or fraud in the sale thereof; to the Committee on Agriculture.

By Mr. STEPHENS of Texas: A bill (H. R. 11171) to authorize and empower the Secretary of the Interior to grant rights of way, permits, or licenses, across or on Indian reservations, Indian lands, and Indian allotments, and for other purposes;

to the Committee on Indian Affairs.

By Mr. HUMPHREY of Washington: A bill (H. R. 11172) making an appropriation for aids to navigation in Alaska; to

the Committee on Appropriations.

By Mr. GOULDEN: A bill (H. R. 11173) to appropriate \$500,000 for the improvement of East River, New York Harbor, and for the removal of certain ledges and shoals in said harbor; to the Committee on Rivers and Harbors.

By Mr. LINTHICUM: A bill (H. R. 11174) providing for the appropriation of a sum of money for the erection at Fort McHenry of a monument and flagstaff to Francis Scott Key and a memorial hall to the defenders of the Nation in the War of 1812, and the erection of a monument upon the North Point battle field, and for the necessary alterations in the buildings and grounds in connection therewith; to the Committee on the Library.

By Mr. TALCOTT of New York: A bill (H. R. 11175) to amend section 1754 of the Revised Statutes of the United States; to the Committee on Reform in the Civil Service.

By Mr. BELL of Georgia: A bill (H. R. 11176) authorizing and directing the Secretary of Agriculture to conduct experiments in the cultivation of apple trees and apples and to establish an experiment station at Cornelia, Habersham County, Ga.; to the Committee on Agriculture.

By Mr. FRENCH: A bill (H. R. 11177) providing for the improvement of the Clarks Fork River in Idaho; to the Com-

mittee on Rivers and Harbors.

By Mr. RAKER: A bill (H. R. 11178) to establish a standard box for apples, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. LOGUE: A bill (H. R. 11179) authorizing the Secretary of State to extend invitation to foreign countries to send delegates to the Fourth International Congress on Home Education; to the Committee on Foreign Affairs.

By Mr. GOODWIN of Arkansas: A bill (H. R. 11281) providing for the purchase or construction of vessels for saving life and property on the Mississippi and Ohio Rivers and their tributaries during flood times; to the Committee on Interstate and Foreign Commerce.

By Mr. SAUNDERS: A bill (H. R. 11232) to erect a statue of Maj. George Waller at Martinsville, Henry County, Va.; to

the Committee on the Library.

By Mr. HARDY: A bill (H. R. 11233) to provide for the purchase of a site and erection of a public building at Teague, Tex.; to the Committee on Public Buildings and Grounds.

By Mr. GARNER: Resolution (H. Res. 357) authorizing the appointment of an additional telephone operator; to the Com-

mittee on Accounts.

By Mr. PROUTY: Resolution (H. Res. 358) providing for an investigation of the truth of an article published in the Washington Times under date of December 20, 1913, relating to an alleged "Nation-wide fight on Crisp bill backers"; to the Committee on Rules.

By Mr. SABATH: Joint resolution (H. J. Res. 180) for the appointment of a committee to investigate the various systems of old-age pensions and annuities; to the Committee on Rules.

By Mr. HAY: Joint resolution (H. J. Res. 181) authorizing the loan of tents and camp equipage to military colleges and schools; to the Committee on Military Affairs.

By Mr. PARK: Joint resolution (H. J. Res. 182) proposing an

amendment to the Constitution of the United States; to the Committee on the Judiciary.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. AINEY: A bill (H. R. 11180) granting a pension to John Cary; to the Committee on Invalid Pensions.

By Mr. BROWNE of Wisconsin: A bill (H. R. 11181) granting an increase of pension to Warren Shingler; to the Committee on Invalid Pensions.

By Mr. BROWNING: A bill (H. R. 11182) to correct the military record of John H. Hoagland; to the Committee on

Military Affairs.

By Mr. BURKE of South Dakota: A bill (H. R. 11183) granting an increase of pension to William H. Mather; to the Committee on Invalid Pensions,

By Mr. BURNETT: A bill (H. R. 11184) granting a pension to Nancy Bates; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11185) granting a pension to Thomas D. Smith; to the Committee on Pensions.

Also, a bill (H. R. 11186) granting an increase of pension to G. T. Kennamer; to the Committee on Invalid Pensions.

By Mr. CANTRILL: A bill (H. R. 11187) granting a pension

By Mr. CANTRILE: A bill (H. R. 11187) granting a pension to Louis G. Hatton; to the Committee on Pensions.

By Mr. CARY: A bill (H. R. 11188) granting a pension to William Clark; to the Committee on Pensions.

By Mr. CLANCY: A bill (H. R. 11189) for the relief of Liston H. Pearce; to the Committee on Military Affairs.

By Mr. CLARK of Missouri: A bill (H. R. 11190) granting an increase of pension to Robert N. Scott; to the Committee on Invalid Pensions,

By Mr. CLAYPOOL: A bill (H. R. 11191) granting a pension to Sarah Catharine Williams; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11192) granting an increase of pension to John H. Shepherd; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11193) granting a pension to Louisa C. Younkers; to the Committee on Invalid Pensions.

By Mr. CULLOP: A bill (H. R. 11194) granting an increase of pension to Elias Lloyd; to the Committee on Invalid Pen-

By Mr. DAVENPORT: A bill (H. R. 11195) granting an increase of pension to William Galke; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11196) granting an increase of pension to Nelson S. Russell; to the Committee on Invalid Pensions.

By Mr. DOOLITTLE: A bill (H. R. 11197) for the relief of William Grimsley; to the Committee on Military Affairs.

By Mr. EAGAN: A bill (H. R. 11198) granting a pension to

Ellen King; to the Committee on Invalid Pensions.

By Mr. FERRIS: A bill (H. R. 11199) for the relief of Joe T. White; to the Committee on Claims.

By Mr. FIELDS: A bill (H. R. 11200) granting an increase

of pension to Malinda J. Lytle; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11201) granting an increase of pension to George W. Rudy; to the Committee on Invalid Pensions.

By Mr. HAMILL: A bill (H. R. 11202) granting a pension to Christiana E. Higgins; to the Committee on Invalid Pensions. Also, a bill (H. R. 11203) granting a pension to Bridget Mal-

ley; to the Committee on Pensions. Also, a bill (H. R. 11204) granting an increase of pension to

Patrick O'Donohue; to the Committee on Invalid Pensions. By Mr. KREIDER: A bill (H. R. 11205) granting a pension to Emma E. Kipple; to the Committee on Invalid Pensions.

By Mr. LANGLEY: A bill (H. R. 11206) granting an increase of pension to Spurlock Adkins; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11207) granting an increase of pension to William H. Swords; to the Committee on Invalid Pensions.

By Mr. MONTAGUE: A bill (H. R. 11208) for relief of the legal representatives of Jacob S. Atlee, deceased; to the Committee on War Claims,
By Mr. MOORE: A bill (H. R. 11209) granting a pension to

Eugene F. Clements; to the Committee on Pensions.

By Mr. MORRISON: A bill (H. R. 11210) granting an increase of pension to Ellis H. Scott; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11211) granting a pension to Adelia Chad-

rick; to the Committee on Invalid Pensions.

By Mr. MOSS of West Virginia: A bill (H. R. 11212) granting an increase of pension to Emma P. Feldner; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11213) granting an increase of pension to Mahala Stevens; to the Committee on Invalid Pensions.

By Mr. MURRAY of Massachusetts; A bill (H. R. 11214) to remove the charge of desertion from the record of Philip Mc-Laughlin; to the Committee on Military Affairs.

By Mr. O'HAIR: A bill (H. R. 11215) granting a pension to James Phillips; to the Committee on Invalid Pensions.

By Mr. OLDFIELD: A bill (H. R. 11216) granting a pension to Luther Butler Austin; to the Committee on Pensions.

By Mr. RAKER: A bill (H. R. 11217) for the relief of Andrew M. Dunlop; to the Committee on Claims.

By Mr. ROTHERMEL: A bill (H. R. 11218) for the relief of the Doremus Machine Co.; to the Committee on Claims.

By Mr. ROUSE: A bill (H. R. 11219) granting a pension to William R. Leonard; to the Committee on Pensions.

By Mr. RUSSELL: A bill (H. R. 11220) granting an increase of pension to Christopher S. Alvord; to the Committee on Inva-

Also, a bill (H. R. 11221) granting an increase of pension to

John Lynn; to the Committee on Invalid Pensions. By Mr. STAFFORD: A bill (H. R. 11222) granting a pension to Anna M. Fox; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11223) granting a pension to Elizabeth Putzear; to the Committee on Pensions.

By Mr. STEPHENS of California: A bill (H. R. 11224) granting an increase of pension to Llewellyn A. Cole; to the Committee on Pensions.

By Mr. STEPHENS of Mississippi: A bill (H. R. 11225) granting a pension to Rosa Carter; to the Committee on Pen-

By Mr. TEN EYCK: A bill (H. R. 11226) for the relief of John P. Vander Volgen; to the Committee on Military Affairs.

Also, a bill (H. R. 11227) granting a pension to Elizabeth S. Atkins; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11228) granting an increase of pension to Merritt D. En Earl; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11229) granting an increase of pension to Phineas Barnum; to the Committee on Invalid Pensions.

Also, a bill (H. R. 11230) granting an increase of pension to Frederick Baker; to the Committee on Invalid Pensions.

By Mr. BEALL of Texas: A bill (H. R. 11234) for the relief of the estate of Nathan Renwick, deceased; to the Committee on War Claims.

By Mr. DICKINSON: A bill (H. R. 11235) granting a pension to Carrie Powell; to the Committee on Invalid Pensions.

By Mr. DIXON: A bill (H. R. 11236) granting an increase

By Mr. DIXON: A bill (H. R. 11236) granting an increase of pension to William N. Barnett; to the Committee on Invalid Pensions.

By Mr. HARDY; A bill (H. R. 11237) for the retirement of James C. Gunn, first lieutenant, Philippine Scouts; to the Committee on Military Affairs.

mittee on Military Affairs.

By Mr. RUBEY: A bill (H. R. 11238) granting a pension to Matilda Proe; to the Committee on Invalid Pensions.

By Mr. RUCKER: A bill (H. R. 11239) granting a pension to Sarah Irene McClelland; to the Committee on Invalid Pensions.

By Mr. TAVENNER: A bill (H. R. 11240) granting a pension to Harriett A. Turnbull; to the Committee on Pensions.

By Mr. THOMSON of Illinois: A bill (H. R. 11241) authorizing the Secretary of War to give A. R. Paton the grade of second lieutenant of Infantry; to the Committee on Military Affairs.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By the SPEAKER (by request): Petition of employees on the ships of the Clyde and Mallory Cos., protesting against the passage of the seamen's bill in its present form; to the Committee on the Merchant Marine and Fisheries.

By Mr. BOWDLE: Petition of the National Housewives' Cooperative League of Cincinnati, Ohio, favoring the passage of legislation to control the distribution of beef, butter, eggs, etc., imported under the new tariff law; to the Committee on Ways and Means.

By Mr. CANDLER of Mississippi: Petitions of citizens of the first congressional district of Mississippi, favoring the passage of the Lindquist pure-fabric law; to the Committee on Interstate and Foreign Commerce.

By Mr. CLANCY: Petition of business men of Cazenevia, Brewerton, Skaneateles, Marcellus, Cortland, Homer, Baldwinsville, Tuily, New Woodstock, De Ruyter, Marathon, McGraw, Fayetteville, Manlius, and Truxton, all in the State of New York, in support of the bill (H. R. 5308) to provide for a tax upon all persons, firms, or corporations engaged in interstate mall-order business, and for other purposes; to the Committee on Ways and Means.

By Mr. DALE: Petition of the National Civil Service Reform League, protesting against paragraph M, section 11, of the currency bill, relative to the employees of the Federal reserve board; to the Committee on Banking and Currency.

Also, petition of G. L. Lerch, of Buffalo, N. Y., favoring the passage of House bill 1872, relative to placing on the pension roll the survivors of the early Indian wars; to the Committee on Ways and Means.

Also, petition of the Woman's Christian Temperance Union of the State of New York, favoring the passage of House joint resolution 168, proposing an amendment to the Constitution of the United States relative to sale, etc., of intoxicating liquors; to the Committee on the Judiciary.

By Mr. EAGAN: Petition of Mr. William Shippen, of Hoboken, N. J., and John E. Moore Co., of New York City, protesting against the passage of the seamen's bill in its present form; to the Committee on the Merchant Marine and Fisherics.

the Committee on the Merchant Marine and Fisheries.

By Mr. EDWARDS: Petition of the Philadelphia Board of Trade, protesting against the passage of the seamen's bill; to the Committee on the Merchant Marine and Fisheries.

By Mr. FARR: Petition of Pennsylvania Association Opposed to Woman Suffrage, Philadelphia, Pa., protesting against the passage of legislation to appoint a congressional committee on woman suffrage; to the Committee on the Judiciary.

Also, petition of the Employers' Association of the Philadelphia Navy Yard and the Greater Philadelphia League, both favoring the passage of legislation to establish a new dry dock at Philadelphia, Ph.: to the Committee on Naval Affairs

at Philadelphia, Pa.; to the Committee on Naval Affairs.

By Mr. FRANCIS: Petition of the National Rural Letter Carriers, at Evansville, Ind., favoring the passage of legislation for Federal and State maintenance of post roads and other legislation; to the Committee on the Post Office and Past Roads.

Federal and State maintenance of post roads and other legislation; to the Committee on the Post Office and Post Roads. By Mr. GALLAGHER: Petition of Amalgamated Sheet Metal Workers' Union, of Chicago, Ill., favoring the passage of the

seamen's bill; to the Committee on the Merchant Marine and Fisheries,

By Mr. GARNER; Petition of the Port Lavaco Commercial Club, of Port Lavaco, Tex., favoring an appropriation for the improvement of the Navidad and Lavaco Rivers; to the Committee on Rivers and Harbors.

Also, petitions of sundry citizens of the State of Texas, favoring the passage of House bill 5308, relative to mail-order houses; to the Committee on Ways and Means.

By Mr. GILMORE: Memorial of the Dedham Board of Selectmen, of Dedham, Mass., favoring the Boston Navy Yard for the building of a supply ship for increase of the Navy; to the Committee on Naval Affairs.

By Mr. GRIEST: Petition of citizens of the ninth Pennsylvania congressional district, favoring the passage of legislation establishing an old-age pension system; to the Committee on Pensions.

By Mr. HAMILTON of New York: Petition of Dunkirk Merchants' Exchange of the city of Dunkirk, N. Y., favoring the passage of legislation for flood control of the lower Mississippi River Valley; to the Committee on Rivers and Harbors.

By Mr. LAFFERTY: Petition of citizens of the third congressional district of Oregon, favoring the passage of the Lindquist pure fabric and leather bill, providing for the labeling of all fabrics and leather goods; to the Committee on Interstate and Foreign Commerce.

Also, petition of the International Alliance of Theatrical Stage Employees of Portland, Oreg., favoring the passage of House bill 1873, relative to improving the condition of labor; to the Committee on the Judiciary.

By Mr. LONERGAN: Petition of the National Rural Letter Carriers' Association, favoring certain changes in the postal laws; to the Committee on the Post Office and Post Roads.

Also, petition of the Taylor-Atkins Paper Co., of Burnside, Conn., protesting against amending the present law to provide for a review of decisions of the United States Court of Appeals by the Supreme Court; to the Committee on the Judiciary.

by the Supreme Court; to the Committee on the Judiciary.

By Mr. MAHER: Petitions of the directors of the Washington Board of Trade, the Chamber of Commerce, and Retail Merchants' Association, protesting against any change in the half-and-fraif principle of the act of 1878; to the Committee on the District of Columbia.

Also, petition of the National German-American Alliance of the State of New York, protesting against the literacy test in the immigration bill; to the Committee on Immigration and Naturalization.

Also, petition of the Maritime Association of the Port of New York, protesting against the passage of the seamen's bill; to the Committee on the Merchant Marine and Fisheries.

By Mr. MARTIN: Petition of Blackhills District Union No. 12, favoring the passage of the McDonald and Keating resolution, relative to Colorado and Michigan investigation; to the Committee on the Judiciary.

Also, petition of citizens of Lead, S. Dak., protesting against the passage of H. R. 8814; to the Committee on the Judiciary.

By Mr. RAKER: Petition of H. J. Hammond, C. R. Behle, and A. C. Rosenberger, of Sacramento, Cal., favoring the passage of H. R. 9292, to classify the salaries of veterinary inspectors, meat inspectors, etc.: to the Committee on Agriculture.

meat inspectors, etc.; to the Committee on Agriculture.

By Mr. SABATH: Petition of Local Union No. 1, International Association of Bridge and Structural Iron Workers, of Chicago, Ill., favoring the passage of the seamen's bill; to the Committee on the Merchant Marine and Fisheries.

Also, memorial of the Chicago Peace Society, approving international agreement for the suspension of the building of battle-ships; to the Committee on Naval Affairs.

Also, petition of Cotton Belt Lodge No. 204, Brotherhood of Locomotive Firemen and Engineers, Jonesboro, Ark., favoring the passage of House bill 101, relative to electric headlights on road engines; to the Committee on Interstate and Foreign Commerce.

By Mr. SCULLY: Petitions of citizens of Atlantic Highlands, Sen Bright, Highlands, Pleasant Bay, and Red Bank, in the State of New Jersey, protesting against the passage of the seamen's bill; to the Committee on the Merchant Marine and Fisherios.

By Mr. UNDERHILL: Petitions of the directors of the Washington Board of Trade, the Chamber of Commerce, and the Retail Merchants' Association, protesting against any change in the act of 1878, especially the portion of the half-and-half system; to the Committee on the District of Columbia.

Also, petition of the National Civil Service Reform League,

Also, petition of the National Civil Service Reform League, New York, N. Y., protesting against the appointing of all the employees of the Federal reserve board without the requirements of the civil-service law; to the Committee on Banking and Currency.

SENATE.

Tuesday, December 23, 1913.

The Senate met at 10 o'clock a. m.

The Chaplain, Rev. Forrest J. Prettyman, D. D., offered the

following prayer:

Thanks be unto God for his unspeakable gifts. track of the years there lingers the sweet music of an angel song, and its blessed ministry has never died out of the human heart. It has come at this time into the lives of little children and speaks with its blessed message of hope to the heart of our common humanity. It has come with its refining influence into the Christian home. We bless God that it inspires us all to a likeness to Him, who gave Himself that we might be rich.

We bless God to-day that with the recurring seasons the message comes back to us from Thee, unfolding Thy glory, inspiring us with the ideals of the life of a perfect manhood, giving to us a spirit of helpfulness and brotherliness.

We pray that the spirit of the Christmas time may enter into the hearts of these Thy servants, inspiring, enlightening, cheering them in the discharge of all their sacred obligations.

We ask for Christ's sake. Amen,
The Journal of yesterday's proceedings was read and approved. Mr. President, I suggest the absence of a Mr. SMOOT.

The VICE PRESIDENT. The Secretary will call the roll. The Secretary called the roll, and the following Senators an-

swered to their names:

Brady Gronna Myers Shively Bristow Hollis Nelson Simmons	
Bryan James Overman Smith, S.	
Burton Johnson Owen Smoot	
Catron Jones Page Sutherlan	1
Chamberlain Kenyon Perkins Thomas	
Clapp La Follette Ransdell Thompson	
Clark, Wyo. Lane Robinson Townsend	
Dillingham Lea Shafroth Warren	
Gallinger Martin, Va. Sheppard Weeks	
Goff Martine, N. J. Sherman Works	

Mr. BRYAN. My colleague [Mr. Fletcher] is unavoidably absent. He is paired with the Senator from Wyoming [Mr. WARREN]

Mr. MARTINE of New Jersey. My colleague [Mr. Hughes]

is absent on official business.

Mr. RANSDELL. The senior Senator from Louisiana [Mr. THORNTON] is unavoidably absent. I ask that this announcement may stand for the day. He is paired with the Senator from South Dakota [Mr. Sterling].

Mr. WEEKS. I wish to state that my colleague [Mr. Lodge] is absent on account of illness. This statement may stand for

Mr. GALLINGER. I desire to announce that the junior Senator from Maine [Mr. BURLEIGH] is absent on account of

The VICE PRESIDENT. Forty-four Senators are present.

The Secretary will call the roll of absentees.

The Secretary called the names of absent Senators, and Mr. REED and Mr. SMITH of Georgia answered to their names when called.

Mr. KERN and Mr. POMERENE entered the Chamber and answered to their names

The VICE PRESIDENT. Forty-eight Senators have answered to the roll call. There is a quorum present.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by J. C. South, its Chief Clerk, announced that the House had agreed to the concurrent resolution of the Senate (S. Con. Res. 12) providing for the printing of 80,000 copies of the Federal reserve act in pamphlet form, etc., with amendments, in which it requested the concurrence of the Senate.

ENROLLED BILL SIGNED.

The message also announced that the Speaker of the House had signed the enrolled bill (H. R. 11003) to provide for expenses of representatives of the United States at the International Maritime Conference for Safety of Life at Sea, and it was thereupon signed by the Vice President.

CONFERENCE REPORT-BANKING AND CURRENCY.

The VICE PRESIDENT. In accordance with the unanimousconsent agreement, the Chair lays before the Senate the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H. R. 7837) to provide for the establishment of Federal reserve banks, for furnishing an elastic currency, affording means of rediscounting commercial paper, and to establish a more effective inquiry?

supervision of banking in the United States, and for other

Mr. GALLINGER. Mr. President, ordinarily a conference report ought to be read, but I ask unanimous consent in this case that the reading of the report be dispensed with, as it is in print.

The VICE PRESIDENT. Is there objection? The Chair hears none, and the reading of the report is dispensed with.

Mr. BRISTOW. Mr. President, the conferees who particlpated in the conference on this bill have made certain changes in the bill, some of which I think are bad.

Mr. LA FOLLETTE. Mr. President, would it disturb the Senator if I should ask him a question?
The VICE PRESIDENT. Does the Senator from Kansas

yield to the Senator from Wisconsin?

Mr. BRISTOW. I do.

Mr. LA FOLLETTE. Would it disturb the Senator to inform us who did participate in this conference and whether

any Senator declined to participate?

Mr. BRISTOW. As to those who participated in the conference I am not advised. I was a member of the committee of conference appointed by the President of the Senate, but I had no knowledge as to the meeting of the conferees until after the report as it is before us had been made, printed, and placed upon the desks of Senators. I was then notified by the chairman of the committee that there would be a meeting of the committee of conference at 4 o'clock, two hours after this report of the committee of conference of the two Houses of Congress on the bill (H. R. 7837) to provide for the establishment of Federal reserve banks, for furnishing an elastic currency, affording means of rediscounting commercial paper, and to establish a more effective supervision of banking in the United States, and for other purposes, had been placed upon my desk. I, in company with the Senator from Minnesota [Mr. Nelson]. visited the room where we were invited to appear. We found the chairman of the committee and the Democratic members of the committee of conference there, and were given to understand that they had perfected the conference report. We were then invited to express our opinion of it, but I preferred to express my opinion where it might appear in the RECORD, rather than in the privacy of the committee room, and that I shall undertake to do this morning.

I see this report is signed by the Democratic members of the committee. Of course, I did not sign it because I was not invited to sign it, and I should not have done so, anyway, for I did not know at the time the report was prepared what it contained, and I had had no opportunity of ascertaining what it

contained.

The first important change made in the bill by the conferees-and I am merely going to call attention to the important changes—is found on page 4, where an organization committee is provided for, consisting of the Secretary of the Treasury, the Secretary of Agriculture, and the Comptroller of the Currency.

Mr. TOWNSEND. Mr. President, does the Senator from Kansas know whether the bill which is now on our desks is the

report of the conference committee?

Mr. BRISTOW. I suppose it is. Document No. 335 says: "As agreed to in conference" and "as passed by the House." That is exactly the same document and the same number as the one which was laid on our desks yesterday afternoon.

Mr. GALLINGER. Will the Senator permit me? Mr. TOWNSEND. I want to finish my ques

I want to finish my question, if the Senator from New Hampshire will permit.

Mr. GALLINGER. Very well. Mr. TOWNSEND. I want to ask the Senator from Oklahoma whether this large document here [exhibiting] contains the correct report of the conferees?

Mr. OWEN. There is a second print marked on the "Comparative print," which contains the last changes made by the conferees and agreed to. I suppose the Senator has that in his hand. There were two of those prints, and this latter contains the various changes that were made. After the first preliminary draft was printed for use, the Democratic members of the conference committee met, went over the bill, and reconciled their differences so far as they could. Then, as chairman, I summoned a meeting of the conferees at 4 o'clock, as the Senator from Kansas [Mr. Bristow] has stated, but the Republican members suggested that it was offensive to them for the Democrats to have previously met and done this work, and so they withdrew from the conference without being willing to remain, although we urged them to do so and to express their opinions about any changes they would like to have made.

Mr. BURTON. Will the Senator from Oklahoma yield to an

Mr. OWEN. Yes; I yield. Mr. BURTON. Is there any substantial difference in this print and the first print, or are the changes merely of phraseol-

Mr. OWEN. Yes; there is a change in the salary of the Comptroller of the Currency, for instance, changing it from \$5,000 to \$7,000 additional, so as to make it equal with that of the other members of the board.

Mr. BURTON. I do not now wish to take up the time of the Senator from Kansas [Mr. Barstow], but at a later time I may ask for an explanation of the changes that have been made.

Mr. BRISTOW. Mr. President, the first important change to which I desire to call the attention of the Senate is the creation of an organization committee, consisting of the Secretary of the Treasury, the Comptroller of the Currency, and the Secretary of Agriculture. This committee will organize this Federal banking system and prepare it for the possession, I suppose, of the Federal board which is afterwards to be appointed. Since the bill provides also that the Comptroller of the Currency shall be a member of the Federal board, it simply authorizes a committee, consisting of the Secretary of the Treasury and the comptroller, two members of the board, and the Secretary of Agriculture, who is not ex officio to be a member of the board, to organize the system. It is a political committee pure and simple, consisting of political officers of the administration, to take charge of this great Federal banking system and organize it; and it will be organized, of course, along political lines, as evidently is intended by the nature of the organization committee which is created. It is one of the astounding things that this measure, which we were told some two months ago was not to be political in any sense of the word, should have developed into a strictly partisan political institution, its organization to be perfected by the political party that holds Andrew Jackson as one of its patron saints. I should like to invite any historian to point to any political inconsistency on the part of any political organization in the history of free government that is any more striking than for the party of Andrew Jackson to put upon this country such a political banking machine as has been created by this bill.

Then, on page 8 of this conference report, is found another interesting change. It is well known to the Senate that those of us who supported the Hitchcock bill sought to provide for the ownership of the stock of the regional banks by the public and the control of the regional bank by a board of directors, a majority of whom should be appointed by the Federal board or by the President. We sought to have public ownership of the stock and Government control of the banks. That bill the Senate refused to accept, and it created a banking system the stock of which is to be owned by the banks and controlled by the banks. There was a provision placed in the bill as it passed the Senate which would enable the public to take any stock that the banks did not want. If the banks refused to subscribe, then the public might have the opportunity. The House provision also permitted the directors of class C to represent on the board of the regional banks the public stockholders. I want to read that provision as it passed the Senate:

Stock not held by member banks shall not be entitled to voting power in the hands of its holders, but the voting power thereon shall be vested in and be exercised solely by the class C directors of the Federal reserve bank in which said stock may be held, and who shall be designated as "voting trustees." The voting power on said public stock shall be limited to one vote for each \$15,000 par value thereof, fractional amounts not to be considered. The voting trustees shall exercise the same powers as member banks in voting for class A and class B directors

Now, I want to read it as the conference committee agreed upon it, and I should like the attention of every Senator:

Stock not held by member banks shall not be entitled to voting

If the stock is not taken by the banks and is sold to the public, then that stock has no representative, has no voting power upon the regional bank board, and the board elected by the banks that do participate, whether five banks or a thousand banks, have absolute control of the regional banks.

Mr. GALLINGER. Of the stock?

Mr. GALLINGER. Of the stock?
Mr. BRISTOW. Of the banks and of the stock also.
Mr. WORKS. Mr. President—
Mr. BRISTOW. The public might own a majority of the stock of a regional bank, but still the banks would have absolute power, and the stock owned by the public has no representative power, and the stock owned by the Covernment can not set tion. The directors appointed by the Government can not act as its trustees in voting it, for the provision covering that has been stricken out. They will have no voice whatever in electing the directors. The few banks that might participate will control the whole thing. Now I yield to the Senator from California.

Mr. WORKS. I was about to suggest to the Senator from Kansas, after his statement that the public had no representation or voting power upon the board, that they have no representation or voting power as stockholders, but the Senator has

since covered that point.

Mr. BRISTOW. Yes; why the conferees should have taken from the three Government directors the power to act as trustees for the public and why they should refuse to permit them to have a voice as such trustees in electing the board of directors for the regional banks I suppose the conferees will explain. It seems to me like a device to enlarge the power of the banks in control of the regional board, if such an enlargement was necessary

Mr. GALLINGER. Mr. President, lest the conferees should forget to make this explanation, would the Senator ask for an

explanation now? It is a very important matter.

Mr. BRISTOW. I should like an explanation. I very glad to have the chairman explain it, if he will.

Mr. OWEN. Mr. President, I shall be pleased to have the Senator repeat the question.

Mr. BRISTOW. Well, I should like an explanation as to why, on page 8, the language in the first bracket of the conference agreement was stricken from the bill?

Mr. OWEN. It was assumed by the conferees that practically there would be little or none of the stock taken by the public, but that it would be taken by the banks, and that the complication of having a director of class C exercising voting powers in one of the three groups of banks into which they are to be classified would involve considerable difficulty and complications that had better be avoided, since, in any contingency, the general interests of the country were protected by the three directors of class C, by the Government-appointed chairman and Federal reserve agent, and by the power given the Federal reserve board to remove any and all of the directors and any and all of the officers of the banks.

Mr. BRISTOW. That may be satisfactory to some people, but it is not to me.

Mr. OWEN. Mr. President, I will advise the Senator that it was satisfactory to the conferees for the two Houses.

Mr. BRISTOW. Yes; I infer that it was or it would not

have been agreed to. Anything that increases the power of the banks and takes from the people representation seems to be entirely satisfactory to the conferees, as other changes in the bill clearly demonstrate.

I desire, now, to call attention to another change, and I especially invite the attention of the Senator from Wisconsin [Mr. LA FOLLETTE] to it. It is found on page 12 of this book. It is in the amendment which the Senator offered and which was accepted by the Senate. As offered by the Senator from Wisconsin, it reads as follows:

No Senator or Representative in Congress shall be a member of the Federal reserve board, a director of a Federal reserve bank, or an officer or director of any member bank.

As revised by the conferees, it reads as follows:

No Senator or Representative in Congress shall be a member of the Federal reserve board or an officer or a director of a Federal reserve bank.

This leaves Members of Congress to be officers and directors in the member banks. Of course, no Member of Congress would be appointed to the Federal reserve board or as a director in any of the regional banks. The evil which the Senator from Wisconsin sought to reach was to prevent Members of Congress from becoming interested in the system and becoming directors and officers of the member banks of the system. Of course, the Senator will readily see that the vital part of that amendment has been cut out. I may comment on that a little later.
Mr. CATRON. Mr. President, will the Senator permit an

interruption before he passes from that point?

Mr. BRISTOW. Yes. Mr. CATRON. Is it not true that all the national banks which go into the arrangement will have to have as much capital and surplus as \$183,500 before they can have a vote that is enough to make up the \$15,000 to be allowed to vote, and that

that will cut out all of the small banks?

Mr. BRISTOW. No; if that change was made by the conferees, it slipped my attention. My understanding is that the provision permitting each bank to have one vote was retained.

Is not that correct?

Mr. OWEN. Each bank has one vote, and only one vote, whether it is a large bank or a small bank.

Mr. BRISTOW. Under the bill as it passed the Senate, the public had a right to one vote for each \$15,000 of stock which the public owned, and that was taken away by the conferees.

No director of class B or of class C shall be an officer, director, employee, or stockholder of any bank.

That has been changed also—and I call the attention of the Senator from Wisconsin to this—so that it reads now:

No director of class B shall be an officer, director, or employee of any No director of class C shall be an officer, director, employee, or stock-holder of any bank.

The bill as it passed the Senate provided that none of the directors of the regional banks should be directors in member banks. That has been cut out, however; and there is no reason now why a director of the City National Bank of New York, or the Chase National Bank, or the First National Bank of Muskogee, Okla., or any other place, should not be one of the directors of the regional banks. That is a new idea that seems

to have been born in conference, because it was in neither bill.

Now we come to the division of earnings. I wish to pass that for the present, however, and call attention to some other

things, and return to that.

On page 30, in the civil-service provision, a very interesting change has been made. I call attention to the last part of the paragraph. A number of minor changes have been made, but I will call attention now to the last one.

This is the way it read as it passed the Senate:

All such attorneys, experts, assistants, clerks, and other employees to be appointed without regard to the provisions of the act of January 6, 1883 (22 Rev. Stats., 403).

The change is as follows:

All such attorneys, experts, assistants, clerks, and other employees shall be appointed without regard.

And so forth.

I do not know what different construction might be put upon that language. Instead of "all to be appointed," this emphasizes it and says that they "shall be appointed" without regard to the provisions of this act, and so forth. So I suppose the President would not have the power, as it was alleged he would have when the debate was on in the Senate, to apply the civil-service rules to these persons if he saw fit. The question was directly asked and the answer made that the President could apply the rules. I think it was the Senator from Washington [Mr. Jones] who offered an amendment on that point. That amendment also seems to have been lost in conference.

Mr. GALLINGER. No; that is in the bill.

Mr. JONES. The amendment I proposed, and which was adopted, is contained in the conference report.

Mr. BRISTOW. It is? All right. I had overlooked it, then.
Mr. JONES. Yes; that part of it was retained.
Mr. BURTON. It was omitted from the print of yesterday,
but it is in the print of to-day.

Mr. BRISTOW. It was not in the print that was handed me. Mr. POMERENE. Mr. President, if the Senator will remember, I called his attention personally to that matter.

Mr. BRISTOW. I do remember it now. It had slipped my

Mr. POMERENE. It was simply a misprint that caused it

to be omitted in the printing.

Mr. BRISTOW. But the significant change is that it is now provided that these employees "shall be appointed" without regard to the civil service. They were not even willing to trust the President. They were afraid that possibly, in some spasm of virtue, he might order the civil-service rules applied to the selection of these appointees.

Mr. POMERENE. Mr. President—
The PRESIDING OFFICER (Mr. SMITH of Georgia in the Does the Senator from Kansas yield to the Senator from Ohio?

Mr. BRISTOW. I do. Mr. POMERENE. Do

Does not the Senator recognize the fact that this is simply changing the grammar of the sentence? It

All such attorneys * * * to be appointed.

The infinitive is stricken out, and the word "shall" is inserted, which is the only change. It does not change the meaning of it one whit.

Mr. BRISTOW. It may not. When the language says that the President shall not appoint them under the provisions of that law, I think it is more specific, and more of a command that he shall not do it, than it was in the other form.

Mr. POMERENE. Assuming that to be so, Mr. President, the amendment proposed by the Senator from Washington [Mr. Jones] is there, which gives the President full power to cover all of these places into the civil service.

Mr. BRISTOW. After they are appointed. Mr. POMERENE. Oh, yes.

Mr. BRISTOW. Not to appoint them under the civil service, but to cover them into the civil service after they are appointed. Mr. POMERENE. No; and the Senator has not been a

stranger to that practice here in the past.

Mr. BRISTOW. Oh, well, it does not make very much difference as to what has happened in the past.

Mr. POMERENE. Of course not.

Mr. BRISTOW. The method by which the civil-service law

has been extended, as the Senator from Ohio knows, has been by Executive order. It began when the law was first enacted, and every President from that time down to the present has extended the civil service except the present President. I do not think he has extended it any. He has been exempting, but

not extending, as I remember.

Mr. POMERENE. And it has nearly always been extended at the close of the President's term, after his own official friends

were in office

Mr. BRISTOW. That has been the practice of the Presidents.

Mr. POMERENE. Yes.
Mr. BRISTOW. I am not defending it. I never have defended it. It has been the uniform practice, and I have not blamed the Presidents so much as I have blamed Congress. There is little criticism to be offered as to the Executive in regard to the administration of the civil-service law. The fault has been more with Congress than with the Executive. The importunity of politicians and Members of Congress has been such that Presidents have hesitated to cover into the civil service the officers that were appointed from members of the political party to which they were opposed.

Now, I wish to call attention to a change on page 33. It re-

lates to the accepting of drafts or bills of exchange. I should like to know why this alteration has been made. I will read it:

Any member bank may accept drafts or bills of exchange drawn upon it and growing out of transactions involving the importation, exportation, or domestic shipment of goods having not more than six months sight to run.

The words "or domestic shipment" have been cut out, so that member banks now can accept drafts and bills of exchange only for the exportation or importation of goods, and not for domestic shipment.

I should like to know why the dealer in foreign merchandise, whether he is importing it or exporting it, is given an advantage over the dealer in domestic merchandise on exactly the same kind of paper. Perhaps some member of the committee of conference can explain that. If so, I should like to hear it.

I will inquire of the chairman why he exempts or strikes out, on page 33, in the paragraph next to the bottom, the words "or domestic shipment," leaving these bills of exchange only on for-

eign shipments?

Mr. OWEN. I will say to the Senator from Kansas that the chairman yielded with very great reluctance on this point, because he had a very strong opinion in favor of it, and had caused it to be put in the bill in the first instance.

The reason it was struck out was, by the demand of the House, or the argument which was made against its remaining in by the House conferees was, that small banks were apt to abuse the right of selling their credit in the way of acceptances by accepting domestic bills in default of any accommodation they could extend at the time because of their then resources. It was said that in that way they might abuse their credit, and that it would be difficult to keep a record of the sale of ac-

Mr. BRISTOW. It seems to me that could have been controlled by limiting the amount of paper which such banks could accept.

Mr. OWEN. It was limited in the bill. Nevertheless it was struck out.

Mr. BRISTOW. The effect of striking that out, as the Senator knows, is that a bank may deal in acceptances on imported merchandise, but not on domestic-manufactured merchandise.

Mr. OWEN. Yes; and I made the argument the Senator is now making in favor of it. I caused it to be put in the bill in the first instance, and insisted upon its remaining in the bill, but it was struck out by the House conferees because they said it would cause inflation of credit. I disagreed with them, and I agree with the Senator from Kansas that it ought to have remained in.

Mr. BRISTOW. Of course it is a manifest favor to the foreign producer of merchandise as against the domestic producer. I feel that it is a very great injustice to our domestic producers, and I concur in the opinion expressed by the chairman as to that. That is one of the things that I think I should have insisted on if I had been permitted to participate in the conference.

Mr. OWEN. The Senator ought not to say that he was not allowed to participate in the conference, because the Senator had the work which was performed by the Democratic members submitted to him at 1 o'clock on yesterday, at the very first moment we could have a print of it, so as to give him an opportunity of seeing what changes were contemplated. Then the Senator was invited to express his opinion upon any of those changes; but he declined to do so, and withdrew from the conference without permitting the differences in the proposed conference report to be submitted to him for signature.

Mr. BRISTOW. Two hours after the report had been printed and circulated in both Houses and was on the desk of every Member of the Senate and of the House, I, as a member of the committee of conference, was invited to appear and state, to gentlemen who had made up their minds what they were going to stand for, what I thought about it. And, as I said before

Mr. OWEN. The Senator is mistaken in saying that the conference report was printed, because the conference report was not printed. What he mistook for the conference report was a printed preliminary draft made for the purpose of saving time, showing what the Democrats thought would be advisable in reconciling the differences between the Houses. It was not the final actual conference report, and had not been signed. It was simply a preliminary draft made by the Democrats of the committee, and was put in print for common convenience of examination by all interested. The Senator knows that perfectly well.

Mr. BRISTOW. Yes; I know that that-

Mr. OWEN. So that Senators could have an opportunity to examine it.

Mr. GALLINGER. Mr. President-

Mr. BRISTOW. I yield to the Senator from New Hampshire. Mr. GALLINGER. I will ask the Senator from Kansas whether or not, when he was invited to appear before certain gentlemen after this report had been printed, the conferees on the part of the House were present?

Mr. BRISTOW. Yes.

Yes.

Mr. GALLINGER. They were?
Mr. BRISTOW. They were there, and we were invited to express our opinions.

Mr. OWEN. I again insist that the Record should not show that that was after the report had been printed, because the actual report had not been printed.

Mr. BRISTOW. Well, the pamphlet I have on my desk is entitled "Report of the committee of conference of the two Houses," and that was on my desk two hours before.

Mr. OWEN. The Senator is referring now to a document

that was not on his desk.

Mr. BRISTOW. I beg the Senator's pardon.
Mr. OWEN. All right.
Mr. BRISTOW. I am referring to a document that was on my desk on December 22, and was placed here at 2 p. m.
Mr. OWEN. Then the Senator is not referring to the print

of the conference report, because that is not the print of the conference report.

Mr. BRISTOW. I am reading what it says, "Report of the committee of conference of the two Houses.

Mr. OWEN. I know the Senator is reading what it says, but I am talking about the actual fact.

Mr. TOWNSEND. May I ask the Senator a question?
Mr. BRISTOW. I yield for that purpose.
Mr. TOWNSEND. Had or had not the conferees agreed to this report when they invited the Republican members in?

Mr. OWEN. They had not. Mr. TOWNSEND. Does the Senator mean that it was open at that time to any change the Republican conferees might have suggested?

Mr. OWEN. Yes; and it was explained to them, and they were invited to suggest changes, and they declined.

Mr. CLARK of Wyoming. The print which I have, which was laid upon the desks of Senators yesterday, supposedly with the concurrence of the committee, has three columns to it.

Mr. CLARK of Wyoming. The first column is "House bill," the second column the bill as "Passed by Senate," and the third the "Conference agreement." Of course, it was not a report, because it had not been made to the House, but I took it to be what it said it was, an agreement of the conferees as to what they would report to the Houses.

Mr. OWEN. I will say to the Senator that the first print repeated word for word in the third column the action of the Senate before the Democratic members even met. Then the Democratic members went over it and suggested changes, and after they had made suggested changes it was printed the second time, Monday forenoon. Copies were given Senators Bris-Tow, Nelson, and Weeks at 1 p. m. Monday. Then all the conferees of the two Houses were called in, at 4 p. m. Monday, and they were publicly and courteously invited to suggest whatever changes they desired, and the Republican conferees declined to make any suggestions, but chose to regard it as something of an affront in not having been invited in in the first place to the

Democratic caucus on Sunday.

Or ADK of Wyoming. This print of the bill was certainly not made before the time the Senator from Kansas said they were invited in. This print which I hold in my hand is a print which was laid on the desk later. But the print which I hold in my hand has a column headed "Conference agreement."

Mr. OWEN. I will say to the Senator that that was done for the purpose of saving time. The first print of the document he has in his hand had no interlineations whatever in the Senate bill, but showed, first, the House bill; second, the House bill as amended in the Senate; and, third column, the unchanged Senate bill ready for amendment by conferees. It was done for the convenience of the printers, so that when changes were made in conference they would not have to reset the whole matter, but could quickly make inserts in column 3.

Mr. CLARK of Wyoming. It seems to me we are wasting a

lot of time and a lot of money in printing.

Mr. WILLIAMS. Mr. President— Mr. BRISTOW. I yield to the Senator, and then I must hurry on.
Mr. WILLIAMS. I ask permission out of order to introduce

a bill.

The PRESIDING OFFICER. The Chair is obliged to rule that that is in violation of the consent agreement.

Mr. GRONNA. Mr. President-Mr. BRISTOW. I yield to th I yield to the Senator from North Dakota, and then I must decline to yield further. Other Senators want to occupy time.

Mr. GRONNA. I am very much interested in the paragraph which the Senator from Kansas has just been discussing in reference to acceptances.

Mr. WILLIAMS. Do I understand that unanimous consent was refused for the introduction of the bill?

The PRESIDING OFFICER. The Chair rules that under the unanimous-consent agreement consent can not be given; that it would be a violation of the existing unanimous-consent agree-

Mr. WILLIAMS. I do not care to argue that question with the Chair now, because it would interrupt the Senator from Kansas, but some day I will convince the Chair that the Chair has ruled wrong

The PRESIDING OFFICER. For the present the Chair

believes he ruled properly.

Mr. BRISTOW. I yield to the Senator from North Dakota.

Mr. GRONNA. I want to ask the Senator from Kansas a question, as I am very much interested in this particular paragraph, which relates to acceptances of drafts and bills of ex-As I understand the paragraph, acceptances can be made only for shipments of goods that may have been im-

ported or exported.

Mr. BRISTOW. That is right.

Mr. GRONNA. Is it not true that if in 1907 domestic bills or acceptances could have been employed, about \$100,000,000 of drafts would have been used in that way? This forecloses the right of the farmer or the agricultural class to have their drafts drawn against bills of lading of their grain and their

stock? Are they not excluded from this regional bank?
Mr. BRISTOW. Yes.
Mr. GRONNA. That is another gross discrimination in favor of the exporter and against the domestic shippers of this

Mr. BRISTOW. The packing house can take advantage of these acceptances; the banks can accept for any exportation of products, but the shipper of cattle to a domestic packing house or the shipper of grain or cotton to a domestic mill is barred from the privilege of having his drafts accepted, and so in the case of the mill shipping to a customer. It is a discrimination in favor of the exporter and against domestic trade. I think it is an infamous thing.

Referring to the participation of the conferees, I do not care to haggle about that, but a conference means that the conferees of the two Houses shall meet and discuss a measure and come to an agreement as to its provisions if they can.

Mr. GALLINGER. A full and free conference.

Mr. BRISTOW. A full and free conference. It is the unbroken precedent of the Senate that members of both political parties represented on the conference committee shall participate.

Mr. OWEN. Mr. President-

Mr. BRISTOW. I will yield in just a minute. This is a violation of the unbroken precedent, and I think it was because the chairman of the committee believed that the Republican conferees might vote with members of the Democratic conference, and thereby probably put in or take out of the bill some of

his pet measures. Because of that, I have been told he refused to sit in the conference that was held with the Republican members present.

Mr. OWEN. Mr. President, the Senator from Kansas has no justification in supposing that the majority party can not or would not act in unison and as a unit in conference. If the Senator thinks that he, representing an opposition party, can split the Democratic Party at his convenience and change the policy of the majority of the Democratic Party in this body, he is mistaken. He tried to do it in the Banking and Currency Committee and he failed. He was not permitted to try it in the conferences of the Democrats of the Senate, and we had good reason in excluding in the preliminary consideration of this bill the Senator from Kansas, because we did not want a "debating society" in lieu of a conference.

Mr. BRISTOW. Yes; I will get to that pretty soon. There are some things in this bill which the Senator from Kansas was for that the Senator from Oklahoma is against. The President of the Senate appointed the Senator from Minnesota and the Senator from Kansas as members of the committee of conference and the Senator from Oklahoma had no right, either in morals or so far as the membership of this body is concerned, to exclude him from a full and free conference in that room, whenever the bill was under consideration. I believe it was done because the Senator from Oklahoma knows that he could not control the vote of the Senator from Kansas any more than he could control the votes of all the Members on the Democratic side in the interest of certain great banking concerns which have had a part in the framing of the provisions of

Mr. OWEN. Mr. President, I deeply feel my recent affiliation with the big business interests of the country, and I appreciate the complete reform of the Republican Senators, who have had for years the opportunity of giving this country relief against big business and have never done it, and who have not only been affiliated with big business, but have been receiving campaign funds ad libitum from those very interests.

Mr. BRISTOW. The Senator from Oklahoma, who has assumed such virtue in the years that are passed, who has denounced the Aldrich bill, has accepted its most offensive provisions and covered them with a mask to deceive the American people, and he knows it.

I now come to the insurance of deposits. Before I take that up I will refer to the provision on page 42, which requires the Federal reserve bank to receive on deposit at par from member banks or from Federal reserve banks checks and drafts, and so forth. That will come as a severe blow to the small country banker, who has so violently protested against that provision.

Now, I want to take up section 7. Every provision in this bill that was in the interest of the banks has been retained. The provisions that were stricken out were provisions in the interest of the public. I call the attention of the Senate to the colloquy with the Senator from Oklahoma on the last day that the bill was before the Senate in regard to the insurance of bank deposits. It will be remembered that I read an article from the New York Sun, in which it was said that Secretary McAdoo had been revising this bill, and that one of the things he decided upon that should go out was the provision for the insurance of deposits. The Senator from Oklahoma, after some ance of deposits. The Senator from Oklahoma, after some equivocation, finally said that there was no agreement that it should go out, but declined to say that it would be held in.

I want to speak just a few words about the insurance of deposits. It has been attacked upon this floor with great violence.

A provision was placed in the bill which was ineffective, but it recognized a principle. It would have been of advantage at least to some parts of the United States.

The present postal savings bank is simply a scheme or a system very largely for the insurance of deposits. The Government takes the money from the people and pays 2 per cent interest on it. The day that it is deposited in a post office an officer goes across the street and deposits it in a bank, and the bank pays the Government 2½ per cent. The postal savings-bank system was instituted for the purpose of giving the people who were afraid of banks a safe place to put their money. They had onfidence in the Government, but not in the banks.

Mr. THOMAS. Mr. President—

The PRESIDING OFFICER. Does the Senator from Kansas

yield to the Senator from Colorado?

Mr. BRISTOW. I do.

Mr. THOMAS. I think the Senator can go a step further and say that the purpose of the pending bill is to insure bank notes or notes of issue.

out of hiding; that such money would be deposited in the post offices, where those who are skeptical as to the safety of banks would have no doubt about its safety. It has resulted in bringing out something over \$30,000,000 that has been deposited

in our post offices.

As I said, the same day this money is taken by the postmaster and deposited with a bank the bank pays the Government 2½ per cent; that is, the Government insures the safety of that fund to the depositor and charges him one-half of 1 per cent-for it. If there is any Senator here who can deny that proposition, I should like to have him do it now. It is nothing in the world but an insurance of the money to the depositor that it will be returned. The Government does not use it. Probably one-thirtieth of the amount that has been deposited has been invested in bonds, but the amount is comparatively insignificant. The postal savings system, as we have it now, is an insurance of deposits, for which the Government charges one-half of 1 per cent; yet we are told it is unsafe to take a part of the profits of a regional bank and insure depositors in the member banks against loss.

The fight that has been waged here against depositors' insurance is an unjustifiable assault upon as sound an economic principle as ever was woven into the statutes of the United

States. It ought to have been in this bill.

The Senator from Oklahoma can preserve the features in this bill that add to the profits of the bank of which he is one of the owners, but he lets go out the only provision that would insure the safety of the funds of the people who deposit in those banks.

Mr. OWEN. Mr. President—
The PRESIDING OFFICER. Does the Senator from Kansas yield to the Senator from Oklahoma?

Mr. BRISTOW. I do.

Mr. OWEN. The Senator from Kansas goes far in attempting to impugn the motives of a brother Senator. He violates the Senate rules in doing that. I shall not dignify the intimation of the Senator with any answer. It does not deserve an answer. I have for years advocated a guaranty fund or an insurance fund for bank deposits. I spoke in this Chamber five years ago in favor of it. The House committee is preparing a special bill on the plan of insuring bank deposits. have a subcommittee expressly charged with that duty. They expect to bring out a perfected bill and one that is not so imperfectly drawn as this proposed use of a part of the funds which are earned by the Federal reserve banks. I should expect to assist in perfecting a measure of that kind, but I remind the Senator from Kansas, while he invokes the gods to witness as to the perfidy and wickedness of the Senator from Oklahoma, every single member of the Kansas delegation who voted at all voted for this measure in the House. The Senator thinks he represents Kansas. Not a single member of the Kansas delegation voted against this measure in the House.

Mr. BRISTOW. I regret very much that is the case. Mr. OWEN. Six of them were for it and two were absent. Mr. BRISTOW. I regret very much that the Representatives from Kansas should have so voted. I think if they had been thoroughly advised none of them would have voted for it, except those who do not profess to be free and independent from the dominion of a caucus.

Mr. REED. Mr. President-

The PRESIDING OFFICER. Does the Senator from Kansas yield to the Senator from Missouri?

Mr. BRISTOW. I will for a moment, but I must get through. am taking more time than I ought to take.

Very well; I will take a few moments after the Senator is through.

Mr. SHAFROTH. I should like just to say in a minute that during the conference consideration the Senator from Oklahoma insisted three or four times upon this amendment being in. It was denied by the House conferees. They made the claim that they were going to have a perfected system. The action of the Senator from Oklahoma was absolutely loyal to the provision which the Senator from Kansas is referring to.

Mr. REED. Mr. President, that is what I rose to say, exactly, and I would have said it in stronger terms than my friend from Colorado has said it. I only make a remark now because I want to emphasize what he said. Since I have the floor, let me say that this was practically a last-ditch proposition on the part of the Senate, and it came to a point where, manifestly, there would be a disagreement reported and the passage of the entire measure delayed unless there should be a

yielding.

Mr. BRISTOW. Yes; that is true. The argument that was made for the postal savings bank was that it would bring money process of preparation, indeed it is almost, if not quite, pre-

pared, developing a plan that will create a real fund. Even if such a plan did not exist, we have the power to inaugurate such a plan; and even if neither proposition were true, it still remains that if the Representatives of the House absolutely refused to yield and we had the choice of delaying or defeating the entire bill or yielding this matter, it would have been better for the country, of course, to yield upon the principle that if you can not get entire relief, you had better have some relief than

othing. The criticism of my friend from Kansas— Mr. BRISTOW. Mr. President, I beg the Senator from Missouri to remember that the time for discussion is limited to-day,

and I shall have to ask him to speak in his own time.

Mr. REED. I did not know that. Let me finish this sentence, and I am through. The criticism of the Senator from Kansas upon the chairman of the committee is not justified by

any fact which occurred in conference. Mr. BRISTOW. Mr. President, it may be satisfactory to the Senator from Missouri, in whose sincerity of purpose I have confidence, so far as this proposition is concerned, to say that "we will let this go out of the bill and we shall provide for it in different legislation." Since I have been in the Senate that has been one of the methods of defeating legislation. Now is the opportunity; now is the accepted time; now we had the provision in the bill. If it were desired to perfect it, it would have been just as easy to perfect it now as it would have been to perfect other provisions in the bill. It was a provision

directly in the interest of the depositors of the banks.

I notice the Senator from Oklahoma did not yield the point that the interest to be paid on the stock which these same banks are made to hold should be 6 per cent instead of 5 per cent. The House provided that the dividend to be paid on the stock by the regional bank should be 5 per cent. The Senate increased that from 5 per cent to 6 per cent, and that provision remains in the bill. It was a provision of the Senate that gave the banks 1 per cent more, and the Senator from Massachusetts [Mr. Weeks], when he discussed the bill, declared that it meant throwing away by the United States Government a million dollars. I suggested on the last night when the bill was under consideration that we could take that million dollars and create a depositors' insurance fund, which would be of value to the depositors in the banks throughout the United States. Oh, no; that suggestion could not be accepted. Those who drew the bill in the interest of the national banks preferred to put that million dollars into the coffers of the banks instead of putting it into a trust fund to insure the money of the depositors in the banks.

You may say, "We will legislate on this subject in the future." Yes, possibly; but now is the time. nture." Yes, possibly; but now is the time.

Mr. OWEN. Will the Senator from Kansa

Will the Senator from Kansas yield to me? Mr. BRISTOW. I shall have to let the Senator from Oklahoma answer in his own time. I want to read an extract from the Congressional Record, on page 4719, of September 5:

the Congressional Record, on page 4719, of September 5;

Mr. Williams. I want merely to read a part of Jefferson's Manual which relates to a direct personal interest, not to the general interest of consumers. I am interested in beef because i am a consumer of it;

"Where the private interests of a Member are concerned in a bill or question he is to withdraw. And where such an interest has appeared his voice has been disallowed, eyen after a division. In a case so contrary, not only to the laws of decency, but to the fundamental principle of the social compact, which denies to any man to be a judge in his own cause, it is for the honor of the House that this rule of immemorial observance should be strictly adhered to."

Then the Senator from Mississippi continued:

The Speakers of the House of Representatives and the presiding officers of the Senate have ruled that the Member's vote could not be excluded in his interest, because he himself was the judge of the fact as to whether he was personally and directly interested or not; that he must rely upon his own sense of honor and justice in determining that fact.

That was a quotation read and those were remarks made by the senior Senator from Mississippi when the tariff bill was under consideration and the Senator from Rhode Island [Mr. LIPPITT] was discussing it. An attack was made by a number of Senators on the other side upon the Senator from Rhode Island because he is interested in some cotton mills. alleged that the tariff on cotton was directly in his interest, While the tariff on a cotton fabric may be of general interest to the manufacturers of cotton fabrics throughout the country, it can not be located specifically and directly in the interests of a single manufacturer as personal legislation. owns a large interest in a bank and he votes for a provision which increases the earnings of that particular bank, does he not vote to increase his own personal fortune in a direct way and not in a general way such as would be the case under the tariff bill? I maintain that he does. When a Senator votes for a dividend of 6 per cent instead of a dividend of 5 per cent on stock in which he has a personal interest, it seems to me that is coming in direct violation of the rule which Jefferson's Manual lays down; it is far more direct than any vote could be on a tariff schedule; yet the indignation of some Senators in this Chamber against some other Senators who have voted on general schedules has been very great.

I now want to read a clipping which has been handed me,

which is as follows:

OWEN INVESTS IN NEW BANK-SENATOR WILL BE BIG STOCKHOLDER OF ST. LOUIS INSTITUTION.

St. Louis institution.

Senator Robert L. Ower, chairman of the Senate Committee on Banking and Currency, last night confirmed a report that he is to be a large stockholder in a national bank now being organized in St. Louis. The head of this institution will be the Rev. Dr. J. T. H. Johnston, president of the Reserve National Bank of Kansas City.

The new institution will absorb a number of other St. Louis banking concerns, among them the German Savings Institute and the Commonwealth Trust Co., the latter being one of the influential financial concerns of that city.

My allogs then in the Latter being one of the influential financial concerns of the content of the content

My allegation is that this bill has been drawn in the interests of the banks; that the Senator from Oklahoma, as the chairman of the committee, is largely interested in banks; that the profits which will accrue to those banks directly will add to his personal fortune; that he has voted to increase the dividends on the stock of the regional banks, which will be paid to the member banks, from 5 per cent to 6 per cent; that he has voted against permitting the public to hold the stock of these regional banks and has insisted that it shall be held by the member banks; and that he has voted against giving the Government the control of the regional banks and in favor of the banks controlling the regional banks, and it is for him to say whether he has violated the rule laid down in Jefferson's Manual.

In closing I desire to say that this bill contains a concentration of power that has never been lodged in any Federal officer since the Government was established. It puts in the hands of the Secretary of the Treasury and his subordinate officer, the Comptroller of the Currency, a power over the banking and currency affars of this Nation greater than has ever been held by any man in the history of any civilized nation over the bank-

ing and currency of that nation.

Where are we coming to in the centralization of power? The Attorney General by a statement sends up the stock of corporations, the aggregate capitalization of which is more than \$500,000,000, approximately 10 per cent in a single day. By his action he can decrease the value of that stock to-morrow in the same amount. When you take the power which the Attorney General assumes under the laws and add to that the power that this bill places in the Secretary of the Treasury, you are providing a centralization of power that Alexander Hamilton would have blushed with shame to have suggested, and yet this is done by a political party that holds up Thomas Jefferson as its patron saint. Ah, you may pursue this course and deceive the American people for a time, but it will be for a limited time, and for a limited time only.

Mr. OWEN. Mr. President, it will only take me a moment to answer the Senator from Kansas [Mr. Bristow]. Twenty-four years ago I did establish a little bank down in Oklahoma the First National Bank of Muskogee. I had stock in it then; I have stock in it now, and I shall keep it until I die. I am proud of that little bank; it has done a good work in its sphere. The suggestion of the Senator from Kansas that my action in connection with this bill is moved in any degree by my possession of that stock is not only ridiculous but absolutely false,

and the Senator knows it is false.

The suggestion made by the Senator from Kansas that 5 per cent on \$100,000,000-which would abstract \$5,000,000 from this system-is less expensive to the general public and more advantageous to the banks than 6 per cent on \$50,000,000-which would abstract \$3,000,000 from the system-is mere foolishness. There is a difference in favor of the 6 per cent on \$50,000,000 over 5 per cent on the \$100,000,000 of \$2,000,000 in favor of the general public.

The banks of the Southwest do not regard a 6 per cent inestment as a valuable investment. They lend money at 8 and 10 per cent; they are doing it now, and they have no difficulty in placing money at 8 per cent on excellent security. gestion of the Senator does no credit either to his judgment or to his heart.

Mr. REED. Mr. President, I shall occupy the floor but a moment, because the time is limited and I understand, under the arrangement which has been made, all of the time has been assigned to the other side of the Chamber except about an hour.

I said in part when permitted to interrupt the Senator from Kansas [Mr. Bristow] that the Senate conferees had contended for the so-called guaranty, or insurance, provision of this bill until it became manifest that a disagreement would result. A disagreement would of course have delayed the final passage of this bill and possibly would have imperiled its passage at

We were therefore put to the answer of this question: Shall we have a bill containing many benefits, have it pass, have the business of the country go on uninterrupted and unimpeded by the present condition of uncertainty, or shall we insist upon retaining in the bill a provision which all admit was imperfect and experimental, but nevertheless a provision which would have recognized the principle of bank insurance? Under those conditions we yielded. The House, through its conferees, stated to us that it was their fixed purpose to prepare and bring in a bill which would work out a consistent, harmonious, and effec-tive plan for the insurance of bank deposits. Under those conditions it would have been a foolish thing for the Senate to have insisted and longer delayed the passage of this bill. Now, be-cause we did that, the Senator from Kansas indulges in what parliamentary custom, usage, and rules forbid me from properly characterizing in this body.

We have had a lot of mock heroics and vociferous fulmination

about this bill being drawn in the interest of the banks. Cou-pled with that are two claims. One is that by compelling the banks to take the stock of this system we have perpetrated a wrong and an outrage upon the banks and compelled them willy-nilly to subscribe to this capital stock, and that by so doing we have almost invaded their constitutional rights, if, indeed, we have not quite done so, and taken their property without due process of law. Having thus claimed that a wrong is being imposed upon the banks when we ask them to take this stock, and having exhausted the language of vituperation against us because of that, out of the same mouth and from the same lips and within 15 minutes' time we find ourselves denounced because we have not given the public the great benefits it would derive

from the purchase of this same stock. Mr. BRISTOW. Mr. President-

Mr. REED. Just wait until I conclude this sentence. I have heard those two arguments from that side of the Chamber, first from one man and then from another, and it can not be that they are both true. It can not be that it is a great outrage upon the banks to ask them to take this stock, and at the same time that it would be a great blessing to the public to permit it to take the same stock. Consistency is a jewel that seems to be getting very rare in this debate.

Mr. BRISTOW. Mr. President The PRESIDING OFFICER. Does the Senator from Missouri yield to the Senator from Kansas?

I yield.

Mr. BRISTOW. The Senator, of course, does not mean to misrepresent me, I know; but he never heard me say it was doing an injustice to the banks to compel them to take this He may have heard other Senators say so.

Mr. REED. I do not mean to do an injustice to the Senator I am dealing with the general line of the debate. Mr. BRISTOW. The reason I interrupted the Senator was that he said "from the same lips." I never have contended that. I have heard it from the same lips. I am not

replying especially to the Senator from Kansas.

Mr. President, the next claim that is made is that we are in some way imposing a burden upon commerce by permitting a 6 per cent dividend upon \$50,000,000 of stock, but that we would be conferring a great benefit upon commerce by levying a 5 per cent dividend upon \$100,000,000 of stock. already been answered. It answers itself.

The truth about the matter is that there is no occasion for anybody to go into heroics over this matter at all. The truth about the matter is that this bill is intended to strengthen our banking system. Nobody has ever claimed anything else. If the plan works as its authors hope, as everybody hopes who is more of a patriot than he is of a partisan, more of a lover of his country than he is of the success of his party, the truth of the matter is that the bill will probably benefit the banks by removing from them the great menace that is constantly present of paules and of constriction of credits at the very moment when credits ought not to be constricted. The other truth that goes with it as a corollary is that by removing this menace from the banks we at the same time remove the menace from the

A panic first strikes the bank, but within the next succeeding moment it strikes the depositor of the bank; it strikes the borrower from the bank; it strikes the business of the country, and it goes on down and strikes the man who digs in the trench and who toils in the mine. A sound financial system is essential to a sound business system, and a sound business system is essential to a sound industrial system, and all are essential to

the happiness of a people.

Mr. President, I do not intend to follow this line of discus-

Senator from Kansas. The bill before us does not differ in any great essential from the bill that he himself signed. The personal attack upon the chairman of the committee is a regrettable thing, and is about as far-fetched as it would be to charge a sinister and selfish motive to the Senator from Kansas because at some time he may borrow money from a bank or he may have a newspaper that borrows money from a bank. That would not be a proper charge to make; and the Senator from Kansas ought to withdraw the statement he made here upon the

Mr. NELSON. Mr. President, it is not my intention at this time to enter into any discussion of the merits of the bill as agreed upon in conference. I only intend to refer to some other matters of a peculiar and revolutionary character in connection

with the bill.

When the pending bill came to the Senate on the 18th of September last, it was understood, and was so indicated on the other side of the Chamber, that it was to be treated as a measure of legislation that concerned the welfare of the people of the entire country, high and low, rich and poor, Republicans, Democrats, Socialists, Populists, or whatever might be their political or social affiliations, and that we were to consider it in a purely nonpartisan spirit. Whatever motive may have actuated other Senators in that respect, so far as I am concerned I considered the bill in that spirit from first to last. Strangely enough, however, we were hampered from time to time while we were carefully considering the bill. I attended all the hearings of the committee from the 18th of September on, except during one solitary week at the beginning, when I was necessarily compelled to be absent. Notwithstanding the close attention which was being given to the measure we were from time to time threatened with a caucus unless we moved more rapidly and made certain changes in the bill.

Senators all know the result. A disagreement arose in the committee on one or two vital propositions, when it divided into two sections, and each section of six made a separate report. The report made by the members of the committee headed by the Senator from Oklahoma [Mr. Owen] was afterwards submitted to a Democratic caucus or conference. The bill reported by the section of the committee with which I acted was not

submitted to any conference.

I need not go into what transpired in reference to the passage of the bill. I can only say that after the bill was passed a request for a conference with the House of Representatives was made by this body, and acceded to by the other legislative body. According to parliamentary usage, the bill was put into conference; but, as a matter of parliamentary law, there has been no conference on the bill.

When a bill is referred to a committee of conference, if there are no restrictions in connection with the reference, if there is no provision or resolution limiting the operations of the committee, it has been understood from time immemorial, from the beginning of our system of parliamentary law, that such a conference should be a full, fair, and free conference, open to all

the members of the committee.

What are the facts in this case? When the conferees met, the Republican members were not permitted to be present. want to acquit the Members of the House; I want to do full justice to them. The conference committee of the House, headed by Mr. Glass, took their Republican associate with them, and were willing to confer with the Republican members of the conference committee of the Senate. Objection was made to that course, however. The objection came from the six Democratic conferees on the part of the Senate. They saw fit to exclude us from a full, fair, and free conference on this bill, such as has always been customary.

Mr. President, I have served in four different legislative bodies in my day, and I have never before had such an experience as that I have just undergone. I have served in this body for 18 years; I have been at the head of two important committees; and in my legislative conduct I have always aimed to treat Senators on both sides of the Chamber fairly and honestly, without discrimination. I do not think any Democrat who has served with me can say that as a member of any committee or as chairman of any committee I have ever discriminated against Democrats. I have always accorded to them the same fair treatment in all matters of legislation that I have given to any of my Republican colleagues.

The conference was ordered on last Saturday. cratic members of the conference committee met that afternoon or evening; they met again on Sunday morning, and continued in session until 3 or 4 o'clock on Monday morning. They had There was no occasion for this kind of an attack by the come to an agreement among themselves, and their report was

printed. The Republican members were never consulted or invited to the conference.

About 10 o'clock yesterday morning I received a telephonic message from the chairman of the committee asking me to meet with them. I went over to his room a few minutes after that time, between half past 10 and 11 o'clock. I found the chairman of the committee there and the Senator from Missouri [Mr. Reed]. I said, "I suppose you have agreed to your conference report?" "Yes; we have." "There is nothing for us to do, then?" "No." I walked out. I heard nothing more. Then afterwards, between 12 and 2 o'clock, the chairman of the committee called me out of the Chamber and handed me the printed conference report which I hold in my hand, and said, "I wish you would look this over." Subsequently, at 4 o'clock, we were summoned before the committee. After the Democratic members had had a conference over the bill, lasting from Saturday noon until Monday morning at 3 or 4 o'clock, we were called up, just as a criminal is called up after a verdict of conviction against him has been found, and asked what we had to say as to why sentence of the Democrats should not be pronounced upon us. [Laughter.] We were called before the committee at 4 o'clock, and they said, "Here is what we have agreed upon. What have you to say as to why this Democratic sentence should not be pronounced upon you?

What could we say? A poor culprit knows, under such circumstances, that it is idle for him to enter into any dispute with the judge. He might as well sit down and keep quiet, and that is what we did. It was pure mummery; and yet, in the face of these bald facts, the chairman of the committee has the audacity to come here and say that we were given an oppor-If he calls that an opportunity, I hope the Senator from Oklahoma will live to have such opportunities in the

future. [Laughter.]

Mr. President, I feel that this was an insult and an indignity offered to the Republican members of the conference committee. When the President of the Senate appointed three Republican conferees it meant, under parliamentary law, that we were to be permitted to cooperate and to act with the other members of the committee. By your conduct, Senators, you have not only insulted us and piled injury upon insult by calling us before your committee after you had agreed, but you have disfranchised the States we represent. You may have humiliated me by the course you have pursued, you may have belittled me, but what is more, you have belittled and disfranchised the great State of Minnesota, which I have the honor in part to represent,

When the President of the Senate appointed me one of the members of the conference committee I was appointed as a Senator from the State of Minnesota. Under the Constitution my mandate was as strong, my power of attorney was as comprehensive as that of the Senator from Oklahoma or of any other Senator in this body. I wish to say to the Senator from Oklahoma that the State of Minnesota, however unworthy its representative may be, is at least entitled to as much consideration in this Chamber as the States of Oklahoma, Colorado, and New Hampshire; and we hope by and by to be as big as the

State of Ohio. [Laughter.]

These are the bald facts in the case. What do they lead to Mr. President? They lead to a new parliamentary rule inflicted upon us by the Democrats. Whenever your President or you see fit to label a measure a party measure, whether it be a matter of rural credits, antitrust legislation, railroad legislation, or what not, and hold a party caucus over it, treat it purely as a party question, and ignore us, not only on regular committees but on committees of conference as well, you have established a rule that none but you are entitled to legislate for this country, you have established a rule that States which send Republicans here are not entitled to any consideration. By the conduct of the six Democratic conferees you have, as I have said, not only insulted Republican members of the committee, but in that respect you have disfranchised the State of Minnesota, the State of Kansas, and the State of South Dakota, States equal to your States under the Constitution, whose representatives in this body were appointed as members of the conference committee.

I have heard a good deal said about the commission of the Democratic Party to legislate. They may have a great com-mission, for all I know; but under the Constitution of the United States we are all here on a footing of equality; we are here as representatives of great States, entitled to equal consideration. When you fail to give us fair and equal consideration, you to that extent disfranchise the great States we represent.

So far as I am concerned, I never felt so humiliated in all my legislative experience as I feel on this occasion. My humilia- jority reached a vote. What it cared about was what the

tion, however, is a small matter, a personal matter, compared with the humiliation and indignity inflicted upon the great State of Minnesota in the disfranchising of its representative in this body.

I shall go home to my people in Minnesota and tell them that the Democratic Party have adopted a new gospel here; that whenever they have a piece of legislation they desire to put through they will label it "party legislation"; that after that has been done it is to be passed by caucus rule; and if it gets into conference Republicans are not to have any consideration, and you in Minnesota are to be forever disfranchised.

Mr. WILLIAMS. Mr. President—
Mr. NELSON. I decline to yield to the Senator from Mississippi. I like the Senator from Mississippi, but he must take the same medicine that his Democratic conferees have given me on this occasion

Mr. WILLIAMS. I beg the Senator's pardon; I had no intention of interrupting him at all. I thought the Senator was

sitting down.

Mr. NELSON. Mr. President, it is "a long road that has no turning." "The mills of God grind slowly, yet they grind exceeding small." I have seen two Democratic administrations come and go during my legislative career. I have seen another one come, and I think I shall live to see that go, too. ter.] I think, M1. President, that bye and bye a greater day will dawn for the Republic, when this Democratic legislative tyranny that has been inflicted upon us at this session will be something that even the Democrats will be as ashamed of as they are ashamed of some of their actions in the past.

Mr. President, knowing that other Senators desire to speak on this question, I do not feel warranted in occupying more time

on this occasion.

Mr. WILLIAMS. Mr. President, it is strange that a Republican Senator with 18 years of memory should still have such a short memory. The Senator says it is a long road that has no turn. I appreciate that. We finally got to the turning of

this particularly long road.

All of the Senator's talk reminds me of the experience of an old negro woman down in Greenwood, Miss. Her mistress had company unexpectedly and sent her husband out to get old Aunt Martha, the cook, and to get her at once. Her husband found old Aunt Martha on the street with a brickbat in her hand and indulging in a lot of rather extreme language. "Aunt Martha, what is the matter?" She said, "Well, some poor white trash just come along here with one of them new machines that run without any horses, and come mighty near running over me. If I could have got this brickbat in time I would have stove in his brains." Thereupon the master said, Well, your mistress wants you to come, and to come rapidly; you must help her out; she wants you to come in five or six minutes." She said, "How do you expect me to get way out She said, "How do you expect me to get way out there in five or six minutes?" He said, "I will carry you out in my auto." He put her in. The old darky looked a little out of place at first, but finally surrendered herself to the luxurious cushions. After a while there came crossing the road a colored man who did not hurry a bit. The old woman said, "Run right on. He has no business at all crossing the road in front of our car, anyhow." [Laughter.]

That is the way I feel. We went through the same experi-

That is the way I feel. We went through the same experience at the other end of this Capitol, for I remember when Tom Reed was Speaker, and I remember when he used to say to Benton McMillin in that inimitable New England drawl of his, "Mac, get the other Democrats together; we are about to perpetrate another outrage; and we want you to witness it.'

Then later on I served over there in the capacity of minority leader, a place with much name and little power, as many have learned before me and since. Joe Cannon was then Speaker, and Joe Cannon would say, in the language of Tom Reed, Sharp, the Republican Party, responsible for the legislation, is about to perpetrate another outrage. Put your hand on the Democrats and bring them in, so you may know what it is be-forehand." Sometimes they would give us 20 minutes to talk Sometimes they would give us 20 minutes to talk. Once they did not give us even any time at all.

This is a part of the experience in the House of Representatives as given by a distinguished Congressman there in reply "one-minute gush of the Wyoming geyser," something like

this Kansas geyser. He said:

That is, the Wyoming geyser-

is still "harping on my daughter" and talking about "caucus rule."

By the way, I found out, when I was in the minority in the House, that the country did not care much about how

majority did, and as long as the Republican Party enacted legislation that the country approved of nobody did anything except smile at us when we talked about caucus rule and all that

He is still "harping on my daughter" and talking about "caucus rule" and the exclusion of the Republican conferees, forgetting the fact that when the Vreeland-Aldrich bill was passed by a Republican Congress the Democratic conferees were excluded.

I remember that fact distinctly, because I was one of them. I was not admitted to the room until Senator Aldrich on one side and Representative Vreeland on the other had completed the draft of the bill. Then I was asked in and had it handed over to me.

Now, the country is going to judge us by what we are doing. If this is a good bill, a sound bill, and will accrue to the prosperity of this country, the country will stand up and call us blessed. If we have made a mistake, the country will rise up

and call us accursed. That is all there is to it.

Of course, I should feel sorry if I had ever had anything to do with anything that might have hurt the feelings of the genial Senator from Minnesota [Mr. Nelson]. I would rather have seen anything in the world done than to have seen him left in a frame of mind where he felt hurt in any way. But the public business must be attended to, and this difference between the two Houses, which was a difference between Democrats in the two Houses, had to be settled. The Senator from Minnesota knows as well as I do that the presence of others there would not have done anything except to delay the final settlement.

This country does not carry on legislation by States, not even in the Senate. There was a time when my ancestors contended that it ought, but that time has passed. We carry on legislation by majorities, a majority representing the Nation. This majority here and now is responsible for this legislation, and if it permitted others to twist the bill awry and put into it things that were not consistent with its purpose, it would be we who would be blamed and not the men who put it in there.

I ask the Senator from Minnesota—genial, good natured, sweetly dispositioned as he always has been—to let his mind run back a few years, and it may be that he can understand that there not only is always a turning to a long road, but that this particular long road is a Republican long road that has had a Democratic turn; and I hope the country will some day feel

Mr. NEWLANDS. Mr. President, I think this bill has been much improved in conference. It has been improved with reference to those provisions which have been claimed as likely to tend to inflation, among them the provision permitting Federal reserve notes to be kept in the reserves of banks, mere promises to pay instead of basic money.

Another was the provision regarding keeping out national-bank notes. It is obvious that as the basic money of the country and of the world increases, as it has been increasing for the past 20 years, it is the duty of every nation having out any considerable amount of uncovered paper money to gradually cover it with basic money or else to retire it. Otherwise, during a period of expansion of the basic money, the uncovered paper money will remain out for purposes of inflation.

Mr. President, a country suffering from inflation is like a man suffering from a spree, more stimulant is constantly required until the breakdown comes. We find that a country which is passing through a period of inflation is constantly demanding more inflation as the cure of existing conditions. Twenty years ago we were suffering from a contraction of the basic money of the world, caused by the diminished output of gold, and also caused by the elimination of silver. To-day we are suffering from an inflation of the basic money of the world caused by an enormously increased production of gold and an inflation of credits resting upon this basic money, which in this country alone have trebled in quantity, increased to the extent of about 300 per cent. On the other hand, the population in 20 years has increased only 30 or 40 per cent. This is the cause of the high cost of living. I think, therefore, the conference committee is to be commended for having stricken out the two provisions that point to a further inflation.

I think it unfortunate, however, that when the provision allowing the Federal reserve banks to be counted as the reserve of banks was stricken out a provision was not inserted giving the reserve board power to give State banks not now up to the requirements of this law an extension of time in order to come within these requirements. We all know that the average reserves of the national-bank notes are 3 or 4 per cent above the requirements of this act, whilst the reserves of the State banks are 3 or 4 per cent below the requirements of this act. It is important that the State banks should come in immediately. I regard it as a misfortunte that provision has not been made

for the immediate coming in of the State banks without requiring of them immediate compliance with this statute as to their reserves.

I regret also that the committee did not strike out the phrase "not more than 12," thus permitting the organization committee to designate not less than 8 cities to be known as Federal reserve cities without limitation as to the maximum. I believe that whilst 8 may be sufficient in the first instance, the number ought to be gradually increased, increased beyond 12, and increased finally in such way as to give a reserve city to each State, organizing each State into a reserve district composed of the State and the National banks of that State as member banks.

I believe if we should pursue that system by a constant evolution we would eventually have a reservoir at Washington in which would be deposited a considerable part of the funds of the reserve banks required by this law to be turned over by the member banks to them, and that thus we would have a great central reservoir at Washington from which money could be supplied directly to any reserve bank that might be under stress without going through the formula of calling upon one reserve bank to aid another reserve bank, with possible protest against and delay in such a procedure.

Mr. President, I do not know whether this bill gives the power of recommendation to the reserve board. It is possible that they may make their recommendations to Congress without such a provision, but I have always regarded such a power in the interstate-commerce act as one of the most important of its provisions, for it is under the recommendations of the Interstate Commerce Commission and the result of long and practical experience that we have been enabled thus far by a gradual process to perfect that act. All the recommendations of that commission are gradually being complied with, though many of them have been much delayed. The last one, one which they had been pressing for years, relates to the valuation of railroads.

Regarding the stock, I regret that the provision compelling a subscription of stock was not stricken out. I believe that sufficient capital is furnished to all the reserve banks by the deposit of a third of the reserves of the member banks required by this law.

If all the State and National banks come in under this union, the reserve banks will have \$500,000,000 of reserve money. That money they could use most effectively in the rediscounting of notes held by the member banks in any section of the country where there is a panic or a stringency; and it will be all the capital that will be required, when you take into consideration the fact that the Government itself will have some \$200,000,000 of funds which it can loan to the reserve banks or deposit in them and also has the extraordinary power of issuing these reserve notes for the purpose of rediscount.

I think it is a misfortune that we should regard these reserve associations as banks organized for profit. I think if you regard that as one of their functions, they are likely to be led into error. I believe that if they will be regarded as banks of profit, there will be a constant temptation to keep the reserve notes out and also to keep these reserves employed in rediscounts.

The merit of this whole system is that it establishes emergency reservoirs, and the benefit to be received from this act is that after the reservoirs are drawn upon to meet an emergency the funds withdrawn are gradually restored with a view to meet another emergency; otherwise, if they are left out after the emergency is over they are out for purposes of inflation. More than that, the moneys will not then be in the reservoirs to meet another emergency.

It seems to me just as absurd to make these reserve banks banks of profit as it would be to expect profit from our fire department through the employment of its horses in drayage and trucking and the employment of the firemen in the ordinary vocations. The purpose of a fire department is to be on hand with its engines and its men and its apparatus in order to meet a great emergency, and we expect, of course, those engines and the men and the apparatus to be idle except when the emergency is on. If we were to permit these men to be employed in other vocations they would not be on hand to meet the emergency. So, if we employ the funds in these reserve banks and loan them out during ordinary times when there is no press or stringency, it will simply be depriving them of all capacity to relieve when the emergency comes.

I hope that the result of the recommendations of the reserve board with this feature of profit making will be absolutely eliminated in the future, and I hope that by process of evolution and changes in the law we will have a reserve bank in each State and a central organization at Washington which can aid them all.

Mr. THOMAS. Mr. President, I have been greatly disappointed that the conference committee struck from the bill that part of section 7 which was designed to create an insurance fund for the benefit of depositors in failed member banks. My disappointment is modified in some degree by the assurances which are given by members of the Senate conference committee that it is the intention of the Banking and Currency Committees of both Houses in their codification of the banking laws to present a more mature and better designed system of depositors' insurance.

I have, however, some skepticism as to the possibility of the accomplishment of this much-desired purpose during the days of the present Congress. I hope that my fears may not be realized; but it is extremely difficult, when so much legislation is pressing upon our attention and demanded by the country, to focus the business of the National Legislature more than once upon the same subject during the same Congress. However, I am obliged to accept this assurance for what it may be worth and to indulge the hope that before we shall have adjourned for the summer we shall have perfected this measure by crystallizing into legislation this very important principle.

I have given it much study and consideration. It may be that my conclusions about it are entirely wrong; it may be that I have no adequate conception of the principle involved; but the more I have considered it the more I am convinced that it is an absolute essential to any complete and desirable system of banking. Every argument which I have heard against it can be made with equal propriety against the great principle of insur-

ance as applied to human affairs in all departments of business. I am unable to draw a mental distinction between the idea of guaranteeing or insuring the money of an individual when it is deposited in a bank, which is a quasi public institution, and the idea of insuring his property against destruction by fire or his family against that loss and deprivation which might otherwise come through his death.

Mr. President, as a man's property and family are the foundation of his cares, his apprehensions, and his ambitions, so also are the collective deposits of the average man the founda-

tion of our entire structure of banking and currency.

It is true, as has been stated here several times, Mr. President, that the primary purpose of this measure is to strengthen, enlarge, and perfect our banking system; but surely that embraces both the wisdom and the duty of safeguarding the man who deposits his money in these institutions as far as possible against the danger of loss. Senators have been extremely solicitous on both sides of this Chamber lest the issuance of notes by the Federal reserve banks should in some manner be affected by a lack of security, lest their value should decline because of their volume, lest the money of the United States should be brought into disrepute through some failure to provide against every possible contingency leading to that result; all of which, Mr. President, receives and has received my unqualified approval. I can imagine no duty higher than that which is imposed upon the legislator when framing measures concerning the circulating medium of his country than to safeguard it against every possible peril.

But, Mr. President, I regret that I have not heard more concern expressed for the man and the woman who, earning a little surplus money, are obliged to place it in the banks, whereby it becomes a part of the general deposits. They are the great body of the people, the small depositors, upon whose collective funds a first lien is imposed by this law for securing and safeguarding the currency issues therein provided for. Surely there should be a second lien, or if not a second lien, then some provision whereby these deposits may also be safeguarded to their owners, who intrust sometimes their all to the keeping of these great banking institutions.

Mr. President, in saying this I cast no reflection whatever upon the solvency or the integrity of our banking system or upon the high standing and character of bankers as a class; but we know that, so long as human nature remains unchanged, there will be failures and insolvencies in banking as in other lines of business; that so long as human nature is unchanged, in the business of banking, as in every other pursuit of man, individuals will embark in that business whose selfishness, whose dishonesty, whose ambitions, and whose temptations will interfere with the exercise of their duties with an eye single to the security and welfare of those who trust in them. These are the men, Mr. President, in every department of business and of life against whom all restrictive legislation is aimed. Experience teaches us that so long as these unchangeable conditions exist so long will there be failures, insolvencies, misappropriations of funds, and misapplications of deposits, followed by that eternal law in human affairs which imposes the consequences of

every man's wrongdoing more heavily upon the innocent creature

than upon the guilty offender.

The Government of the United States, the States of the Union, municipalities everywhere require security for their deposits, no matter how solvent the depositaries may be. is a wise practice, one which finds universal approval as gards public funds, even from those who deny and denounce its attempted application to the custody of private funds. There is not a bank in the United States which has an employee, however honest, capable, and conscientious, who is not required to give a bond to his institution indemnifying it against possible loss in consequence of his employment; yet such is the contradiction of human nature that the very men who recognize and apply this rule in other transactions denounce as unwise, as wrong in principle, and as socialistic in practice the proposition to throw the same safeguards around the deposits of that class of people which can least afford to lose them, upon the plea that it may result in the introduction of unscrupulous practices and the embarkation of dishonest individuals in the banking business, when both are so obviously possible that the public fund and the small employee are alike bonded for the general security.

So we have finally framed this measure, Mr. President, after committee labors and public debates and joint conference, after long and anxious consideration, by excepting from its terms this most salutary principle, which, in the form in which it has been introduced in the bill, was certainly of the most innocuc s character as it affected the banks and their resources. It required the payment by no individual bank, by no banking corporation, of a single dime for the purpose; it simply provided that a part of the profits to be made by these Federal reserve banks, after the dividend provided by law had been paid, after the surplus had been taken care of, should be used as a fund for the payment of depositors of banks belonging to the system which might become insolvent.

Mr. President, I can not understand why our Senate conferees, all of whom I believe are favorable to the principle, and most of whom voted for the amendment upon this floor, should have yielded for any purpose or for any consideration to the House demand for its excision. Tell me that the House demanded it! Why, that is no reason. The conferees of the other House naturally stood for the bill which had passed that body. Why should not those who represented us upon that body have been equally insistent, equally obdurate, equally obstinate? I concede that there must be compromise wherever there is a serious division of opinion, which must ultimate in some common ground, or constructive legislation may be doomed to failure; but I can not escape the conviction that two men, Members of the other body, at the other end of this building, by their successful insistence upon having their own way, have become the ultimate authors of this legislation,

We have heard a good deal about ca .cus domination from our friends upon the other side, and have been reminded of the fact that a majority of a majority, which is a minority of the whole, has been conspicuous in the legislation of this session; but. Mr. President, we are now face to face with a more obvious and indubitable fact, that two men, Members of the majority party of the House of Representatives, have dictated the character and elements of this bill, to whose insistence the six representatives of this body finally surrendered what seems to be a vital element to its completeness, tempered only by the assurance that it will become the subject of legislation in the near future.

The conclusion which I draw from this result is, that our Federal legislation, in its final analysis, is the legislation, not of the Senate and of the House of Representatives, not of the committees of the Senate and of the House, but of the majority, members of the conference committees of the two bodies, tempered largely by the staying powers and persistency of the most positive and dominating. And so this great measure is practically the result of the insistence of two determined men against what I believe to be the collective majority opinion and wish of the Members of both Houses as to this feature of it.

Mr. President, it is my impression also that the near approach of the Christmas holidays and the desire of Senators and of Members to get away from here and go back to their homes and their families has had something to do with the surrender of some of its vital provisions. Ah, Mr. President, I feel quite as strongly as any Member of this Chamber the ties of home and of family and the sentiments which prompt their reunion with the holiday season; but I am also conscious that we are sent here to legislate for 100,000,000 people upon subjects which they have defined and determined on. We have been engaged in considering perhaps the most important measure of this or

any other administration, a measure upon which hangs not only the hopes and the future of a mighty Republic, but a measure upon which the Democratic Party must stand or fall before the country, a measure which may determine its entire future, a measure which, to my mind, is of more supreme importance in its ultimate consequences to the Nation than all the tariff bills that have been drawn and enacted since the day when the Constitution of the United States was formally adopted. So believing, I think it might have been better for a little while to have cast aside our ordinary desires, to have forgotten Yuletide and the prattle of children, and to have devoted further time, if necessary—and I am not one of those who have been complaining of the amount of time consumed in the consideration of this measure, either in committee or elsewhere—to the end that when it finally evolved from the Congress of the United States and was carried to the President for his approval it would embody in principle and in phraseology as nearly as possible every element seemingly essential to its complete and unquestioned success.

I do not, Mr. President, by this mean to be understood as prophesying disaster to this bill; far from it. With all its imperfections, as I view it, it is a great and needed improvement upon existing conditions. I have both hope and faith in its immediate and ultimate favorable operation. I firmly believe that the banks, the people, and the Government, recognizing it as the best measure presently obtainable, will do what they can in mutual cooperation to make it successful in practical application to all the busy affairs of a busy Nation. Consequently, notwithstanding the fact that this, one of its chiefest and most important features, has been eliminated, I recognize that under all the circumstances it is our duty to accept it,

and then get behind it and make it effective.

Mr. President, I should not have taken the time of this body to say a word upon this subject at this late hour if it were not for the fact that in a modest way I have been somewhat conspicuous in my advocacy of what is called the guaranty principle in the State from which I hail. There it became a vital political issue away back in the campaign of 1908, when the party to which I belong pledged itself unreservedly to the enactment of such a measure, and largely upon the strength of that pledge the State of Colorado for the first time went completely and unreservedly Democratic. The government and affairs of the Commonwealth were placed in the hands of that party, but, charged with every obligation of party faith, the legislature turned its back upon this with some other equally insistent pledges, ignored both the wishes and the welfare of the people, and failed to enact their pledges into legislation. It resulted in a schism which threatened at one time the supremacy of the organization, and which found expression two years ago in a reaffirmation of this principle, followed by a second triumph and betrayal. What I had to say at home about the manner in which the people's confidence was obtained and then betrayed by my party has made it wholly impossible for me to remain silent upon this floor, in view of the action of the conference committee in striking the insurance feature from the bill.

In conclusion I want to say that I shall do all I can, in season and out of season, upon this floor and elsewhere, for a national depositors' guaranty fund. When the Banking and Currency Committee shall make its report, embodying the principle of an insurance of deposits in banks coming into the new system, I shall see to it, as far as I can, that it is crystallized into national legislation and becomes a permanent feature of the

banking policy of the United States.

And, Mr. President, I am satisfied that the time will come very soon thereafter when every banking institution now opposing this idea, as they opposed the establishment of the Postal Savings System, as their conservatism prompts them to oppose every and any change from the old ways, will perceive through the increasing confidence of the public in banking institutions and by the consequent increase of their deposits through the establishment of a feeling of security and confidence, that this is not only a salutary measure for the depositor himself but for those who receive the money of the depositors as well. In its practical operation but a few months will elapse before this system, as the Postal Savings Bank system now is recognized to be, will be hailed as one of those salutary and necessary improvements which benefit all sorts and conditions of men alike, but most of all those who have so long opposed it.

Therefore, Mr. President, while yielding, because I must and

Therefore, Mr. President, while yielding, because I must and under protest, to the final conclusion of the conference committee, I certainly hope that my friends on this side of the Chamber, when we come to a codification of our banking laws, will realize the vast importance of caring for the needs and inviting the confidence of the depositors, of keeping constantly in view the luterests and the welfare of the men and the women who con-

stitute the earners of this Nation, and whose little hoards in the banks mean all that stands between them and want when employment ceases and the real struggle for existence begins.

Mr. ASHURST. Mr. President, I wish to occupy only a moment of the time of the Senate, and I would not occupy even that much time were it not that I feel it incumbent upon me to express my regret that one of the most salutary reforms contained in the pending measure as it passed the Senate, and one which the Nation demands, has been eliminated by the action of the conferees.

The Senator from Minnesota [Mr. Clapp] the other evening said he would like to draw a picture of three controlling six; but Le might have drawn a picture of two controlling six, because I observe that the report is signed by two conferees on the part of the House of Representative and six on the part of the Senate, and that the provision requiring an insurance fund to guarantee the depositors in failed banks has been stricken from the bill.

I wish to read a short excerpt which I have just clipped from Collier's Weekly, as follows:

A deposit-guarantee fund exists now in four States. The plan is working well. In 10 years it will be universal. A national guaranty fund might easily draw out a billion dollars of real money, not flat money, now hoarded or buried, and add this real money to the banking strength of the country. Why should a united Democratic Congress, with a Democratic President—a combination that conceivably might not occur again in 20 years—fumble this golden opportunity?

My Democratic brethren, if we again "fumble" an opportunity, such as we have upon this occasion, it will be more than 20 years before we shall get another. I approve the bill generally, and trust that a bill guaranteeing deposits will be en-

acted into a law at an early date.

Mr. TOWNSEND. Mr. President, I have not heretofore occupied much of the time of the Senate in discussing this bill. I have known that debate was useless. I declined the opportunity that was given me to become a member of the Committee on Banking and Currency because it would have been necessary, in order to accept that place, that I should have been relieved from membership on the Committee on Indian Affairs, in whose work I am deeply interested and with which I had some familiarity. I desire now, just for a moment, to state briefly why I have not supported the bill and can not now support the conference report.

I believe that this measure is born of a political emergency, an emergency created by the Democratic administration. I am a partisan; I believe in political parties, and that parties in power should assume the responsibility for legislation. I have never had any fault to find with that doctrine; but I also believe that parties should be founded upon principle. I do not believe in parties that are established and maintained simply for political spoils. I do not think it is a proper course for a party to pursue to enact legislation affecting the great interests of the country, without due regard as to whether such legislation is right or wrong, in order to meet a political emergency.

I charge that this bill is a political measure, and one which does not meet the honest, uncoerced approval of a majority of this Senate. The best proof of that statement is the testimony of the Senators on the other side of this Chamber, who have repeatedly risen in their seats and found fault with it and suggested changes, which could have been made if such Senators had exercised their free will and honest judgment. The most conspicuous example, possibly, is the senior Senator from Nevada [Mr. Newlands], who seems to have very profound convictions on matters proposed for legislation; but his gentle, loyal political mind surrenders to the party caucus on every occasion, and I can easily imagine the amount of suffering that that Senator has endured during the consideration of this measure and of the tariff bill.

I have stated that I believed this was a matter of political emergency. If it were not a political measure, having been made so by a seeming necessity, there is not a doubt in the mind of a single Senator in this Chamber that we would have had a different bill from the one now before us; we would have had a bill founded upon the needs of the country, and it would not be the one that we are now considering. This measure was framed and will be enacted into law at a time and under conditions when good financial legislation could not well be secured. The tariff bill has just passed and its results are not working out to the satisfaction of its makers. Something must be done to relieve that situation, and the currency bill is brought forward. It is well calculated to obscure the legitimate effects of the tariff. Something new and equally disturbing is now pushed to the fore, and neither the tariff nor currency bill can be tried on its merits.

Whether it is expressed or not, it is believed by its advocates that this measure will make money easy. Unless it unduly inflates the currency it will certainly have failed as a political emergency measure. It is true that a number of years ago—18 or 20 years ago—the demand was for more money. Prices were low and it was said that we could not have good prices without more money; and yet at this time, when the claim is made that things are too high, thereby showing by the same rule that there is a redundancy of money, it is proposed to pass a law for political purposes which will make money more plentiful, without regard to its quality. Under existing conditions if such a result follows it will be a mistake. Such a law can not be passed and the country still maintain that stable prosperity, that sure progress which it has enjoyed and ought to continue to enjoy

cught to continue to enjoy.

Furthermore, the bill is passed at a time when the country is disturbed over conditions not directly connected with banking and currency, but with the relations between capital and labor, with propositions to control the great trust question, with unsettled conditions of industry generally, with new schemes involving a reorganization of the Government itself, some of which questions have had their birth in the minds of ambitious and sensational politicians operating for political revenue only, at a time when legislators have been overworked throughout a long year's sessions. Under those conditions the public mind, as represented in the Senate, at least, is not in the most judicial frame for passing upon legislation which should endure during many years to come.

I think that this bill creates a political machine—one of the greatest political machines that has ever been created by legislation. Mr. President, the modern cry has been against political machines, and yet under the sanction of law it is proposed to create one whose possible baneful effects may control the finances of our country.

I referred a moment ago to the fact that the condition of the country is peculiar. The Democratic Party is in power, to be sure—in power not by the will of the majority of the people but because of a division among the opposition. One of the leading characters, perhaps the dominant character, in this administration is a man whose ideas on finance, whatever else we may say of him, have not been considered sound. I assume that not even a majority of the majority approve those ideas now. That his idea is to have more money there can be no question; and I am fearful that, inasmuch as it is possible to create a political board, one will be created; and, having created such a board and given it unlimited power, lodging in it great discretion as to the issue of currency, having given it the power to appoint all the employees of the system, we will have a machine which, it seems to me, it is unwise in every particular to create.

It is undoubtedly true that there are some features of this bill which are good, but I submit that the 25 per cent bad, to which the Senator from Massachusetts [Mr. Weeks] referred, is sufficient to vitiate it all. I do not believe that the existing law is 25 per cent bad. That law provides for emergency currency and is good enough until we can get together in a non-partisan manner and enact a law which will not be dictated by the ambitions of politicians or by the necessities of a political party in trouble. Every candid Senator will admit, if he consults his honest convictions, that we could have had not only a better bill than the one before us but a good one if partisan politics had been eliminated and an honest effort made to get the best.

I said it was a bad time to pass this law. We have just passed the tariff bill. We now propose to pass a currency bill. Suppose, for argument's sake, that the country shall go "wrong," as we use the term, suppose that conditions shall not be what they ought to be, to what cause are we going to charge that condition?

Some of us insist that because these bad conditions had begun before this law was enacted they are due to the tariff; other gentlemen will insist, possibly, that they are due to the currency legislation. Where are we going for the remedy and where are we going to apply it when we think we have found it—to the tariff or to the currency, or to both? Must the next Congress, in its efforts to bring relief, revise both the tariff and the currency laws? It has seemed to me that with the emergency currency law which is now on the statute books we could well have tried out one of these great experiments at a time. Then we would have known exactly the cause of the trouble, if trouble should exist.

So, Mr. President, believing, as I do, that this bill is not carefully framed, believing that it is possible under it—nay, probable under it—to inflate the currency to such an extent as to bring disaster to the country, believing that it is framed upon partisan lines for political purposes and that a currency bill

should not be a partisan measure, believing that instead of restoring order it will add to existing confusion, I have felt it my duty to vote against it in the past, and I shall feel it my duty to vote against this conference report.

Mr. LEWIS. Mr. President, how much time is there yet undisposed of on this side for those sustaining the report?

The PRESIDING OFFICER (Mr. SAULSBURY in the chair). The Chair is informed that there has been no division of time whatever.

Mr. LEWIS. Mr. President, I am conscious of the ability of the members of the Committee on Banking and Currency to discuss the merits of this measure to a degree so much superior to anything I contribute that I will not trespass upon that field. Nor, sir, would I mar the effect, certainly the success, of any discussion they may offer upon the correctness of this measure. I shall intrude myself upon the Senate for a few moments to indulge one or two observations that have suggested themselves to me as I have listened to the eminent Senator from Michigan [Mr. Townsend] and the able Senator from Kansas [Mr. Bristow].

I came into the Chamber this moment when the very enthusiastic and energetic senior Senator from Kansas was, with his usual vehemence and always admirable declamation, pouring out his invective upon those who were the creators of this bill. He expressed with unqualified malediction his prophecy as to the ruinous effect of its operation. Then, when he was followed by the versatile Senator from Michigan, it became evident to my mind that these eminent Senators really are haunted with the specter that there is in the distance somewhere, not now to be located, some danger, and they wish to cry out against it that they may get credit for sounding the alarm. Though they do not see it, yet they would have the country understand that it is approaching. They do not exactly understand in what form it is stealing upon us, but they wish to have the country understand that whatever it is, they wish to be held as having "spied it first" and to have early disclaimed responsibility for it.

The philosophy of these distinguished Senators seems to be compiled and expressed in that famous quatrain that has come lately to us from the humorous poet in the phrase:

I never saw a purple cow;
I never want to see one;
But I will tell you, anyhow,
I'd rather see than be one,

[Laughter.]

I will say to the distinguished Senators that with all the "bulls" they may perpetrate upon the Senate they need have no fear of being impaled upon the horns of this imaginary purple cow which somewhere upon the road is supposed to collide with their vehicle of progress.

The able Senator from Kansas seems to have an idea that a very great machine called centralization is quite on the way to disturb the democracy of this country. But the distinguished Senator from Kansas did not hesitate, in his very able addresses, to propose to the Senate the creation of a single central bank in the United States of America, with a single head, with a single body, with various arms—arms truly of Briareus, eyes of Argus, and strength of Hercules—that could, with all the force of ancient and modern power, grip the Republic in a single hand and tyranny of centralism—an institution that would only relax its control whenever to do so served the political uses of the political party in power or crush the Nation when it declined to yield to its dictates. Yet this is the able Senator who inveighs against this bill for fear for what he says is centralism.

My learned friend from Kansas has not hesitated to give his approval in the past to all that system of government that has turned over to the Federal power as against the local homerule or State government those instrumentalities that centralize all power in the Federal Government under the theory or designation of a Republican Party domination. The conscience of the wrong of all this that has lately come upon him as against centralization seems to be a new birth and a new baptism. I would welcome him to the creed, and likewise to the conversion, but I would rather see it in acts of performance than in mere

profession of words.

What is the grievance of the able Senator from Kansas? It is that in this bill there are some elements to which he can not give his accord.

Will the distinguished Senator from Kansas certify to his country that with the platform of his party demanding that there shall be currency reform, and having demanded it in the last eight gatherings—certainly in the last four national conventions—that the Republican Party shall, as far as he is concerned, make the declaration but shall do nothing toward its performance; and that when something is done by the Democracy it shall be defeated, however filled with blessings, however

faithful to its promises, however full in its relief, merely because it comes from the Democracy?

Surely that can not be the sentiment of a patriot; and that the distinguished Senator from Kansas is patriotic we are ready to concede.

The objection lies solely and wholly, if I do not misunderstand him, in the creed of his saying, in effect, "Either the scheme I present or none. The country may be in want, but it will take the bread I improvise or none. It may thirst upon the road, but it will take water from my cup or it shall thirst to its death. It shall continue in all its distress unless it takes its remedy in nostrums from my hand. If it shall not bear the credit of my name, my distinction, and my authorship, then be it the House bill or the bill from the Senate house which may tender remedy-in the language of Mercutio to Montague and Capulet, I

shall cry out 'A plague upon both your houses.'"

This may in certain regions of this country go for statesmanship, but with the small wisdom that I am able to summon up I can but impute to it a temporary political expediency which

will not serve an enduring or ennobling use.

When I saw my learned friend from Kansas turn from his past faith; leave off the pursuit of his old hope, and colleague with those Senators on the other side whom for days and days in the last two years he has been holding up to the execration of his country; when I recalled his past, that when he sought the votes of Kansas at any time successfully, he got them by crying out the names of Gallinger, Root, and Penrose, and by the names of this Mephistophelian trinity was enabled to win the approval of Kansas and the restoration of himself to the confidence of the people; I was pained to note that upon the very first opportunity coming to him he was found casting his vote with these gentlemen, with these eminent Senators, according to the views they possess, these which had for so long been denounced by him as the source of all public danger. President, I could not help but conclude that the Senator had awakened to a fancy that there had come a time when there must be a change in his course. That if there is to be a hope in Kansas, his hope must be anchored there with the accursed and condemned of yore. That he had made a mistake in assuming that his past course had profit or political return, and that now he must return to the black mansion where ruled the tyrant

I remember, Mr. President, that somewhere in the sacred songs we hear in the revival services there is something that goes like this:

There is a fountain filled with blood Drawn from Immanuel's veins; And sinners plunged beneath that flood Lose all their guilty stains.

Mr. President, I fancy I can hear the distinguished Senator from Kansas in his new conversion improvising and paraphrasing that, in its application to these distinguished Senators, men whom heretofore he has so indicted before the country, his new chant to be:

There is a fountain filled with gold Drawn from corporate veins; And if I can be gathered into its fold I may lose my Progressive stains.

[Laughter.]

Truly, the distinguished Senator from Kansas may take to himself what consolation this new religion may afford him, and ultimately he may feel that he will have his reward. But now he turns to these singed and ancient forbears of the party against which heretofore he has cried out so greatly, but with whom he now allies himself at the moment of his emergency, when he approaches a conflict in Kansas in which by their aid he thinks he has much to hope, but, I fear, little to gain. The Senator possibly now feels that from these only he has his succor, and possibly he turns to them now as he once clung in ancient faith; and in the language of that sweet and gentle admonition of Ruth to Naomi, we can hear him again exclaim to "Penrose, Gallinger, and Root":

Entreat me not to leave thee nor from following after thee, for wherever thou goest I will go, wherever thou stayest I will stay, and wherever thou liest [laughter] there, too, will I lie [laughter] and be buried also.

[Laughter.]

And, Mr. President, I dare say when these new redeemed gods of Belial come to speak of the Senator in the future they will no longer refer, to him contemptuously as the "long hair." He will no longer be designated as one who has gone wrong, and as an "anarchist"—no, no! I deplore the suggestion that rises within me. It will be none of these. It will no longer be, "the brave Bristow from dauntless Kansas." No longer will it be "the independent Joseph Bristow"-alas, oh, no! In recognition of the contrite position he has taken at their

altar, of the worship he has poured out at their throne hereafter, he shall be accepted in full faith and designated as "St. Joseph, our long-lost brother." [Laughter.]

Mr. President, out of the sense of esteem and sweet affection I have borne the distinguished Senator from Kansas because of what I felt to be his pure motives, I regret to see this departure and this surrender. Hereafter these devils of contrivance these three Senators named-which have been held up by him to the execrations of this country, are no longer to be regarded as enemies. They are now the heroes of the salvation of the Nation. They are now the exemplars of divinity. They are the sole trinity of pure progress and virtue for the future, as far as the vote of the distinguished Senator from Kansas can certify. There he will be no longer astray, though for some years out of the fold, shivering like the naked beast of burden, seeing the provender distributed to others who were saddled and bridled-he prefers to turn to where he can be ridden and driven by those whom he hopes can drive him safe to a distance just beyond which to what in navigation would be called a harbor and in politics would be termed a refuge.

Mr. President, out of my regard for him I call him back. In the language of the philosopher poet, I cry to him:

Behold your host, noble scholar and student.
Look you! that no longer you should roam;
But to the glory of your fame,
To the honor of your name,
Turn about and come home.

The Senator from Michigan [Mr. Townsend], ever pleasing to me-sir, there is no man who rises upon his feet here who, I assert, contributes more of sincerity, of sweeter eloquence, more accurate diction, or more delightful rhetoric than the able Senator from Michigan-what says the able Senator from Michigan from his point of view? He exclaims that there will be a panic from this bill.

Mr. President, I have not seen a measure proposed here on the floor of the Senate from the Democracy that some distinguished Senator on the other side has not found it convenient to rise in his place to summon the American country to view the fire that is being lighted; the incendiary hand that is lighting it, and the desolation that is just ahead, because some measure of legislation has come from the Democracy. Says the Senator: "This is a political bill!"

What does my distinguished friend expect in a political government? The bill, I desire to say to the Senator from Michigan, for two months and a half was before the Senate under the able leadership of the leader of this side and under the conscientious cooperation of them all, each and all of us endeavours to make it a population and propolitical bill. What side oring to make it a nonpartisan and nonpolitical bill. What aid did we get from the distinguished Senator from Michigan? That committee duties may have called him away justifying his absence, I will not deny; but the roll call will indicate an absence more profitable to the committee he was serving than to the Senate. Then I ask, What aid did the Democracy get in seeking to make this a nonpolitical measure? What encouragement from the distinguished Senator's colleagues? None. Where was the cooperation of those who should have come to the Democracy to aid it in carrying out the will of the people as expressed at the ballot box or in platforms? It was absent. Where was the effort on the part of the distinguished Senators on the other side to rescue the measure from the air of politics, in order to give it a business air and a nonpolitical character, that the country might obtain relief from it as ordered by both platforms-theirs and ours? The answer is, There was none.

Why? Because eminent Senators such as the distinguished

Senator from Michigan feared that in the natural result of affairs some credit might fall to the opposite political party, and rather than have that small credit come to the Democracy they would defeat to the people the great benefit that would

go to the country.

Then what was left? The Democracy, after long indulging the able Senators on the other side, calling them, sir, without hope, because the effort had been a failure, was compelled to take its resort to the only course left, that it might carry out the will of the people. This was under party organization, by the Democratic Party-that party that had been designated at the ballot box to carry out the reliefs for which the people had voted.

The learned Senator is right. The bill is political, political to the extent that it voices the political ideas of the people of this country, political in that it expresses in legislation the platform of the Democracy and that it now speaks the hopes of the Democracy for the welfare of the country. To that extent alone is it political.

Says my friend, "It will bring about machine control." Well, that there may be 10 or 12 men who may have a small control of the organization of the financial system—as all things must

be controlled-I will concede. But where was the voice of the able Senator or his colleagues when, under an earlier organiza-tion, one man, the Comptroller of the Currency, had the control? Under the Aldrich-Vreeland bill, presented here in a preceding Congress, while the Republican administration was in power, shall it not be recalled that centralization there rested in three men, and they under no control of the Government at all, if I may read the English language?

All things must be guided, honorable sir. To some men each system must be intrusted. The people have intrusted to us the administration and given to the Democracy the power to exe-Then to those must be intrusted the bill passed cute their will.

by the legislative body.

But my friend, the able Senator from Michigan, still, in the words of Polonius "harps upon my daughter." He recalls, no doubt, his support of the resolution of the able Senator from Kansas [Mr. Bristow] that sought to condemn the Secretary of State at a time when it was assumed that the Secretary of State, Mr. Bryan, was giving some of his time to public discourses before the country. The dual combination of the fervent, impulsive, and generous Senator from Kansas and the calm, philosophic didactician from Michigan is always found whenever the name of Bryan is suggested or the possibility is opportune of some voice against him where he can not speak for himself.

Says the learned Senator: "There is the hand of Bryan upon this currency." I do not know whether the learned Senator from Michigan contrived that from his brain or whether it was born from a certain fatuous fetish worship I have observed on the Republican side of the Senate, that whenever the senior Senator from New York [Mr. Root] arises and says a perfeetly evident thing in an extraordinary manner, yet with much hesitancy, as if he were in doubt himself about it [laughter], promptly there arise upon his side his generous worshipers, and lighting their tapers before his shrine cry out: "Me, too! Correct you are, noble sage, reverend philosopher—how true!" Promptly upon the assertion by that sage that upon this bill were the marks of what he termed, if I recall his expression, the "heresies twice repudiated before the country," whatever he meant by it—referring to the Secretary of State—trusting as the distinguished Senator from New York did that he might arouse some old prejudice that had previously prevailed, awaken some fear; light some alarm—the able Senator from Michigan, ever alert and ever conscientious under ordinary conditions, likewise rises in his place, and, if I may use the barnyard illustration, when the great Shanghai crowed, the lesser brood flapped their wings and cock-a-doodle dood. [Laughter.]

Has it come to this, that able Senators of respectability and

conceded capacity can find no other argument against measures than to seek to revive old and ancient differences long since disposed of, and that when the country is once again united, when we are in harmony, when the ridges that once divided us, the chasms that once separated us are all closed up and we are again seeking the common good, the common welfare, to give peace, prosperity, and happiness to a united people in our com-

mon country?

Sir, since it pleases my able friend to conjure confusion by the name of Bryan, therefore reflecting an imaginary cloud upon the Democracy because he was its leader; I invite him to recall what has been the effect of the teachings of Democracy when this man was its standard bearer. Where are those denunciations against the position taken on the election of Senators by the vote of the people? The eminent Senator was the first afterwards. when the public were aroused to the justice of it, to cast his vote in affirmance of the doctrines which were preached and those which were advanced by the gentleman he now condemns.

Where was this doctrine, sir, of primary election, by which the people should express themselves directly at the ballot box, condemned on the part of eminent Senators on the other side as being in violation of the Constitution, anarchistic, socialistic, revolutionary, contravening every doctrine of common sense and patriotism—where? Why, adopted by the vote of the distinguished Senator from Michigan and his colleagues. One after another the reforms proposed by the Democracy when the present Secretary of State was its leader have been espoused in the platforms of one wing of the Republican Party, designated as Progressives, and adopted, whenever there was a hope or desire of success, by the other, called the Republicans.

If the distinguished Senator from Michigan will pause to reflect, there will be borne in upon his mind that the great people outside of this Chamber are not deluded. They are conscious of the great issues. The Democracy has been placed in power. It received its mandates from the ballot box. One of them was to wrest the money control from those who had abused it, and to place it in the hands of those who would I

administer it to its honor, while they gave life and opportunity and prosperity to the great mass of the people.

The measure has received its birth from the Democracy. there be any amendation or changes necessary to perfect its life, they will come in due time, and in due and proper way, from the hands of those to whom the people have intrusted the subject. The Scnators need have no fear. That duty will not be shirked. It will not be abandoned. It will never be sur-

There is before this country a united Democracy. She stands upon the principle of the constitutional right of every citizen, however situate. Her doctrine is, Sovereign citizenship to the humblest man; equal rights to the poorest citizen. There she rests herself to-day, and rejoicing in her reunion, she says to her fellow mankind, paraphrasing Philip of Falconbridge in King John:

Now that our princes are come home again, Come the three corners of the world in arms, And we shall shock them. For naught can make us rue, If Democracy to itself do rest but true.

Mr. TOWNSEND. Mr. President, I shall not attempt to present many facts to disturb the picturesque Senator from

Mr. LEWIS. I can not hear the Senator. I can not afford to lose anything he says. May I ask for order for the Senator?

Mr. TOWNSEND. I merely wish to call attention to one matter to which he referred, which might be taken seriously, although I doubt it.

The Senator stated that if the junior Senator from Michigan had been present in the Senate, he might have assisted in framing this bill. That, of course, is a part of the humor of the speech of the Senator. As if any Republican Senator would have been permitted to assist in that work! The fact is that while I was away during some of the time the Committee on Banking and Currency were considering this bill, and nothing was before the Senate, I was away under the order of the Senate with the junior Senator from Arkansas [Mr. Robinson] on the work of the Senate.

I doubt if any man has been in the Senate more than I have been during my term of office. I am always in my seat. I am here when the other side of the Senate Chamber is practically vacant. I try to attend to the duties of my office. If the distinguished Republican Senators who are members of the committee were unable to impress themselves upon the committee, I do not know what I could have done sitting here in the Senate when the bill was not before us.

Mr. SHAFROTH. Mr. President, I regret very much that there has been criticism on the part of the Senator from Minnesota [Mr. Nelson] and the Senator from Kansas [Mr. Bristow] as to the action of the conferees with respect to this bill. They seem to ignore the fact that every tariff bill that ever has been passed has been the result of conference; and not only that, but conferees have been appointed at the end of whose meetings the members of the opposite party were not permitted to appear and to consider the matter.

I wish to say that the Senators who have been criticizing the procedure stand in high esteem on the part of every member of the conference committee, but their action has been precipitated

Mr. BRISTOW. Mr. President, will the Senator yield to me to correct a statement? I understood him to say that every tariff bill had been conducted in the same way in conference. I challenge the statement, and I do not believe he can point to a single tariff bill in connection with which a conference has been held in this way.

Mr. SHAFROTH. I asked several Senators if that was not

I know the last tariff bill was passed in that way.

Mr. BRISTOW. Yes; but that is the only one.
Mr. SHAFROTH. If it was not done previously, it was just

due to the fact that they had such an overwhelming majority that it was not necessary to bring together the members of the party with relation to it.

Mr. SMOOT. Mr. President, I simply wish to say that the

Senator is mistaken, as far as the Senate is concerned, when he makes the statement.

Mr. SHAFROTH. I know it has been done in almost every instance in the House.

Mr. SMOOT. I know nothing about the House. I am speaking of the Senate. I do know that the statement is incorrect, so far as the Senate is concerned.

Mr. WILLIAMS. If the Senator will pardon me a moment, while I can not lay my hand on it now, my recollection is that the late Senator from Virginia, John W. Daniel, made a speech upon the floor of this Chamber in which he said that he and the other senatorial conferees were not invited in, except at the

very last moment, to be told what had been done, in connection

with the Payne-Aldrich bill. That is my recollection.

Mr. SMOOT. The Senator from Mississippi, I think, is mistaken. The Senator from Virginia, Mr. Daniel, complained of the fact that the hearings upon the bill were held in the pres ence of the majority of the committee, and without the minority being present, and that they were called in after the bill was completed; but he never complained that that was the case in relation to the conferees.

Mr. WILLIAMS. I may be mistaken, but that is my recollec-

tion. I will try to hunt it up. Mr. OWEN. Mr. President-

The PRESIDING OFFICER. Does the Senator from Colorado yield to the Senator from Oklahoma?

Mr. SHAFROTH. I do.

Mr. OWEN. I wish to call the attention of the Senate to the Record, on page 4783, August 2, 1909, after Senator Daniel complained of the action of the majority of the committee of conference, when Senator Aldrich used these words:

I may say, in passing, that I was one of the managers on the part of the Senate on the act of 1894. The Democratic members of the conference committee never invited me to be present at a meeting. I never attended a meeting of the conference committee, and I never expected to. I supposed that the gentlemen who were responsible for the legislation of 1894 would prepare that bill and agree, if they could, with the Members of the House of Representatives as to what its terms should be

Senator Aldrich then says:

When the conference upon this bill was appointed I, within an hour, called a meeting of all the managers. I stated to those gentlemen that we expected to proceed in the usual course, and that the Republican managers on the part of the Senate and of the House would come to an agreement as to the terms of their report.

And that is what they did do. They signed their report. That is shown here in the RECORD.

Mr. WILLIAMS. I am correct about Senator Daniel complaining there because he was not called into conference?

Mr. OWEN. You are.

Mr. WILLIAMS. I thought I was.

Mr. SMOOT. I remember very well the statement of the Senator from Virginia, Mr. Daniel, and I know the statement he did make was that the Republican Members met for the discussion of the bill before the members of the committee were called in.

Mr. SHAFROTH. Mr. President, the chairman of the Banking and Currency Committee of the House last night said when the Aldrich-Vreeland bill was brought before the consideration of the Committee on Banking and Currency, although he was the ranking Democratic member, he was denied any access what-ever to the consideration of it in the conference.

Mr. WEEKS. Mr. President—
The PRESIDING OFFICER. Does the Senator from Colorado yield to the Senator from Massachusetts?

Mr. SHAFROTH. Yes, sir.

Mr. WEEKS. I should like to correct that statement made by the chairman of the House Committee on Banking and Cur-He has forgotten what really happened. In the first rency. He has forgotten what really happened. In the first place, he was not the ranking Democratic member of the Banking and Currency Committee of the House. In the second place, I was one of the conferees on that bill, and Democratic Senators and Democratic Members were present and took part in the consideration of the report in conference.

Mr. SHAFROTH. All I know is the statement of the gentle-

Mr. WEEKS. His statement is wrong, and it should not be quoted by the Senator from Colorado.

Mr. SHAFROTH. The chairman of the Banking and Currency Committee of the House last night made that statement.

Mr. President-

Mr. SHAFROTH. I yield to the Senator from Nebraska.

Mr. NORRIS. To my mind if there is something wrong, and I believe there is, in the conferees of one party not calling in the members of the conference committee who belong to the other party, does it help the matter any for one party to cite the precedent of another? I should like to ask the Senator from Colorado if Senator Aldrich, on the bill that has been talked about here, did exactly what the Democrats are doing now, in refusing the other conferees any consideration, does he think the precedent set by Senator Aldrich is a sufficient justification for

the action of the present Democratic conferees?

Mr. SHAFROTH. Mr. President, I will say in reply that whenever a question that is before the Senate or the House partakes of the nature of a political question it is almost indis-pensable that there should be conferences of the Members of the Senate of that political party which favors it. It may be said that this is not a political question, but we know that it is.

We know that the most violent differences of political parties have occurred upon the very question of currency and banking. We know that in the platforms of the parties, nearly every time the conventions of the respective parties meet, there is always something containing an outline of the view of the party upon this question.

Mr. NORRIS. Mr. President-

Mr. SHAFROTH. I would rather not yield unless the Senator requests it specially.

Mr. NORRIS. I will not interrupt the Senator unless he wants me to do so.

Mr. SHAFROTH. In this case we met for the purpose of considering the bill, and we found from the conditions before we got into conference that there were irreconcilable differences, differences that did partake of a political nature. The Democratic platform contained a provision condemning a central bank, and yet every Republican member upon that conference announced that he was in favor of a central bank and would take just as few banks as he possibly could, in order to make it come as near to that ideal as he could. I have no criticism to make of that view. It is natural that they should have that view. It is in the line of centralization, and we have their arguments for it, and there are some good arguments. But here was a proposition that came right up against the Democratic platform, and yet to say that did not naturally come from political difference is to ignore language.

Mr. GALLINGER. If the Senator will permit me Mr. SHAFROTH. I yield to the Senator from New Hampshire.

Mr. GALLINGER. The question of one central bank was not submitted to the conference at all. It could not be submitted to it.

I say when they expressed themselves they Mr. SHAFROTH. favored it. I am talking about the situation that has grown up. We have the authority for that. We find that the question then came as to whether we should have four or whether we should have eight or more reserve banks. We found as a result of that that there was a sharp division, the Republicans being upon one side of that question. Then we found that other differences arose. We found that they were willing absolutely, in our minds, to destroy this bill. The bill had been introduced as a measure of a bank for banks, and it was the object and purpose of the measure as voiced by the Democratic sentiment that it should be a bank of banks, and whenever you attempted to take away the directorate it could not be a bank of banks. Therefore, in our judgment, if a single bank should ever come into it, thereby the whole scheme of currency and of bank reform would have been destroyed.

Mr. GALLINGER. Will the Senator permit one further sug-

gestion?

Mr. SHAFROTH. Yes, sir. Mr. GALLINGER. The Se

The Senator from Colorado surely was not afraid that three Republicans would outvote the six Demo-

cratic members of the conference committee?

Mr. SHAFROTH. I am describing what occurred in full. It was not the conference committee, but I want to lead up to the situation, and I wish to show our position in relation to the Here were differences that were marked, differences that absolutely would change directly opposite to the policy which had been thought to be best in the framing of the bill in the first instance. As a result it was manifest that we could not meet as a full committee and perfect the bill. ator from Nebraska [Mr. HITCHCOCK] recognized this difference and said the parting of the ways has come. There was pending at that time the very question whether we should have four or whether we should have eight or more regional banks, and also. I presume, we had considered the question as to whether it should be a bank of banks. At least there had been

a great expression upon the matter. Mr. WILLIAMS. Mr. President-Mr. WILLIAMS.

The PRESIDING OFFICER. Does the Senator from Colorado yield to the Senator from Mississippi?

Mr. SHAFROTH. I do; but I can not make an argument when I am constantly interrupted. I yield to the Senator.

Mr. WILLIAMS. In the interests of historic truth, it is so

seldom that the Senator from Utah, as a matter of fact, fails in his memory as to what occurred on this floor that I wish to read a few things that Senator Daniel did say. He said:

I have three times called the attention of this body-

That is, the Senate-

I have three times called the attention of this body to the fact that conferees of the Senate—three in number—have been hindered, impeded, thwarted, and overturned in their efforts to discharge their duties to you as honest representatives and to the country which they respect and desire faithfully to serve.

That is, the conferees now; not the hearings upon the bill. He further said:

The Senate did me the honor—and it is one that I profoundly appreciate, although I fear it was much more earned by the length of my service than by any abilities that could be fifly attributed to me—to include my name in the appointment of the following Senators as the conferees on this immense tariff bill.

Then he names the Senators.

I desire to say to you, Senators, that I have done the best I could in my feeble way to exercise the duties which you under the law saw fit to impose upon me,

Still further, he says:

A solemn and honorary bond had been entered into by word of mouth tween the chairman of the conference committee and the Democratic afterees that they would be called as soon as the bill was ready to

Now, that was all Daniel hoped for, all he expected, all he demanded.

demanded.

With a view, of course, to their voting for or against it.

I will state here, as I have previously stated in the Senate, that we were so called after the bill was first recommended by the conferees, and it was in pursuance of a right then recognized and of a practice then performed. Accordingly, on that morning at 10 o'clock, in pursuance of that agreement and that understanding, the Senator from Texas and myself reported ourselves at the conference committee in the annex. In the chair sat the chairman, the Senator from Michigan [Mr. Burrows] sat on his right flank, the Senator from Pennsylvania [Mr. Penrose] near by, and I noticed the Senator from Maine [Mr. Hale], and the Senator from Illinois [Mr. Cullom] also there. The question was asked, "Gentlemen, are you ready to submit the bill to us?" "No; there are five or six things in the bill as to which we have not reached a conclusion."

I came over to the Capitol Friday morning, and I stayed here all day until just before 5 o'clock that I might be in reach of the call of the committee, who intimated that they might be ready that afternoon. When I went from here I went down to the annex—right by them. The day sped. The chairman of the committee—whether he had signed the report or not I do not know at the moment—went out, where I had a short time perhaps preceded him, where we expected the Wrights to fly their aeroplane. I did not know until the next day that that committee, which was in default of a faithful and honorable promise to me and my associates, had reported to the House.

Whether the Senator from Virginia was right or wrong, I

was right in saying he had made the complaint.

Mr. SMOOT. Mr. President, I do not want to take the time of the Senator from Colorado, but from the RECORD read I see that the Senator from Virginia not only spoke of the hearings before the bill was reported to the Senate but also of the conference as well. I admit my memory was at fault as to the

Mr. WILLIAMS. I am always delighted to find the Senator from Utah wrong about his recollection of a fact which took place in the body of the Senate. I gleaned that from the news-

papers, and I was certain I was right.

Mr. SMOOT. I will say that I never in my life nor will I ever as long as I am a Senator make a statement on the floor of the Senate that I do not believe is absolutely correct. think this is about the only time that I was ever mistaken, and in this I was only partly mistaken, because the Senator from Virginia referred both to the hearings and to the conference report, and as I remembered he referred only to the

Mr. OWEN. Mr. President, I call for the regular order.

The PRESIDING OFFICER. The Senator from Colorado

will proceed.

Mr. SHAFROTH. As I was saying, here was a committee that met for the purpose of considering this bill and to settle the differences that existed, which had developed through the hearings and during the consideration after the hearings. was manifest that no bill could be agreed upon while there were Senators upon one side and Senators upon the other. We could have voted until doomsday, and if we had waited until somebody yielded we never could have reported it. It must be remembered also that some of the Republican

Members were very violently opposed to this bill. The Senator from Kansas [Mr. Bristow] said upon one occasion that it was the most iniquitous bill he had ever read in his life. When you meet under those circumstances you must expect that Senators will justify themselves in voting for anything in order to defeat a bill. We regarded not that they intended it that way, but that it would result in that way; that whenever they attempted to deviate this bill from the very foundation of it, from the very elements that entered into it, making it not a banker's bank, there could be but one result, and that result would be the destruction of the bill, because the bankers would never come into it under any other circumstances.

That being the case, what was it natural to do with those who believed one way? It was just as the Senator from Nebraska said—the time of the parting of the ways had come. Of necessity there was a line between the Democrats and

the Republicans, and necessarily there must be cooperation among the Republicans as well as among the Democrats. That made the justification, and it made a clear necessary condition that must arise in the consideration of a bill.

Mr. President, following that we had a conference and that conference agreed upon a bill. The Republicans criticized the Democratic conference, but nevertheless we could frame nothing without that conference. That course was absolutely indispensable if we wanted any bill at all.

Of course the discussion occurred upon the floor of the Senate. Then the conferees were appointed. I have no doubt but what every man who was appointed upon that conference committee regarded that this would be the way in which, in the first place, the bill would be considered by the members of the conference committee of the Senate and House. First, the Democratic conferees would discuss the matter and then the Republican members of the conference committee would be asked to come in and make any suggestion. That was done, and as has been described by the Senator from Oklahoma, there was no suggestion offered.

That must inevitably be the rule. They naturally said that we had made up our minds on it, and they did not care to do it. But that of necessity must be the rule wherever you have a political measure or a question that political platforms have

divided upon.

Now, then, I refer to what Mr. GLASS said in his argument before the House of Representatives last evening. I want to call attention to the exact language he used, because he described the situation. He says:

Then we were treated just now to the one-minute gush of the Wyoming geyser. [Laughter on the Democratic side.] He is still "harping on my daughter," and talking about "caucus rule," and the exclusion of the Republican conferees, forgetting the fact that when the Vreeland-Aldrich bill was passed by a Republican Congress the Democratic conferees were excluded. I remember that fact distinctly, because I was one of them. I was not admitted to the room until Senator Aldrich on the one side and Representative Vreeland on the other had completed the draft of the bill. Then I was asked in and had it handed over to me. [Laughter on the Democratic side.]

That is the testimony as to what occurred in the conference between the Senate and House as to the form of the bill.

The Senator from Michigan [Mr. Townsend] attempts to make out that Mr. Bryan is at the bottom of this bill and that it is a complete surrender to his views concerning banking and currency. Yet we only an hour ago heard the Senator from Kansas [Mr. Bristow] say that we had absolutely surrendered to the banks in this matter. I take it that when there comes from one side of the Chamber a condemnation of the bill because it represents the views of William Jennings Bryan and then from the same side of the Chamber, and both the men voting together upon every question, we hear that it is an absolute surrender to the banks, there is something of an inconsistent nature in the propositions that are made there.

The conferees, as well as the members of the Senate Committee on Banking and Currency, have tried to make this a good workable bill. We found that people had fundamental ideas that would not agree with ours. We found that they were voting that way, and voting solidly. As a result, it caused this difference. It necessitated a conference committee, and that the members upon one side should get together and arrange the matter and in every way perfect the bill according to their

If we had differed on immaterial or inconsequential matters it would have been different, but when you strike the very foundation of the bill, with an attempt to change it from a bankers' bank into one of a different kind, which, in our judgment, would absolutely have destroyed the bill, of course there is no use saying that modifications or changes could be made; their work would delay a report or produce a deadlock in conference.

Now, I want to say simply this, that there has been an attack made upon the chairman of the Committee on Banking and Cur-I think it is as unfounded and improper as any attack could be made. There are items in the bill that are in some instances in favor of State banks and sometimes against State banks, sometimes in favor of national banks and sometimes against them. I defy any man to point out the action of the chairman of this committee in ever having a line of conduct in his votes that would indicate he is favoring any bank he may be connected with. There are various things that he might be interested in, if you are going to attempt to show relations that are so remote as that a person being a director or a stockholder in some small bank, he is controlling in any manner all the credits of the country.

We find, in the first place, the question of the Federal reserve board. It has not a banker on it. Did you find the Senator from Oklahoma voting in favor of the bill—in favor of putting any banker on the Federal reserve board? Oh, no; you found that he was absolutely insistent upon the fact that there should not be any banker upon the Federal reserve board. Yet, according to the statement made by the Senator from Kansas, you might expect that he was going to frame a bill here in the interests of his own little bank in one of the towns in Oklahoma, and that, therefore, he would vote in favor of anything which would aid or assist that bank. Is that a fair imputation? Is there anything that should receive the indorsement of anybody in a statement of that knd?

Now, you have heard the declamations made upon the other side in favor of not forcing the banks into this system. It is said that it ought to be sufficiently attractive for them to come into the system. That has been urged repeatedly by Member after Member upon the other side of this Chamber. Yet did you hear the Senator from Oklahoma, either before the bill was framed or after it was framed by the committee, or on the floor of the Senate, uttering one word in favor of making it so attractive that the banks would come in voluntarily? Yet from the inferences which are to be gathered, because the Senator from Oklahoma owns a little stock or a little bank down in Oklahoma, he would subjugate his judgment in order to advance his private interests. We do not see that that criticism can possibly be considered seriously by anyone.

Mr. President, I have been informed that we are probably taking more time than we ought to take on this side, and therefore I will not go into an analysis of this matter with relation to the Senator from Oklahoma any further. I merely want to say that the purpose and object of the bill is to create a discount market, to mobilize the reserves, and to establish an elastic currency. That is what the bill does, and I am satisfied that it will meet with the approval of the American people.

Mr. GALLINGER. Mr. President, I propose to take but a few minutes in this discussion.

For myself, Mr. President, I have been here, as some of you know, a long time. It has been my privilege to serve on a great many committees of conference, and I have never yet served on a committee of conference where the entire membership of the conferees on the part of the Senate were not called into consultation at the very beginning. If that rule has been departed from, either in the past or in the present instance, it is a very unfortunate circumstance. The matter of a conference was established in the very first Congress that was held in this country, and the theory that was then laid down—and I assume almost all Senators are familiar with it—applies to-day as much as it did at that time.

On the 15th of April following, this committee reported that they "had conferred on the business with a committee of the House of Representatives for that purpose appointed"; whereupon it was "Resolved, That in every case of an amendment to a bill agreed to in one House and dissented to in the other, if either House shall request a conference and appoint a committee for that purpose, and the other House shall also appoint a committee to confer, such committee shall, at a convenient time, to be agreed on by their chairman—

This relates to their first meeting-

meet in the conference chamber and state to each other verbally or in writing, as either shall choose, the reasons of their respective Houses for and against the amendment, and confer freely thereon,

I recall the fact, Mr. President, that this morning in debate the Senator from Oklahoma [Mr. Owen] suggested that they did not want much discussion in the committee of conference, and for that reason they excluded at least one member of the minority. But in establishing this committee of conference in the early days of the Republic, it was distinctly stated that they were to meet and either verbally or in writing express their individual views, with the purpose, of course, of influencing the decision.

I remember very well when William J. McDonald, formerly Chief Clerk in the Senate, sat at that desk. He was a distinguished parliamentarian, as had been his father before him, who had occupied the same position. I have somewhere in my possession a little book that Mr. McDonald prepared and had printed, entitled "Questions of Order, and Decisions Thereon." I notice that the Acting Secretary has it in his hand. In that little book Mr. McDonald laid down this principle:

The importance of providing for the settlement of disagreements between the two Houses caused them thus, at a very early period, to adopt this rule, the object of which was to facilitate and to expedite legislation. * * * The concluding sentence of this rule says that the conferees "shall meet in the conference chamber and state to each other verbally or in writing, as either shall choose, the reasons of their respective Houses for and against the amendment, and confer freely thereon." That is to say, all conferences between the two Houses under this rule shall be free conferences. Not merely that there shall be free discussion in the conference chamber, but that the result of the conference shall be the free judgment of the conferees, and not one prescribed in advance, or in any way anticipated or shaped by the separate action of either House.

I notice in Gilfry's Precedents, "Decisions on points of order," and so forth, there is a mass of information on this subject which it would be well for all of us to read and, so far as possible, retain in our memory. On page 211 attention is called to a statement by the late Speaker Reed, which is to my mind an important contribution to this question:

A conference, as now conducted by legislative bodies in the United States, is what is known as a full and free conference. Speaker Reed, in his Manual of Parliamentary Law, chapter 15, section 242, gives a clear and concise definition, as follows: "A free conference is one where the conferees meet and present not only the reasons of each House, but such arguments and reasons and persuasions as seem suitable to each member of the committee. Instead of being confined to reasons adopted by either House, each member may present his own. A conference may therefore be a free conference, though each House may have instructed its members and limited them to the terms of the agreement. This method of conference is the only one known to our parliamentary law; at least it is the only one now in practice. When two legislative bodies in this country have a conference it is a free conference."

Mr. President, as I said in the beginning, if the Senate has departed from the rule laid down by Speaker Reed, by Mr. McDonald, and by Thomas Jefferson, because that matter is discussed in Jefferson's Manual, and is in the habit of not calling in all the conferees at the initial meeting of the committee of conference, it is an unfortunate condition, and it ought not to be sanctioned.

In the present instance, there were upon the part of the Senate six Democrats and three Republicans on this conference committee. It is just possible, it has been suggested to me, that it might have happened that two of the Democratic members might have joined the three Republican members and controlled that conference committee, so far as the Senate was concerned, on one or two somewhat important points. It is inconceivable to me, from what is laid down in the books and always insisted upon as a full and free conference, that the voice of those three Republican members should have been excluded. It was not such a conference, and, if I had my way, Mr. President, I would add an additional rule to our code of rules, providing that in the meetings of conference committees the entire membership of the committee shall be invited not only to the initial meeting, but to all other meetings of the committee. It is unfair. If the Republicans have practiced it in the past, they did something that they ought not to have done. Our Democratic friends, practicing it on this occasion, did an injustice both to themselves, to the minority on the conference committee, and to the Senate itself.

I submit, Mr. President, that while there is no remedy for what has occurred, I think this debate may be of some use to the Senate if it emphasizes the fact that we have no right to say that a question is a political question when it is submitted to conference. It is in the possession of the committee of conference, and not in the possession of a portion of that committee who can reach conclusions that may correct or not correct and exclude from consideration and conference, because they have the power to do it, the minority members of that committee. I regret it was done in this instance. I apprehend had it been done otherwise the result would have been the same; I apprehend we would have had precisely the same bill before us in the conference report we have now; but it would have saved a great deal of unnecessary friction and would have at least not added another precedent to what I conceive to be an extremely bad practice, because it is in violation of every parliamentary rule that I have ever read on the subject of conference committees.

Mr. WEEKS. Mr. President, the Senator from Illinois [Mr. Lewis], who has just addressed the Senate, is always entertaining, and he is a consistent defender of his party. His motto might well be "My party, right or wrong." What he has said as to the Senator from Michigan [Mr. Townsend] has been replied to by that Senator, and heaven knows I would not think of defending the Senator from Kansas [Mr. Bristow] in his presence.

The Senator from Illinois, however, is not entirely consistent when he chides the Republican Party for its inaction or its inactivity in connection with banking and currency legislation. Everything that has been done for 50 years to correct or to better our financial system has been done by the Republican Party, and invariably it has been done against the united opposition of the Democratic Party. Every Democrat in Congress voted against the national banking act. Democrats then in Congress or those who are now Democrats were responsible for continuing the greenbacks until they had cost the country, by the estimate of those competent to judge, \$500,000,000 by keeping out a depreciated currency 14 years after it should have been retired.

The Democratic Party—or a large portion of the Democratic Party—were responsible for the doctrine of the free and un-

limited coinage of silver on the basis of 16 to 1, which cost the

country inestimable amounts.

The Democratic Party voted unanimously against the establishment of the gold standard in 1900, and voted as unani-mously against the passage of the Aldrich-Vreeland bill in

I have referred to the Aldrich-Vreeland bill before, not that I consider it in any sense a piece of legislation which is technically perfect, but it is on the statute books, and if there had been necessity for its use I believe it would have furnished the country with sufficient currency to have bridged over the kind of a panic that we had in 1907.

All this legislation has been enacted by the Republican Party, and, I repeat, it has been done against the united and insistent opposition of the Democratic Party. So I think it is hardly just to criticize the Republican Party for what it has not done, even if it is admitted that its record is not entirely clear.

In addition to that the Republican Party has been the means, through the Montary Commission, of agitating this question, of causing it to be publicly discussed, of increasing the public's knowledge of the question to such a degree that this legislation is now possible; and very much of the bill on which we are now going to vote has been taken bodily from the report of the Monetary Commission. So it can hardly be said that that part of the work of the Republican Party has not been justified in

the eyes of the opposition.

A Senator on the other side has quoted the chairman of the Committee on Banking and Currency of the other House in regard to conferences or caucuses. I will make the general statement, Mr. President, that there never has been an instance in the history of this Government when all Members appointed by the presiding officers of the respective bodies over which they presided have not taken part in conferences, except on tariff legislation. The tariff is an entirely different matter from the ordinary questions which come before Congress. There are people who talk of taking the tariff entirely out of politics, and yet the tariff is the very essence of division between political parties. There may be some reason-I think, myself, there is some reason-why a tariff conference and a tariff bill should be adopted and passed on by members of the political party which is responsible for the legislation; but that does not apply to legislation of this character.

At the expense of taking a little time, and possibly of reiteration. I want to call the attention of the Senate to just what has been done, because the people of this country, as their opinions are voiced through the press, have said time and again during the last six months that this legislation should be entirely removed from any political complications. Has that been done by the Democratic Party, whether the legislation is good, bad, or indifferent? I say, not at all. In the other House the bill was considered by the Democrats of the Committee on Banking and Currency sitting as a separate body, no Republican member of the committee being admitted for any purpose or reason. The bill was taken directly into the House, where it was reported, and was sent to a Democratic conference. The Democratic conference or caucus reported the bill, and after a day or two of debate the bill was passed as it came from the conference,

That is the history of the bill in the other House, and yet Democrats will say, "What did you do with the Aldrich-Vreeland bill? Did you give more time to debate in the House?" say no; the time was less when the Aldrich-Vreeland bill came into the House, but the circumstances were entirely different. Congress had been in session six months; there had been a consistent attempt to get legislation through the regular channels and in the ordinary way, and there had been a failure to do so. The session of Congress was approaching its end: It was necessary that legislation should be had, and therefore the-usual method of bringing in a rule limiting debate was adopted; but the circumstances were entirely different, as I have said.

This bill came over to the Senate. Has it been considered in the Senate as a nonpartisan proposition? I submit to Senators that it has not been, in any sense. Hearings were given by the entire committee, and I think the hearings were given against the judgment of some of the majority on that committee; but there is no one to-day who questions the value of those hearings. The bill is much better than it was when it came from the other The bill, in my judgment, is better to-day than it was when it passed the Senate, although in two or three respects I think it was, not improved in conference. It was, however, improved in other respects sufficiently so, it seems to me, that on the whole it is a better bill.

The bill, after having been acted on for some time in the full Committee on Banking and Currency of the Senate, was taken into a Democratic conference, and an agreement was made and action taken which should have been taken after it had been senting the other House was not permitted to be present, neither

demonstrated in this body that the bill could not pass without summary caucus action.

What is the result? The result is that we have in this bill some propositions which not even two-thirds, and in two or three cases only a small majority, of the Democrats themselves are in favor of. If every Democrat were voting his own judgment, as every Republican in this body has voted his judgment, several of these propositions would go out of the bill.

The Senator from Illinois chides the Senator from Kansas because he has not voted against his party on all propositions. When more than one Democrat will show the independent spirit which the Senator from Kansas has shown in the pastwhen one Democrat will do that-then we may properly say that there is some reason for the criticism which the Senator from Illinois has made of the Senator from Kansas.

As a matter of fact, however, Democrats know that some of the propositions which are in this bill were passed in their caucus or their conference by one majority, by three majority, or four majority, or five majority, and that in every one of those cases the Republicans in this body are opposed to the majority of the majority in their caucus action; in other words, if a free and untrammeled vote were taken here, I think that nearly three-fourths of the Members of this body would vote against some of the provisions to be incorporated in the bill. That is the fault of the caucus action.

I am one of those who believes that the majority party is responsible for legislation. In the final analysis there is nothing to do but for the majority to take the bit in its own mouth and go ahead, perfect, and pass legislation. I believe in that; but the majority in this body has not proceeded along those The majority took that course before any debate had been held in the Senate, before determining whether the bill could be improved on the floor of the Senate as it might have been, it has taken that action in an unprecedented way, and I believe that whatever the result of the legislation will be, the country will not approve of the course which it has taken.

Mr. BRISTOW. Mr. President—
The VICE PRESIDENT. Does the Senator from Massachusetts yield to the Senator from Kansas?

Mr. WEEKS. Yes. Mr. BRISTOW. Mr. President, my name has been heard a good many times in the debate.

Mr. WEEKS. I beg the Senator's pardon for using it.

Mr. BRISTOW. Not at all. My name has been used in connection with some remarks made by the Senator from Illinois [Mr. Lewis], remarks which I thought of but little consequence, and therefore paid no attention to them; but I desire to say, since the Senator from Massachusetts has referred to the matter, that my votes here have been controlled by my judgment as to what were the merits of the particular proposition for which I was voting. I have been interested in what I voted for a great deal more than with whom I voted. Whenever any matter comes up which appeals favorably to my judgment and my conscience I vote for it; I care not whether one man may vote with me or against me if I am voting for what I believe is the right

Mr. WEEKS. Mr. President, just one word about this conference. As I said a moment ago-I think I referred to it-it has been stated that when the Aldrich-Vreeland bill was in conference, Democratic Members of the Senate and of the House were not present during the conference. That statement is based on what was said in a speech made by a gentleman from Virginia last night in the other House. I doubt the propriety of quoting Members of the other body on this floor; I doubt the but so long as that has been done, I want to say that I was a member of that conference committee, and I remember perfectly what took place. The then Senator from Virginia, Mr. Daniel, was a member of that conference committee and was present. The senior member of that committee in the other House at that time was the gentleman from Louisiana, Mr. Pujo, who was present at the conference. I do not recall that the present chairman of the committee was present, but two members of the minority were and took part in the deliberations of the conference. I remember the incident so clearly that there can not be any doubt about it. I am sure when the gentleman from Virginia looks up the facts, he will find that that is the case, and that the gentleman from Louisiana, who was then the senior minority member of the committee, if he were present would substantiate the statement which I am making.

In this case it is true that the members of the House conference committee wished to act as the representatives of that body, Republicans and Democrats alike, and their doing so was opposed by the Senate Democrats on the conference committee. So the Republican member of the conference committee reprewere the three Republican Senators who had been appointed by the presiding officer of this body as a part of the conference. I state once more that in the history of this Government there never has been such an instance except in the consideration of partisan tariff legislation, and it is an entirely unjustifiable course, even if it were supposed that there could not have been obtained an agreement on some matters as promptly as has been the case.

Now, I want to refer for just a moment to the provisions of this bill which I think are distinctly worse than they were when the bill left the Senate. One of them is the provision for collecting checks drawn on member banks. As the bill passed the Senate it provided for the collection of checks drawn on reserve banks and member banks by other reserve banks at par, but it provided that checks drawn on member banks by individuals or corporations or firms should be collected after making a reasonable and suitable charge for the service. It is a fact that a large part of the earnings of banks, especially of country banks, comes from collection and exchange business. One witness from the South before the Banking and Currency Committee stated that of his \$48,000 total earnings, \$20,000 came from this item alone; and it is true that without exception, those who appeared before our committee stated that they believed it right and proper that they should be allowed to continue to enjoy reasonable earnings from this banking process. Under this bill they can not enjoy any earnings whatever from that source, because all checks and drafts drawn on reserve banks by member banks must be collected at par, and provision is made that member banks may collect checks or drafts drawn by indi-viduals or firms, but can only charge the cost of the collection for so doing; in other words, the earnings of every bank in this country, and especially of the country banks, are going to be materially crippled as a result of this provision.

I object, Mr. President, to the provision for the organization That brings in another political phase which of this system. should have been left out of this bill. As it is now, we are going to have this system organized by the Secretary of the Treasury. the Secretary of Agriculture, and the Comptroller of the Currency, if one is ever appointed. That is a political body, pure and simple; and you can not divorce it from politics under any circumstances. The Hitchcock provision of the bill which was brought in here provided that the reserve board should consist of nine, including the Secretary of the Treasury, and that those nine gentlemen should organize this system. That seemed a reasonable method of procedure, because it was to administer the system, and therefore it seemed right that they should organize it. The provision adopted by the Senate was that the Secretary of the Treasury and two members of the reserve board, to be appointed, should constitute the organization com-That in itself was somewhat worse, I think, than the provision which we brought in; and yet it was distinctly preferable to the provision in the conference report.

I submit to the Senate that the adoption of this method of organizing the board is going to throw a suspicion of political influence around the most important part of the whole system we are establishing. If we are not going to have politics removed from it, if there is going to be a suspicion in the minds of the people of this country that this is going to be a political machine, manipulated by anybody or by any party, then its usefulness will be very largely impaired, if not destroyed, at the very beginning. I can not too strongly enter my protest against this method—and I am fearful that it has been in the minds of those in control from the very beginning that this method should be adopted—of organizing this great non-partisan business system, which should be of the greatest advantage to the people of the country, and will be if properly administered.

Mr. OWEN and Mr. LEWIS addressed the Chair.

The VICE PRESIDENT. The Senator from Oklahoma.

Mr. OWEN. Mr. President, the Democratic members of the conference committee have been criticized very severely for a violation of the precedents in meeting together and dealing unjustly with the minority members of this committee. I think it is only just and fair to say that the precedents justify the action we have taken. That practice was followed in the tariff bill of 1894 as well as in the later tariff bill of 1897. In connection with the tariff bill of 1909, when Senator Daniel complained against the conference committee, Senator Aldrich, giving the reasons why the Republicans met together to adjust their differences between themselves, said:

I think I can safely say that if the committee had followed his suggestion—

That is, that all should meet together—
a year from now would have found us without a bill reported.

And with regard to the facts of the conference of August 2, 1909, Senator Aldrich said:

When the conference upon this bill was appointed I, within an hour, called a meeting of all the managers. I stated to those gentlemen that we expected to proceed in the usual course and that the Republican managers on the part of the Senate and of the House would come to an agreement as to the terms of their report, and that when they had agreed I would call the full conference together and submit it to them, and that that meeting should be held 24 hours, at least, before the bill was reported to Congress.

Mr. President, the House acted on Saturday. The Democratic members of the conference committee on the part of the Senate met and immediately undertook to reconcile their differences with the Democratic conferees of the House. They worked until half past 4 o'clock Monday morning, at which time there was sent to the printer a preliminary draft of the conference report, subject to further correction and consideration before it should be finally completed and submitted. At the same time there was ordered to be printed for the Senate a first edition of this preliminary draft of the report of the committee of conference. In that first report we had reconciled most of the differences between the Democratic members of the conference committee of the Senate and of the House, but had not then completely reconciled all differences.

At 4.30 o'clock on Monday morning the Printing Office was given the data and at 7 o'clock a. m. the copy was prepared and at 1 p. m. the preliminary draft was printed in three parallel columns. As soon as we got the copy from the printers—1 p. m.—we immediately served the Republican members with copies and explained what work we had done and asked them to go over the items and see to what extent the adjustment of the points of difference was agreeable or objectionable to them. That was about 1 o'clock—some time shortly after 1, to the best of my recollection. Therefore, until 4 o'clock there was about three hours for the Republican members of the conference committee to examine the work which had been done as a preliminary matter by the Democratic members of the conference committee.

The Senator from Ohio was under the impression that there were no changes made after that. He is mistaken about that. In the second edition of the amended bill printed for the use of the conferees—the first print was not a report, but only a preliminary draft—changes were made on pages 4, 5, 7, 8, 9, 10, 12, 13, 14, 15, 16, 17, 18, 22, 24, 26, 27, 28, and 29. The second edition of that print shows that those changes were made after all the conferees, Democrats and Republicans, had their meeting.

The full meeting of the conferees was called at 4 o'clock, and they were all present, except Senator CRAWFORD, who had gone The Republican conferees who for three hours had had the print showing what the Democratic conferees had been able to accomplish, were then invited to express themselves with regard to any of these items, but they felt offended because they had not been taken into consultation in the preliminary work and alleged that they had been treated with some indig-In point of fact, no indignity whatever was done them or intended to be done. It was believed that we would make time by having the Democratic members come together and reconcile their differences without the interference of their political opponents; and it was expected that the Democrats would stand together as party members and not permit the Republican conferees to control the matter in conference any more than the Democrats had intended or expected to permit the minority members of the Committee on Banking and Currency to control and write this legislation in the Banking and

Currency Committee by cooperating with one Democrat.

There is a party obligation resting upon the Democracy. They are in honor bound to deliver to the country a release from the intolerable conditions which have so long prevailed in this country under Republican and plutocratic rule. I am not willing to charge those intolerable conditions to any one party alone. I rather think they have grown up out of commercial and financial conditions for which perhaps no single individual can be held responsible; yet the Democratic Party, in its great desire to improve conditions, made certain great and serious promises to the country and that party can only carry out its pledges to the Nation by cooperating as a party and by strict party organization.

I realize the difficulty of caucus action. I have myself advocated having a stenographer in the conference or caucus of the Democrats, so that there might be complete publicity. We have been repeatedly reproached with secret, underhand caucus action, as if there were a secret possible in a party caucus. Where 50 men gather together there is no possible secrecy. We talk about the secrecy in the Senate in executive session, and yet everybody knows that whatever is done in executive session is announced in the public press the next morning. We have tried from time to time to prevent exposure of that

kind on the theory that the proceedings in executive sessions should be secret. It is a mere farce and a mockery.

Mr. GALLINGER. Mr. President-Mr. OWEN. I yield to the Senator.

Mr. GALLINGER. Just one question. I noticed that the Senator from Oklahoma said that the Democratic members did not propose to permit the Republican members of the conference committee to control the action of the conferees. will ask the Senator this question: Supposing those three Republican members held the same views that two of the Democratic members did on the matter of insuring deposits, does not the Senator think that those five men in that conference ought to have had their way on that particular point?

Mr. OWEN. I will say to the Senator that the six members of the conference committee representing the Senate were in favor of the matter to which the Senator refers, but the House absolutely refused to agree. I will say further to the Senator, answering the spirit of his question, that if there were two Democrats on the conference committee representing the Democrats of the Senate I would regard it as party perfidy on the part of one of them to vote with the Republicans to turn down

his colleagues.

Mr. GALLINGER. Then a conference is of no consequence at all, if its members are not to be permitted to express their views and vote their views. I have always supposed the rule to be that it is necessary to have a majority of the conferees of each House to agree upon a report, and I had always supposed, if three Republicans chanced to agree with three Democrats in a conference committee of nine, that they ought to have

their way.

Mr. OWEN. I do not understand that to be the practice; I do not think that is the practice in a matter of this kind. may be true with regard to some immaterial matters, but not in the case of a great bill of this kind, which has been made a matter of party action by the Republicans as well as by the Democrats, because the Republicans all lined up practically unanimously against it in the Senate, as well as in the comstood together in the committee as a solid mittee. They stood together in the committee as a solid phalanx and made it a political matter by their own action. In the first case the chairman of the committee attempted to prevent this matter being treated in a partisan way and thought it was possible to do so, but he found it was impossible to do it; and when he ascertained that to be a fact, he did the only thing remaining for him to do-he treated it as a party matter. He was completely justified in doing so, because there was no other way in which to get adequate results and to represent the sentiment of the Democratic Party in this country.

Mr. GALLINGER. Mr. President, let me make this suggestion: The Senate passed upon certain very important matters that have been eliminated from the bill as it comes from the conference. Suppose that three Republican Senators and two Democrats on that conference committee had stood for that provision which the Senate put in, does not the Senator think that

they ought to have had that privilege?

Mr. OWEN. They might in that contingency have referred the matter back to the Senate again, but the representatives of the party in power should act together and not permit the representatives of the minority to divide their councils.

Mr. GALLINGER. Oh, well, I do not see why they should

Mr. OWEN. They should because the House refused to agree to the matter to which the Senator is referring, and if the Senate conferees did not yield, there remained nothing but a disagreement reported back to the Senate.

Mr. GALLINGER. Of course, then, a disagreement would have to have been reported, which is a very common thing in

connection with conference reports.

Mr. OWEN. However we may argue this matter and indulge in rhetoric and in suggestions for and against across the aisle, I think it at last comes down to the question that under our present form of government, where we are moving under party organizations, there is no escape from party responsibility and the plain common-sense duty of the party to act through its organization in the management of matters for which the party feels a party responsibility. The Republicans have done that in the past and the Democrats are doing it now. I hope to see the day come when that may be obviated, and that day will come when Senators stand on this floor and represent in truth nothing but the wishes and the desires and the welfare of the people of this country; and it never will come until then.

Mr. GALLINGER. And the Senator thinks he is the only

one who does that, I presume.

The VICE PRESIDENT. The hour of 2 o'clock and 30 minutes having arrived, the question is, Shall the Senate agree to the report of the committee of conference?

Mr. NELSON. On that I call for the yeas and nays.

The yeas and nays were ordered, and the Secretary proceeded

to call the roll.

Mr. GALLINGER (when Mr. BURLEIGH's name was called). The junior Senator from Maine [Mr. Burleigh] is detained from the Senate on account of illness.

Mr. CHAMBERLAIN (when his name was called). I have a general pair with the junior Senator from Pennsylvania [Mr. which I transfer to the junior Senator from New OLIVER]

Jersey [Mr. Hughes] and will vote. I vote "yea."

Mr. CHILTON (when his name was called). I have a general pair with the junior Senator from Maryland [Mr. Jackson], but under the terms of it I am allowed to vote on the final passage of the bill and the conference report. I therefore vote

Mr. CLARK of Wyoming (when his name was called). have a general pair with the senior Senator from Missouri [Mr. STONE]. That Senator is absent because of severe illness. his absence I withhold my vote. If he were present, and if I

were at liberty to vote, I should vote "nay."

Mr. SHEPPARD (when Mr. Culberson's name was called). I wish to announce the necessary absence of my colleague, the senior Senator from Texas [Mr. Culberson]. He is paired with the senior Senator from Delaware [Mr. DU PONT]. If my colleague were present, he would vote "yea."

Mr. BRYAN (when Mr. FLETCHER's name was called). My colleague [Mr. Fletcher] is absent. He is paired with the junior Senator from Wyoming [Mr. WARREN]. If he were present, he would vote "yea."

Mr. MARTINE of New Jersey (when Mr. Hughes's name was My colleague [Mr. Hughes] is out of the city on official business.

Mr. LEA (when his name was called). I have a general pair with the senior Senator from South Dakota [Mr. Crawford], but as he voted for the bill I feel at liberty to vote on this roll call. I vote "yea."

Mr. WEEKS (when Mr. Lodge's name was called). Although I have done so before to-day, I wish to announce that my colleague [Mr. Lodge] is absent on account of illness, and that he has a general pair with the junior Senator from Georgia [Mr. SMITH

Mr. MYERS (when his name was called). I am paired with the junior Senator from Connecticut [Mr. McLean]. In his absence I withhold my vote, unless it should prove necessary in order to constitute a quorum. If at liberty to vote, I should

Mr. REED (when his name was called). I have a pair with the senior Senator from Michigan [Mr. SMITH]. I transfer that pair to the senior Senator from Louisiana [Mr. Thornton] and

will vote. I vote "yea."

At this time I desire to announce that my colleague [Mr. STONE | is unable to attend the Senate. He is confined to his room by illness, which has lasted now for several days. If he were present and at liberty to vote, he would vote " yea." his absence he is paired with the senior Senator from Wyoming [Mr. CLARK].

Mr. SAULSBURY (when his name was called). general pair with the junior Senator from Rhode Island [Mr. COLT], and in his absence withhold my vote. If at liberty to

vote, I should vote "yea."

Mr. WILLIAMS (when Mr. Shields's name was called). am requested to announce the necessary absence from the Chamber of the junior Senator from Tennessee [Mr. Shields], on account of illness.

Mr. SMITH of Arizona (when his name was called). before me a telegram from my pair, the senior Senator from New Mexico [Mr. Fall], in which he says that I am released from the pair on the final vote; and he wishes me further to announce that if he were present he would vote for this bill on its final passage. I vote "yea."

Mr. SMITH of Georgia (when his name was called). I have

a general pair with the senior Senator from Massachusetts [Mr. I transfer that pair to the senior Senator from South

Carolina [Mr. TILLMAN] and will vote. I vote "yea."
Mr. TOWNSEND (when the name of Mr. SMITH of Michigan was called). As has been stated by the junior Senator from Missouri [Mr. Reed], the senior Senator from Michigan [Mr. SMITH] is paired with the junior Senator from Missouri. If my colleague were present, he would vote "nay."

Mr. SUTHERLAND (when his name was called). paired with the senior Senator from Arkansas [Mr. Clarke], who, I understand, is absent. I transfer my pair to the junior Senator from Maine [Mr. Burleigh] and will vote. I vote

nay."

Mr. RANSDELL (when Mr. Thornton's name was called). The senior Senator from Louisiana [Mr. Thornton] is unavoidably absent. He has a general pair with the junior Senator from South Dakota [Mr. STERLING]. If present, he would vote 'vea.'

Mr. WARREN (when his name was called). I am paired with the senior Senator from Florida [Mr. Fletcher]. I transfer that pair to the junior Senator from Wisconsin [Mr. STEPHENSON) and will vote. I vote "nay."

Mr. WILLIAMS (when his name was called). I have a pair with the senior Senator from Pennsylvania [Mr. Penrose]. I transfer that pair to the junior Senator from Tennessee [Mr. SHIELDS] and will vote. I vote "yea."

The roll call having been concluded, the result was announced-yeas 43, nays 25, as follows:

	YE	AS-43.	
Ashurst Pacon Bankhead Bryan Chilton Gore Hitracock Hollis James Johnson	Jones Kern Lane Lea Lewis Martin, Va. Martine, N. J. Newlands Norris O'Gorman Overman	Owen Pittman Poindexter Pomerene Ransdell Reed Robinson Shafroth Sheppard Shively Simmons VS—25.	Smith, Ariz. Smith, Ga. Smith, Md. Smith, S. C. Swanson Thomas Thompson Vardaman Weeks Williams
Borah Bradley Brandegee Bristow Burton Catron	Clapp Dillingham Gallinger Goff Gronna Kenyon La Follette	McCumber Nelson Page Perkins Root Sherman Smoot	Sutherland Townsend Warren Works
Burieigh Clark, Wyo. Clarke, Ark. Colt Crawford Culberson Cummins	du Pont Fall Fletcher Hughes Jackson Lippitt Lodge	McLean Myers Oliver Penrose Saulsbury Shields Smith, Mich.	Stephenson Sterling Stone Thornton Tillman Walsh

So the report of the committee of conference was agreed to.

COMPENSATION FOR INJURIES TO WORKMEN (S. DOC. NO. 336).

The VICE PRESIDENT laid before the Senate a communication from the Secretary of Labor, transmitting, in response to a resolution of the 22d instant, a report of the Commissioner of Labor Statistics in regard to the laws of the various States and the United States and of foreign countries providing systems of compensation for injuries to workers in their employment, which, with the accompanying papers, was referred to the Committee on Education and Labor and ordered to be printed.

NAVAL SUPPLY SHIP.

Mr. WEEKS presented resolutions passed by the Board of Aldermen of Melrose; of the Chamber of Commerce of Wor-cester; of the Board of Selectmen of Revere; and of Local Lodge No. 471, International Association of Machinists, of Lynn, all in the State of Massachusetts, favoring the construction of the proposed naval supply ship at the Boston Navy Yard, which were referred to the Committee on Naval Affairs.

BANKING AND CURRENCY.

Mr. OWEN. I have received two telegrams, one from the National Bank of Commerce, of Shawnee, Okla., and the other from the president of the Third National Bank of St. Louis, Mo., which I ask may be printed in the RECORD.

There being no objection, the telegrams were ordered to be printed in the RECORD, as follows:

SHAWNEE, OKLA., December 23, 1913.

Hon. Robert L. Owen, Washington, D. C.:

We congratulate you upon the masterful manner in which you have handled the currency bill and its passage. We heartly indorse the bill, and desire to join the system. Am wiring the comptroller to-day our application.

NATIONAL BANK OF COMMERCE

Sr. Louis, Mo., December 23, 1913.

Hon. ROBERT L. OWEN, Washington, D. C .:

Congratulations on passage of banking and currency bill. The Third National Bank of St. Louis will enter and assist in any way possible the organization and operation of the new system.

President Third National Bank of St. Louis. FEDERAL RESERVE ACT.

The VICE PRESIDENT laid before the Senate the amendments of the House of Representatives to the concurrent resolu-tion of the Senate No. 12, providing for the printing of extra copies of the Federal reserve act, which were, in line 3, to strike out "eighty" and insert "eighty-five," and, in line 4, to strike out "thirty" and insert "forty."

Mr. OWEN. I move that the Senate concur in the amendments of the House of Representatives.

The motion was agreed to.

HOLIDAY RECESS.

Mr. MARTIN of Virginia. From the Committee on Appropriations I report back favorably without amendment the concurrent resolution of the House (H. Con. Res. 26) providing for a holiday recess, and I ask unanimous consent for its present consideration.

The VICE PRESIDENT. The Senator from Virginia asks unanimous consent for the present consideration of the resolution, which will be read.

The Secretary read the resolution; and there being no objection, the Senate proceeded to its consideration.

The VICE PRESIDENT. The question is on agreeing to the concurrent resolution.

The concurrent resolution was agreed to.

BRIDGE ACROSS BAYOU BARTHOLOMEW.

Mr. SHEPPARD. From the Committee on Commerce, I report back favorably, without amendment, the bill (H. R. 8142) to authorize the construction, maintenance, and operation of a bridge across the Bayou Bartholomew at or near Wilmot, Ark.,

and I ask for its present consideration.

The VICE PRESIDENT. The bill will be read for the information of the Senate.

The Secretary read the bill; and there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration.

Mr. CLARK of Wyoming. I simply wish to ask the Senator when this bill reached the Senate?

Mr. SHEPPARD. It reached the Senate on yesterday.

The bill was reported to the Senate without amendment, ordered to a third reading, was read the third time, and passed.

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. WILLIAMS:

A bill (S. 3867) to found and maintain a mutual insurance fund for depositors in national banks, to be kept available in the United States Treasury and to be administered by a bureau in the Treasury Department, organized and regulated for that purpose; to the Committee on Banking and Currency.

By Mr. ROBINSON:

A bill (S. 3868) to make more efficient Indian administration, and for other purposes; to the Committee on Indian Affairs. By Mr. POINDEXTER:

A bill (S. 3869) to amend the military record of John Morrow; to the Committee on Military Affairs.

A bill (S. 3870) granting a pension to Clara A. Brown; A bill (S. 3871) granting a pension to John Leonard; and A bill (S. 3872) granting a pension to Emanuel Johns; to the Committee on Pensions.

By Mr. RANSDELL:

A bill (S. 3873) to prevent and punish the desecration, mutilation, or improper use of the flag of the United States of America; to the Committee on the Judiciary.

By Mr. SHIVELY:

A bill (S. 3874) to place on the retired list of the Army the names of the surviving officers who were mustered out under the provisions of the act of Congress approved July 15, 1870, in reduction of the Army; to the Committee on Military Affairs.

TRADE IN CHINA

Mr. POMERENE. I introduce a joint resolution and ask that it be referred to the Committee on Commerce, and, for the information of the Senate, I ask that it may be printed in the RECORD.

There being no objection, the joint resolution (S. J. Res. 94) to authorize the Secretary of Commerce to investigate the condition of trade in China for the purpose of determining the desirability of establishing there a permanent exposition of the products of the United States of America was read twice by its title, referred to the Committee on Commerce, and ordered to be printed in the RECORD, as follows:

Be it resolved, etc., That the Secretary of Commerce is hereby authorized to investigate, by a commission of not more than three qualified persons, the condition of our trade with China, for the purpose of determining upon ways and means for its expansion and to particularly determine whether or not it would be desirable for the United States of America to establish and maintain there at some convenient commercial center a permanent exposition of the products of the field and industries of the United States on terms which might make the exposition self-sustaining when established.

Sec. 2. For the purposes aforesaid there is hereby appropriated and made available in the hands of said Secretary from money otherwise unappropriated in the Treasury of the United States of America the sum of \$20,000.

ACCOUNTS OF AUDITOR FOR DISTRICT SUPREME COURT.

Mr. MARTINE of New Jersey submitted the following resolution (S. Res. 239), which was read, considered by unanimous consent, and agreed to:

Resolved, That the Attorney General be, and hereby is, directed to secure, as far as possible, a report on the receipts and disbursements of all moneys received by the auditor for the Supreme Court of the District of Columbia since his incumbency in office.

That he shall assemble and transmit all data pertaining to the receipts and disbursements pertaining to his office, under oath, for use of the Senate, not later than January 12, 1914.

ENROLLED BILL SIGNED.

A message from the House of Representatives, by J. C. South, its Chief Clerk, announced that the Speaker of the House had signed the enrolled bill (H. R. 7837) to provide for the establishment of Federal reserve banks, to furnish an elastic currency, to afford means of rediscounting commercial paper, to establish a more effective supervision of banking in the United States, and for other purposes, and it was thereupon signed by the Vice President.

ADDRESS BY J. G. SCHMIDLAPP.

Mr. BURTON. I have a copy of an address delivered by Mr. J. G. Schmidlapp at a joint meeting of the Optimists' Club and the Commercial Club of Cincinnati, Ohio, giving some impressions of the economic conditions in Germany. I desire to have the address printed as a public document, and I ask that it be referred to the Committee on Printing for their consideration.

The VICE PRESIDENT. If there be no objection, that action will be taken.

INTERNATIONAL MONETARY CONFERENCE.

Mr. THOMAS. I desire to give notice that on January 12, 1914, after the routine morning business, I shall address the Senate on the joint resolution (S. J. Res. 89) proposing the appointment of five delegates to an international monetary conference, and making an appropriation therefor.

EXECUTIVE SESSION.

Mr. BACON. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After 1 hour and 15 minutes spent in executive session the doors were reopened.

DEATH OF REPRESENTATIVE PEPPER, OF IOWA

The VICE PRESIDENT. The Chair lays before the Senate resolutions of the House of Representatives, which will be read.

The Secretary read the resolutions (H. Res. 359), as follows:

IN THE HOUSE OF REPRESENTATIVES

Resolved, That the House has heard with profound sorrow of the death of Hon. I. S. Pepper, a Representative from the State of Iowa; Resolved, That a committee of 18 Members of the House, with such Members of the Senate as may be joined, be appointed to attend the funeral; Resolved, That the Sergeant at Arms of the House be authorized and directed to take such steps as may be necessary for carrying out the provisions of these resolutions, and that the necessary expenses in connection therewith be paid out of the contingent fund of the House; Resolved, That the Clerk communicate these resolutions to the Senate and transmit a copy thereof to the family of the deceased.

Mr. KENYON. Mr. President, I offer the resolutions which I send to the desk and ask for their present consideration.

The resolutions (S. Res. 240) were read, considered by unanimous consent, and unanimously agreed to, as follows:

Resolved, That the Senate has heard with deep sorrow the announcement of the death of Hon. IRVIN ST. CLAIR PEPPER, late a Representative in Congress from the State of Iowa.

Resolved, That a committee of eight Senators be appointed by the Vice President to attend the funeral of the deceased Representative.

Resolved, That the Secretary communicate these resolutions to the House of Representatives and transmit a copy thereof to the family of

The VICE PRESIDENT appointed under the second resolution as the committee on the part of the Senate Mr. Kenyon, Mr. Cummins, Mr. Brady, Mr. Jones, Mr. Reed, Mr. Lewis, Mr. THOMAS, and Mr. THOMPSON.

Mr. KENYON. Mr. President, I desire to give notice that at some future day I shall ask the Senate to consider resolutions on the life and public services of Representative Pepper.

The VICE PRESIDENT. The notice will be entered.

Mr. KENYON. I move, as a further mark of respect to the memory of the deceased, that the Senate do now adjourn.

The motion was unanimously agreed to; and (at 4 o'clock p. m.) the Senate adjourned, the adjournment being, under the concurrent resolution of the two Houses, until Monday, January 12, 1914, at 12 o'clock m.

NOMINATIONS.

Executive nominations received by the Senate December 23, 1913. SECRETARIES OF EMBASSIES.

Fred Morris Dearing, of Missouri, now secretary of the legation at Brussels, to be secretary of the embassy of the United States of America at Madrid, Spain, vice Gustave Scholle, nominated to be secretary of the legation at Habana.

Willing Spencer, of Pennsylvania, now second secretary of the embassy at Berlin, to be secretary of the legation of the United States of America at Caracas, Venezuela, vice Henry F. Tennant, nominated to be secretary of the legation and consul general at San Salvador.

William Whiting Andrews, of Ohio, now secretary of the legation at Lisbon, to be secretary of the legation of the United States of America at Berne, Switzerland, vice William Walker Smith, appointed secretary of the legation and consul general at Santo Domingo.

Sheldon Whitehouse, of New York, now second secretary of the embassy at Paris, to be secretary of the legation of the United States of America at Managua, Nicaragua, vice Arthur Mason Jones, nominated to be second secretary of the embassy at St. Petersburg.

Frederick A. Sterling, of Texas, now second secretary of the embassy at St. Petersburg, to be second secretary of the lega-tion of the United States of America at Peking, China, vice George T. Summerlin, nominated to be second secretary of the embassy at Berlin.

Henry F. Tennant, of New York, now secretary of the legation at Caracas, to be secretary of the legation and consul general of the United States of America at San Salvador, Salvador, vice Thomas Hinckley, nominated to be second secretary of the embassy at Vienna.

INTERSTATE COMMERCE COMMISSIONER.

Judson C. Clements, of Georgia, to be an Interstate Commerce Commissioner for a term of seven years from January 1, 1914. (Reappointment.)

UNITED STATES ATTORNEY.

Stuart W. Walker, of West Virginia, to be United States attorney for the northern district of West Virginia, vice H. Roy Waugh, whose term will expire January 5, 1914.

POSTMASTER.

VIRGINIA.

James A. Lawson to be postmaster at Danville, Va., in place of Frank D. Lumpkin. Incumbent's commission expired December 14, 1912.

CONFIRMATIONS.

Executive nominations confirmed by the Senate December 23, 1913

INTERSTATE COMMERCE COMMISSIONER.

Judson C. Clements to be an Interstate Commerce Commissioner. COLLECTOR OF INTERNAL REVENUE.

Fred C. Kirkendall to be collector of internal revenue for the ninth district of Pennsylvania.

RECEIVER OF PUBLIC MONEYS.

H. Clay Sharkey to be receiver of public moneys at Jackson, Miss.

REGISTER OF THE LAND OFFICE.

William F. Cummins to be register of the land office at Jackson, Miss.

UNITED STATES ATTORNEY.

Stuart W. Walker to be United States attorney for the northern district of West Virginia.

UNITED STATES MARSHALS.

W. T. Dortch to be United States marshal for the eastern dis-

trict of North Carolina. Charles A. Webb to be United States marshal for the western district of North Carolina.

POSTMASTERS.

ARIZONA.

A. T. Pancrazi, Yuma.

KANSAS.

R. E. Stotts, Garden City.

MISSISSIPPI.

Thomas P. Barr, Jackson.

MISSOURI.

Robert H. Williams, Louisiana.

NEW MEXICO.

L. Pascual Martinez, Taos.

NORTH CAROLINA.

Louis G. Daniels, Newbern. R. S. Montgomery, Reidsville, John R. Swann, Marshall.

OHIO.

Homer Gard, Hamilton. George B. Snyder, Youngstown.

HOUSE OF REPRESENTATIVES.

Tuesday, December 23, 1913.

The House met at 2.30 o'clock p. m.

The Chaplain, Rev. Henry N. Couden, D. D., offered the fol-

lowing prayer:

We thank Thee, our Father in heaven, for the star which guided the Magi to the little Child cradled in His mother's arms in the stable of an inn, whose advent had been heralded by the angelic host praising God and saying, "Glory to God in the highest, and on earth peace, good will toward men"; a star prognostic of that light which the little Child subsequently gave to the world in a heavenly Father which has been slowly solidifying the race into one family; the Child who, as the carpenter's son, dignified honest toil and illustrated in His sublime life and character the possibility of perfected manhood and brought to light life and immortality. We thank Thee for the Christmas-tide which awakens the better angels of our nature and thrills

peace; that Thy kingdom may come and Thy will be done through the love which came into the world nineteen hundred years ago. Take us to our several homes full of the Christmas spirit, that we may carry light to those who sit in darkness, cheer to those who are disconsolate, hope to those who are in despair, help to the poor and needy, the widow, the orphan, and those down and out; that we may feast our souls on the good we have contributed to others. In the Christ spirit. Amen. The Journal of the proceedings of yesterday was read and ap-

RECESS.

Mr. UNDERWOOD. Mr. Speaker, I ask unanimous consent that the House stand in recess until 3 o'clock.

The SPEAKER. The gentleman from Alabama asks unanimous consent that the House stand in recess until 3 o'clock. Is there objection? [After a pause.] The Chair hears none, and consequently the House is in recess until 3 o'clock.

AFTER RECESS.

The recess having expired, the House was called to order by the Speaker.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Tulley, one of its clerks, announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H. R. 7837) to provide for the establishment of Federal reserve banks, to furnish an elastic currency, to afford means of rediscounting commercial paper, to establish a more effective supervision of banking in the United States, and for other purposes.

ENROLLED BILL SIGNED.

Mr. ASHBROOK, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bill of the following title, when the Speaker signed the same:

H. R. 7837. An act to provide for the establishment of Federal reserve banks, to furnish an elastic currency, to afford means of rediscounting commercial paper, to establish a more effective supervision of banking in the United States, and for other pur-

THE CURRENCY.

Mr. GRAY. Mr. Speaker, while I am now and always have been opposed to the national-bank currency system, I do not believe that there is any foundation for the sudden face about of the Wall Street bankers and their charge that this currency is inflexible, inelastic, cumbersome, unworkable, and incapable of adaptation to meet the varying demands of business. I do not accept this sudden cry of alarm and the danger from the national-bank currency coming from the special financial inter-ests as made in good faith or for a sincere purpose. I do not believe our national-bank currency is of itself dangerous and fruitful of disaster. I do not believe that this system, which only but yesterday was lauded by these same men as the best system in the world, has undergone this sudden transformation and become to-day the worst system in the world. I do not believe that this system which has stood for a half century without disclosing the dire effects now charged against it has developed in the twinkling of an eye an inherent danger and a menace to busines

I am convinced that this sudden change of front, this attack upon the national-bank currency, begun in 1906, and the panic of 1907 following that attack, were all in pursuance of a deliberate plan and conspiracy to discredit the national-bank currency that there might be reared upon its ruins a central autocratic bank under private control, and were made to create public opinion to sustain and secure the passage of the Aldrich currency bill.

I want it understood that I give no credit to these charges. I am not opposing the national-bank currency upon these grounds, but upon the grounds that the issue of public currency, the control of its volume, and the direction of its distribution among the people are vital public functions, directly affecting the general welfare and prosperity, and as such should be exercised only by the people themselves through the instrumentality of government.

This is a supreme moment to the people of this Nation. It is the only time within a half century when it has been possible to restore to them the control of their money. Heretofore all attempts at such restoration have been opposed and defeated by the adroit claim that the national-bank currency was the soundest, most stable, and the best in the world; but the world anew with the angelic chorus. Grant, O most merciful Father, that it may sound on till every battleship and implement of war shall be beaten into plowshares and pruning hooks
and nations shall have learned the art of living together in now the breastworks of the money power has been thrown down for an assault upon the many small and dependent bankers—to wrest from them the right to issue and control the of a few manipulating financiers. The opportunity is ours for the people to reclaim their own, and when this bill becomes a law to-day, by the signature of the President, the dream of 50 years of financial freedom and independence will have become actual and a full realization.

ADJOURNMENT RESOLUTION.

Mr. UNDERWOOD. Mr. Speaker, there is no further business to transact to-day, but we can not determine until the Senate has passed the Christmas resolution and has messaged it back, and I ask unanimous consent that the House stand in recess for five minutes.

The SPEAKER. The gentleman from Alabama asks unanimous consent that the House stand in recess for five minutes. Is there objection? [After a pause.] The Chair hears none.

AFTER RECESS.

The recess having expired, the House was called to order by the Speaker.

MESSAGE FROM THE PRESIDENT OF THE UNITED STATES.

A message, in writing, from the President of the United States was communicated to the House of Representatives by Mr. Latta, one of his secretaries, who also informed the House of Representatives that the President had approved and signed joint resolution of the following title:

On December 22, 1913:

H. J. Res. 165. Joint resolution for recognition of the services of the late David Du B. Gaillard, lieutenant colonel, Corps of Engineers, United States Army, as a member of the Isthmian Canal Commission, and for the relief of Mrs. Katherine Davis

SESSION LAWS OF THE TERRITORY OF ALASKA (H. DOC. NO. 508).

The SPEAKER laid before the House the following message from the President of the United States, which was read, referred to the Committee on Territories, and ordered to be printed, the accompanying documents having been sent to the Senate:

To the Senate and House of Representatives:

In accordance with section 20 of the act of Congress entitled "An act to create a legislative assembly in the Territory of Alaska, to confer legislative power thereon, and for other purposes," approved August 24, 1912, I transmit herewith a bound volume of the session laws, duly authenticated, containing the acts and resolutions of the first session of the 1913 Territorial Legislature of Alaska,

WOODROW WILSON.

THE WHITE HOUSE, December 22, 1913.

LEAVE TO PRINT.

Mr. LANGLEY rose.

The SPEAKER. For what purpose does the gentleman rise? Mr. LANGLEY. I rise to make an inquiry. On yesterday the gentleman from Alabama [Mr. Underwood] asked unanimous consent that all Members be permitted to extend their remarks in the RECORD for five days. I asked him at the time whether that meant five legislative days, and I understood him to indicate his assent to that. But the RECORD does not show it, and I desire to know whether that was the purpose of it. So many gentlemen are going away for Christmas that unless the privilege be granted for five legislative days they will not have any chance to prepare their remarks.

Mr. UNDERWOOD. Mr. Speaker, inasmuch as the Members of the House are going away for the holidays, I shall renew the

request of yesterday and ask that it be five legislative days.

The SPEAKER. The gentleman from Alabama [Mr. Underwood) asks unanimous consent that all Members may have five legislative days in which to extend their remarks on the currency bill. Is there objection?

Mr. MANN. Reserving the right to object, why should we pad the Congressional Record in that way with the effusions

written in the three weeks' vacation?

Mr. UNDERWOOD. Well, I will say to the gentleman from Illinois that I have always believed that it is a very proper thing for Members of this House to communicate to their constituents their views on the legislative questions that come before the House, and I do not think the habit of printing the speeches on actual legislative matters is a bad habit at all. do think the right of printing is sometimes abused by lugging in things that have nothing to do with the matters before the House. But here was a great bill that every man's constituency is interested in, and I think it is a very proper thing to allow every Member of the House who desires to do so to put in the RECORD his views, so that he may explain them to his constituents.

Mr. LANGLEY. That is what I want to do. The gentleman knows that the time allowed for debate was very limited, and a very large majority of gentlemen had no opportunity to say anything at all during the debate.

Mr. MANN. Most of them will stand better with their constituents if they are not given leave to print. [Laughter.]

Mr. LANGLEY. I would be willing to take my chances on

Mr. GARNER. Mr. Speaker, will the gentleman permit a suggestion?

Mr. MANN. Yes.

Mr. GARNER. If you allowed only five calendar days, they would have to print a Record when Congress was in recess.

They frequently do that.

Mr. GARNER. But that is not the best way of doing it.

Mr. MANN. I recently suggested to the Joint Committee on Printing that it correct or change the method of indexing the RECORD, so that it would be possible to find something in the index. Under the existing system the index is issued every two weeks, but the indexes do not carry over, and when you want to know whether or not something has been done and can not locate the date you have to go through a large number of indexes. While I think the Congressional Record is well indexed, yet no person who indexed anything could ever meet the mind of everybody else.

For instance, there was printed in the RECORD some time ago a cow illustration, printed by the distinguished Senator from South Carolina [Mr. TILLMAN], endeavoring to show to the people that the East had milked the cow at the expense of the West and South. I dare say there is not a Member of the House who could find that under the index. If you would look under "illustrations," you would not find it. If you would look under "cow," you would not find it. If you would look under "TILL-MAN," you would not find it. If you would look under "tariff," you would not find it. It would take some brilliant genius who would look under "allegorical cow," who would find it in the

Mr. LANGLEY. I will say to the gentleman from Illinois that I would like to put one of our famous blooded Kentucky horses in the RECORD, but I do not intend to do it.

Mr. MANN. Go on and do it, and use it. [Laughter.]

Mr. LANGLEY. I would confine myself to the subject under discussion. If we would fix the limit within which speeches can be printed from the 12th to the 16th, inclusive, that would meet the situation.

The SPEAKER. Nobody has objected to the request yet. Mr. LANGLEY. I know, but he was suggesting objections

I was waiting to see if the gentleman from Indiana [Mr. BARNHART] was here to protect the RECORD.

Mr. TAYLOR of Colorado. I should like to ask the gentleman from Illinois if he does not think we ought to have on the front page of the daily Congressional Record a brief index of the contents of each number? I introduced a resolution of that kind in the last Congress and again in this Congress, and it would seem to me that it would save the Members of the House and other readers of the Congressional Record a wonderful amount of time if we could have some clerk prepare a brief index, a very brief statement of what is in each daily RECORD, so that we could look at it and determine quickly what is in it.

Mr. MANN. You might have an index each day of the RECORD of the preceding day, and that might be satisfactory to some gentlemen. As for me, I read the RECORD every day, and do not need an index. I want to say that the Committee on Printing thought that the making of as perfect an index as we would like to have would be too expensive, and that it would cost in the neighborhood of \$150,000 in order to do it, and I think they made out a pretty strong case.

Mr. MURDOCK. I will ask the gentleman why it would not be practicable to index the RECORD on the day that the proceedings are had? Daily newspapers do it, and it would be a great

help to have it done.

Mr. TOWNSEND. I can suggest to the gentleman from Kansas that an index printed on the title-page could not be made up until every page of the RECORD was made up and page The gentleman knows that. CK. I know that is true. proofs taken.

Mr. MURDOCK.

Mr. TOWNSEND. Because such an index could be made

up only after page proofs were taken.

Mr. MURDOCK. The typographical difficulties of getting up an index in a brief space of time are not great. It is a very easy matter. It is done in most newspaper offices of the land at the time each day when they are the busiest. It ought to be done every morning as a convenience to Members of the House.

Mr. MANN. If you would keep the padding out of the Rec-

ORD, you would not need it.

Mr. TOWNSEND. In newspaper offices a schedule or dummy is kept, in morning offices, by the night editor and the night city editor, and it is determined by them in advance on what page each important story is to be run. The make-up man follows this schedule to a large extent, so that even before the last page is cast an index of the whole paper may be prepared from these schedules. This, of course, can not be done for the REC-ORD, because most of the matter must be run in the order it is reported, not as an editor or make-up man may wish.

The SPEAKER. Is there objection to the request of the gentleman from Alabama [Mr. Underwood] that Members shall have five legislative days in which to print speeches in the REC-

ORD on the currency bill? There was no objection.

ENROLLED BILLS PRESENTED TO THE PRESIDENT FOR HIS APPROVAL.

Mr. ASHBROOK, from the Committee on Enrolled Bills, reported that this day they had presented to the President of the United States, for his approval, the following bills:

H. R. 7837. An act to provide for the establishment of Federal reserve banks, to furnish an elastic currency, to afford means of rediscounting commercial paper, to establish a more effective supervision of banking in the United States, and for other pur-

H. R. 11003. An act to provide for expenses of representatives of the United States at the International Conference for Safety

of Life at Sea.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Tulley, one of its clerks, announced that the Senate had passed without amendment bill of the following title:

H. R. 8142. An act to authorize the construction, maintenance, and operation of a bridge across the Bayou Bartholomew at or

near Wilmot, Ark.

The message also announced that the Senate had agreed to the amendments of the House of Representatives to the concur-rent resolution of the Senate No. 12 to print 80,000 copies of the Federal reserve act.

The message also announced that the Senate had passed bill of the following title, in which the concurrence of the House of

Representatives was requested; and

S. 3484. An act to amend an act entitled "An act to codify, revise, and amend the laws relating to the judiciary," approved March 3, 1911, being chapter 231 of Thirty-sixth Statutes at Large.

The message also announced that the President of the United States had approved and signed bill of the following title:

On December 22, 1913:

S. 2689. An act amending an act entitled "An act to increase the limit of cost of certain public buildings, to authorize the enlargement, extension, remodeling, or improvement of certain public buildings, to authorize the erection and completion of public buildings, to authorize the purchase of sites for public buildings, and for other purposes," approved March 4, 1913.

The message also announced that the Senate had passed

without amendment the following House concurrent resolution:

House concurrent resolution 26.

Resolved, That when the two Houses adjourn December 23, 1913, they stand adjourned until 12 o'clock meridian on Monday, January 12, 1914.

ADJOURNMENT.

Mr. UNDERWOOD. Mr. Speaker, I move that the House do

The motion was agreed to; accordingly (at 3 o'clock and 10 minutes p. m.) the House, under the order previously made, adjourned until Monday, January 12, 1914, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1. A letter from the Secretary of the Treasury, transmitting a copy of a joint communication from the Secretary of Agriculture and the Postmaster General of the 19th instant, submitting an estimate of appropriation in the sum of \$1,000,000 for enforcing the provisions of the act approved August 24, 1912 (37 Stats., pp. 551, 553), for improving roads for Rural Delivery Service and for extending the benefits of such work to communities in which no work has as yet been undertaken (H. Doc. No. 509); to the Committee on Appropriations and

ordered to be printed.

2. A letter from the Secretary of the Treasury, transmitting estimates of urgent deficiencies in appropriations required by

that department for the services of the fiscal year ending June 30, 1914 (H. Doc. No. 512); to the Committee on Appropriations and ordered to be printed.

3. A letter from the Secretary of the Treasury, submitting supplemental estimates of appropriations required for the Naval Establishment for the service of the fiscal year ending June 30, 1915 (H. Doc. No. 511); to the Committee on Naval Affairs and

ordered to be printed.

4. A letter from the assistant clerk of the Court of Claims, transmitting a certified copy of the findings of fact filed in the cause of Thomas B. Scott, administrator of the estate of Mary Scott, deceased (H. Doc. No. 510); to the Committee on War Claims and ordered to be printed.

CHANGE OF REFERENCE.

Under clause 2 of Rule XXII, committees were discharged from the consideration of the following bills, which were referred as follows

A bill (H. R. 844) granting a pension to William A. Rappelye; Committee on Invalid Pensions discharged, and referred

to the Committee on Pensions.

A bill (H. R. 4172) granting an increase of pension to Rebecca M. Gaunt; Committee on Invalid Pensions discharged, and referred to the Committee on Pensions.

A bill (H. R. 8799) granting an increase of pension to Thomas M. Ranes; Committee on Invalid Pensions discharged, and referred to the Committee on Pensions.

A bill (H. R. 10321) granting an increase of pension to Charles B. Marshman; Committee on Invalid Pensions discharged, and referred to the Committee on Pensions.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials

were introduced and severally referred as follows:

By Mr. BARKLEY: A bill (H. R. 11242) to amend an act entitled "An act to codify, revise, and amend the laws relating to the judiciary," approved March 3, 1911, being chapter 231, Thirty-sixth Statutes at Large; to the Committee on the Judi-

Also, a bill (H. R. 11243) to amend an act entitled "An act relating to the liability of common carriers by railroad to their employees in certain cases," approved April 22, 1908; to the Committee on Interstate and Foreign Commerce.

on Ways and Means.

Also, petitions of sundry citizens of Belle Center and Findlay, Ohio, favoring the passage of a bill prohibiting the misbranding of articles made from fabric, leather, or rubber; to the Committee on Interstate and Foreign Commerce.

SENATE.

Monday, January 12, 1914.

The Senate met at 12 o'clock m. The Chaplain, Rev. Forrest J. Prettyman, D. D., offered the

following prayer:

Almighty God, we come before Thee presenting ourselves as the objects of Thy tender mercy and of Thy constant care, made as we believe to receive revelations of Thyself, and with our highest function to give back into the heart of God selfrevelations in response to all the expressions of Thy love for us. Thou hast saved us with an everlasting salvation, and Thou dost permit us to place our soul and body upon Thine altar as a living sacrifice in expression of our sense of infinite gratitude to Thee.

Thou hast brought us to the beginning of a new year. Thou dost call us forth into the untrodden paths of the days and months before us. We desire to have our life adjusted to God, to have our lives God-centered, that there may be light along the pathway at every step that we take, in the sacred trust which Thou hast committed to us not only for our personal life but for this great Nation.

So may we be obedient to the will of God and keep in step with God's forward movement, that we may work out Thy divine program for us as a people. Let Thy blessings rest upon every Senator in this honorable body. Give them Thy personal comfort and guidance and blessing, and lead them in the discharge of their public duty according to Thine own gracious will. For Christ's sake. Amen.

HENRY CABOT LODGE, a Senator from the State of Massachu-

setts, appeared in his seat to-day.

The Journal of the proceedings of Tuesday, December 23, 1913, was read and approved.

THE COMMERCE COURT.

The VICE PRESIDENT laid before the Senate a communication from the Attorney General, transmitting a letter from the presiding judge of the United States Commerce Court calling attention to a typographical error in a statement of expenditures of the appropriations for the maintenance of the United States Commerce Court previously transmitted, which, with the accompanying paper, was referred to the Committee on Appropriations and ordered to be printed.

VESSEL BRIG "RENSALAER" (H. DOC. NO. 530).

The VICE PRESIDENT laid before the Senate a communication from the assistant clerk of the Court of Claims, transmitting the findings of fact and conclusions of law and opinion filed by the court under the act of January 20, 1885, in the French spoliation claims set out in the annexed findings and opinion by the court relating to the vessel brig Rensalaer, James Mitchell, master, which, with the accompanying paper, was referred to the Committee on Claims and ordered to be printed.

ENROLLED BILL SIGNED.

A message from the House of Representatives, by J. C. South, its Chief Clerk, announced that the Speaker of the House had signed the enrolled bill (H. R. S142) to authorize the construction, maintenance, and operation of a bridge across the Bayou Bartholomew, at or near Wilmot, Ark., and it was thereupon signed by the Vice President.

PETITIONS AND MEMORIALS.

The VICE PRESIDENT presented a petition of the State Administrators of Vocational Education in conference in New York City, December 13, 1913, praying for the enactment of legislation authorizing the President to appoint a commission to consider the need and report a plan for national aid to vocational education, which was referred to the Committee on Agriculture and Forestry.

He also presented petitions of the Central Labor Union of Philadelphia, Pa.; of Branch 3, Socialist Body, Twenty-second Assembly District, of Kings County, N. Y.; of the Saugus Socialist Club, of Massachusetts; and of Vorhees Township, Branch No. 1, Socialist Party, of Gibbsboro, N. J.; and of the Socialist Party of Bay County, Mich., praying that an investigation be made into the conditions existing in the Michigan copper country, which were referred to the Committee on Education and Labor.

He also presented memorials of Andrew Jackson Branch American Continental League, of Cincinnati, Ohio; of Local Branch, American Continental League, of Rochester, N. Y.; of Matthew Thornton Branch, American Continental League, of Philadelphia, Pa.; of Jefferson Branch, American Continental League, of New Bedford, Mass.; of the Robert Emmet Literary Society, of Wilmerding, Pa.; of Washington Branch, American Continental League of Youngstown, Ohio; of George Washington Branch, American Continental League, of Pittsfield, Mass.; of Andrew Jackson Branch, American Continental League, of Wilmerding, Pa.; of the Jefferson Club of the Seventeenth Ward, of Brooklyn, N. Y.; of the Affiliated Branches of the American Continental League, of Pittsburgh, Pa.; of Abraham Lincoln Branch, American Continental League, of Brooklyn, N. Y.; of Commodore Perry Branch, American Continental League, of Jersey City, N. J.; of the United Irish American Societies of Greater New York; and of Thomas Jefferson Branch, American Continental League, of Philadelphia, Pa., remonstrating against an appropriation being made for the celebration of the so-called 100 years of peace among Englishspeaking peoples, which were referred to the Committee on Foreign Relations.

He also presented a petition of the National Convention of Insurance Commissioners, held at New York, N. Y., December 16, 1913, praying for the enactment of legislation providing for the testing and improvement of fire-retarding devices, which was referred to the Committee on Standards, Weights, and Measures.

Mr. OLIVER presented a petition of sundry citizens of Pittsburgh, Pa., praying for the enactment of legislation granting relief to persons who served in the United States Military Telegraph Corps during the Civil War, which was referred to the Committee on Pensions.

He also presented a memorial of the Commercial Club of Farrell, Pa., remonstrating against the proposed dissolution of the United States Steel Corporation, which was referred to the Committee on the Judiciary.

He also presented a petition of Local Union No. 1186, United Brotherhood of Carpenters and Joiners of America, of Pittsburgh, Pa., praying for the enactment of legislation to locate shipments of foodstuffs which have been held in cold storage, which was referred to the Committee on Interstate Commerce.

He also presented a memorial of the Produce Exchange of Philadelphia, Pa., remonstrating against the enactment of legislation to locate shipments of foodstuffs which have been held in cold storage, which was referred to the Committee on Interstate Commerce.

He also presented a petition of the Brotherhood of Locomotive Engineers, Order of Railway Conductors, Brotherhood of Locomotive Firemen and Enginemen, and the Brotherhood of Railroad Trainmen, assembled in joint union session at Freedom, Pa., praying for an investigation into the recent strike in the Calumet district, in Michigan, which was referred to the Committee on Education and Labor.

He also presented memorials of the Robert Emmet Literary Society, of Wilmerding; of the Andrew Jackson Branch, American Continental League, of Wilmerding; of the Thomas Jefferson Branch, American Continental League, of Philadelphia; of the Matthew Thornton Branch, American Continental League, of Philadelphia; and of the affiliated branches of the American Continental League of Pittsburgh, all in the State of Pennsylvania, remonstrating against an appropriation being made for the celebration of the so-called one handred years of peace among English-speaking peoples, which were referred to the Committee on Foreign Relations.

Mr. GALLINGER presented a petition of the Daughters of Liberty of Quincy, N. H., praying for the enactment of legislation providing an educational test for immigrants to this country, which was referred to the Committee on Immigration.

He also presented a petition of the Board of Trade of Berlin, N. H., praying for the enactment of legislation authorizing the Secretary of the Treasury to employ additional architectural aid in the construction of the public buildings of the country, which was referred to the Committee on Public Buildings and Grounds.

Mr. CLARK of Wyoming. On behalf of my colleague [Mr. Warren], who is necessarily absent, I present a memorial of sundry citizens of Wyoming, protesting against the passage of the so-called Sunday observance bill, which I move be referred to the Committee on the District of Columbia.

The motion was agreed to.

Mr. CLARK of Wyoming (for Mr. Warren) presented resolutions adopted by Local Union No. 905, of Reliance; of Local Union No. 2174, of Rock Springs; and of Local Union No. 2312, United Mine Workers of America, of Dietz, all in the State of Wyoming, favoring the appointment of a committee to make Federal investigation of the conditions in the copper-mining regions of the State of Michigan, which were referred to the Committee on Education and Labor.

He also (for Mr. Warren) presented resolutions adopted by Local Union No. 2293, district 22, United Mine Workers of America, of Rock Springs, Wyo., and of Local Union No. 2700, United Mine Workers of America, of Crosby, Wyo., favoring the enactment of legislation to make lawful certain agreements between employers and laborers and persons engaged in agriculture or horticulture and to limit the issuing of injunctions in certain cases, and for other purposes, which were referred to the Committee on the Judiciary.

Mr. HITCHCOCK presented a petition of sundry citizens of Hastings, Nebr., praying for the enactment of legislation to further restrict immigration, which was referred to the Committee on Immigration.

He also presented memorials of sundry citizens of Lincoln, Crawford, and Scotch View, all in the State of Nebraska, remonstrating against the enactment of legislation compelling the observation of Sunday as a day of rest in the District of Columbia, which were referred to the Committee on the District of Columbia.

Mr. MARTINE of New Jersey presented petitions of the mayor and common council and of the Board of Trade of Sea Bright, N. J., praying that an appropriation be made for the construction of a retaining wall or bulkhead to protect the shore front at that place, which were referred to the Committee on Appropriations.

Mr. JACKSON. I present a resolution adopted by the Educational Association of the Methodist Episcopal Church in annual session at Hackettstown, N. J., which I ask may be read.

There being no objection, the resolution was read and ordered to lie on the table, as follows:

HACKETTSTOWN, N. J., January 8, 1914.

The Educational Association of the Methodist Episcopal Church in annual session, representing about 70 universities, colleges, and higher schools in every part of the United States, respectfully request the appropriate committees of the Senate and House of Representatives in Congress assembled to include the provisions of the amendment to

Senate bill No. 3091, as offered by Senator Jackson, of Maryland, on December 13, 1913, thus guaranteeing an equitable division of the funds appropriated in the bill as between the races.

Resolved further, That we commend the stand of Senator Jackson in this particular.

J. R. HARKER,

President of the Association,

President of Woman's College, Jacksonville, III.

C. A. FULMER,

Secretary, Chancellor of Nebraska Wesleyan

University, Lincoln, Nebr.

Mr. BURTON presented a memorial of the Board of Trade of Dover, Ohio, remonstrating against the proposed dissolution and destruction of the United States Steel Corporation, which was referred to the Committee on the Judiciary.

He also presented a memorial of the board of directors of the Business Men's Clubs of Cincinnati, Ohio, remonstrating against the enactment of legislation providing for the legalization of trade unions and prohibiting injunctions in certain cases, which was referred to the Committee on the Judiciary.

He also presented a petition of the Ohio Valley Druggists'

Association, praying for the enactment of legislation recognizing and establishing the system of uniform prices on trademarked and branded goods, which was referred to the Committee on Manufactures.

He also presented a petition of sundry citizens of Dayton, Ohio, praying for the adoption of an amendment to the Constitution granting the right of suffrage to women, which was ordered to lie on the table.

He also presented a petition of sundry citizens of Marion Ohio, praying that the application of the railroads be granted for such reasonable increase of freight rates as may be necessary to cover the increased cost of operation brought about by the numerous demands made upon them, which was referred to the Committee on Interstate Commerce.

He also presented a memorial of sundry citizens of Van Wert, Ohio, remonstrating against the enactment of legislation annulling the civil-service status of assistant postmasters, which was referred to the Committee on Civil Service and Retrench-

He also presented a petition of the City Council of Columbus, Ohio, praying for the enactment of legislation authorizing the telegraph and telephone companies to be owned by the Government, which was referred to the Committee on the Judiciary.

Mr. NELSON presented a memorial of sundry citizens of Pennington County, Minn., remonstrating against the enactment of legislation compelling the observance of Sunday as a day of rest in the District of Columbia, which was referred to the Committee on the District of Columbia.

He also presented a petition of the Minneapolis Association of Credit Men, praying that an appropriation be made for the erection of levees along the Mississippi River for the protection from flood waters, which was referred to the Committee on Commerce.

He also presented petitions of the congregation of the Eden Prairie Presbyterian Church, of the Woman's Missionary Society of the First Presbyterian Church of Minneapolis, of the congregations of the Presbyterian Church of Bloomington, of the First Presbyterian Church of Minneapolis, of the Presbyterian congregations of Crystal Bay, Long Lake, and Maple Plain, all in the State of Minnesota, praying for the passage of the so-called antipolygamy bill, which were referred to the Committee on the Judiciary.

Mr. CHAMBERLAIN. I present resolutions adopted by the Seattle Rotary Club, of the State of Washington, which I ask may be printed in the RECORD.

There being no objection, the resolutions were ordered to lie on the table and to be printed in the RECORD, as follows:

Resolution from Seattle Rotary Club.

Resolution from Seattle Rotary Club.

Whereas Alaska is conceded to be a land of great but undeveloped resources; and Whereas first among these resources are vast fields of coal—anthracite, semibituminous, and bituminous—as good as any coal in the world and suitable for the use of the battleship fleet of the Navy of the United States; and

Whereas the coal now used by the Pacific Fleet is brought from the Atlantic to the Pacific coast around Cape Horn in foreign ships and at great expense; and

Whereas the opening of the Panama Canal and the coming expansion of the commerce of the United States on the Pacific Ocean and the more extended operations of the Navy on the waters of the Pacific Ocean will necessitate the assembling of vast quantities of coal for use not only in time of peace but as supply in preparation for possible war; and Whereas these fields are now owned by all the people and are now being opened up by the Department of Mines for the use of the Navy; and Whereas because of these facts the people of the Pacific coast are unanimous in agreeing that the first great necessity in the opening up and development of Alaska—the one thing which would be of the greatest material benefit not only to the people of Alaska and the Pacific coast but to the people of the whole country is the building and operation of a railroad to her great coal fields in order that the coal from the same may be made available for the battleships of our country as well as the commerce of the world; and that the second great

necessity is the continuation of such a railroad connecting one of her open ports with her great interior river systems and thus by adequate transportation provide the foundation upon which to develop her vast dormant mineral and agricultural possibilities for the benefit of the whole country: Therefore be it

of the whole country: Therefore be it

Resolved, That the Rotary Club of the city of Seattle does hereby indorse the plan of railroad construction in Alaska in general as embraced in the bills on this subject in the House of Representatives and the Senate of the United States which have already been recommended for passage, having received the approval of the Committee on Territorles in both the House and Senate, respectively, believing the plan so authorized to be such as all broad-minded men interested in the development of this country can approve.

Epitomized these bills authorize the appropriation of \$35,000,000 to \$40,000,000 for the building of railroads in Alaska under and by direction of the President of the United States. All details as to carrying out the same and the selection of routes, etc., are left to the President. The Interstate Commerce Commission is given authority over the roads when constructed. The appropriation for construction is to be repaid by a proportion of all moneys derived from the sale of public lands or from the coal or mineral therein contained or the timber thereon; be it further

Resolved. That the rotary clubs of the United States be requested to the contribution.

further Resolved. That the retary clubs of the United States be requested to take such favorable action in regard to the purpose of these resolutions as may be deemed advisable and to make such action known to all of the Members of Congress from their respective States.

ALASKA

(From Seattle Rotary Club.)

ALASKA.

(From Seattle Rotary Club.)

The United States purchased Alaska from Russia in 1867, paying therefor \$7,200,000. Since that time the Government has expended approximately \$40,000,000 in administering a so-called government therand in the building of roads, aids to mavigation, etc., making a total expenditure for Alaska, including its purchase price, of approximately \$50,000,000. Due to the fortitude and courage of American pioneers, we have taken from the land and waters of Alaska products valued at approximately \$50,000,000. Song, tearing a bainnee in favor of Alaska of a proven approximately \$50,000,000. The total proven approximately approximately \$60,000,000, tearing a bainnee in favor of Alaska of a major was a subject of the control of the Alaska, who have made exhaustive reports on the taxast undeveloped resources of that Territory. It is known that the greatest fisherles of the world to-day are in Alaskan waters; it is known that both anthractic and bituminous coal exists there in quantity and quality equal to the great coal fields of Pennsylvania and West Virginia. Representatives of the Agricultural Department have grown wheat of the finest quality at the junction of the Tanana and Yukon Rivers, producing 50 are 64,000,000 acce.

Agricultural experts have estimated that there is a soll more productive and a climate more salubrious than may be found in Norway, Sweden, Denmark, or Finland, which countries are in practically the same latitude. These countries do not contain more than one-half the same agricultural and grazing grea that is found in Alaska, and yet they maintain a population of twelve to fifteen million people. About 12 years ago the Government purchased and sent to Alaska 1000 refudeer. These have increased in number until we now have fixed they maintain a population of twelve to fifteen million people. About 12 years ago the Government purchased and sent to Alaska 1000 refudeer. These have increased in number until we now have fixed by a fixed provided to the proper development

Mr. CHAMBERLAIN. I present resolutions adopted by the Chamber of Commerce of Cordova, Alaska, which I ask may be printed in the RECORD.

There being no objection, the resolutions were ordered to lie on the table and to be printed in the RECORD, as follows:

CORDOVA CHAMBER OF COMMERCE, Cordova, Alaska.

Whereas the unfortunate conditions which have existed in the Territory of Alaska during the past few years make it imperative that Government aid should be extended in the construction of railroads within the Territory, which would prove a stimulus to the development of the rich resources of the country;

And whereas a measure generally known as the Chamberlain-Wickersham bill, which provides for the expenditure of \$35,000,000 or \$40,000,000 for the purposes of railroad construction in Alaska has been favorably reported in the United States Senate and agreed to by the House Committee on Territories;

And whereas most of the Representatives in Congress from the Western States, as well as the commercial bodies of the Pacific coast, have given a willing, earnest, and vigorous support to the measure providing for railroad construction in Alaska: Therefore be it

*Resolved.** That the Cordova Chamber of Commerce cordially indorses

ing for railroad construction in Alaska: Therefore be it

Resolved, That the Cordova Chamber of Commerce cordially indorses
the bill referred to as being the most practicable means as an aid to the
development of the Territory, and commends in grateful appreciation
the efforts that have been put forth in support of this measure by the
Representatives in Congress and the commercial bodies of Seattle and
other cities; and be it further

Resolved, That the western Members of Congress be earnestly requested and urged to put forth every possible effort to secure the
passage of the Chamberlain-Wickersham bill during the early days of
the new session to begin on December 1, as the needs of Alaska are
imperative and present conditions deplorable.

H. A. SLATER, President,
NATHANAEL GREENE, Secretary.

Mr. CHAMBERLAIN presented a petition of sundry citizens of Portland, Oreg., praying for the enactment of legislation granting relief to persons who served in the United States Military Telegraph Corps during the Civil War, which was referred to the Committee on Pensions.

Mr. WEEKS presented a memorial of the Socialist Club of Saugus, Mass., remonstrating against the enactment of legislation to further restrict immigration, which was referred to the

Committee on Immigration.

He also presented a memorial of the Chamber of Commerce of Worcester, Mass., remonstrating against the adoption of certain provisions of the income-tax law, which was referred to the Committee on Finance.

He also presented a memorial of George Washington Branch, American Continental League, of Pittsfield, Mass., and a memorial of Jefferson Branch, American Continental League, of New Bedford, Mass., remonstrating against an appropriation being made for the so-called celebration of "One hundred years of peace among English-speaking peoples," which were referred to the Committee on Foreign Relations.

He also presented resolutions adopted by Local Union No. 229. Boot and Shoe Workers' Union, of Boston, and of the Central Labor Union of Springfield, all in the State of Massachusetts, praying for an investigation into the mining conditions of the copper districts in Michigan, which were referred to the Com-

mittee on Education and Labor.

He also presented a resolution adopted by the Massachusetts Association of Sealers of Weights and Measures, favoring the enactment of legislation providing for uniformity of weights and measures throughout the various States, which was referred to the Committee on Standards, Weights, and Measures.

He also presented resolutions of the national legislation committee of the Board of Trade of Springfield and of the Women's Educational and Industrial Union of Boston, all in the State of Massachusetts, favoring the passage of the so-called Lever agricultural extension bill, which were referred to the Commit-

tee on Agriculture and Forestry.

He also presented a resolution of the board of directors of Boston Credit Men's Association, favoring the enactment of legislation for the prevention of floods throughout the country,

which was referred to the Committee on Commerce.

He also presented petitions of sundry citizens of Massachusetts, favoring the enactment of legislation to make lawful certain agreements between employers and laborers, and persons engaged in agriculture or horticulture, and to limit the issuing of injunctions in certain cases, and for other purposes, which were referred to the Committee on the Judiciary

He also presented a memorial of sundry citizens of Athol, Mass., remonstrating against the enactment of legislation compelling the observance of Sunday as a day of rest in the District of Columbia, which was referred to the Committee on the

District of Columbia.

Mr. PERKINS presented a petition of General George A. Custer Council, No. 22, Junior Order United American Mechanics, of Oakland, Cal., praying for the enactment of legislation to further restrict immigration, which was referred to the Committee on Immigration.

He also presented a petition of the Board of Supervisors of Crescent City, Cal., praying that an appropriation be made for the construction and maintenance of a breakwater at that place, which was referred to the Committee on Commerce.

He also presented a petition of the Chamber of Commerce

of Los Angeles, Cal., praying that an appropriation be made for the construction of a breakwater and for the improvement of the harbor at Crescent City, in that State, which was referred

to the Committee on Commerce.

He also presented a petition of the Chamber of Commerce of San Francisco, Cal., praying for the enactment of legislation to provide for the registration of, with collectors of internal revenue, and to impose a special tax upon all persons who produce, import, manufacture, compound, deal in, dispense, sell, distribute, or give away opium or coca leaves, etc., which was referred to the Committee on Manufactures.

He also presented a petition of the Associated Chambers of Commerce of the Pacific Coast, praying for the reorganization of the United States Army, which was referred to the Com-

mittee on Military Affairs.

He also presented a petition of the California Branch of the American School Peace League, praying for the enactment of legislation providing for the suspension for one year of the naval construction program, which was referred to the Committee on Naval Affairs.

Mr. ROOT presented memorials of sundry citizens of New York, remonstrating against the enactment of legislation compelling the observance of Sunday as a day of rest in the District of Columbia, which were referred to the Committee on the

District of Columbia.

Mr. TOWNSEND presented memorials of sundry citizens of Holly, Battle Creek, Union City, Lansing, and Flint, all in the State of Michigan, remonstrating against the enactment of legislation compelling the observance of Sunday as a day of rest in the District of Columbia, which were referred to the Committee on the District of Columbia.

He also presented the petition of Rena L. Miner, president of the Michigan Department of Army Nurses of the Civil War, praying for the passage of the so-called Army nurse pension bill, which was referred to the Committee on Pensions.

Mr. NORRIS presented a petition of sundry citizens of Hastings, Nebr., praying for the enactment of legislation to further restrict immigration, which was referred to the Committee on Immigration.

Mr. McLEAN presented a petition of the Daughters of Liberty of Ansonia, Conn., praying for the enactment of legislation providing an educational test for immigrants to this country, which was referred to the Committee on Immigration.

He also presented a petition of the Federation of Women's Clubs of Connecticut, praying for the enactment of legislation authorizing Federal control of the water powers on the public domain, which was referred to the Committee on the Conservation of Natural Resources.

Mr. CLAPP presented a petition of the Minnesota Historical Society, praying that an appropriation be made for the erection of a monument to the memory of Lieut. William S. Cox, United States Navy, which was referred to the Committee on the Library

He also presented petitions of the Commercial Clubs of Thief River Falls, Roseau, Warroad, Roosevelt, International Falls, Spooner, and Baudette, all in the State of Minnesota, praying that an appropriation be made to aid in improvements, fire protection, and drainage of unentered Chippewa lands on the ceded Red Lake Reservation in Minnesota, which were referred to the Committee on Indian Affairs.

Mr. LODGE presented the memorial of William E. Bliss. C. E. Palmer, and 86 other citizens of Massachusetts remonstrating against the enactment of legislation compelling the observance of Sunday as a day of rest in the District of Columbia, which was referred to the Committee on the District of Columbia.

He also presented a resolution adopted by the Rural Letter Carriers' Association of Massachusetts, favoring an increase and the readjustment of the salaries of rural letter carriers, and recommending certain changes in that service, which was referred to the Committee on Post Offices and Post Roads.

He also presented memorials of George Washington Branch, American Continental League, of Pittsfield, and of Jefferson Branch, American Continental League, of New Bedford, all in the State of Massachusetts, remonstrating against an appropriation being made for the celebration of 100 years of peace with England, which were referred to the Committee on Foreign Relations.

He also presented a petition of the Massachusetts Association of Sealers of Weights and Measures, praying for the enact-

ment of legislation regulating weights and measures throughout the country, which was referred to the Committee on Standards. Weights, and Measures.

He also presented a petition of the Boot and Shoe Workers' Union of Boston, Mass., praying for an investigation of the mining conditions in Michigan, which was referred to the Com-

mittee on Education and Labor.

Mr. POINDEXTER presented a memorial of Liberty Grange, Patrons of Husbandry, of Yakima County, Wash., remonstrating against raising the embargo on potatoes, which was referred to the Committee on Finance.

He also presented a resolution adopted by the Spokane County Rural Letter Carriers' Association of Washington, favoring the enactment of legislation increasing the salaries of rural letter carriers, which was referred to the Committee on Post Offices and Post Roads.

He also presented a petition of the Trades and Labor Council of North Yakima, Wash., praying for the passage of the so-called Alaska railroad bill, which was ordered to lie on the

He also presented a petition of sundry citizens of the State of Washington, praying for the enactment of legislation providing an educational test for immigrants to this country, which was

referred to the Committee on Immigration.

He also presented a petition of Spokane Camp, No. 2, Sons of Veterans, of Washington, praying for the enactment of legislation providing for an increase in the military and naval forces of the United States and for the preparation of boys in the high schools of the country for such purpose, which was referred to the Committee on Military Affairs.

BILLS AND JOINT RESOLUTION INTRODUCED.

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred as

A bill (S. 3875) to authorize the Secretary of Commerce to sell certain department publications and to provide for crediting the department's printing allotment with the proceeds; to the Committee on Printing.

land entries; to the Committee on Public Lands.

A bill (S. 3891) to increase the limit of cost for the erection and completion of the United States building at Pendleton, Oreg.; to the Committee on Public Buildings and Grounds.

A bill (S. 3892) for the relief of Charles G. Griffa; to the

Committee on Military Affairs.

A bill (S. 3893) for the relief of George N. Wolfe (with accompanying papers); and A bill (S. 3894) for the relief of William Fulton Hedges (with

accompanying papers); to the Committee on Claims.

By Mr. OWEN:
A bill (S. 3895) to prevent the use of the mails and of the telegraph and telephone in furtherance of fraudulent and harmful transactions on stock exchanges.

The VICE PRESIDENT. To what committee does the Sen-

ator from Oklahoma wish to have the bill referred? Mr. OWEN. The Committee on Banking and Currency.

Ought it not to go to the Committee on Inter-Mr. OLIVER.

state Commerce?

The VICE PRESIDENT. The Chair has been in the habit of complying with the request of the Senator who introduces a bill. In the opinion of the Chair, the bill should go to the Committee on Interstate Commerce, but it will be referred to the Committee on Banking and Currency, if that is the request of the Senator from Oklahoma.

Mr. OWEN. That is my request. The VICE PRESIDENT. It will be so referred.

By Mr. MARTINE of New Jersey:

A bill (S. 3896) granting a pension to Mary E. High (with accompanying papers); to the Committee on Pensions.

By Mr. MYERS:

A bill (S. 3897) authorizing the Great Northern Railway Co. to revise its line of railway adjacent to the Glacier National Park, in the State of Montana, and granting to the said railway company the right of way for its revised line in the said national Park; to the Committee on Public Lands.
A bill (S. 3898) to amend an act entitled "An act to provide

A bill (S. 3899) to liment an act entitled. An act to provide for the acquiring of rights of way by railroad companies through Indian reservations, Indian lands, and Indian allotments, and for other purposes," approved March 2, 1899; and

A bill (S. 3899) to provide for the acquiring of additional

lands by railroad companies through Indian reservations, Indian lands, and Indian allotments, and for other purposes; to the Committee on Indian Affairs.

A bill (S. 5900) granting an increase of pension to Malachi

Cordero; to the Committee on Pensions.

By Mr. HUGHES:

A bill (S. 3901) granting a pension to Thomas F. Keating;

A bill (S. 3902) granting a pension to James Hanna;

A bill (S. 3903) granting a pension to William R. Claxton; A bill (S. 3904) granting an increase of pension to Richard

De Groat;

A bill (S. 3905) granting a pension to Perdita McVean; A bill (S. 3906) granting a pension to Alexander M. Robert-

A bill (S. 3907) granting an increase of pension to James B.

Romaine; and
A bill (S. 3908) granting an increase of pension to William
H. Van Name; to the Committee on Pensions.
By Mr. GALLINGER:
A bill (S. 3909) for the relief of the heirs at law of Peter

Nodine; to the Committee on Claims.

A bill (S. 3910) granting an increase of pension to Alphonso

Maddocks (with accompanying papers); to the Committee on Pensions.

By Mr. OLIVER:
A bill (S. 3911) for the relief of the estate of David B. Landis, deceased, and the estate of Jacob F, Shenffer, deceased; to the Committee on Claims.

By Mr. McCUMBER:

A bill (S. 3912) granting an increase of pension to David

Keith (with accompanying papers);
A bill (S. 3913) granting an increase of pension to Marie L. Van Solen (with accompanying papers);

A bill (S. 3914) granting an increase of pension to John

Leary (with accompanying papers); and A bill (S. 3915) granting a pension to Catherine Holbrook (with accompanying papers); to the Committee on Pensions.

By Mr. LODGE:

A bill (S. 3923) to provide for a tariff commission; to the

Committee on Finance.

A bill (S. 3924) to remove the charge of desertion from the military record of Elisha L. Bennett, jr.; to the Committee on Military Affairs.

A bill (S. 3925) for the relief of Teresa Girolami (with accom-

panying paper); to the Committee on Claims. By Mr. NELSON:

A bill (S. 3926) relating to the adjudication of homestead en-

tries in certain cases; to the Committee on Public Lands.

A bill (S. 3927) authorizing the appointment of Joseph Westesson, a professor of mathematics, with the rank of lieutenant, in the United States Navy, on the retired list; to the Committee on Naval Affairs.

A bill (S. 3928) granting a pension to Isabel Arneson; and A bill (S. 3929) granting an increase of pension to Harriett M. G. Crooks; to the Committee on Pensions.

By Mr. SMITH of Arizona:

A bill (S. 3930) to provide for investigation to ascertain the feasibility of the construction of a dam and irrigating ditches in the San Pedro Valley, State of Arizona; to the Committee on Irrigation and Reclamation of Arid Lands. By Mr. NORRIS:

A bill (S. 3931) providing for increasing the water supply of the city of Washington, for the building of a dam on the Potomac River to supply light and power for the use of the United States and the District of Columbia, and for other purposes; to the Committee on the District of Columbia.

By Mr. PERKINS:

A bill (S. 3932) to authorize the establishment of a light and fog-signal station at Point Vincente, Cal.; to the Committee on Commerce.

A bill (S. 3933) providing for the payment of certain claims of the State of California growing out of the Indian wars; to the Committee on Claims.

By Mr. POINDEXTER:

A bill (S. 3934) for the relief of W. A. Miller; to the Committee on Claims.

A bill (S. 3935) granting a pension to Fred T. Macomber; to the Committee on Pensions.

By Mr. OVERMAN:

A bill (S. 3936) to prohibit improper and corrupt lobbying and to regulate the employment of legislative counsel and agents; to the Committee on the Judiciary.

By Mr. McLEAN:

A bill (S. 3937) granting an increase of pension to Mary E.

Hubbell (with accompanying papers); and A bill (S. 3938) granting an increase of pension to Jennie E. Puffer (with accompanying papers); to the Committee on Pen-

A bill (S. 3939) authorizing the issuance of patent to the heirs of James Longmire; to the Committee on Public Lands.

A bill (S. 3940) granting a pension to John Simonsen (with accompanying papers); to the Committee on Pensions.

By Mr. CLAPP: A bill (S. 3941) for the relief of Omer D. Lewis; to the Committee on Indian Affairs.

A bill (S. 3942) granting an increase of pension to Thomas Stevens; to the Committee on Pensions.

By Mr. TOWNSEND:

A bill (S. 3943) granting a pension to Ida Gilhooly (with accompanying paper); to the Committee on Pensions.
By Mr. DILLINGHAM:

A bill (S. 3944) granting an increase of pension to William H. Goodwin (with accompanying papers); and

A bill (S. 3945) granting an increase of pension to George Clark (with accompanying papers); to the Committee on Pensions.

By Mr. STONE:

A bill (S. 3946) granting an increase of pension to Frank Kesler (with accompanying papers);

A bill (S. 3947) granting an increase of pension to John Lynn (with accompanying papers);

A bill (S. 3948) granting an increase of pension to Benton Braden (with accompanying paper); and

A bill (8. 3949) granting an increase of pension to Joseph Stall (with accompanying papers); to the Committee on Pensions.

By Mr. JAMES:

A bill (S. 3950) providing for the registration of designs for manufactured products; to the Committee on Patents.

By Mr. BORAH:

A bill (S. 3951) authorizing and legalizing the exchange of certain lands between the United States and the State of Idaho; to the Committee on Public Lands.

By Mr. REED:

A bill (S. 3952) granting an increase of pension to Simon B.

Rothchild (with accompanying papers);
A bill (S. 3953) granting an increase of pension to John C. Miller (with accompanying papers);

A bill (S. 3954) granting a pension to Eliza Clark (with accompanying papers); and

A bill (S. 3955) granting an increase of pension to Burden H. Barrett (with accompanying papers); to the Committee on Pensions.

By Mr. CLARK of Wyoming (by request): A bill (S. 3956) authorizing the purchase of lands chiefly valuable for timber and for the growth of timber in the State

of Wyoming; to the Committee on Public Lands.

By Mr. CHAMBERLAIN:

A joint resolution (S. J. Res. 95) providing for method of improving channels giving access to military reservations or fortifications (with accompanying paper); to the Committee on Commerce.

ROCK CREEK PARK.

Mr. LODGE. I submit an amendment proposing to appropriate \$5,000 for the removal of dead and down timber from the woods and streams of Rock Creek Park, in the District of Columbia, intended to be proposed by me to the District of Columbia appropriation bill. I ask that the amendment be printed and referred to the Committee on the District of Columbia, and I should be glad if the committee would give me an opportunity to be heard upon the amendment.

The VICE PRESIDENT. The amendment will be referred to the Committee on the District of Columbia and printed.

LANDS IN OREGON.

Mr. CHAMBERLAIN submitted an amendment intended to be proposed by him to the bill (S. 3343) granting to the State of Oregon certain lands claimed by the State of Oregon under an act of Congress approved September 28, 1850, and an act of Congress approved March 12, 1860, which was referred to the Committee on Public Lands and ordered to be printed.

AMENDMENTS TO RIVER AND HARBOR BILL,

Mr. CHAMBERLAIN submitted an amendment relative to an appropriation for the completion of the improvement at the mouth of the Columbia River, Oreg., etc., intended to be proposed by him to the river and harbor appropriation bill, which was referred to the Committee on Commerce and ordered to be printed.

He also submitted an amendment proposing to appropriate \$50,000 for the examination and survey of the Columbia and Snake Rivers, Oreg., Wash., and Idaho, with a view to the canalization of these streams between Celilo and the mouth of the Columbia and to Pittsburg Landing on the Snake River, etc., intended to be proposed by him to the river and harbor appropriation bill, which was referred to the Committee on Commerce and ordered to be printed.

He also submitted an amendment proposing to appropriate \$146,000 for continuing the improvement and completion of the north jetty of the Siuslaw River, Oreg., etc., intended to be proposed by him to the river and harbor appropriation bill, which was referred to the Committee on Commerce and ordered

to be printed.

HARBOR OF HAMBURG AND THE LOWER ELBE.

Mr. LANE. I present a paper, being a reply to instructions of the Department of State adopted October 4, 1913, relative to the harbor of Hamburg and the lower Elbe. I move that the paper be referred to the Committee on Commerce.

The motion was agreed to.

HOUR OF DAILY MEETING.

On motion of Mr. KERN, it was

Ordered, That the hour of the daily meeting of the Senate be 12 o'clock meridian until otherwise ordered.

THE UNITED STATES STEEL CORPORATION.

Mr. LANE. I submit a resolution, which I ask to have read. The resolution (S. Res. 241) was read, as follows:

Mr. LANE. I submit a resolution, which I ask to have read. The resolution (S. Res. 241) was read, as follows:

Resolved, That the Interstate Commerce Commission is hereby directed to conduct an examination and inquiry for the purpose of ascertaining whether there exist facts or evidence that in the opinion of the commission would justify the Government in instituting suits or legal proceedings for recovery of fines, penalties, or forfeitures from the United States Steel Corporation, its subsidiaries, or any common carrier because of unlawful rebates, offsets, and preferences received and accepted by the above-named corporation or its constituent companies within the last six years.

The Interstate Commerce Commission is hereby directed to hear all witnesses and testimony in pursuance of this resolution at open public hearings to be held before one or more members of the commission.

The Interstate Commerce Commission is hereby further directed to forthwith subpean and bring before it William H. Green, of Creighton, Nebr., to give testimony before said commission relative to unlawful rebates, offsets, or preferences received and accepted by the United States Steel Corporation and its subsidiary corporations from common carriers as aforesaid.

And should said William H. Green when before the commission name any other person or persons as having knowledge of facts or evidence showing payments of unlawful rebates, offsets, or preferences to said United States Steel Corporation or subsidiary thereof as aforesaid, then the Interstate Commerce Commission is hereby directed to forthwith subpean and examine before it any such person or persons: *Provided*, That nothing in this resolution shall be construed as affecting the discretion of the commission with respect to the taking of the testimony of any witness or causing such witness to produce books or papers when it appears that such witness is an employee, agent, officer, or director of the United States Steel Corporation, any subsidiary thereof, or of any common ca

Mr. LANE. I ask unanimous consent for the immediate consideration of the resolution.

Mr. GALLINGER. Let the resolution go over and be printed,

Mr. President.

Mr. CUMMINS. Mr. President, I think the resolution ought to be referred to the Committee on Interstate Commerce. Interstate Commerce Commission, as the Senator from Oregon [Mr. Lane] knows, is already overburdened with work, and I think that a proposition for such an inquiry as this ought to go before the Committee on Interstate Commerce in order that it may look into it and determine whether the matter involved is of sufficient importance to require the commission to investigate it.

Mr. LANE. Mr. President, I wish to say, for the information of the Senator from Iowa, that allegations are made in the resolution that such methods are being pursued in carrying on the business of the United States Steel Corporation, and I think it is a most excellent time right now to enter into an inquiry concerning it. I shall ask for the consideration of the matter at the hands of this body. I do not wish it tucked away in the Committee on Interstate Commerce in order to give the Interstate Commerce Commission time to clear up their work. That will take 8 or 10 years, as nearly as I can ascertain, if they keep up their present rate of progress; at any rate, it will require not less than three or four years,

which would be too long a delay.

The VICE PRESIDENT. There being objection to the present consideration, it will lie over until to-morrow.

Mr. LANE. I will call up the matter to-morrow.

CONDITIONS IN MINING DISTRICTS IN MICHIGAN.

Mr. ASHURST. I submit a resolution which I ask may be read and referred to the Committee on Education and Labor. The Secretary read the resolution (S. Res. 243), as follows:

The Secretary read the resolution (S. Res. 243), as follows:

Resolved, That the Senate Committee on Education and Labor is hereby directed to make a thorough and complete investigation of the conditions existing in the copper mines in the Calumet, Hancock, and South Range copper mining districts in the counties of Houghton, Keweenaw, and Ontonagon, Mich., for the purpose of ascertaining—

First. Full and accurate facts concerning the past history and present status of the relations of the employers and employees in the said copper mines in so far as the said history may have any direct or indirect relation to the existing labor troubles, and to this purpose and end said committee is authorized and directed to investigate and report as to the justice and reasonableness of the minimum wage demand of the employees in said district, the justice and reasonableness of an increase in the compensation of the employees, the reasonableness of an eight-hour day for underground employees, and the necessity and reasonableness of the employment of two men on all machine drills.

Second. The history of the organization of the various companies

Second. The history of the organization of the various companies or corporations owning or working copper mines in the said district; that is to say, the committee shall ascertain how much money was originally invested in the purchase and acquisition of the said copper

properties by the owners, the amount of the gross yield of the mines, and the value of the capital stock of the various corporations (operating copper mines) at the time of their incorporation and the market value of the capital stock of such corporations at the present time. The committee shall especially investigate the facts and report as to the amount of dividends and assessments of the said copper mines with the view especially of ascertaining the amount of the assessments levied by the Calumet & Hecla Mining Co. and the amount of money paid out as dividends by that company from its inception down to the present time.

money paid out as dividends by that company from its inception down to the present time.

Third. Whether or not any of the employers or employees in said district have declined to consent to a committee on arbitration to be appointed by the President of the United States and the governor of the State of Michigan, jointly, to which committee all matters in dispute might be submitted and by the findings of which committee all parties at interest should be bound.

Fourth. Whether or not any system of peonage is maintained in said copper-mining districts.

Fifth. Whether or not access to post offices is prevented; and if so, by whom.

Sixth. Whether or not the immigration laws of the United States.

Fourth. Whether or not any system of peonage is maintained in said copper-mining districts.

Fifth. Whether or not access to post offices is prevented; and if so, by whom.

Sixth. Whether or not the immigration laws of the United States are being or have been violated in the said copper-mining districts; and if so, by whom.

Seventh. Whether or not the Secretary of Labor or any other official or officials of the Government may be of service in the premises.

Eighth. Whether or not persons are being or have been convicted and punished in violation of the laws of the United States.

Ninth. Whether there exists or has existed a combination of coppermining companies in restraint of interstate commerce and trade for the purpose of advancing the price at which copper shall be sold to consumers in Michigan and other States, or for any other purpose.

Tenth. Investigate and report whether or not firearms, ammunition, and explosives have been imported into said State for the use of either party to the existing labor troubles, and the number, names, and general reputation of the men imported into said district to act as guards, deputy sheriffs, or in similar positions.

Eleventh. Investigate the efforts of the various labor organizations to unionize said copper mines, including demands made on employers, and the methods used to enforce said demands.

Twelfth. Whether or not the said copper-mining companies have attempted to induce the action of officials, judicial or otherwise, in said district, or have interfered with the administration of justice in said district, or have interfered with the administration of justice in said district, or any subcommittee thereof, is hereby empowered to sit and act during the session of Congress or of cither House thereof at such time and place as it may deem necessary; to require by subpema or otherwise the attendance of witnesses and the production of papers, books, and documents; to employ stenographers at a cost not exceeding \$1 per printed page; to take and make a record of ill epi

The VICE PRESIDENT. The resolution will be referred to the Committee to Audit and Control the Contingent Expenses of

Mr. TOWNSEND. Mr. President, I am sorry that the exigencies of politics outside of Michigan seem to make it necessary to present such a resolution at this time. I would be the last Member of this body to try to prevent a settlement of the unfortunate condition that exists in our State, and which has existed there since July last; and I certainly would not object to any effort being put forth which would result in securing justice

to the parties concerned. If Michigan is suffering from one thing more than another at this time, it is that from outside influences. The governor of Michigan has been doing his very best to adjust the unfortunate conditions in the copper country. The Department of Labor has made an investigation; the Department of Justice has sent a representative up into that country, who has not yet reported; the governer himself has been on the ground for several days, and his report is not yet out; a grand jury has been called, composed of men who were selected before the strike occurred; and that grand jury is still at work, at least its findings have not been submitted; yet it is proposed at this time to secure the passage of a resolution calling for an investigation by the Congress through a committee composed of men, possibly, in some instances, at least, who have already prejudged the situation. This resolution proposes things which no Senator on this floor believes Congress can take constitutional cognizance of or has any legal right to investigate. There is contained in the resolution a voluntary insult to the courts of our State, it being suggested that they have been improperly influenced.

To my mind, Mr. President, this resolution was not intended for and will not result in settling the disturbance in upper Michigan. If we could have an investigation that would be

fair and just, of all matters which Congress has any right to investigate, I would gladly support it, because the public lacks the facts involved in this distressing controversy. I do not believe that an investigation by a committee of Congress will help us any. I repeat, the resolution covers matters with which Congress has no right to deal. There are some statements made in the resolution which, if correct, would be subject to investi-gation by Congress. If it should be confined to those matters, and it is thought by the committee after a careful investigation that justice is going to be secured, and that that unsettled condition can be settled, I want the investigation; but, Mr. President, until a report has been made by the authorities of the State, who have been honestly and properly investigating this matter, it seems to me that the Congress ought not to intervene.

I deny that there is a State in this Union which has a higher regard for justice and right or that exerts more care in looking after the relative interests of all parties in all controversies

within its borders than Michigan.

I repeat, Mr. President, that I am sorry the exigencies of politics seem to make it necessary for outside influences to ask that something be done in Michigan. Unless it can be shown that there is some prospect of shedding some sunlight on this vexed question that will help us in Michigan and help the country to get at the exact truth of the situation Congress should not take this proposed action.

I ask, Mr. President, that the resolution be printed and go over, so that we can have a chance to look at it.

The VICE PRESIDENT. The resolution has been referred. to the Committee to Audit and Control the Contingent Expenses

Mr. LODGE. The question has not been put.

Mr. GALLINGER. It seems to me that under the rule it is competent for any Senator to object to the present consideraday and then any proper disposition can be made of it.

Mr. ASHURST. Mr. President, I did not ask for the immediate consideration of the resolution, and I trust no Senator

misheard me. I never thought of asking for the immediate

consideration of the resolution.

In reply to my friend the distinguished Senator from Michigan I am sorry he permitted himself to make what I deem to be the unjust observation that this resolution was prompted by political considerations or political expediency. The Senator political considerations or political expediency. from Michigan is a truthful man. He is a gentleman. If he has any evidence that this resolution has been prompted by political considerations or expediency now, in the Senate, is the time to produce his evidence or to admit that he was in error in saying such a thing.

I have very high regard for the Senator from Michigan, and he knows it. It misbecomes him to say that political considera-tions or political exigencies have prompted the introduction of

this resolution.

Sir, I represent, in part, the State of Arizona. In that State Sir, I represent, in part, the State of Arizona. In that state we do not believe that the mere interests of Arizona are all that should engage our attention. While I have no right to speak for my colleague, I believe, in fact I know, he shares my view that to promote the good of the Nation should be as much the duty of a Senator as to put forward the good of his own State.

If political expediency prompted this resolution, then, Mr. President, I am at least glad that something prompted the Senate of the United States to try in a calm, orderly way to ascertain the truth. If it be "political expediency" to ascertain the truth, then the epithet should be worn by myself. I deny that there is aught in the resolution that is other than the most strict parliamentary language. I regret the necessity which prompted the resolution, and I deny again that it is prompted by other than the desire to promote the public weal.

I say to the Senator from Michigan that it ill becomes him

to make and repeat, as he did, such an assertion.

Sir, I have received over 5,000 letters and telegrams on this subject from all parts of the United States, from statesmen, from writers, from business men, from lawyers, from laborers, from college men, from all classes of men all over the United States. I have this portfolio [exhibiting] full that I could put into the RECORD if I saw fit. I shall not do so, however. These communications urge me or somebody in a calm, sedate, and proper way to introduce a resolution asking an investigation of what we must admit is a deplorable situation in the State of Michigan. If the time unfortunately comes, as I trust it will not, when the same condition obtains in my own State, I shall be the first to ask for the light, he first to ask for the truth, and shall be the last to rise in my place and object to any committee of the Senate ascertaining the truth.

I shall not incorporate into the RECORD a long list of these letters and telegrams, but I shall read one telegram which I have just received from one of the most accurate, one of the most profound thinkers in the United States, Charles Edward Russell .

CHICAGO, ILL., January 11, 191h,

Hon, Henry F. Ashurst, United States Senate, Washington, D. C.:

United States Senate, Washington, D. C.:

Have just returned from investigation of copper miners' strike in Michigan. Situation clearly demands investigation by Congress. Lawlessness and oppression of armed guards, misuse of militia, violation of constitutional rights, killing of peaceable citizens, deportation, interference with interstate business require it. Because I know your profound sympathy with tollers and services for people, beg you to press this.

CHARLES EDWARD RUSSELL

I care not, so far as I am personally concerned, by what epithet the Senator from Michigan may choose to stigmatize my poor and weak efforts to obtain the truth; but if he believes he can shut off an investigation by characterizing it with an epithet or saying that it was prompted by political expediency, he does not show the wisdom and the judgment he usually shows.

Mr. LODGE. Mr. President, I understood the request made by the Senator from Arizona was for reference. The question

was on the reference of the resolution. The VICE PRESIDENT. It has been referred.

Mr. LODGE. It is my misfortune that I did not know it. I was waiting here to say a word with regard to it, and I was not conscious that it had been referred.

The VICE PRESIDENT. The resolution calls for the expenditure of money, and under the statute the Chair had referred it to the Committee to Audit and Control the Contingent

Expenses of the Senate.

Mr. LODGE. Certainly; I do not question the proper direction of the Chair as to the course it should take; but I think a resolution of that sort, under the rules, goes over for one day on the objection of any Senator. The Senator from Michigan was recognized as soon as the resolution was read, and asked that it go over and be printed. I was about to make the same request myself; for, as I listened to the reading of the resolution, which is a very long one, I gathered that there were in it some subjects undoubtedly within the jurisdiction of the Congress and others that, it seemed to me, clearly were not.

I do not think it is within our jurisdiction or is proper for us to enter upon an inquiry as to whether or not a State court Las been bought up. It seems to me hardly proper for us to undertake to pass upon the question whether a State has acted within its rights in the exercise of its police power.

For those reasons, it seems to me, that before the resolution takes the course which the Chair has properly designated we should have a right to look at it and consider whether or not it should be referred in its present form.

Mr. ASHURST. Mr. President, the distinguished Senator from Massachusetts said something about the State courts which I did not hear. Will he repeat his statement?

Mr. LODGE. I said there was a clause there which appeared

to me, as I heard it read, to call for an investigation of the State courts to see whether or not they had been bought up.

Mr. ASHURST. Mr. President, I am sorry the distinguished Senator could possibly put such a construction on the language. The resolution says nothing about anybody being "bought up" or "sold down." I am very sorry that impression has gotten out. It is absurd.

Mr. LODGE. Mr. President, I will read what I heard, and it seems to me to indicate that:

12. Whether or not the said copper-mining companies have attempted to influence the action of officials, judicial or otherwise, in said district, or have interfered with the administration of justice in said district.

If that does not mean improper interference with the State courts, I do not know what language does mean.

Mr. ASHURST. I will say to the distinguished Senator from

Massachusetts that the resolution does not use the harsh characterization which the Senator attributes to it. It does not say that anybody has been "bought up" or "sold down." I know that when the Senator reflects he must see the injustice which is done by saying on the floor of the Senate that the resolution

contains a suggestion that anybody has been "bought up."

Mr. LODGE. It is a proposition to investigate the State courts of Michigan and see whether or not they have been im-

properly influenced by anybody.

The VICE PRESIDENT. This is the state of the record, regardless of what Senators may say about it:

The Senator from Arizona requested that a resolution be read and referred to the proper committee. There was no objection. It was read. In view of the fact that it called for the expenditure of money, it has been referred to the Committee to Audit and Control the Contingent Expenses of the Senate. After that was done the point was made that the resolution, upon objection, should lie over one day under the rule. It came

after the reference.

The view of the Chair is that it is first the duty of the Committee to Audit and Control the Contingent Expenses of the Senate to say whether or not money shall be expended for any purpose. When the resolution comes back from that committee, it seems to the Chair, that will be the time to determine whether this resolution or an amended resolution shall be passed, or whether it shall be referred to some committee to determine what, if any, resolution shall be passed.

The Chair does not care anything about it, but that is the

state of the record.

Mr. SMOOT. Mr. President, I remember well hearing the Senator from Arizona state that he introduced the resolution and asked for its reference to the Committee on Education and Labor. I had no objection whatever to its going to that com-The resolution had not been read. We knew nothing about what was in the resolution. Of course, after the reading of the resolution the question should be considered whether it should go to that committee or some other committee.

I think the Chair was perfectly right in having the resolu-tion referred to the Committee to Audit and Control the Contingent Expenses of the Senate, provided no objection was made to it. Under the rules an objection carries it over for one day. To-morrow, when it comes up regularly and automatically at the close of the morning business, the Senate will decide as to

whether or not it shall make an amendment to it.

It seems to me an amendment should be made to the resolution before it goes to the Committee to Audit and Control the Contingent Expenses of the Senate, because after it goes there the committee only has the question to consider whether or not it shall authorize the expenditure of the money. A part of the committee may want to authorize the expenditure of the money for a certain portion of the resolution, but may not like to order the money spent for the whole of it.

Therefore, in my opinion, the resolution ought to be perfected in the Senate before it goes to the committee. The proper way to proceed would be to have it done at the present time, if there were not an objection raised, but there was an objection, which took it over until to-morrow, when it will come up auto-

matically before the Senate.

Mr. WILLIAMS. Mr. President, I wish to say that when a resolution upon a like subject was introduced, for the investigation of conditions in the West Virginia coal mines, the resolution was sent first to the Committee to Audit and Control the Contingent Expenses of the Senate, and that committee struck out of it those parts of the resolution which, in the opinion of the committee, were not subjects matter of Federal jurisdiction, and then authorized the expenditure of the money for the other purposes. In other words, it reported the resolution back to the Senate with an amendment, which was adopted. Then a resolution came from the Committee on Education and Labor, which at that time I thought was the same resolution that had come to us and had been corrected by us; and in that resolution there were restored certain features of the original resolution which did not relate to the subjects matter of Federal jurisdiction.

I mention this merely because it shows the danger that lies along the pathway. As a matter of fact, the Committee to Audit and Control the Contingent Expenses of the Senate never did favor the expenditure of money for certain purposes in connection with that investigation, and yet the money was expended

for those purposes.

I wish to give notice that in case this resolution goes to the Committee to Audit and Control the Contingent Expenses of the Senate, if we strike out of it such parts of it as we think are purely matters of State jurisdiction, and then if it comes back from any other committee to which it shall be subsequently referred-and it will have to be referred to some other committee, because we have no jurisdiction over anything except the

expenditure of money—we shall oppose it.

I think, therefore, it would be better if the resolution went to some other committee first, and then were referred to this committee, after it comes back, for it to consider the question as to the expenditure of the money out of the contingent fund.

Mr. SMOOT. Mr. President, in answer to the Senator I wish to say that it is my opinion that the Committee to Audit and Control the Contingent Expenses of the Senate has no right whatever to change a resolution when it is referred to the committee for the purpose of determining whether money shall be expended from the contingent fund of the Senate. The resolution ought to be perfected in the Senate before it goes to that he objected to the resolution being referred to the committee,

committee, and then the committee will have to pass upon the question whether they shall authorize the expenditure of money from the contingent fund of the Senate for the purpose of the investigation, if an investigation it may be.

Therefore it seems to me that the objection made here today carries the resolution over for one day. To-morrow, when it comes up automatically before the Senate, it should be perfected and then referred to the Committee to Audit and Control

the Contingent Expenses of the Senate.

Mr. WILLIAMS. I know no rule of the Senate, nor do I know any principle, that prevents the Committee to Audit and Control the Contingent Expenses of the Senate from amending a resolution which has been referred to it, just as any other committee does. When a resolution is referred there to expend certain moneys out of the contingent fund for a certain investigation, it seems to me it is clearly within the jurisdiction of the committee to determine that certain parts of the resolution do not present subjects of appropriate Federal investigation, and to strike those parts out of the resolution. any rate, that is the course we took in the other case, whether we had the right to do it or not, and I think that is the course that will be taken by the committee in the future.

Clearly we might conclude that there was a right, for example, to see whether interstate commerce had been interfered with or whether the administration of postal affairs had been interfered with, and to order money to be expended from the contingent fund for the purpose of investigating to see whether or not that was the case, whereas we would have no right to investigate to see whether John Smith had lawlessly slain John Jones, and we would not appropriate money out of the contingent fund of the Senate to investigate that case of

manslaughter.

Mr. SMOOT. Mr. President, in this particular case the Senator introducing the resolution does not want consideration of it until it is referred to the Committee on Education and Labor. Now, the Committee on Education and Labor wants to know, the Senate wants to know, whether the Committee to Audit and Control the Contingent Expenses of the Senate are willing to enter upon the investigation, and they have the resolution referred to them not under the rules of the Senate but under the law. The law requires that it shall go to that committee. If the committee decide that they want an investigation of this question they will report favorably to the Senate, and then the resolution will be referred to the Committee on Education and Labor according to the request made by the introducer of it.

Mr. WILLIAMS. Why can they not decide that they want the money expended for an investigation as to a part of the resolution which they deem a part of the business of the Senate and not as to other parts which they deem not to be parts of the business of the Senate?

Mr. BORAH. Mr. President, as I understand the status of the record, it is that the resolution has already been referred; that it was referred before objection was made.

Mr. TOWNSEND. It must have been referred before it was read, because I waited until the reading was through and got

the recognition of the Chair immediately after the reading. Mr. BORAH. My observation with reference to the West Virginia resolution is that it is not very material whether it proceeds first to the Committee to Audit and Control the Contingent Expenses of the Senate or whether it proceeds second to that committee, because it will be fought out in both places. Even if it is perfected in the minds of the Committee on Education and Labor, it will be reperfected by the Committee to Audit and Control the Contingent Expenses of the Senate, especially while the distinguished Senator from Mississippi [Mr. Williams] is the chairman of that committee, because he has certain views with reference to the question of State So you have to meet the question, and I think it very immaterial whether it goes to that committee first or goes to it second.

Mr. TOWNSEND. Mr. President, I do not wish to make any point on the matter referred to by the Vice President. I desire to state, however, I had not supposed that when a Senator rose to present a resolution, stating in presenting it where he wished to have it referred, that such request estopped any Sena-tor from asking, under Rule XIV, that the resolution be printed

and go over for a day.

The VICE PRESIDENT. May the Chair interrupt the Senator from Michigan?

Mr. TOWNSEND.

Certainly.

DENT. The Chair will ask the Senator The VICE PRESIDENT. from Michigan whether when he was on his feet the first time or whether it was not after it had been referred that the Senator from Michigan rose?

Mr. TOWNSEND. I asked in the course of my first remarks that it go over and be printed. I had not beard the Chair an-nounce that the resolution would be referred.

The VICE PRESIDENT. If it is the recollection of the Senator from Michigan that he asked that the resolution be printed and go over before the Chair referred it, the Chair having no pride of opinion, will withdraw the resolution from the Com-

mittee to Audit and Control the Contingent Expenses of the Senate and let it lie over until to-morrow. But that is not the

recollection of the Chair.

Mr. LODGE. I ask for the reading of the stenographer's notes where the Senator from Michigan objected.

Mr. GALLINGER. I think that is conceded.
Mr. TOWNSEND. Mr. President, I desire to be heard on that proposition further before I take my seat. I am confident that the Senator from Arizona presented this resolution, because he had been asked to present it. Of course, I believe he presented it because some people in Arizona asked him to present it, and that he thought, and honestly thought, it was his political duty to present the resolution.

Now, Mr. President, I am not claiming that there ought not to be an investigation of affairs in Michigan. I am not resisting any honest investigation of conditions in my State which are properly subject to investigation by Congress. Indeed, if I thought the truth of the strike situation could be obtained in no other way I would be even willing that the rights of Michigan might be invaded, for the exact truth is all-important. The trouble has continued so long because the real issue has been so confused and uncertain.

I have advocated since I have been a Member of Congress a measure providing for the investigation of such controversies. There is now pending before the Committee on Interstate Commerce a bill introduced by me providing that a commission may be appointed by the President which shall investigate these matters, and the results of such investigation would command the respect of the country. No investigation that shows itself to have been partisan or to have been made with the case prejudged by the character of the investigators would have any weight in settling the controversies. I believe that a properly informed public sentiment would settle this strike, and I repeat, I have asked in a bill that such a commission be appointed by the President of the United States. I have asked the chairman of the Committee on Interstate Commerce to call that bill up in order that such a commission might be created, whose duties it should be to go into these matters in detail and in such a way that the result would command the respect of the public.

I object to this particular resolution because I feel that no good could come from it and that conditions would be made worse instead of better. I object to it at this time because I want the authorities who have been investigating the disturb-ance to report, and I want them to have sufficient time to make You answer that this condition has been in existtheir report. ence a long time; that we have waited long enough. Oh, but Senators do not understand the complications that have existed there. I do not believe a majority of the Senators want to impeach the honor and integrity of the Democratic governor of Michigan. His record shows that he has been in sympathy with the toiling classes quite as much as with the other classes of our people. I do not believe any man who has carefully investigated this matter and understands Michigan's history wants to impeach the courts of our State. I do not believe Senators want to interfere with the work that is now being performed by the

grand jury in reference to this particular trouble.

It is for these reasons that I have asked that due care be taken before we complicate the situation and perhaps unduly prolong the strike. If you can by congressional action, if you can by investigation, throw on the subject more light than has been thrown on it, I have no objection to it. The people of Michigan have no objection to it. But such a commission should be unbiased by political or class prejudice. If we could get a report upon the commission bill that has been once reported to Congress and several times considered by congressional committees since I have been a Member here and have the measure enacted into law, this and other great controversies between capital and labor would be settled without such tremendous loss to the parties directly involved and to the people. Such a commission was created by President Roosevelt in the anthracite coal strike, and that without any authority of law, but he recognized the seriousness of the strike and appreciated that publicity of the truth was the sure and direct remedy. Its findings would command the respect of the country and end the strike. In fact, no such long-continued disturbance would occur if it was known

in advance that the exact truth would be disclosed. No wrong thing could stand the judgment of public opinion. By all means let us have light, and for the same reason let us not becloud an already bad situation.

THE TELEGRAPH AND TELEPHONE AS ADJUNCTS TO POSTAL SERVICE.

Mr. NORRIS. Mr. President, I submit a resolution and ask unanimous consent for its present consideration.

The VICE PRESIDENT. The Senator from Nebraska submits

resolution and asks unanimous consent for its present consideration. It will be read.

The resolution (S. Res. 242) was read, as follows:

The resolution (S. Res. 242) was read, as follows:

Resolved, That the Postmaster General be, and he is hereby, directed to send to the Senate the results of the investigation he has been making regarding Government ownership and control of means of communication with a view to the acquisition by the Government of the telegraph and telephone facilities, to be operated as an adjunct to the postal service, and that in connection therewith he send to the Senate all of the data and information that has been acquired by means of such investigation, together with a copy of all reports that have been made thereon by any committee or persons appointed by him for the purpose of making such investigation.

The VICE PRESIDENT. Is there objection to the present consideration of the resolution? The Chair hears none, The question is on agreeing to the resolution.

The resolution was agreed to.

Mr. BACON subsequently said: Mr. President, there was a resolution just adopted by the Senate, offered by the Senator from Nebraska [Mr. Norris], which I am somewhat inclined to think should go first for consideration to the Committee on Post Offices and Post Roads. The chairman of that committee is not now present. I therefore will not do more than enter a motion for a reconsideration, so that if the members of that committee should think it desirable they could make a motion

for a reconsideration.

The VICE PRESIDENT. The motion to reconsider will be noted.

PARITY OF EXCHANGE BETWEEN GOLD AND SILVER USING COUNTRIES.

Mr. THOMAS. Mr. President, I ask for the reading of Senate joint resolution No. 89.

The VICE PRESIDENT. The Secretary will read Senate joint resolution 89.

The Secretary read the joint resolution introduced by Mr. THOMAS December 13, 1913, as follows:

joint resolution (S. J. Res. 89) for the appointment of an international commission to fix a parity of exchange between gold and silver using countries.

Whereas the purpose of H. R. 7837 now under consideration in the Senate is to establish a permanent and satisfactory system of banking and currency equal at all times to the demands of the Nation's economic and commercial requirements; and Whereas a system of banking and currency to be thoroughly efficient must be adaptable as well to the needs of foreign and domestic trade; and

must be adaptable as well to the needs of foreign and domestic trade; and Whereas the recent growth of our foreign trade justifies the assurance of its rapid and continuous expansion; and Whereas the markets of the world include China, Japan, India, the Straits Settlements, Mexico, and South America, which countries embrace nearly two-thirds of the human race, and whose industrial and commercial affairs are transacted upon a silver basis, notwith-standing their nominal adoption of a gold standard; and Whereas changes in the gold price of silver bullion causes constant and sometimes violent fluctuation in exchanges between gold and silver using countries, seriously disturbing all current commercial transactions between them; and Whereas every fall in these exchanges operates as a bounty upon exports from silver-using countries, and imposes a burden upon imports to them from gold-using countries, thereby converting trade relations between them into a mere gamble in silver; and Whereas these conditions place the United States and other gold-standard countries at a great disadvantage in competition in agriculture and manufacturing industries, and have for years stimulated the transfer of such industries from gold-using countries to silver-using countries, where the price of wages and raw material have undergone no change during the past half century; and Whereas the efforts of Great Britain to overcome these evils in India by placing that great dependency upon a "gold-exchange basis," and by government coinage of the rupee, whose exchange value it has vainly sought to maintain by law, have resulted disastrously and caused a constantly increasing drainage of gold from England to India, where it disappears from the channels of trade and exchange; and

and
Whereas in consequence of such failure Great Britain has created a
royal commission, now sitting at Whitehall, to "inquire into the
measures taken by the Indian Government to maintain the exchange
value of the rupee in pursuance of, or supplementary to, the recommendations of the Indian currency committee of 1898; and whether
the existing practice in these matters is conducive to the interests
of India," thus indicating the gravity of trade and currency conditions, caused by the dislocation of exchanges and evidenced by the
partial destruction of India's foreign trade and her absorption of gold;

partial destruction of India's foreign trade and her absorption of gold; and
Whereas the problems submitted to said royal commission for solution are of common international concern, affecting their trade and menacing the gold reserves of all nations; and
Whereas no national system of banking and currency however sound can fully serve the people while international trade is subject to constant and violent fluctuations of international exchange: Therefore be it

Resolved, ctc., That the President be empowered to suggest to the Governments of Great Britain, Germany, and France the appointment of delegates by them and by the United States to an international conference to consider and recommend to their respective Governments a common plan and method by which a parity or fixity of exchange may be established between them and the silver-using nations of the world.

Resolved jurther, That when and as soon as any two of said Governments shall favorably respond, the President is hereby authorized to appoint delegates to such conference, not to exceed five in number, and who shall be empowered to represent the United States thereat, and who shall report to the President the result of their deliberations, with such recommendations as they shall deem essential to the accomplishment of the end desired.

Resolved further, That the sum of \$100,000, out of any money not otherwise appropriated, be appropriated to pay the expenses of the delegates so to be appointed by the President, the object which the pre-

Mr. THOMAS. Mr. President, the object which the preamble and resolutions just read are designed to subserve is the essential adjunct of every currency system in the civilized world. Until it shall have been attained they are alike inefficient in one of their most vital functions. Unless, therefore, leading com-mercial powers shall recognize this fact and by concert of action establish this object by cooperative agreement, their fiscal and commercial relations with Asiatic and South American communities must be exposed to the perils which spring from unsettled and fitful changes in the value of foreign money, perils which have been in operation for years, drastic in result and ominous in their portent. International trade is largely dependent for its success, and therefore for its healthy expansion. upon a reasonable and reliable parity or fixity of exchange between the nations. Without this it is largely speculative, being subject to the hazard of rise or fall in the relative value of money of one country expressed in terms of the money of another, changes in which must operate to the advantage of the country whose money occupies the lower end of the scale. The changes subsidize its exports in proportion as their fluctuations are great or small. They also penalize its imports and thus compel the domestic production of their principal elements.

Two-thirds of the world's inhabitants occupy the continents of Asia and South America. Within the past quarter of a century most, if not all, of the peoples of these continents have outwardly conformed to the monetary policies of the great manufacturing nations of the world by nominally adopting what is called the gold-exchange standard of values. Hitherto they were both legally and actually upon the silver standard. They are still, in fact, upon that standard, and will remain so. The settled customs of centuries and the needs of business have forced them to conform in practice to the old methods and the old system, notwithstanding their codes and statutes. Wages. contracts, and the innumerable small transactions of daily life go on as before. In Asia silver and in South America silver or paper are the medium through which these are expressed and discharged. And the nations which deal with them which covet their trade and seek their valuable markets must reckon with this fact, for it is a portentous one, affecting not our foreign commerce alone but our domestic, industrial, and political conditions as well.

I must here assure the Senate that I have no intention of discussing the old issue of bimetallism. I shall make no plea for the free coinage of silver. I shall neither frighten the timid nor beguile the tolerant by any appeal for a return to the money of the Constitution, for I know how useless and perhaps how tiresome that would be. Although I am as strong in my conviction of the virtues of the bimetallic standard as when I first espoused the doctrine, although bimetallism has by an unrepealed and therefore by an existing law been solemnly declared to be the policy of this Nation, I realize that for the time its day has passed and it must await the hour of its certain resurrection. And while I earnestly believe that the future will vindicate the mighty struggle of its advocates for its reestablishment in America, and that the inexorable needs of commercial intercourse among the nations will again lift the white metal to its rightful place as the twin monetary metal of the world, I know that in this age the United States will adhere to its prevailing standard and shape its financial legislation in harmony with the provisions of the act of 1908. I bow to this condition because I must. I therefore recognized and discharged my duty to the country by supporting the banking and currency bill.

Mr. President, the effort to place the economic development, the commerce, and the credits of both hemispheres upon a gold basis has been foredoomed to failure. The contracts and obligations of Europe and North America resting upon that metal are more than ten times the world's supply. They can never be more than ten times the world's supply. They can never be liquidated according to the terms of the bond unless the golden stores of nature to be hereafter discovered and appropriated shall multiply present production manyfold. And foreign com-merce is increasing at the rate of 7 per cent per annum, while the yearly output increases the world's gold supply but 3 per cent. To place that metal under our trade with Asia is as impossible as would be the attempt to transport an army of 50,000 men upon vessels with a maximum capacity of 10,000 men. course, it has become the sole money of international exchange, for it is the money of the manufacturing nations. But this supreme fact is the fundamental cause of the fluctuations in exchange, since the pressure upon gold is reflected in the price of all commodities, which now include the money of the trading nations. Bismarck long ago likened its limited supply to a blanket wholly insufficient to cover all seeking shelter under it, and whose struggles to possess it kept some of them continually bare. And whatever intensifies the struggle sends ex-change down, to the confusion of those whose trade balances are with the silver-using nations.

But, Mr. President, this conclusion emphasizes the importance of pointing to one of the evils, and the most formidable one. which has resulted from our discard of silver as primary money, and which urgently requires correction, for we must reason with the great fact that so long as silver, population considered, carries the major part of the world's commercial burdens-as a slave, perhaps, but carries them nevertheless-and so long as we trade with countries using that metal as their medium of domestic exchange, we in common with the other gold-using countries are directly and deeply concerned in steadying its value and promoting its efficiency at some predetermined ratio.

In 1897 President McKinley, recognizing this great truth, appointed the Wolcott Commission to deal with it by securing some measure of international cooperation with reference to it, a commission authorized by Congress and commanding the warm support of men like the late Senator Hoar. It came to nought, through the opposition of the Indian Viceroy, whose ill-timed counsel was permitted to override the approval of Lord Salisbury and Mr. Balfour.

In conveying to the French Chamber of Deputies the mis-carriage of this historic effort Mons, Meline said:

carriage of this historic effort Mons. Meline said:

Monometallists, unfortunately, can not wipe out the fact that there are 900,000,000 human beings who know only silver, use only silver, trade only with silver, and do not want gold. Facing these there are 400,000,000 of gold monometallists. It is true that they belong to the richest and most powerful nations who are the creditors of the universe; but these nations would be unwise if, intoxicated by their present power, they should despise their opponents, for these opponents, the silver countries, are young and vigorous. Their labor is cheap and they wait only for the hand of the engineer and the eye of the overseer. Nay; for they already have them.

If we add to these advantages those offered by the silver standard, which allows their selling their products in our markets at a low rate and acts as a protective barrier at home, favoring their development of their industries, we must not be surprised some day if we see the balance turn in their favor, to the great detriment of the nations now so proud of their gold standard. We are, unfortunately, powerless to decide this question single handed; it is a problem of international importance. No Government can solve it according to its own views; it can only urge the solution which it deems preferable.

Mr. President, the question has become more momentous with

Mr. President, the question has become more momentous with the passage of every year since these fateful words were ut-tered, and we have done nothing. In common with Great Britain and Germany, we have stood still while the evil has increased. Its causes are obvious, its progress inevitable.

It is a fact, Mr. President, that in China, Japan, and other silver-using countries the rate of wages and the value of raw material are constant, and are reckoned and paid in silver or its equivalent. Revolutions in the world's standards have not affected these conditions. The cost of a day's labor is the same as it was in 1870 and is paid in the same money. The value of oriental produce and raw material is practically the same and reckoned by the same standard. Stated conversely the purchasing power of the silver coin has persisted as to all transactions and commodities in these countries, although it has fallen in value when measured in gold. It is perfectly clear, therefore, that he who produces in China on a silver basis may sell in that he who produces in China on a silver basis may sell in the United States on a gold basis, exchanges his gold for silver, and reap a harvest of profit, gauged, however, by the rate of exchange then prevailing. The system operates as a bounty on exports, which increases with every fall in the gold value of silver, and decreases with every rise in that value. Silver de-pression means prosperity to the silver-using nations, and menaces in turn not the export trade of gold-using countries only, but their manufacturers as well, for the bounty which the silver-using country enjoys under these conditions places a corresponding embargo upon its imports, which requires it to supply them by producing them at home. And this is the competition and the only competition of cheap foreign labor with the labor of America which we may justly fear. It can not be neutralized by tariff laws, which do not even check it, for it proceeds from the dislocation of our exchanges with those of tions where cheap labor is abundant. And so it was inevitable that manufacturers for the oriental trade would be, as they have been forced to transplant many of their factories to Asia,

and that rival establishments should spring into existence not only to compete with them for the local markets, but to invade

those of England and the United States as well,

This is neither a new question nor a new condition. It is an old and a persistent one. It has long confronted us. It manifested itself as soon as its causes were developed. In 1892 the North Island of Hakodate, in Japan, advertised for bids for 1,500 tons of iron pipe for street mains. A British firm obtained the contract at 4 sovereigns per ton. At the rate of exchange then prevalent this cost the purchaser 28 of its silver dollars. In 1893 the preconcerted assault upon silver in the United States synchronized with England's closure of the Indian mints. Silver fell 9 pence an ounce within the month. In 1894 Hakodate advertised for bids for another 1,500 tons of iron pipes. The same British firm responded with the same bid. But now the exchange had fallen to 40 silver dollars for 4 sovereigns. Therefore Hakodate rejected all bids, erected her own foundry, supplied her own needs, and since then has become an exporter of iron pipes to China and India.

In 1894 the Yokohama Chamber of Commerce warned London

Every month of delay in monetary reform does not only a temporary but a permanent injury to the trade of all countries having a gold standard, as although the eventual righting of the silver question may check the further establishment of mills in Japan and China those already erected will remain keen competitors of the mills and factories of Lancashire and the wost, and there will be great difficulty in ever again getting back the trade now being diverted. Already under the influence of cheap silver a large proportion of the trade east of the Suez Canal is finding for itself new channels which will gradually be closed to western competition.

In 1903 Sir Thomas Jackson said to the Straits currency commission:

I was in Shanghal in 1867; then the only items of export were tea and silk. Now the low exchange has enabled them to export all sorts of things—hides, tallow, wax. In fact, in a ship of 6,000 tons you will find tea and silk not 5 per cent of the cargo. There are a hundred and one articles exported from China now that were impossible to export 30 years ago.

And one of my predecessors in this Chamber, Senator Teller, shortly afterwards said:

Five gold dollars or 1 sovereign used to purchase 3 taels only, and 3 taels then paid the wages for one day of 25 Chinese mill hands, while to-day 5 gold dollars buy 8 taels, and 8 taels a day pay a day's wage not to 25 but 60 Chinese mill hands; such is the nature of the protest which sums up our sliver philosophy.

In 1909 Tong Shoa Vi, first prime minister under the Republic, wrote:

In China fluctuations in exchange such as those of last year are of course very troublesome for our importing merchants; still no doubt last year's fall in silver greatly assists our mills and other manufacturing industries which might be damaged by the competition of imported foreign goods if the exchange rose. Thus the fall in exchange is even as an increasing tariff, but unlike a tariff our exports are not reduced, but, so to speak, subsidized.

A list of textile and metal factories and foundries now operating in China, India, and Japan, which have been erected since the great silver debacle of 1893, would be most interesting; but I have not had time to tabulate them. Mr. Moreton Frewen, who has devoted his great abilities to a study and solution of this mighty problem, says:

this mighty problem, says:

China, unable to buy our gold (exchange) and thus our iron and steel, for the first time in history erected for herself in Hankow great steel rolling mills, and commenced the export of pig iron in full cargoes. Han-yang is to-day selling high-grade pig iron f. o. b. for 16 taels a ton. Now, the gold price of 16 taels in 1873 was 5 guineas; in 1907 it was still £2 16s., and in 1908 only £1 18s. 6d. It is quite safe to say that no white labor in the world has ever produced pig iron of such good quality for any such gold price, and for this sinister genesis of a new industrial era in China, for which to-day the Panama Canalyawns, the conversion in exchange caused by the Simla silver operations in 1907 must be held directly responsible. A recent number of an American scientific periodical says; "Five years ago Japan and China boasted but two small steel plants. To-day these two plants are employing more persons than any steel company in the world, with the exception of the United States Steel Corporation, and one-third as many as the latter. These companies not only supply most of the needs of their own countries but recently captured a big order for the Philippines, in which American, British, and German firms were bidding."

A few years ago China began to export pig iron to Seattle and

A few years ago China began to export pig iron to Seattle and San Francisco at prices which American producers could barely afford to meet. They clamored for more protection, which they needed, but not by way of increased duties. They ascribed China's iron invasion to her cheap labor, which was true, but it was made efficient solely through the fall in our exchanges with that country. When this rises the invasion is checked and ceases if the rise be great, when the tide turns in the other direction. This is attested by the experiences of 1906 to 1908.

American merchants noticed in 1908 all down the Pacific coast that trade conditions with China between such ports as San Francisco, Portland, and Seattle had become suddenly reversel. Ships in 1906 and 1907 had been running west full and returning almost empty; but in 1908 they salled west empty to return with full cargoes of Chinese products, and especially pig iron. Let me instance the case of the great Oregon and Washington lumber interests. Good dressed lumber from Portland had cost the Shanghai buyer in 1907 \$30 gold per

thousand feet. At the exchange of 1907 this was 33 silver taels, but at the exchange of 1908 \$30 gold now cost the Shanghai buyer 48 taels, whereas he was able to buy similar lumber from the Manchuran mills in the Yalu River for 39 taels. These figures are, of course, equally applicable to the westbound exports of steel rails and cotton goods or wheat and flour.

So shrewd an observer of trade currents and conditions as James J. Hill could not fail to perceive this undesirable situation nor to discern its causes. It is not surprising, therefore, that he should have directed attention to it. Through the columns of the World's Work for January, 1910, under the caption of "A lost opportunity on the Pacific," he said:

As soon as capital is supplied to develop her native resources she (China) will furnish her own raw materials for manufacture, buying them in her own markets on the silver basis, and selling them abroad on the gold basis. This will enable her, as long as her own people are content to accept these low silver prices for material and labor, to cut our prices in two. Bar silver sells at about 52 cents per ounce in New York. On this basis the silver in a dollar is worth about 45 cents. The Chinese manufacturer who can pay his workman his low wage with silver worth its face and sell his product for gold that is convertible into silver at twice its face has an advantage which we can not ignore or escape.

Mr. Charles Denby, United States consul general at Shanghal, reported in 1908 that—

When silver is high, imports are increased; when silver falls, importations become unprofitable and heavy losses result upon goods in stock. Importing firms have found their legitimate trades seriously embarrassed during the past 12 months by the depreciation of silver. Fluctuations in value of local currency rulned hundreds of Chinese merchants who had dealings with foreigners. Normally this depreciation would have considerably stimulated the export trades.

The VICE PRESIDENT. Will the Senator from Colorado suspend for a moment? The morning hour having expired, the Chair lays before the Senate the unfinished business, which will be stated.

The Secretary. A bill (S. 48) to authorize the President of the United States to locate, construct, and operate railroads in the Territory of Alaska, and for other purposes.

Mr. CHAMBERLAIN. I ask that the unfinished business be temporarily laid aside until the conclusion of the address of the Senator from Colorado, and that it be then taken up.

The VICE PRESIDENT. If there be no objection, the unfinished business will be temporarily laid aside, and the Senator from Colorado will proceed.

Mr. THOMAS. Mr. President, it is perhaps unprofitable to quote further from those who have written or reported upon this all-important subject, for the testimony is all one way. I must, however, refer to another of its many phases before proceeding to a discussion of possible remedies.

The steady level of wages in silver-using countries means their decrease in terms of gold. As gold rises in value when quoted in silver currency, the same amount of gold translated into silver increases in purchasing power in their labor markets. The effect of this condition in substituting silver-paid labor for gold-paid labor is nowhere more vividly illustrated than upon the Pacific marine, where the labor of the Orient has almost wholly supplanted that of the Occident. Mr. Kopsch, of Shanghai, says that—

Sliver-paid Chinese labor has driven every European sailor and fireman from the decks and stokeholds of foreign vessels plying on the coast of China, and the premium paid by gold countries to silver labor will crush the efforts of the machinist to rap the profit of his toil in the East just as it has vanquished the seaman.

All Americans deplore the decay and disappearance of our country's merchant marine, and all would unite in resort to every available method for its restoration. But it would be a melancholy satire upon our institutions and our policy if, when ships of commerce shall again fly the American ensign on every sea, their enginemen, their crews, and their coal heavers should consist of yellow men recruited from the exhaustless supplies of the Far East, to the exclusion of our own people, because they toil for a wage reckoned and paid in the coin which they and their ancestors have for centuries accepted as the unchanging symbol and standard of human values.

The problem will in the space of a few short months lie directly in our commercial pathway. It is the real yellow peril. The completion of the Panama Canal is vastly more than the greatest engineering achievement of the human race or the opening of a new highway for the commerce of the world. As Hugo said of Waterloo, "It is a change of front of the universe," It shrinks the earth into smaller compass and brings its races into closer contact. It will companion Atlantic lanes of travel with watery avenues of traffic across the illimitable expanses of the great. South Sea. The goal of American and European rivalries will be the markets that lie upon Asiatic shores. And these will be held by their own peoples as best they can. Long ago they perceived that to do this their counter invasion of our markets was indispensable. This will be as well their policy of the future as of the past. Panama cutting distance in twain is wholly

impartial. Her economic advantages are mutual. She brings us as near to Asia as she brings Asia near to us. And with dislocated exchanges whose fluctuations are but occasionally upward, how shall Europe and America overcome their handi-

The trouble-

Said the late Senator Jones, of Nevada, the greatest political economist of his day in public life, in a letter of May 5, 1908, to

is not now with our currency or yours, but is in the exchanges between the West and the Orient. This involves us in the most complex economic problem of our time. For if gold prices are to continue to rise—as too surely they will rise, and sliver prices to fall—what a crisis it is which looms ahead. There is nothing, it seems to me, stranger nor much sadder in history than the fact that public opinion has been so drugged and duped that it sees nothing in the exchanges with one-half of the human race excepting the price of the sliver bullion of Nevada.

On the 3d of December last the president of the United States Steel Corporation delivered an illuminating address in the city of Chicago upon the subject of export trade. His knowledge of the subject is much more comprehensive than mine. I was therefore pleased to note that he had been an observer of our trude relations with the Orient, and alive to the actual and latent competition which there confronts us. He says:

The remarkable ingenuity and adaptability of the Japanese and the enermous population and latent possibilities of China must be reckoned with in considering the future struggle for the trade of the world. In the products manufactured by Japan, actual competition with her in Asiatic markets, on which her ambition is particularly concentrated, enables one to realize the extent of her activities. Japan, aside from shipping one-third of her exports to the United States, now dominates the trade of China in piece goods, which formerly were largely obtained from Great Britain and America. Formerly Japan exported raw materials which they now buy and export in the form of manufactured goods, and are rapidly becoming, like Russia, an increasing factor in the business economies of the world, Japan's exports having increased from \$200,600,000 in 1908 to \$203,000,000 in 1912.

Mr. Farrell does not refer to the stimulus which falling exchanges have given this growing trade, but he is too intelligent an observer of modern economics and too closely identified with one of our greatest industries to have overlooked it. And all must perceive that Japan has within recent years become a great carrier nation. Her merchant marine, equipped with crews recruited from her own people and paid a silver wage that has not varied for a century, is visibly increasing. She will soon dominate the transportation of the Pacific, for she can do the work more cheaply than Great Britain and far more cheaply than we can. Is it patriotic, is it wise, is it even expedient to ignore these most obvious conditions and let them drift without some effort to correct them? Is national prejudice against an ancient money metal so strong, the opposition to its use so bigoted, that the commerce of a hemisphere is to be jeopardized, if not lost, because of it?

If so, let me remind my hearers that this is but half the prob-, for as water reaches its level, and as the nation which can sell the cheapest will outstrip its competitors in the race for commercial supremacy, so will our own markets become in time the prize of other lands upon whose wares we have placed a subsidy by outlawing their currency in the exchange of the world and then keeping it subject to all the contingencies which accompany the changing values of gold. Our ultimate stake may be the retention of what we have rather than the obtaining of what we desire. It would be a melancholy sequel to our construction of the Panama Canal if it should ultimately prove rather a portal for the incoming fleets of eastern commerce than an outlet for the distribution of our own.

Mr. President, it is fortunate for our purpose that this evil is not an unmixed one. The importers of the Far East suffer from its existence, and these are eager to aid in its avoidance. ments to America and Europe in trade balances and interest upon public and private debts held in Europe and America must be made in gold or its equivalent. These counter burdens are sometimes severe, while the uncertainty always surrounding exchange makes the subsidy it confers fitful and inconstant.

Hence we may be reasonably sure that Asia and South America and Mexico will welcome any solution of the problem which promises permanent and reasonably steady equilibrium.

The thoughtful students of this universal difficulty have been able to suggest but one effective remedy for it, and that has never been tried. I shall discuss it presently. Before doing so it is well to refer to one whose experimental stages I trust are over, and which instead of removing has vastly aggravated the evil. I allude to England's effort to establish the gold standard in India. That great dependency has been silver's standard of the contraries. She has absorbed it from the rereservoir of the centuries. She has absorbed it from the remotest periods, like a sponge absorbing water. She has held what she has received parting with practically none of her constantly accumulating store. She has been rightly called "the sink of silver." Her rupee is her standard of value, worth from a bitter experience that silver is not money in India,

nominally about 48 cents, or 11 to the sovereign. Until 1803 their coinage was free. Her people hoarded or melted them and transformed them into ornaments, always available for money in times of need. After 1803 and until the establishment of the recommendations of the Fowler committee of 1808 their hordes of silver, whether coined or melted, were still available for their needs. The Viceroy, in 1897, rejected the proposals of the Wolcott committee, because their first effect would be an intense disturbance of Indian trade and industry by the sudden rise in the rate of exchange, and that would kill India's export trade, "for the time at least." He would prefer the bounty which Indian exports then enjoyed through the cheapening of silver bullion to the substantial relief of all in-ternational trade. Great Britain accepted his conclusions, and then facing about in 1900 deprived India of that advantage by imposing the gold standard upon her people. To make that standard effective she determined upon governmental coinage of the rupee and upon a forced maintenance of its value at 15 to the sovereign. This appeared possible by regulating their coinage as the exigencies of trade and exchange required, by suspending their coinage entirely or by locking them up when seemingly redundant, and by imports of gold when needed through the exchange of rupees or rupee paper at that ratio. But silver continued to transact the business of the country. The Hindoo was joined to his kind of money and would not turn to some other. Mr. Dunbar, treasurer of the Bank of Bengal, has recently said that-

Gold currency in India is a wasteful and expensive luxury. There is any amount of funds in India. It is simply that rupees are locked up by the Government. We want rupees, and we can not import rupees; we can import sovereigns and "councils," but it is rupees we want, and they are locked up.

This policy did, however, give China and Japan the same advantage over India through the fall of its exchange which the three countries had theretofore enjoyed in common against Europe and the United States. The rupces beyond India were not 15 to the sovereign, but what the current gold value of silver was to the sovereign. And the exports of that unhappy country withered and dried up, with no compensating advan-

Such were conditions in February, 1910, when the Government as a last stimulus to its pallid experiment imposed a high tariff upon all imports of silver bullion to India. Let Mr. Frewen tell the consequences:

tariff upon all imports of silver bullion to India. Let Mr. Frewen tell the consequences:

For the financial year 1909, while the imports of gold into India had fallea off more than 8,000,000 sovereigns as compared with 1908, the import of silver, on the other hand, showed an increase for the year of over 17 per cent, and this albeit there was already a duty of 5 per cent on all imported silver. It was now evident that unless heroic measures were adopted to save the gold-exchange standard, the ineradicable preference of the natives for the metal of every Indian contract and obligation for hundreds of years would yet override the various orders in council at Simia. Therefore in February, 1916, the natives, who laid in times past drawn their trade balances in either of the two preclous netals, were informed that if they took payment in an onnes of gold they would receive an ounce of gold, but if in a hundred tolas of silver they must hand over to the sirkar 16 tolas. It is little wonder the great drain of gold to India set in. During the nineteenth century the proportions of the two metals imported were gold to silver as 1 to 31; last year the proportion of gold to silver had become 8 to 1, and the importation of silver had shrunk to negligible dimensions. During the two complete financial years which have elapsed since the imposition of the silver duties, India—including sums on deposit in London—has taken about 73,000,000 sovereigns of our gold, or at the rate of over 100,000 daily. Yet in spite of the warning of the native members of the viceroy's council, this silver tax, unprecedented in the whole world's history, has been persisted in. It had the inevitable and the foreseen result of discrediting silver with the natives, of checking the Indian absorption of the white metal—which absorption by raising the rate of tael exchange enables China to purchase our commodities—and, what is far more important, it set in motion to the hoards of India has the past two years were still evallable when and where needed, th

Mr. President, this unhappy juggling with Indian finances has resulted in the absorption by that country since 1900 of more than \$700,000,000 of gold from Europe, which is entirely lost to trade. The drain has increased abnormally since 1910, and will continue to so increase until Britain abandons her policy and recognizes the grave danger with which that policy menaces all the monetary systems of Europe. When the Fowler committee began its inquiries consols were at 111; they are now about 75. If Indian gold were available to commerce, if it there continued to circulate in the channels of trade, stimulating industry and promoting adventure, its translation to that country would not be a subject of universal solicitude. But the native is learning

although silver rupees are. And so he utilizes the latter for his business transactions, but hoards gold as he once hoarded silver. And when this substitution becomes universal in India and gold flows there as silver went there in the past, what will be the effect of the current upon that vast inverted pyramid of credits which finds its support upon the world's visible supply of the vellow metal?

It is not surprising that Great Britain, appalled by these conditions and by the certainty that this "financial hemorrhage" must under the existing régime continue, has appointed a commission to inquire into the measures taken to maintain the exchange value of the rupee and to ascertain whether the existing practice is conducive to the interests of India. It requires no royal commission to determine that it is not conducive to her own. Nor to the finances of the continental nations which because of it are most unsatisfactory.

Mr. President, this formidable Indian experiment has broken It is worse than a failure; it is a crime against the 400,000,000 people of her great dependency. It is more than a national failure, for it jeopardizes every gold reserve in Christendom, and thereby disturbs the foundations of credit everywhere. But it has demonstrated by the greatest financial object lesson of the century the hopeless inability of gold to do the monetary

work of all the world.

Surely a wise and enlightened statesmanship, recognizing this stupendous truth, should adjust the monetary systems of the nations to it. As gold must be the money of Europe and North America, and as silver must in practice be the money of the remainder of the world, and as commercial intercourse must and should always continue between them, a way should be found to establish some steadfast parity of exchange between them. The ratio is of secondary importance except as it must be a factor in the equation. Be it 16 to 1 or 32 to 1, let it be agreed upon between the nations, each contributing toward its steady and constant maintenance. This can be done. It must be done if international trade and commerce are to be conducted upon principles of universal application. And it must be done by international concert, since no nation, however

powerful, can alone accomplish the task.

In 1891, Mr. Goschen, an uncompromising gold monometallist, then chancellor of the exchequer in Lord Salisbury's Government, was moved by the financial crisis of 1890 to propose a solution of what was then in its ultimate analysis this identical problem, by the issuance of a limited number of small notes against silver, in compliance with the suggestion of the royal commission in 1888. He maintained that it would protect the gold reserve, absorb any surplus of unused silver, and thereby sustain its value at a steady level. He elaborated this proposal with his usual exhaustive ability. It was defeated by the bimetallists, who since then have perceived its wisdom and its availability, if utilized by the four great gold-using powers in concert, in placing silver exchange at a point where it can be maintained and thus relieve Asiatic and South American trade of its dangerous and speculative characteristics. At the same time this limited coinage will furnish a desirable and thoroughly safe additional currency, incapable of expansion, and readily adaptable to the innumerable small transactions of the people. Inflation would be impossible.

Mr. Frewen says:

Mr. Frewen says:

The world's annual production of silver may be reckoned at 230,000,000 ounces, of which, one year with another and irrespective of the price he pays, the consumption of the silversmith is about 140,000,000 ounces, a consumption which must tend to increase with the world's wealth and population. Thus not more than 90,000,000 ounces remain over for monetary use. Can this amount be safely and profitably taken off the market by a single buyer purchasing 7,500,000 ounces monthly at a fixed price on behalf of the four great partner nations? During the past 15 years the purchases of the Indian Government have averaged about 30,000,000 ounces a year, and the purchases of our own royal mint for our token silver currency, and to meet a rapidly increasing demand for silver currency in Central and West Africa, may be safely estimated at 15,000,000 ounces more. We may add to this an annual average demand for 10,000,000 ounces more for the new Straits dollars for the requirements of the Malay currency.

Mr. President, if Great Britain can do this, surely the United

Mr. President, if Great Britain can do this, surely the United States, France, and Germany could take care of the remaining 35,000,000 ounces per annum, were the silver-using nations to absorb none of it, a highly improbable contingency. But their demands upon the available supply are large and increasing. Moreover, such an arrangement would stimulate the demand for it everywhere, while India would resume her age-long accumulations of it. Its industrial consumption grows apace as well, and last year reached 65 per cent of the annual production. The gross production from 1905 to 1911 was 1,379,277,040 ounces, of which India, under the adverse conditions which I have discussed, consumed 708,133,300 ounces, or much more than 50 per cent. Under the proposed plan her gold may come out from its hiding places and quicken the currents of her commerce

with its abundant flood, and her drain of it from the hoards of Europe will cease, while consols rise and discounts fall.

It may be interesting in this connection to refer to some figures giving the production and the coinage of gold and silver for 1912 as given in the Report of the Director of the Mint, 1912, pages 250 and 251.

World's production of gold and silver, and coinage thereof, for 1896-1911.

\$27, 951, 733 Silver: ____ounces__ Production_____do___ __ounces__

Coinage value of silver coined____ Industries consume 62 per cent of this production, equaling 1,688,241,347 ounces. Deduct from production leaves apparently available for coinage needs but 1,034,728,568 ounces, or 898,454,754 ounces less than the actual coinage, an apparent contradiction, easily explained by extensive recoinages, on the one hand, and the use of coin silver in the industries, on the other.

Mr. President, this method of sustaining foreign exchanges may prove delusive, but I do not think so. It provides a service for what must prove a rapidly dwindling silver surplus, and thus destroys the primal cause of falling silver values. It equalizes the competitive commercial conditions of all countries, and establishes a safe and constant medium for all international transactions. It will make the ebb and flow of gold less frequent and quiet these apprehensions which any movement of it inevitably arouses. And it will relieve the toiler of the gold-standard countries from the dangerous and artificial advantage which the uncertain exchanges now prevailing gives to the laboring hordes of the more ancient silver-using civilizations, and which advantage must increase with the certain increase in the value of gold by the added burdens which every hour of delay imposes upon it.

And, Mr. President, our new monetary system, although carefully constructed upon the best models that time and experience can give, although well adapted to all the commercial and industrial affairs of the Nation and equal to every demand of British and continental commercial intercourse, will prove unequal to the ordeal of South American and oriental traffic while their exchanges are governed by the capricious and unreliable fluctuations of silver values. This is the one subject on which all international interests are identical, and the proper adjustment of which all international trade demands. Great Britain, Germany, France will welcome our initiative in seeking a cooperative solution of the difficulty, and the silver-using nations if they do not welcome will surely accept a result proceeding from the mutual conference of the four great nations of Christendom.

We begin the new year with two great schemes of legislation behind us, wrought into the statutes by the direction of the American people, whose government we now control. of these, carefully framed and exhaustively considered, has commanded instant and wide-spread approval. Those who opposed and those who advocated it are now alike its friends and supporters. It is designed to aid industry in all directions by coining current credit into money that stringencies might be overcome and panics avoided. It was fashioned in harmony with the Democratic platform declaration that "banks should exist for the accommodation of the public and not for the control of business" ; that commerce and manufactures released from the thraldom of high protection should be supplied with a safe and pliant method of financial equipment which its expanding energies will demand. This, Mr. President, has been done by the new banking and currency law, which I believe will stand the test of time and experience. It will prove an effective agency in quickening and sustaining our domestic commerce, and our commerce with Europe and Canada generally. But, Mr. President, in common with these countries it needs the supplemental stimulus of steady exchange with the remaining countries of the world. Without it our trade relations with them can be neither certain nor permanent. Exposed to the fitful rise and fall of their money values the commercial barometer will confound the calculations and mock the plans of men. We are upon the threshold of a new epoch in our material progress. We are girding our loins for the greatest economic race in history. ranged for it every preliminary save one. Realizing its vast and immediate importance shall we not assume the lead in arranging it as well? France has been ready and anxious to aid us in the task for many years. England is now alive to the necessity of action, and Germany's commercial activities assure us that she has not overlooked this great obstacle to eastern traffic.

They will welcome our initiative. Their common interest in the common handicap means speedy response, and response means speedy and effective cooperation. And when the world's exchange mediums shall have been adjusted and the last obstacle to an universal commerce shall have been removed each of the nations will have a fair field and need ask no favors.

Mr. President, I move that Senate joint resolution No. 89 be referred to the Committee on Finance.

The motion was agreed to.

RAILROADS IN ALASKA.

Mr. CHAMBERLAIN. I request that the unfinished business be now laid before the Senate.

The PRESIDING OFFICER (Mr. WALSH in the chair). Chair lays before the Senate the unfinished business, which is Senate bill 48.

The Senate, as in Committee of the Whole, proceeded to consider the bill (S. 48) to authorize the President of the United States to locate, construct, and operate railroads in the Territory of Alaska, and for other purposes, which had been reported from the Committee on Territories with an amendment in the nature of a substitute.

Mr. CHAMBERLAIN. I ask unanimous consent that the formal reading of the bill be dispensed with, but that the bill be

printed in the RECORD.

The PRESIDING OFFICER. The Senator from Oregon asks that the formal reading of the bill be dispensed with and that it be printed in the RECORD. The Chair hears no objection, and the formal reading of the bill will be dispensed with.

The amendment reported by the Committee on Territories was to strike out all after the enacting clause and to insert:

the formal reading of the bill will be dispensed with.

The amendment reported by the Committee on Territories was to strike out all after the enacting clause and to insert:

That the President of the United States is hereby authorized and directed to cause to be located such main lines for railroads from mote the settlement of Alaska, develop its resources, and provide adequate and suitable tarnsportation for coal for the Army, Navy, and other Government services; of troops, arms, and munitions of war; of the mails, and for other Government and public uses, together with such branch lines, feeders, sidings, switches, and spurs as he may deem necessary; and when such line or lines are located he is hereby authorither on the contract of the services; of troops, arms, and spurs as he may deem necessary; and when such line or lines are located he is hereby authorither of the contract of lease, but no contract or lease shall be for a longer period than 10 years.

Sec. 2. That to enable the President may cause said road or roads to be operated by contract or lease, but no contract or lease shall be for a longer period than 10 years.

Sec. 2. That to enable the President for construct and operate the railroad or railroads and works appurtenant and necessary thereto, as trained or railroads and works appurtenant and necessary thereto, as the property of the contract of the location of said railroad lines and in the construction, completion, equipment, and operated to the United States Army, at his discretion, and likewise to employ any engineers in civil life, at his discretion, and such other persons as he may deem necessary for the proper and expeditious prosecution of said work. The duties, powers, and compensation of said road or confineers of the United States Army, at his discretion, and such other persons as he may deem necessary for the proper and expeditious prosecution of said work. The duties, powers, and compensation of said road or railroad said property of the property of the property of the property of

in such case the lines thus connected shall be operated as a through route with through rates upon a fair and reasonable apportionment of revenue and expenses.

SEC. 5. That the Secretary of the Treasury is hereby authorized to borrow, on the credit of the United States, from time to time, as the proceeds may be required to defray expenditures authorized by this act (such proceeds when received to be used only for the purpose of meeting such expenditure), the sum of \$40,000,000, or so much thereof as may be necessary, and to prepare and issue therefor coupon or registered bonds of the United States, in such form as he may prescribe and in denominations of \$20 or some multiple of that sum, redeemable in gold coin at the pleasure of the United States after 10 years from the date of their issue, and payable 30 years from such date, and bearing interest, payable quarterly in gold coin, at the rate of 3 per cent per annum,; and the bonds herein authorized shall be exempt from all taxes or duties of the United States as well as from taxation in any form by or under State, municipal, or local authority: Provided, That said bonds may be disposed of by the Secretary of the Treasury at not less than par, under such regulations as he may prescribe, giving to all the citizens of the United States an equal opportunity to subscribe therefor, but no commissions shall be allowed or paid thereon, and there is hereby appropriated, out of any money in the Treasury not otherwise appropriated, the sum of \$1,000,000, to be used for carrying out the provisions of this act, including the expense of preparing, advertising, and issuing the bonds herein authorized, to continue available until expended: Provided, That so much of the said sum of \$1,000,000 as shall have been expended shall be reimbursed to the Treasury, to be known as the "Alaska railways redemption fund," into which shall be paid the net earnings of said railroad or railroads above maintenance charges and operating expenses; the said redemption fund, or any part thereof,

Mr. CHAMBERLAIN. It is amusing, Mr. President, in the light of latter-day investigations and knowledge, to read the discussions in Congress at the time the bill was pending for making an appropriation of \$7,200,000 in payment to Russia for her possessions in North America. This was the sum which the treaty, negotiated by Hon. W. H. Seward, Secretary of State, provided should be paid for these possessions, and opposition developed to the making of an appropriation to carry out the treaty stipulations. While Mr. Seward was commended in many quarters of the country for his foresight and statesmanship, he was roundly denounced in others for negotiating a treaty for the purchase of a territory which was practically unknown, and to the casual observer simply a frozen, barren wilderness. House bill 1096, making the necessary appropriation to carry out the treaty stipulations, was reported favorably to the House May 18, 1868, with a lengthy report signed by Hon. N. P. Banks for the committee, accompanied by the views of the minority in opposition. These documents show that patient and painstaking consideration was given to the bill, but it conclusively shows that neither the majority nor the minority of the committee knew anything at all about Alaska and its resources as compared with what we know of them to-day. In 50 years from now it will probably be said by those who come after us that we of the present day know as little about the real Alaska as did those who subscribed the reports mentioned.

The report discusses at length, from the information then at hand, the resources of Alaska, including agriculture, wood and timber, coal and other minerals, game, furs, and fisheries, laying particular stress upon the latter. But the report upon these subjects shows, in the light of present information, only slight knowledge of any of them, and the conclusion to favor the then pending measure was based rather upon considerations of public policy than the intrinsic worth of the country from a commercial standpoint. The report of the majority, who reported in favor of an appropriation for the purchase of Alaska, says in conclusion:

These statements upon the character of the territory acquired by the treaty are the results of personal observations made by perfectly reliable public officers and private citizens since the date of the purchase, representing different interests and different parts of the country, moving in different directions and by different courses through the territory by sea and land, and are presented without argument as a just representation of facts already known in support of the treaty.

I might say, incidentally, that I doubt very much if any American citizen up to that date had ever gone through any part of Alaska except, possibly, those portions of the Territory that skirt the Pacific Ocean and the Gulf.

The remarks preceding this part of the report upon the rights of the House in regard to the negotiation of treaties, which were orally presented to the committee, are embodied in the report at the suggestion of members who voted in the affirmative and negative on the final question of reporting the bill herewith presented.

The treaty adds an extended territory to the United States, the political jurisdiction of which will ultimately be indispensable to its peace and power.

It tends largely, directly, strongly, and immediately to the consolidation of the northern Pacific coast line as an American possession.

It creates an entirely new industrial interest of vast proportions on the Pacific, the results of which can not now he fully appreciated.

It makes telegraphic communication between the United States and the people of China, Asia, India, and Russia as simple and as feasible as that between New York and San Francisco.

It concentrates the power of Russia and extends that of this country, which together will soon span the entire globe north, and strengthens the mutual friendship and interests that have marked their career since the period when they together first challenged the attention of Europe as continental powers, and began their work of expansion and progression.

It adds greatly to the productive wealth of the country, It furnishes indispensable ports for American whalers and fishermen in the Pacific and Arctic Oceans

It furnishes a basis for explorations and discovery in the Arctic region.

region.

It incloses British Columbia within American jurisdiction south,

It incloses British Columbia within American jurisdiction south, west, and north.

It removes the danger of territorial or maritime jealousies and controversies to which the two countries that have been and ought to remain friends are constantly exposed.

It strengthens the military position of the Government.

For these and other reasons that might be presented, the committee reports to the House the following bill making an appropriation to carry the treaty into effect, with a recommendation that it be enacted into a law.

The Senate will observe that there is only one mention of the commercial value of Alaska to this country in this whole favorable report, and the report itself, taken as a whole, shows that there was very scant knowledge in the possession of the committee at the time the report was filed.

But the suggestion of the woeful lack of information as to the real value of this magnificent acquisition and of the contempt in which the country was held by many persons of that day and generation is disclosed by the discussion of the then pending measure by Hon. C. C. Washburn and Hon. George W. Morgan, the minority members of the committee, who concluded their lengthy statement, as follows:

cluded their lengthy statement, as follows:

The minority of the committee, baving considered the various questions involved and the evidence in regard to this country under consideration, are forced to the conclusion that the possession of the country is of no value to the Government of the United States; that it will be a source of weakness instead of power, and a constant annual expense for which there will be no adequate return; that it has no capacity as an agricultural country; that, so far as known, it has no value as a mineral country; that its timber is mostly confined to the narrow strip of country only 30 miles wide south of Mount St. Elias, and is generally of a poor quality and growing upon inaccessible mountains; that its fur trade is of insignificant value to us as a Nation, and will speedily come to an end; that the fisheries are of doubtful value, and that whatever the value of its fisheries, its fur trade, its timber, or its minerals, they were all open to the citizens of the United States under existing treaties; that the right to govern a nation or nations of savages in a climate unfit for the habitation of civilized men was not worthy of purchase; that the constitutional right of this House to refuse to appropriate the money was known to Russia at the time the treaty was negotiated, and there can be no charge of bad faith if that right is asserted. They therefore, report the following resolution:

*Resolved**. That it is inexpedient to appropriate money for the purchase of Russian America.

The bill finally passed and was approved July 25, 1868.

The bill finally passed and was approved July 25, 1868.

I have deemed it advisable to call attention to these reports, because they show not only the conflicting views of the then stat-men but also the lack of information as to the resources of Alaska, even after the purchase had been made and was about to be concluded by an appropriation of the purchase price. They reflect the views of some of our contemporaries who have given the subject no consideration and who still look upon Alaska as a mysterious midnight land, as barren and as worthless as the Arctic regions.

It will be my purpose in the discussion of the pending bill authorizing the construction of a railroad in Alaska to show the wonderful resources of this magnificent empire, what it has added to the wealth of our country, and what its future possi-bilities are with proper transportation facilities.

The same ignorance with refere ce to Alaska has been from time to time displayed as was displayed when the acquisition of the Oregon country was under consideration-a country from which have been carved the magnificent Commonwealths of Oregon, Washington, Idaho, Montana, and part of Wyoming. There were then distinguished men in both branches of Congress who insisted that this splendid country was only fit to be used as a place for the colonization of convicts and outlaws, just as there are men to-day who insist that Alaska is only a fit habitation for the grizzly bear and the fur-bearing seal, wholly useless for the uses of civilized man.

For nearly 30 years after the cession to the United States Alaska was almost entirely ignored by Congress. There were practically no laws for its government, no appropriations for its proper support, and nothing for its development. Almost nothing was done for the betterment of the condition of its citizens until about the time of the discovery of gold in paying

quantities, less than 20 years ago.

And then, when on the eve of a development which was calculated to astonish the world, that Government which had neg-

lected its people, which had looked upon it as a wilderness, which had done nothing for its advancement, either commercially or morally, by executive fiat, was compelled to throttle its opportunities by withdrawing nearly all of its resources from private acquisition and control, to protect them from exploitation and monopolization.

In order to show what was done in reference to withdrawals, I asked the Forestry Department to furnish me with a list of the withdrawals in Alaska. I do not wish to be understood as objecting to these withdrawals, because if they had not been made there is no question in the mind of anyone who has given the subject consideration that Alaska's magnificent resources, its copper, its coal, and nearly everything else, would now be in the control of a monopoly. The Alaska Syndicate, composed of the Guggenheims and the Morgans, would have had possession of Alaska just as they now practically control all the gateways to that rich Territory. But these are the withdrawais, and withdrawals made at a time when there were laws in force in Alaska which would have enabled individual enterprise and initiative and effort to have obtained possession of them, but they were being obtained at the expense of the people of this country and in favor of special interests.

Withdrawals in Alaska.

Rand, McNally & Co.'s Atlas gives the total area of Alaska as 590,884 square miles, or ______ 378, 165, 760 The Tongass National Forest embraces approximately _____ 15, 481, 000 The Chugach National Forest embraces approximately ____ 11, 267, 850

The above are the two withdrawals of known area of the greatest quantity of land reserved.

But that is not all.

The coal (November, 1906) and oil (November 3, 1910) withdrawals in Alaska are what are known as blanket withdrawals. They prevent the location and patenting of lands chiefly valuable for coal or oil wherever found. In addition to the coal and oil withdrawals there is another blanket withdrawal applicable to Alaska, which is known as the medicinal spring withdrawal (March 28, 1911). This last-named forbids the locating or appropriation and patenting of lands in Alaska surrounding mineral or medicinal springs. In none of these last three cases can a statement be made as to the approximate acreage, since it affects all lands in which these minerals or springs are found.

So by a blanket withdrawal the coal lands, which were one of the most valuable assets of the Territory, were withdrawn.

the most valuable assets of the Territory, were withdrawn.

In 1911 the President withdrew, upon the recommendation of the Secretary of the Interior, an area so that Congress might consider legislation looking to the construction of a Government-owned rallroad. The area withdrawn embraces an area of approximately 250,000 acres. The next largest withdrawals of which the acreage can be computed are those withdrawals for military and naval purposes in Alaska, to establish coaling stations, telegraph stations, forts, and so forth. The area of these lands is not known, but on August 4, 1911, the Secretary of War informed the Secretary of the Interior that the areas withdrawn at the request of that department were 22,366 acres. No withdrawns of consequence have since been made for military or naval purposes. The next group of consequence are the areas withdrawn for game, bird, and fish reservations. While the area of these is not known it is not very large. Then, also, there are lands withdrawn for the native Indians, for educational purposes of those Indians becaptiment, of Agriculture experiment station, and lighthouse revertions.

Many of these reservations overlap. For instance, the coal, oil, and medichnal springs reservations may be either within or without the boundaries of the national forests, as will also be found in the case of most of the military, naval, bird, game, and other reservations.

Except for the coal, oil, and mineral springs reservations, it is possible to compute at least the approximate area of all the others. It would require, however, at least a week's time to do this. The records in the case are all in the office of the Commissioner of the General Land Office.

So it will be seen, Mr. President, that there is practically nothing left to be acquired by private initiative either in the mining section, the coal or the oll section, or under any of the laws of this country.

Mr. ROBINSON. Will the Senator from Oregon yield for question?

Mr. CHAMBERLAIN. Certainly.

Mr. ROBINSON. Are all the withdrawals the Senator has described still in force?

Mr. CHAMBERLAIN. They are all still in force.

Mr. ROBINSON. Over what period of time do the withdrawals extend? How long do they run?

Mr. CHAMBERLAIN. The President may release them by proclamation at any time.

Mr. ROBINSON. How long have they been in force?

Mr. CHAMBERLAIN. Since 1906, practically.

Mr. THOMAS. I should like to ask the Senator from Oregon he can give an approximation of the total acreage of the withdrawals?

Mr. CHAMBERLAIN. The department itself says it can not furnish the information. It is pretty safe to state, I will say to the Senator, that practically everything that is of any value in Alaska has been withdrawn and that the United States owns 99 per cent of the Territory.

Mr. THOMAS. One can not locate even a glacier up there?

Mr. CHAMBERLAIN. Nothing. I believe the glaciers are

within forest reserves, generally speaking.

Notwithstanding all this, Alaska has been contributing more money to the arteries of commerce, Mr. President, than is being contributed to this country by the commerce of the Orient, the smaller countries in the east or the west, as I shall prove by statistics furnished by the Department of Commerce.

Alaska has a good homestead law and a good law for the acquisition of rights of way and the development of railways

by private corporations.

In order to get it before those who take any interest in the subject-and I assume all Senators will-I am going to ask that those laws be inserted in the RECORD. They show that the lack of development is not due to the fact that we have not the laws, because we have the best laws governing the subject, but because everything, by blanket and other withdrawals, has taken from acquisition by private capital or private initiative.

Now, Mr. President, I ask to have inserted in the RECORD the act approved May 14, 1898, extending the homestead laws and providing for right of way for railroads in the District of Alaska, and for other purposes. I also ask to have inserted the acts approved June 6, 1900, April 28, 1904, and May 28, 1908, for regulating the development of coal mines to show that the laws affecting Alaska are practically more generous in their terms than are the laws which govern the western part of this country

The PRESIDING OFFICER (Mr. Walsh in the chair). Permit the Chair to ask the Senator from Oregon if he desires to have this matter printed as an appendix to his remarks?

Mr. CHAMBERLAIN. If the Chair please, I will have them

inserted at this point.

The PRESIDING OFFICER. In the absence of objection it will be so ordered.

The matter referred to is as follows:

[Public, No. 95.]

An act extending the homestead laws and providing for right of way for railroads in the District of Alaska, and for other purposes.

An act extending the homestead laws and providing for right of way for railroads in the District of Alaska, and for other purposes.

Be it enacted, etc., That the homestead land laws of the United States and the rights incident thereto, including the right to enter surveyed or unsurveyed lands under provisions of law relating to the acquisition of title through soldiers additional homestead rights, are as may be made by the Decretor Alaska, subject to such regulations as may be made by the Decretor Alaska, subject to such regulations, as may be made by the Decretor Alaska, subject to such regulations, as may be made by the Decretor Alaska, subject to such regulations, as may be made by the Decretor Alaska, subject to such regulations, and the subject of Alaska shall be located within or taken from lands in said District: Provided, That no entry shall be allowed extending more than 80 rods along the shore of any navigable water, and along such shore a space of at least 80 rods shall be reserved from entry between all such claims, and that nothing herein contained shall be so construed as to authorize entries to be made, or title to be acquired, to the shore of any navigable waters within said District: And it is further provided, That no homestead shall exceed 80 acres in extent.

Sec. 2. That the right of way through the lands of the United States in the District of Alaska is hereby granted to any railroad company, duly organized ander the laws of any State or Territory or by the congress of the United States, which may hereafter file for record with the Secretary of the Interior a copy of its articles of incorporation, and due proofs of its organization under the same, to the extent of the congress of the United States adjacent to the line of said road, material, earth, stone, and timber necessary for the construction of said railroad; also the right to take for railroad uses, subject to the reservation of all minerals and coal therein, public lands adjacent to said right of way for station buildings, depots,

Sec. 3. That any railroad company whose right of way, or whose track or readsed upon such right of way, passes through any canyon, mes and occupancy of said canyon, pass, or defile for the purposes of its road, in common with the road first located, or the crossing of other canyon, pass, or defile and the road of the canyon, pass, or defile for the purposes of its road, in common with the road first located, or the crossing of other canyon, pass, or defile shall not cause the disuse of any tranway, wagon road, or other public highway mow located therein, nor prevent highway where such tranway, wagon road, or highway may be necessary for the public accommodation; and where any change in the location of the passage of such railroad through any canyon, pass, or defile, said railroad company shall, before entering upon the ground occupied by structors at its own expense in the most favorable location, and in as perfect a manner as the original road or tranway: *Procided,* That such expenses shall be equitably divided between any number of railroad that where the space is limited the United States district court shall require the road first constructed to allow any other railroad or transverse of the right to regulate the charges for freight, passengers, and the control of the con

attempted to be made possess written authority, signed by the Secretary of the Interior, authorizing the collection and specifying the rates of toll: *Provided**. That accurate printed copies of said written authority from the Secretary of the Interior, including toll, freight, and passenger charges thereby approved, shall be kept constantly and conspicuously posted at each station where toll is demanded or collected. And any person, corporation, or company collecting or attempting to collect toll without such written authority from the Secretary of the Interior, or falling of a misdemeanor, and on conviction thereof shall be fined for each offense not less than \$50 nor more than \$500, and in default of payment of such fine and costs of prosecution shall be imprisoned in shall have been paid.

That any person, corporation, or company qualified to construct a wagon road or tramway under the provisions of this act that may herefore have constructed not less than 1 of tramway at a cost of not less than \$500, shall have the prior right to apply for such right of way and for lands at stations and terminals and to obtain the same pursuant to the provisions of this act over and along the line hithert constructed or actually being improved by the applicant, including wharves connected therewith. That if any party to whom license has been granted to construct such wagon road or tramway shall, for the period of one year, fall, neglect, or refuse to omplete the momental party of the period of one year, fall, neglect, or refuse to omplete he had office shall be canceled, and the reservations of such lands for the purposes of said right of way shall cease and become null and void without further action. And if such road or tramway, and thereupon shall revert to the United States without further action or declaration, the notation of such uncompleted section upon the recorded with the Secretary of the Interior may prohibit the collection.

That all mortgages executed by any company acquiring a right of way under this act, up

the person, company, or corporation having been first in time in actual survey or construction, as the case may be, shall be deemed first in right.

SEC. 9. That the map and profile of definite location of such railroad, wagon road, or tramway, to be filed as hereinbefore provided, shall, when the line passes over surveyed lands, indicate the location of the road by reference to section or other established survey corners, and where such line passes over unsurveyed lands the location thereon shall be indicated by courses and distances and by references to natural objects and permanent monuments in such manner that the location of the road may be readily determined by reference to descriptions given in connection with said profile map.

SEC. 10. That any citizen of the United States 21 years of age, or any association of such citizens, or any corporation incorporate under the laws of the United States or of any State or Territory now authorized by law to hold lands in the Territories, hereafter in the possession of and occupying public lands in the District of Alaska in good faith for the purposes of trade, manufacture, or other productive industry, may each purchase one claim only not exceeding 80 acres of such land for any one person, association, or corporation, at \$2.50 per acre, upon submission of proof that said area embraces improvements of the claimant and is needed in the prosecution of such trade, manufacture, or other productive industry, such tract of land not to include mineral or coal lands, and ingress and egress shall be reserved to the public on the waters of all streams, whether navigable or otherwise: Provided, That no entry shall be allowed under this act on lands abutting on navigable water of more than 80 rods: Provided further, That there shall be reserved by the United States a space of 80 rods in width between tracts sold or entered under the provisions of this act on lands abutting on the water front to any citizen or association of citizens, or to any corporation incorporated under the

ated prior to January 21, 1898, by survey or otherwise, under sections 12 and 13 of the act approved March 3, 1891 (26 Stats. L., ch. 561), may be perfected and patented upon compliance with the provisions of said act, but subject to the requirements and provisions of this act except as to area, but in no case shall such entry extend along the water front for more than 160 rods: And provided further, That the Secretary of the Interior shall reserve for the use of the natives of Alaska suitable tracts of land along the water front of any stream, inlet, bay, or seashore for landing places for cances and other craft used by such natives: Provided, That the Annette, Pribilof Islands, and the islands leased or occupied for the propagation of foxes be excepted from the operation of this act.

That all affidavits, testimony, proofs, and other papers provided for by this act and by said act of March 3, 1891, or by any departmental or Executive regulation thereunder, by depasitions or otherwise, under commission from the register and receiver of the land office, which may have been or may hereafter be taken and sworn to anywhere in the United States, before any court, judge, or other officer authorized by law to administer an oath, shall be admitted in evidence as if taken before the register and receiver of the proper local land office. And thereafter such proof, together with a certified copy of the field notes and plat of the Strict of Alaska, and if such survey and plat shall be approved by him, certified copies thereof, together with the claimant's application to purchase, shall be filed in the office of the surveyor general of the District of Alaska, and if such survey and plat shall cause notice of such application to be published nearest the claim within the District of Alaska, and the explicant shall at the time of filling such field notes, plat, and application to purchase in the land office, as aforesaid, cause a copy of such plat, together with the application shall be kept posted in a conspicuous place on s

such claim until the final adjudication of the rights of the parties, and such patent shall then be issued in conformity with the final decree of the court.

Sec. 11. That the Secretary of the Interior, under such rules and regulations as he may prescribe, may cause to be appraised the timber or any part thereof upon public lands in the District of Alaska, and may from time to time sell so much thereof as he may deem proper for not less than the appraised value thereof, in such quantities to each purchaser as he shall prescribe, to be used in the District of Alaska, but not for export therefrom. And such sales shall at all times be limited to actual necessities for consumption in the District from year to year, and payments for such timber shall be made to the receiver of public moneys of the local land office of the land district in which said timber may be sold, under such rules and regulations as the Secretary of the Interior may prescribe, and the moneys arising therefrom shall be accounted for by the receiver of such land office to the Commissioner of the General Land Office in a separate account, and shall be covered into the Treasury. The Secretary of the Interior may permit, under regulations to be prescribed by him, the use of timber found upon the public lands in said District of Alaska by actual settlers, residents, individual miners, and prospectors for minerals, for firewood, fencing, buildings, mining, prospecting, and for domestic purposes, as may actually be needed by such persons for such purposes.

Sec. 12. That the President is authorized and empowered, in his discretion, by Executive order from time to time to establish or discontinue land districts in the District of Alaska, and to define, modify, or change the boundaries thereof, and designate or change the location of any land office therein; and he is also authorized and empowered in a district shall, during their respective terms of office, reside at the place designated for the land districts of Alaska shall each receive an annual sala

mulgate and enforce rules and regulations to carry this provision into effect.

SEC. 14. That under rules and regulations to be prescribed by the Secretary of the Treasury, the privilege of entering goods, wares, and merchandise in bond or of placing them in bonded warehouses at any of the ports in the District of Alaska, and of withdrawing the same for exportation to any place in British Columbia or the Northwest Territory without payment of duty. is hereby granted to the Government of the Dominion of Canada and its citizens or citizens of the United States and to persons who have declared their intention to become such whenever and so long as it shall appear to the satisfaction of the President of the United States, who shall ascertain and declare the fact by proclamation, that corresponding privileges have been and are being granted by the Government of the Dominion of Canada in respect of goods, wares, and merchandise passing through the territory of the Dominion of Canada to any point in the District of Alaska from any point in said District.

Approved, May 14, 1898.

[Public, No. 168.]

An act to extend the coal-land laws to the District of Alaska. Be it enacted, etc., That so much of the public-land laws of the United States are hereby extended to the District of Alaska as relate to coal lands, namely, sections 2347 to 2352, inclusive, of the Revised Statutes, Approved, June 6, 1900. [Public, No. 204.]

An act to amend an act entitled "An act to extend the coal-land laws to the District of Alaska," approved June 6, 1900.

An act to amend an act entitled "An act to extend the coal-land laws to the District of Alaska," approved June 6, 1900.

Be it enacted, etc., That any person or association of persons qualified to make entry under the coal-land laws of the United States, who shall have opened or improved a coal mine or coal mines on any of the unsurveyed public lands of the United States in the District of Alaska, may locate the lands upon which such mine or mines are situated, in rectangular tracts containing 40, 80, or 160 acres, with north and south boundary lines run according to the true meridian, by marking the four corners thereof with permanent monuments, so that the boundaries thereof may be readily and easily traced. And all such locators shall, within one year from the passage of this act, or within one year from making such location, file for record in the recording district, and with the register and receiver of the land district in which the lands are located or situated, a notice containing the name or names of the location or locators, the date of the location, the description of the lands located, and a reference to such natural objects or permanent monuments as will readily identify the same.

SEC. 2. That such locator or locators, or their assigns, who are citizens of the United States, shall receive a patent to the lands located by presenting, at any time within three years from the date of such notice, to the register and receiver of the land district in which the lands so located are situated an application therefor, accompanied by a United States deputy surveyor or a United States mineral surveyor duly approved by the surveyor general for the District of Alaska, and a payment of the sum of \$10 per acre for the lands applied for; but no such application shall be allowed until after the applicant has caused a notice of the presentation thereof, embracing a description of the lands, to have been published in a newspaper in the District of Alaska, and shall have caused copies of such notice, together with a c

made or title to be acquired to the shore of any navigable waters within said district.

Sec. 3. That during such period of posting and publication, or within six months thereafter, any person or association of persons having or asserting any adverse interest or claim to the tract of land or any part thereof sought to be purchased shall file in the land office where such application is pending, under oath, an adverse claim, setting forth the nature and extent thereof, and such adverse claimant shall, within 60 days after the filling of such adverse claim, begin an action to quiet title in a court of competent jurisdiction within the District of Alaska, and thereafter no patent shall issue for such claim until the final adjudication of the rights of the parties, and such patent shall then be issued in conformity with the final decree of such court therein.

Sec. 4. That all the provisions of the coal-land laws of the United States not in conflict with the provisions of this act shall continue and be in full force in the District of Alaska.

Approved, April 28, 1904.

[Public, No. 151; S. 6805.]

[Public, No. 151; S. 6805.]

Approved, April 28, 1904.

[Public, No. 151; S. 6805.]

An act to encourage the development of coal deposits in the Territory of Alaska.

Be it enacted, etc., That all persons, their heirs or assigns, who have in good faith personally or by an attorney in fact made locations of coal land in, the Territory of Alaska in their own interest, prior to November 12, 1906, or in accordance with circular of instructions issued by the Secretary of the Interior May 16, 1907, may consolidate their said claims or locations by including in a single claim, location, or purchase not to exceed 2,560 acres of contiguous lands, not exceeding in length twice the width of the tract thus consolidated; and for this purpose such persons, their heirs or assigns, may form associations or exprerations, who may perfect entry of and acquire title to such lands in accordance with his other provisions of law under which said locations were originally made: Provided, That no corporation shall be permitted to consolidate its claims under this act unless 75 per cent of its stock shall be held by personsequalified to enter coal lands in Alaska.

SEC. 2. That the United States shall at all times have the preference right to purchase so much of the product of any mine or mines opened upon the lands sold under the provisions of this act as may be necessary for the use of the Army and Navy, and at such reasonable and remunerative price as, may be fixed by the President; but the producers of any coal so purchased who may be dissatisfied with the price thus fixed shall have the right to prosecute spits against the United States in the Court of Claims for the recovery of any additional sum or sums they may claim as justly due upon such purchase.

SEC. 3. That if any of the lands or deposits purchased under the provisions of this act shall be owned, leased, trusted, possessed, or controlled by any device permanently, temporarily, directly, indirectly, tacitly, or in any manner whatsoever so that they form part of or in any way effect any combination, or

Mr. CHAMBERIAIN. I have dwelt briefly upon the opinions which Senators and Members of the House of Representatives formerly entertained with reference to Alaska, and I may say that the same opinion expressed by the minority when the bill for the payment of the purchase price was before the House of Representatives in 1868 is entertained by Members of the House to-day. I presume it would not be inappropriate for me to call the attention of the Senate to the report of the minority of the committee in the House of Representatives on a very similar bill in the House during this Congress, because while

we have knowledge upon the subject it does seem to me the minority report shows almost as entire a lack of comprehension of the subject for some reason or other as does the minority report printed nearly 50 years ago.

I have had furnished me by the Geological Survey a map, which is now hanging upon the wall of the Senate Chamber. which shows Alaska, and which may be consulted in connection

with the subject which I propose to discuss.

Seattle is 400 miles nearer to Eastport, Me., the easternmost point of the United States, than to Attu, the extreme western point of Alaska. The meridian of longitude passing through Attu also passes through New Zealand.

The coast line is 26,000 miles long. On the south coast

there are numerous deep, land-locked, ice-free harbors.

The total length of the navigable rivers is 6,000 miles. of these, the Yukon, is 1,500 miles long from the mouth to the Canadian boundary and is navigable by large steamers for 500 miles above that point. It drains an area of 200,000 square miles.

Alaska has an area of 570,390 square miles, of which 100,000 square miles are susceptible of agricultural use, tiliage, and grazing. Probably 30,000 square miles, or 5 per cent of the total area, can be made available for tillage farming.

Four-fifths of the possible tillable area is in the Central Plateau, of which the Tanana Valley offers the largest oppor-tunities for farming. The Cook Inlet region has 3,000 square miles of tillable land, the Copper River drainage 2.000 square miles, and there are 1,000 square miles on the south coast. including the southeastern and southwestern projections.

It is not to be understood that the land in these areas is of such character that every half section is a possible farm home. Excepting in the alluvial-deposit areas bordering the larger streams, the topography of the tillable land is hilly, and in selecting homesteads care must be taken to secure a favorable slope, so as to get the full advantage of exposure to the sun. Apart from the bottom land there are few half sections all of which may be tilled, and homesteads will not be joined one to another, as a rule, but will be separated by land unfit for

Alaskan soils have been formed largely from material produced by glacial action and from alluvial deposits. Gravels occur frequently, and these are often thinly covered with soil. Shallow lakes and lake beds abound, and in these latter the accumulation of partially decayed vegetation has been transformed into peat. Where the vegetation has fully decayed there is a rich black loam.

Because of the protecting coat of vegetation and the short melting season, the frost line in the soil lowers only a few feet during the summer, thus preventing the escape of the excess of soil moisture and, together with the low temperature, the decay of vegetation. This results in a very wet, mucky, and sour condition of the soil. Consequently much of the land, before it can be made to produce tillage crops, must be drained and cleared of the protecting coat of moss and other vegetation in order to permit the heat of the sun to lower the frost line. Lime is very generally needed as a corrective of the acidity of the soil.

Practically all of the tillable land in Alaska must be cleared

Practically all of the thindle land in Alaska must be cleared of a timber growth and of moss, at heavy cost.

The climate of Alaska varies greatly. Now, this is what I want to call the attention of the Senate to, because I think people generally are uninformed as to climatic conditions in Alaska. On the south coast the summers are cool and the winters mild, the mean annual temperature at Sitka being about that of Washington, D. C. Zero temperatures are the exception. Precipitation is heavy, and there is much cloudy weather that is not favorable to tillage farming, other than the growing of vegetables and grasses. The high mountains fronting the south coast intercept the moisture-laden clouds coming from the sea and cause the excessive precipitation at low levels and the permanent snow and ice fields at the higher levels.

The central plateau, consequently, has a much drier climate and a much greater range of temperature, with warmer summers and colder winters. The summers are short as to number of days, but with 18 to 20 hours of sunshine in each 24 hours during the growing season vegetation develops very rap-The winter temperatures are very low, but with dry, still air and clear weather much of the time, particularly in

the upper portion of the Yukon drainage.

Mr. President, I want to call attention briefly to the climatic and geographic conditions of Alaska, because, as I have already said, there is an opinion prevalent when Alaska is mentioned that it is of the Arctic region, and that we are not thinking of it in any other light than as a barren, frozen wilderness. I am going to call attention to a summary of the report on the Alaskan agricultural possibilities, and incidentally as to its climate and its geography.

Mr. President, I want to compare the climate of Alaska with the climate of other countries in the same latitude on the Continent of Europe, and in this connection to show the population and the production of Norway, Sweden, Finland, and the Russian Provinces of Archangel, Vologda, and Olonetz, on the Continent. All these latter countries lie between latitudes 58° and 70° north, and for the most part they are north of 60°, the approximate latitude of the northern reach of the Gulf of Alaska, so that they are practically in exactly the same latitude.

In Europe, within the above limits, are embraced over 985,000 square miles, or about 599,450,000 acres. Alaska, with its 570,390 square miles, or 365,049,000 acres, extends from latitude 54° 30′, in southeastern Alaska, to beyond 71° at Point Barrow, the farthest point north in Alaska. A study of the topography, climate, native plants, and so forth, shows that the conditions are not materially or essentially different in the two regions, whatever advantage there is in climate being probably slightly in favor of the European countries. In these countries of Europe more than 11,000,000 people are living, while the census of 1910 reports 64,356 as the population of Alaska, which seems to be an astounding comparison when it is taken into consideration that the European countries I have named are almost in exactly the same latitude, with conditions almost exactly the same.

Recent statistics show in the three countries and three Provinces in Europe which lie mostly north of 60° that 8,373,000 acres of land were producing cereals of all kinds, the total yield being: Wheat, 6,683,840 bushels; rye, 36,509,640 bushels; barley, 26,963,545 bushels; oats, 109,036,780 bushels. In addition, potatoes to the amount of 100,321,190 bushels and 7,871,119 tons of hay were reported. Live stock are returned for these countries as follows: Horses, 1,516,251; cattle, 6,110,476; sheep, 4,033,578; hogs, 1,484,124; goats, 368,021; and reindeer, 564,732.

The area reported under cultivation varies from less than 0.01 per cent in Archangel and 0.5 per cent in Norway to 4.1 per cent in Sweden. In Finland, Vologda, and Olonetz only about 1 per cent of the total area is in cultivation, as the term is commonly used. In nearly every country there are natural meadows of large extent used as pasture and for haymaking, so that the total under agricultural use is probably about double the figures quoted above. On a basis of 1 per cent of the total area available for crops and 2 per cent for crops, pasture, and haying there should be over 3,650,000 acres capable of cultivation, or 7,300,000 acres available for possible agricultural development in Alaska, pretty nearly as large as the area of the continent. In 1894 the Director of the United States Geological Survey, in a letter to the House Committee on Agriculture, estimated the area of tillable land in southeastern Alaska in the Cook Inlet country, the Alaskan Peninsula, and adjacent islands at from 3,000 to 5,000 square miles, or 2,000,000 to 3,000,000 acres. In 1900, after traveling repeatedly throughout Alaska and comparing estimates from various sources, Prof. C. C. Georgeson estimated the tillable and pasture land of Alaska at 100,000 square miles, or 64,000,000 acres. In 1910 Mr. J. W. Neal, who is in charge of the agricultural experiment station near Fairbanks, made a reconnoissance survey of the Tanana Valley, and he estimated the agricultural and grazing lands of that valley and the small valleys leading from it as about 15,000 square miles, or 9,700,000 acres, or more than the total area reported under crops in the specified countries of Europe.

With the same development of agriculture in Alaska as in Europe to supplement its mining, fisheries, and other industries, Alaska should support a population almost equal to that of Europe north of 60° latitude and a commerce of equal or greater importance.

I ask, Mr. President, that I may have printed as a part of my remarks the comparative area of the European countries with the latitude, the population, the total area, and the area cultivated in cereals, so that it may be used as a basis of comparison with reference to Alaska itself.

Mr. SMOOT. Mr. President, I should like to ask the Senator from Oregon if he means that he desires the matter printed in words, rather than in map form?

Mr. CHAMBERLAIN. I do not care to have it printed in map form, but simply in the form of a compilation of figures; that is all.

The PRESIDING OFFICER. In the absence of objection, permission to do so will be granted.

The matter referred to is as follows:

Cooperative area of some European countries.

	Latitude north.	Popula- tion.	Total area.	Area cult	
Norway	58° 30' to 70° 30' 56° 30' to 68° 60° to 70°	2,000,917 4,919,260 2,335,916	Acres. 76, 226, 000 101, 563, 000 82, 025, 000	Acres. 402,000 4,113,900 1,578,300	Per cent. 0.5 4.1 1.9
inces: Archangel Vologda Olonetz	62° to 70° 58° to 65° 60° to 64° 30′	413,500 1,565,800 422,200	208, 680, 320 99, 369, 600 31, 587, 200	162,200 1,656,930 359,770	.075 1.7 1.1

Mr. CHAMBERLAIN. I also desire to have printed the crop production in the same European countries, to which I have called attention, and which are in the same latitude as Alaska, during the several years beginning in 1905; and also the amount of live stock in those same countries in Europe for a period covering the years from 1906 to 1908.

The PRESIDING OFFICER. There being no objection, that

order will be made.

The matter referred to is as follows:

Crop production in some European countries.

	Wheat.	Rye	Barley.
	Bushels.	Bushels.	Bushels.
Norway (1905)	318,880	951,360	3, 357, 120

Mr. CHAMBERLAIN. Mr. President, because of the fact that Alaska is so little understood in so far as its agricultural resources are concerned, I am going to call attention to certain annual reports of Prof. C. C. Georgeson, special agent in charge of the Alaska agricultural experiment stations, to the Secretary of Agriculture, because I really believe that if the agricultural possibilities and the transportation situation of Alaska were thoroughly understood by the Senate, if Senators would give the subject the attention that some of the Senators who are on the Committee on Territories have done, they would be entirely satisfied as to the possibility of developing Alaska from an agricultural as well as from every other standpoint, if proper transportation facilities were afforded.

I want to say right in this connection—for I am going to discuss the transportation matter at length a little later on—that no man who has ever been in Alaska as a representative of the

Government, so far as I have been able to ascertain, whether from the Agricultural Department or from the Geological Survey, or whether we take the report of the Alaska Railway Commission-every one of them has come back to Congress and suggested, by reports and otherwise, the impossibility of the devel-opment of that country without the construction of railroads, and many of them have suggested that this construction ought to be undertaken by the Government.

Now, note that in his report for 1907, which I am about to read, Prof. Georgeson, who, as I have said, is special agent in charge of the Alaska agricultural experiment stations, as a representative of the Agricultural Department, says, at page 20:

representative of the Agricultural Department, says, at page 20:

It is self-evident that the interior of Alaska can not be settled by the class of people best suited to exploit and develop the latent agricultural capacity when it costs from \$200 to \$500 to move a ton of freight 100 miles inland from the port of debarkation, or more, in proportion to distance; when a seat in the stage from Valdez to Fairbanks costs \$150 and meals and sleeping quarters from \$5 to \$10 a day in addition; when sugar, salt, oatmeal, and other equally plain articles are 25 cents a pound, bacon 40 to 60 cents a pound, condensed milk 75 cents a can, and everything else in proportion. Only people with money, or at least with an assured income, can meet these conditions. The chief assets of pioneer farmers are a vigorous constitution and indomitable courage, but these alone will not pay freight, move families, procure equipments, or buy provisions. The class of people who homestead land do not as a rule have much money, and, taking into account the expenses which homesteaders in Alaska must incur, comparatively few can come here. Corporations and trading companies are not in business for philanthropic purposes; it is useless to look to them for reductions to settlers, although such a step would result to their advantage, since an increase in population would mean an increase in business. The Government alone can remedy these economic conditions, and it can do it by liberal encouragement of railroad building. building

That was in 1907, before the railroad commission was appointed and before President Taft or President Wilson or any of these distinguished gentlemen had discussed the subject in messages or otherwise.

Messages or otherwise.

Alaska is a large country. It will take at least three trunk lines to open up the valleys of the Copper, the Yukon, the Sushitna, and Kuskokwisi. The building of wagon roads, which the Government has begun, will prove of great benefit to the country. Improved transportation facilities are Alaska's greatest need. When these are provided the economic conditions which now bar settlement will gradually right themselves. Competition will bring down prices and the cost of living. Labor will be more plentiful; mines which it will not pay to work at present will be opened; resources now untouched will be exploited; business will increase; markets for farm produce will develop, and the country will be settled. Without improved transportation facilities the country will remain stagnant; only the richest mines can be worked, and the country will be deserted when these are exhausted.

In that same connection he discusses-and I intend to read what he says-the agricultural possibilities up there as disclosed by the experiment stations in Alaska.

Mr. GALLINGER. Mr. President, will the Senator permit me?

Mr. CHAMBERLAIN. Certainly.
Mr. GALLINGER. I have not kept in very close touch with
the development of Alaska, although my sympathies are very strongly in the direction of doing all that we can for that great country. Will the Senator kindly state for my information how many miles of railroad there are now in Alaska?

Mr. CHAMBERLAIN. I intended to take that up in regular I think it is something more than 500 miles. I will call attention in a few moments to the lines that are established to show how far apart they are, so as to show that they really do not develop the country nor supply its needs for transporta-

Mr. GALLINGER. What I was really in search of was information as to whether those lines of railway were built entirely by private capital?

Mr. CHAMBERLAIN. Entirely so; yes, sir.

Mr. GALLINGER. A further question which suggests itself to my mind is, May we not, without actually going into the matter of building railroads by the Government, adopt some policy of granting lands or other subsidies to private corporations to build those roads? Has that been considered or discussed?

Mr. CHAMBERLAIN. That has been considered; and I will say to the Senator that I am going to show a little further on that that has been the policy of this Government, not only in the development of the West and of the South, but practically in the development of the Philippines. The situation in Alaska, however, is sui generis. There is a country of vast possibilities, one-fifth as large as the whole continental country of the United States, 99 per cent of which is still owned by the United States.

Mr. GALLINGER. It has appealed to me very strongly in this connection that, as a matter of fact, the Government owns almost the entire Territory of Alaska.

Mr. CHAMBERLAIN. Absolutely.

Mr. GALLINGER. And that is about the only argument that has yet appealed to me in behalf of the Government building railroads in that Territory. I have been interested in seeing

what Canada is doing in the matter of railroad building. is, I suppose with some aid from the Imperial Government. constructing a great transcontinental line now from the Atlantic to the Pacific far north of the Canadian Pacific, through what has heretofore been an almost untrod wilderness.

Mr. CHAMBERLAIN. Yes, sir. Canada aids her railroads.
Mr. GALLINGER. And I have wondered whether some similar policy might not be adopted here which would relieve us from the necessity of going into Government ownership of railroads. I will say to the Senator-I have had a little private conversation with him for a few moments on this subject-that my mind is not foreclosed against this bill. I want very much to listen to the Senator, and hope I will be permitted to do so in his discussion of the question.

Mr. CHAMBERLAIN. I thank the Senator very much. Mr. GALLINGER. Of course, I am, as all Senators are, subject to be called out of the Chamber, when we can not refuse to go, but I very much want to hear the Senator's views on this

very important subject.

Mr. CHAMBERLAIN. I thank the Senator; and in connection with what the Senator has just said, I want to say that I intend to show a little later, in considering the efforts that this country has made and the policy it has adopted in the development of the western country, that the mammoth grants which have been made to the railroad companies have been really disastrous to our country, and that, too, when the United States itself did not own the adjacent territory, which was largely in the hands of individuals. Alaska, however, has received no support or assistance from the Government, except in the way of constructing trails and wagon roads. The United States owns all of its resources, and, as a business proposition, if for nothing else, the United States ought to develop its own property for the benefit of its own people.

Mr. GALLINGER. In that connection, Mr. President, if the Senator will permit, I will ask the Senator, who possesses a knowledge which I do not on this point, except as I read, is it not a fact that Canada is doing very much more for her northwestern territory, adjoining Alaska, than the United

States has done for Alaska?

Mr. CHAMBERIAIN. There is no doubt about that. Right there in that connection, Mr. President, I will say that there has been great complaint made, as the Senator knows, about our people going up into Saskatchewan, into Alberta, into Manitoba, and into other Canadian Provinces. The reason for that is that Canada is inviting through the instrumentality of her assisted railroads people into that country, while the United States, with just as fine a country immediately adjoining the Canadian Provinces, is absolutely neglecting everything that would tend to its development. If the United States would put forth half the energy that has been put forth in Canada for the development of her railways, we would find Alaska and its hundred thousand square miles of tillable area immediately settled by people of this country who are seeking an outlet, who are seeking homes, and who would be glad to have an opportunity to go there.
Mr. CUMMINS. Mr. President-

The PRESIDING OFFICER. Does the Senator from Oregon yield to the Senator from Iowa?

Mr. CHAMBERLAIN. I yield to the Senator. Mr. CUMMINS. The suggestion of the Senator from New Hampshire [Mr. GALLINGER] opens up a very interesting retro-spect. I should like the Senator's opinion upon this proposition: Would it not have been easier for the United States to have built every railroad to which a land grant has been given and transferred the completed property, without any compensa-tion at all, than to have pursued the course we actually did pursue, namely, giving them great empires of land, which have turned out to be exceedingly valuable?

Mr. CHAMBERLAIN. There is no doubt about that, I will

say to the Senator.

Mr. CUMMINS. I hope we will not pursue that plan in Alaska. I myself would rather have the Government build the railroads there and give them away, if we do not care to operate them, than to give to private companies resources the value of which in the future will be almost beyond computation.

Mr. CHAMBERLAIN. I will say to the "enator that I intend to address myself to the policies which the United States has heretofore adopted with reference to railroad assistance, and he will find from the showing which I hope I shall be able to make that the United States might well have built all the railroads that it has assisted, given them over to the companies that built them, and have made money in the retention of the grants that were made, but I will call attention to that a little later on. I do not want to take up that question until I submit the question of the agricultural resources of Alaska, because, in the final analysis, much of the development of Alaska, rich as it is in mineral resources, w'll depend upon its possi-

bilities of agricultura! development.

Prof. Georgeson, who is a Dane, I believe, born in a country that is in almost the same latitude as Alaska, who has been up in Alaska for 8 or 10 years and who knows the conditions in his own country and in Alaska, representing the Agricultural Department, in his report of COS, at page S—I merely want to call attention briefly to this, for these reports are very interesting, because they discuss all of the different aspects of the possibilities of Alaska-says:

A few things have been demonstrated beyond a peradventure.

I might add here that evidence before some of the committees shows that, generally, where Norwegians or Swedes or Scandinavians go up into the Alaskan country and settle, they commence to make money as soon as they take up the land. Why? Because they understand the conditions, while an American settler who goes up there and undertakes to make money has first to become acclimated and to learn the conditions which prevail in that latitude.

A few things have been demonstrated beyond a peradventure. Perhaps the most important fact proved is that Alaska is an agricultural country. It is but a short time since this claim was discredited and treated with ridicule.

And it is treated with ridicule now, Mr. President, in many

quarters.

Another fact that has been proved is that cattle feed can be produced in any quantity; that is to say, while grains may be injured by frost in certain regions, they can always be grown to a stage at which they will make nutritious hay, and the native grasses can maintain live stock in excellent condition in summer, and they make good hay and silage for winter feed. Indeed, the silage from one species of grass, beach rye (Elymus mollis), proved on analysis to be equal to clover hay in nutritive qualities. Potatoes, cabbage, cauliflower, rhubarb, turnips, lettuce, and, in short, all the hardly vegetables can be grown to perfection up to and even within the Arctic Circle, as has been proved by thousands of settlers.

A legitimate question, and one which is frequently asked, is: Why, in view of the productive capacity of the country and with the prevailing high prices for farm produce, is Alaska not rapidly settled with farmers? The answer is that the economic conditions prevent settlement. Alaska can not be settled before railroads and wagon roads are built and transportation rates are reduced. Under present conditions but few farmers can afford to go to Alaska with their families, live stock, and equipment. The expense would equal the cost of a farm in the States.

the States.

The question of development always goes back to that question, Mr. President—the want of railroad facilities—because no man can move his family into that country and afterwards move the necessary supplies in there unless he is a man of independent means and fortune, and every one of the agents of the Government, no matter from what department, comes to the same conclusion, that the economic conditions in Alaska prevent settlement and development.

Mr. BORAH. Mr. President—
The PRESIDING OFFICER, Does the Senator from Oregon yield to the Senator from Idaho?

Mr. CHAMBERLAIN. I yield. Mr. BORAH. What is the condition of those agricultural lands with reference to being inside of a forest reserve or out-

Mr. CHAMBERLAIN. Well, I said a little while ago, before the Senator came in, that practically everything in Alaska is withdrawn; so that with a good homestead law and a good coal law it is impossible for men to go there and settle. That is one of the economic conditions that has been brought about in part

by these reservations.

Mr. BORAH. I only wish to say that we have in the United States proper a vast amount of land very close to the railroads States proper a vast amount of land very which has not been settled and will not be settled very quickly, which has not been settled and will not be settled very quickly, while I am thoroughly in sympathy with the view which the Senator is entertaining and expressing with reference to the necessity of transportation facilities in Alaska, there will have to be something else to stop the settlers of this country from going into

Canada besides railroads.

Mr. CHAMBERLAIN. I think the Senator is right, but I want to say that the Senator and I might disagree very radically about the propriety of the withdrawals in Alaska. I do not think President Roosevelt ever did anything that I approved of more heartily than his withdrawals in Alaska, because the conditions, as developed by the evidence that has been taken before both the Senate and the House committees, disclose that if President Roosevelt had not made those withdrawals in the first place, with the three or four gateways and the open ports in Alaska in the possession of the Alaskan Syndicate, every coal mine in Alaska would probably have been acquired by the same syndicate; every copper mine would have been secured, as now the most valuable copper mines are owned, by this particular syndicate; so that the only way of preserving that magnificent

Territory and saving its resources for the people of the United States hereafter was to withdraw it at that time.

Mr. BORAH. I am not criticizing Col. Roosevelt for anything that he did, especially for these withdrawals, but there ought to be a time when the Government could disclose sufficient virility in the way of legislation and statesmanship to

open up to the people these lands, which were withdrawn in order that the people might get the benefit of them.

Mr. CHAMBERLAIN. I am in hearty accord with the Sena-tor; but, as the Senator knows, as I know, and as the western people generally know, Alaska has been knocking at the doors of Congress for the last 15 years, asking for the enactment of some laws that would be practical for the development of her coal mines and to protect those mines from monopolistic control; but Congress has not done anything. Congress has practically refused to do anything. The Delegate from Alaska ever since he has been here has had some bill for the relief of Alaska, seeking to have some safe and sane legislation adopted for the development of the mineral resources of that country; and yet we have not done anything.

Mr. BORAH. That is just exactly what I understand.

Mr. SUTHERLAND. Mr. President—

The PRESIDING OFFICER. Does the Senator from Oregon yield to the Senator from Utah?

Mr. CHAMBERLAIN. I yield to the Senator.
Mr. SUTHERLAND. I had understood that the coal lands in Alaska had been withdrawn and that some iceberg lands up there had been put into forest reserves; but do I understand the Senator to say that metalliferous lands have been withdrawn?

Mr. CHAMBERLAIN. Practically.
Mr. SUTHERLAND. Then the lands which are supposed to

contain deposits of gold——
Mr. CHAMBERLAIN. It is safe to say to the Senator that

practically everything has been withdrawn.

Mr. SUTHERLAND. I have not finished-that lands containing, or supposed to contain, deposits of gold and deposits of copper have been withdrawn from the prospector?

Mr. CHAMBERLAIN. I think they have within the reserves.
Mr. SUTHERLAND. Does the Senator approve of that? Does the Senator approve of withdrawing from the prospector lands supposed to contain precious and other metals?

Mr. CHAMBERLAIN. I will say to the Senator that so far as I am concerned I do not approve of wholesale withdrawals, except in the particular emergency to which I have referred, because it was the only way to save the resources

of Alaska to the people,

Now, I will call the Senator's attention to one thing, and then he will understand what I mean. If the Senator will take the trouble to look into the record, he will find that the Alaska syndicate built the Cordova & Northwestern Railroad up to its copper mine at Kennicott. After it had done that and had acquired the control of the richest copper mines in Alaska, it turned its attention to the Bering coal fields; and there is a contract in evidence in the Ballinger investigation which shows that the representatives of the Guggenheim interests entered into a contract with the representatives of the Cunningham claimants for the purpose of acquiring the coal mines in the Bering River district. That is the reason I say I approve of these withdrawals. If they had not been made, the United States would not have any interest in developing that country by railroad or by any other instrumentality.

Mr. SUTHERLAND. I am not saying anything about the withdrawal of the coal lands. I was simply speaking of the withdrawal of other lands. I venture to say to the Senator-from Oregon that if that policy had been pursued from the beginning in this country California would not have become the great gold-producing State that it was; the silver mines of Nevada never would have been opened; the lead and copper and silver mines of Utah never would have been opened. only way the great metalliferous mineral resources of this country have been developed has been through the prospector. If ye : expect any of the undeveloped part of this country to be developed in the same way, you have to give the prospector the opportunity to go into the lands and prospect them and then reap the benefit of what he discovers.

Mr. CHAMBERLAIN. I agree with the Senator about that. Mr. SUTHERLAND. I think it is a thoroughly unwise policy to close any part of the country, either of the United States proper or of Alaska, against opportunity upon the part

of the prospector to go in and discover these minerals.

Mr. CHAMBERLAIN. I agree with the Senator.

Mr. CUMMINS. Mr. President, may I interrupt the Senator from Oregon?

Mr. CHAMBERLAIN. Certainly.

Mr. CUMMINS. I have been waiting five years, ever since I came into the Senate, to hear some one discuss the very question that is now before us; and I should like to hear the Senator from Oregon about it, because I think we shall have to know something about it before we can proceed very far with the building of railroads in Alaska. That is, what kind of law do we need to admit the honest pioneer and developer of a country, and at the same time to exclude the men who, the Senator from Oregon says, in 1906 were about to get possession of the whole of Alaska?

I have never yet heard that question answered as it ought to be. The western Senators are all agreed that these resources ought to be at the disposal of the honest homesteader, the honest prospector, the honest lumberman, the honest miner; but what kind of law can we devise that will permit these men to have their rights, and at the same time will prevent the monopoly which was feared in 1906 with regard to Alaska?

I think the Senator from Oregon will render his country a very great service if he will enter upon the discussion of that

question at some time before he finishes his address. Mr. CHAMBERLAIN. In answer to the Senator, I will say that I am not sure that there is any power in Congress or anywhere to prevent the monopolization and control of resources such as Alaska has.

Mr. SMOOT. Mr. President-

The PRESIDING OFFICER (Mr. VARDAMAN in the chair) Does the Senator from Oregon yield to the Senator from Utah? Mr. CHAMBERLAIN. I yield to the Senator.

Mr. SMOOT. I hardly agree with the last statement the Senator made, in respect to its being impossible to prevent monopolization of the resources of Alaska.

Mr. CHAMBERLAIN. I had not quite finished.

Mr. SMOOT. For instance, I think it is possible to prevent it, as far as coal and oil lands are concerned, by a proper lease bill.

Mr. CHAMBERLAIN. As I say, I had not quite finished

my answer when the Senator interrupted.

Mr. SMOOT. I have introduced a bill along that line; and I have also introduced a bill to-day allowing agricultural entries upon these mineral lands, so that their withdrawal will have no effect upon the men who want to farm them, but all that is under the surface will be retained in the possession of the United States

Mr. WALSH. Mr. President-

The PRESIDING OFFICER. Does the Senator from Oregon yield to the Senator from Montana?

Mr. CHAMBERLAIN. I yield to the Senator.

Mr. WALSH. Before we pass this subject, in order that there shall be no confusion, I think a statement ought to be made which, with the permission of the Senator from Oregon, I shall be glad to make.

Mr. CHAMBERLAIN. I yield to the Senator.

Mr. WALSH. That is that there has been no withdrawal of land in Alaska anywhere affecting prospecting for metalliferous lodes or the prospecting of metal-bearing mineral lands. There are vast forest reserves there, naval reserves, military reserves, and fish reserves, most of which are along the shore. There are vast regions in the interior, in the Tanana-Yukon district, that are not within a forest reserve, and so in the Innoko-Iditarod district and in the Seward Peninsula. That is, there are great regions in Alaska that are open to exploration for the location of mineral claims other than coal which are not within forest reserves at all, and which are not within any reservations of any character. There is no difficulty at all, under the law, about any character. going within even a forest reserve for the purpose of making location of mineral claims and the prospecting can go on just exactly the same. The only difficulty arises when the locator endeavors to make proof. He is then required to satisfy the forest officials that the land is more valuable for the mineral than it is for the timber upon it. There are, however, these important withdrawals of coal lands, and that is the thing which really stands in the way.

Mr. BORAH. Mr. President-

The PRESIDING OFFICER. Does the Senator from Oregon yield to the Senator from Idaho?

Mr. CHAMBERLAIN. I yield to the Senator.

Mr. BORAH. I was going to ask the Senator from Montana if he ever had any experience in trying to satisfy the Forestry Bureau as to what constituted a mineral discovery in a forest

Mr. WALSH. I must answer the Senator that I have had exactly the same embarrassing experience he has had. The trouble about it is that the prospector goes out there and he is entirely satisfied that he can make a mine of his claim, and the forest ranger is entirely satisfied that he is an idiot ever to at- furnish the coal to the man who wants to burn it no cheaper

tempt it; and the recommendation of the ranger ordinarily goes

against that of the prospector.

Mr. CHAMBERLAIN. Mr. President, in answer to the Senator from Iowa [Mr. CUMMINS], who addressed a question to me a while ago as to whether or not it would be possible to enact legislation which would protect these resources from monopolization, I do not believe Congress could pass any laws permitting the individual acquirement of title to the copper mines and the coal lands and the oil lands and resources of that kind and protect them from monopolistic control. because the history of legislation on the subject shows-and the courts have practically sustained that view of it—that an individual, after he acquires title to public lands in apparent good faith, may dispose of it as he will, and yet he may be acting for some great monopoly. No man can read the secrets of a corrupt and designing heart.

Take the Cunningham claims, for instance. I do not pretend to say of my own knowledge whether they were attempted to be fraudulently acquired or not; but it did develop in subsequent investigations that they had not gone very far toward the acquirement of title to those lands until the iron hand of the Alaska Syndicate displayed itself and this syndicate was contracting to acquire control of them. Then the Cordova & Northwestern Railroad, the creation of this same syndicate, was turned into the coal region covered by the Cunningham claims; so that while on the face of it the Cunningham claimants were acquiring title honestly-and maybe they were-yet before the title was complete they were selling it to a syndicate to whose interest it was to secure control of Alaska and everything in it.

I want to say that in my opinion the suggestion of the Senator from Utah [Mr. Smoot] is the correct solution of this problem-that so far as oil lands, coal lands, and resources of that kind are concerned, the Government ought to maintain the ownership and control of them and lease them to people who

want to develop them.

Mr. BORAH. Mr. President-

The PRESIDING OFFICER. Does the Senator from Oregon yield to the Senator from Idaho?

Mr. CHAMBERLAIN. I yield to the Senator from Idaho. Mr. BORAH. The coal lands and oil lands in Alaska never can be developed without a vast amount of wealth and capital behind the development. If you prefer to withhold from them the title, and turn over the matter in the way of a lease, they will still have to have the vast amount of capital which is necessary in order to develop the lands. Individuals, people of limited means, can not go in there and develop the lands even under a lease. They have to depend on capital somewhere.

You are going to be up against the same proposition with reference to the development of coal lands and oil lands that you are with reference to building this railroad; that is, the Government has either got to permit the people who have the capital to go in there or the Government must do it itself. Government will have to furnish the means and the capital to develop the lands and to work the mines, or it will have to permit people to go in there who have a vast amount of capital in order to do it.

You are finally coming to the same proposition with reference to that matter that you are with reference to the railroads, and that is that the Government itself will have to

develop the coal mines and work them if the masses of the people are to get any benefit out of the development.

Mr. CHAMBERLAIN. I differ very radically from the views of the Senator. As coal mines are worked now, in ninetynine cases out of one hundred they are operated by lessees. The records will show that there is an extravagant waste in the operation of all the coal mines under the present leasing system, because the lessee can only develop the paying streaks and veins of coal. If, however, the United States owns this coal land and is the lessor, it, with the machinery of government behind it, can compel the use of the coal mines by the lessees in a way to protect the Government, properly conserve the same against waste, and at the same time furnish means of transportation which will justify a lessee in taking out the coal and shipping it to a market.

Mr. BORAH. The President can compel the man to work the mine to the satisfaction of the Government, and he can compel the man to timber the mine and work out all the portion of the mine which is workable at all. Undoubtedly can compel the man to do that, but the ultimate consumer will pay for all of it. He will necessarily have to do so. If you are going to have standing between the consumer and the Government a lessee who has to be paid or else he will not be there, and to realize upon the proposition you are going to

than if it had gone into the hands of capitalists in the first place and you had undertaken to regulate the monopoly.

Mr. CHAMBERLAIN. States are leasing now-individuals are leasing now-and under arrangements which are entirely

Mr. BORAH. As to the last proposition, I disagree with the Senator. I never have been able to find a leasing system yet which has been in operation for any number of years, either in Australia or in any other part of the world, where corruption did not enter into the matter with reference to securing the leases, maintaining them, and working them, or where the expense did not become so great that the consumer received no

benefit at all from the system.

Mr. CHAMBERLAIN. While I had not intended to refer to it, I have before me, and can show the Senator, a statement of the total coal production in the United States, the mines that are operated by the owners, the mines that are operated by lessees, and the whole situation. The Senator will find, if he will take the trouble to examine the evidence, that nearly all the coal mines are now operated by lessees. If the owner of a mine can lease it to an individual or to a corporation that can operate it at a profit, why can not the United States, which owns the land and which constructs a railroad and fixes the rates, enable a lessee to operate it to the same advantage as an individual?

Mr. BORAH. I presume I have examined the matters to which the Senator refers, as I have examined almost everything I could find upon the subject; but the Senator misunderstands my proposition. I have not any doubt that coal mines are being operated under a lease successfully, but who is paying for it? The price of coal demonstrates who is paying for it, the fact that the mines are being operated in that way.

Mr. CHAMBERLAIN. There is no question that the ultimate consumer pays it. He is paying it now.

Mr. BORAH. Yes.

Mr. CHAMBERLAIN. He is paying the rates that have been fixed by the Pennsylvania mines and the railroad companies,

Mr. BORAH. If the Government can not do anything more with reference to the coal mines of Alaska than to furnish coal

to the consumers of the country at the same price they are paying now, the Government had better stay out of Alaska.

Mr. CHAMBERLAIN. I predict that if the United States will build a railroad there and keep control of the coal fields, it will furnish coal cheaper than it is being furnished to the consumers of Pennsylvania coal or any other coal in this country.

Mr. CUMMINS. Mr. President, will the Senator yield to me? Mr. CHAMBERLAIN. I yield to the Senator from Iowa. Mr. CUMMINS. We ought to bear in mind, in discussing that phase of the matter, that about three-fourths, or at least two-thirds, of the cost of bituminous coal to the consumer con-

sists in transportation. If we can save the consumer on the western coast the great cost of transportation we shall have greatly benefited him, even though it costs as much to take the coal from the mine in Alaska as it costs to take it elsewhere.

I have an idea that the principal benefit, or at least one of the great benefits, of opening up this region will be to reduce the cost of transportation of coal from distant points to the points

of consumption on the Pacific coast.

Mr. CHAMBERLAIN. Yes; I will say that more than twothirds of the cost of transportation of coal from the Pennsylvania mines to the Pacific coast, for the use of the Navy as well as for the use of the individual, is the cost of transporta-

Mr. CUMMINS. I should think it would be more than fourfifths of it; but two-thirds of the average cost of coal to the consumer is transportation.

Mr. CHAMBERLAIN. Yes; there is no question about that. Mr. REED. Mr. President—

The PRESIDING OFFICER. Does the Senator from Oregon yield to the Senator from Missouri?

Mr. CHAMBERLAIN. I yield.

Mr. REED. I wish to direct an interrogatory more to the Senator from Iowa [Mr. Cummins], perhaps, than to the Senator from Oregon [Mr. Chamberlain].

Would it follow, if we leased these lands and furnished cheap transportation, that the consumer would get any benefit? Would not the consumer then be left practically to purchasing from one or two lessees; and as there would be no competition except that created by coal which had come from long distances and had paid large rates, would the consumer really get any benefit, even if we transport it more cheaply?

I am not trying to controvert; I am asking for light.
Mr. CUMMINS. I may be wrong about it, but I have as-

Alaska, and that competition of an effective character would be developed in Alaska, and that the miners or lessees there would compete with each other, and the coal would be sold from that point at a fair profit, considering cost of production and transportation. If the coal in Alaska for the supply of the western country is to be in the hands of a single producer. a monopoly—then, so far as I am concerned, I do not shrink from saying that the Government of the United States ought to produce it and sell it at a fair profit.

Mr. REED. I am not advised how many there are. The debate is new to me. I have been unable, because of other engagements, to give much attention to this bill, and I was asking

for information.

I take it from the question of the Senator from Idaho [Mr. BORAH] that he is of the opinion that the Government itself

ought to work the mines. Am I correct in that?

Mr. BORAH. Yes. The Senator from Missouri, it seems to me, has stated the proposition which we are going to meet, and it is this: There will be no more reason why lessees should compete than why owners should compete, and the consumer will not get any benefit from the development. The lessees will have the same open or secret understanding with reference to the matter, and by the time the coal gets to Seattle or San Francisco or Boise City, Idaho, we will not know whether the title is

in the original party or whether it is in a lessee.

Mr. CHAMBERLAIN. I do not think the Government will have any trouble about controlling the price of coal where it owns the mines and owns the transportation as well, and has the power of fixing the terms of the lease as well as the rates of . transportation. It will be regulated and controlled. There is

not any question about that.

Mr. BORAH. Of course, it is easy to say that, Mr. President, but where has the Government ever regulated, in all its attempts to regulate, so that the price has really drifted down and benefited the consumer?

Mr. CHAMBERLAIN. It seems to me that through the Interstate Commerce Commission the Government has regulated a very much more difficult situation in the transportation of this

Mr. BORAH. The Interstate Commerce Commission is a great commission, but the final benefits to the people are yet to be demonstrated.

Mr. CUMMINS. I can give the Senator an instance of coal being sold at a fair price. In my State—and we have more acres of coal land in that prairie State than there are in Pennsylvania—there is the sharpest competition between the producers of coal. The transportation charge is fixed by law, and the consumers of coal in Iowa get it at such a price as affords the producer but a fair profit. Indeed, oftentimes, and I think the greater part of the time, the producers of coal barely make a fair profit.

Mr. BORAH. Do the consumers of coal in Iowa get coal

cheaper than they do across the river in Illinois?

Mr. CUMMINS. We get it cheaper. Our coal is not quite so good as the coal produced in Illinois.

Mr. BORAH. Naturally, I should think that if it were as good, and the question of quality did not enter into the question of competition, it would go across the river into Illinois.

Mr. CUMMINS. No; the cost of transporting coal is so great

as compared with the value of the coal that unless you have a high quality that pays for long transportation coal is not transported over long distances.

Mr. BORAH. That is true; but then there are points in Illi-

nois which are much closer to the coal fields in Iowa than cer-

tain parts of Iowa are to those same coal fields.

Mr. CUMMINS. Yes. The coal that is mined in our State is practically all consumed in the State, and the territory that we can reach is controlled wholly by the cost of transportation. We get some Illinois coal. We get it, however, wholly because it is better coal and can be used successfully for some purposes for which our coal can not be used.

That, however, is not the point I have in mind. The point I have in mind is that we have sufficient competition among producers of coal in our State to insure its distribution to the consumers at a fair price, considering the cost of production and of transportation, and I see no reason why that should not be true in Alaska.

Mr. REED. Mr. President—
The PRESIDING OFFICER. Does the Senator from Oregon yield to the Senator from Missouri?

Mr. CHAMBERLAIN. I yield; but really I should like to get through.

Mr. REED. I want to make just one remark. Of course that is the whole question. In the State of Iowa, as the Senator sumed that there is room for more than one coal mine in says, there is great competition, a vast body of coal, and a large number of individual companies competing with each other. If that condition is assured in Alaska, of course that is one thing. If, however, the field is limited, if the opportunities for competition are small, or competition is not assured, that is another thing. Then I agree with the Senator who has the floor that, of course, the Government, in its leasing, might possibly protect against an unjust price. Certain it is, however, that by one means or another we ought, in passing this bill, to see to it that the ultimate consumer gets the benefit of a reasonable price.

Mr. BORAH. Mr. President—
The PRESIDING OFFICER. The Senator from Oregon [Mr. CHAMBERLAIN] has the floor. Does the Senator yield to the Senator from Idaho?

Mr. CHAMBERLAIN. I yield.

Mr. BORAH. I want to make just a suggestion. The Senator has signified his desire to go ahead and complete his speech, and I sympathize with his desire to do so, because we have consumed much of his time. I only wanted to say that I am not by any means antagonistic to the proposition which the Senator has before the Senate. My suggestion has only this in view, that if we are going to have these natural resources finally dedicated to the use of the people of the United States the Government can not stop with the mere building of the railroad; it will have to operate the mines and furnish the coal to the consumer.

Mr. LANE. Mr. President-

The PRESIDING OFFICER. Does the Senator from Oregon yield to his colleague?

Mr. CHAMBERLAIN. I yield.

Mr. LANE. I wish to say that in a general way I am in favor of this bill. I want to see the Government build a railroad into Alaska. As to leasing the property containing the coal veins, I have but little confidence in that method of mining coal, for the reason that I have been in mining countries in the past and I find that what the lessee of a mine does is this: He drives his tunnel, his shaft, or sinks his drift upon the very richest portion of the property, and immediately begins to exhaust that which pays him the most in the most rapid manner. In other words, as the miners say, he "guts" the mine. He does not timber for permanency. He timbers in a manner which will last through his lease, and only for that time. He skimps his timbering, and when his lease expires the owner of the mine must come in and reface his mine and start his works anew at a heavy expense. Sometimes it costs him more than he received from the lease. Unless it is very carefully

than he received from the lease. Oness it is very carefully safeguarded, it is a very dangerous proposition.

If I had a good coal vein, or if I owned a good vein of iron ore, or if I owned a good placer claim with a good, rich pay streak, I never would lease it out to any man. I would mine it myself, for the reason that I would keep my work in line and work the full width of my pay streak. If I should lease it to a man who was intent upon making a profit out of it, very well that he would follow the fattest, richest portion of the pay streak, and pay no attention to the rest of the mine, and when he got out of the mine I would have to face

it up and start my work all over again.

I am therefore in favor of having the Government hold full control and absolute ownership of this coal and mine the coal itself; and if it can possibly be done, I shall offer an amendment to this bill to that effect. The Government will turn it over to no lessee to any great advantage to the people. will fall down on that proposition as they have fallen down all along the line in everything in which they undertook to go into partnership with a private interest in the production of something which is for the use of the masses of the people of this country. In my opinion, it will not work.

Mr. CHAMBERLAIN. Mr. President, I have wandered far

afield from the proposition I was discussing, which was the agricultural possibilities of Alaska; but while I am addressing myself to the coal proposition, I wish to refer to the suggestion of the Senator from Idaho as to the impossibility of a Government relieving the ultimate consumer. As has been well stated by the Senator from Iowa, two-thirds or more of the cost of coal to the ultimate consumer is the transportation charge.

Mr. BORAH. Mr. President-

The PRESIDING OFFICER. Does the Senator from Oregon yield to the Senator from Idaho?

Mr. CHAMBERLAIN. I will yield in just a minute. I want to answer briefly the question which the Senator asked me.

Mr. BORAH. I thought the Senator had finished what he was going to say on that subject.

Mr. CHAMBERLAIN. The Government of the United States itself is a large consumer of coal in the Pacific, for the use of its fleet, during the present condition of things. I think the consumption of coal there now, before the completion of the Pan-

ama Canal, is something like 160,000 tons per annum. coal is delivered on board of colliers, either at Norfolk or at Baltimore, at \$3 per ton. It is delivered to the Government of the United States at San Francisco at \$7.50 to \$8.25 per ton, and at practically the same price at Pearl Harbor, in Hawaii, and possibly at the same price in the Philippines. rates are not material. Now, where does that cost come in? If the United States controlled the transportation situation between Baltimore or Norfolk and San Francisco or Pearl Harbor, why could not the United States fix its transportation charges to meet the demands of the ultimate consumer without loss and without excessive or any profit? If the coal mines in Alaska, and transportation facilities as well, are owned by the United States-and it must be remembered that the United States is not there for the purpose of making money-why can it not deliver coal to the ultimate consumer, either at San Francisco or Pearl Harbor or Manila, cheaper than it is possible for individuals to deliver it, whether the ultimate consumer happens to be the United States Navy or the individual citizen?

Mr. BORAH. Mr. President—
The PRESIDING OFFICER. Does the Senator from Oregon

yield to the Senator from Idaho? Mr. CHAMBERLAIN. I yield.

Mr. BORAH. As I understand the position of the Senator, it is that the cost of transportation is what makes coal so high to the consumers of this country.

Mr. CHAMBERLAIN. It does in the West.

Mr. BORAH. Then if the other proposition which I stated a moment ago be true, and the Interstate Commerce Commission is effective in controlling the rates on railroads, why does not the Interstate Commerce Commission see that we get the benefit

of a proper rate of transportation?

Mr. CHAMBERLAIN. We are not discussing that question right now. If you want a frank answer with reference to the Interstate Commerce Commission, I would say that Congress has been so unwise as to overload the commission to such a degree that it can not, except with untiring energy, half do its work now. But that does not have anything to do with this proposition. As a matter of fact the coal resources of Alaska are not being developed simply because, in the auriferous sections of Alaska, with coal at its very door and an abundance within 50 miles of the people who want it for domestic and other purposes, it is being brought in either from the East or from British Columbia at an almost prohibitive transportation cost. In other words, the possibility of development in Alaska is retarded simply because they have not any transportation facili-ties to use the coal of the Territory, even if it were released from the present reserves.

I had hoped that I would have been through with this discussion long before now, and I would have been through had not Senators interrupted me so much. However, I shall attempt to show later that not only are our rates prohibitive as to coal but are almost prohibitive as to everything that goes into or comes out of Alaska, and unless we can reach the coal no one can go there and undertake to develop its resources at any time or in any season of the year. But I want to get back again to the agricultural possibilities of Alaska, from which I have been I am dwelling on that particularly because, as I said in the outset, the early reports on Alaska were opposed to the view that there was a possibility of agricultural development in Alaska. There are men to-day-I have talked with them in Washington, Members of the House and the Senate who say that Alaska is nothing but a refrigerating plant, and that there is nothing there to be developed. I know it is not maliciously said. It is simply said because persons have not given the subject any consideration. Here the Government of the United States has had its ablest men in Alaska from the Agricultural Department; it has had its ablest men from the Geological Survey; it has had its ablest men from every department of the Government studying the situation in Alaska from a scientific standpoint and on the ground, and we can safely be governed by reports made on the ground by persons who have no interest in magnifying the conditions or making things appear better than they are. So we must in the final analysis come back to the reports of these men.

I am going to ask to have inserted in the RECORD as a part of my remarks the report of Dr. Walter H. Evans. I should like to read it to the Senate, but I am not going to do it, because of its length, and I assume that Senators are going to look over the statistics and give consideration to what I submit. Dr. Walter H. Evans is Chief of Insular Stations, Agricultural Department, and his report shows the results of actual experi-ments at four or five agricultural experiment stations in Alaska, at Rampart, Fairbanks, Kenai, and Kodiak, and at Copper Center, where the experiment station was finally abandoned for reasons which appeared good to the Agricultural

Department. I ask that this matter may be inserted in the

The PRESIDING OFFICER. Is there objection? The Chair hears none.

The matter referred to is as follows:

The PRESIDING OFFICER. Is there objection? The Chair hears none.

The matter referred to is as follows:

The establishment of agricultural experiment stations in Alaska was the result of an appropriation of \$5,000 made by Congress for the fiscal year 1898, in which the Department of Agriculture was charged "with the investigation and report to Congress upon the agricultural resoarces and capabilities of Alaska, with special reference to the desirability and feasibility of the establishment of agricultural experiment stations in said Territory."

An investigation covering the summer of 1897 showed that there were decided indications of agricultural possibilities in that country when judged to the expect and though the control of the

on the coast region of Alaska, and to some extent also in the interior, berries abound in a wild state, and the successful cultivation of many has been accomplished. Currants, gooseberries, cranberries, and strawberries are being grown in many places. At the Sitka station hybrid strawberries have been produced by the crossing of wild and domestic sorts, and a number of hardy new varieties are being grown that equal the best of the market varieties.

The work with live stock has been confined to what is often called southwestern Alaska. It was begun in 1906 with the purchase of some

pure-bred Galloway cattle, part of which were sent to Kenal and others placed on Kodiak Island. With the closing of the Kenal station they were all transferred to Kodiak, where they successfully maintained themselves until the volcanic cruption of 1912. The most of the cattle are kept on a reservation some 12 miles from the village of Kodiak, and in the summer of 1911 there were 82 pure-bred Galloways and about a dozen head of grade cattle in the herd. These animals have all been successfully wintered on hay and silage made from native grasses. The station has two 100-ton silos, which are filled with beach grass, and on this and wild hay, supplemented with a very little concentrated milf feed, the stock is kept in good condition. In 1909 the cattle received no shelter until November, when they were stabled at night and hay in the morning, but the cattle were allowed to run on the range during the day. From January 1 to May 7, 1910, the ground at the station was covered with snow, and all stock was fed regularly. The total feeding period was little, if any, longer than is necessary in the more northern parts of the mainland of the United States. In 1908 the feeding period was about a month less than that of 1909. Within six weeks of beginning of grazing the stock was all in prime, fat condition. In 1909, 40 head of ewes were added to the stock kept at Kodiak, and 2 rams were purchased later. The number of sheep had doubled by the summer of 1910. At Kenai, Copper Center, and Fairbanks grain hay has been successfully made by sowing oats and cutting the crop before the grain has ripened. This can doubtless be done in most parts of Alaska where stock feed is needed and a very nutritious and palatable fodder obtained. There does not seem to be any reason why stock raising can not be made a success if care is exercised in the selection of the stock and they are properly sheltered and fed through the winter.

Mr. CHAMBERIAIN. Mr. President, I think I have shown that there are great possibilities of agricultural development in Alaska and I think I have shown it from the records of the department here.

Now, with reference to the mineral and other resources of Alaska, I am going to call the attention of the Senate to the gold, silver, copper, coal, and fisheries. I am not going to read it all, but I will ask to put it in the RECORD, so that Senators may verify what I have to say in reference to the matter.

A few days ago I called upon the Department of Commerce to supplement some statistics that had been heretofore furnished, probably to both the Senate and House committees, on the resources of Alaska. I call the attention of the Senate to the fact that Alaska, beginning in 1868 and ending in 1911, produced \$51,835,143 from its fur-seal skins alone. Its aquatic furs, except seals, amounted to \$12,496,063. The furs of land animals amounted to \$8,350,290. From furs of land animals alone Alaska has furnished to the United States more of money than the Territory cost us in 1868. That is just a single item, and one of the very smallest items. Walrus and whalebone products amounted to \$2,075,463. From fishery products the amount received was \$147,953,077. The total of these several products since 1868 down to and including 1911 is \$222,710,036, whilst the gold production amounted to almost as much as those several products together, the sum being \$195,916,520. The silver amounted to \$1,500,441; copper, \$8,237,594; gypsum, marble, and tin, \$820,850; coal, \$338,189. The total of these mineral products is \$206,813,594, and yet we find the minority members of the committee in 1868 reporting that the agricultural and mineral resources are nothing, and that report finds an echo in the report of the minority of the House committee on this very same subject, showing that there is something wrong somewhere in the efforts that these gentlemen then and now have made to ascertain what the facts were about Alaska.

I ask to have printed in the RECORD as a part of my remarks the value of the output of the sea, fur, and mineral products of Alaska from 1868 to 1911, inclusive.

The PRESIDING OFFICER. The Chair hears no objection,

and it is so ordered.

The matter referred to is as follows:

* 1868-1905. * Product of seal islands only.

Mr. CHAMBERLAIN. I want to say, Mr. President, that this information is accessible to all the members of the Senate. It

is from Senate Document 882.

Mr. SMOOT. Of what session?

Mr. CHAMBERLAIN. Sixty-second Congress, second session. Mr. President, I am going to ask to have inserted in the RECORD a "comparative statement of the total commerce of Alaska and the commerce of specified insular possessions and foreign countries with the United States during years ended June 30, from 1904 to 1913, inclusive," furnished me by the Department of Commerce.

We have been spending immense sums of money on the Philippines. There everything seems possible. We have been spending money in our other insular possessions. Yet the commerce of Alaska is more than that of any of those possessions, except Porto Rico.

I am going to call attention to a few items. We will take the fiscal year ending June 30, 1913. For that year the commerce of Alaska was \$72,670,027. That is the largest commerce we have ever had with Alaska. Our business with Scotland during that time—that is, for 1913—was, in round numbers, \$60,000,000; with Spain, only \$54,000,000; with Russia in Europe, only \$52,000,000; with Ireland, only \$32,000,000; with Austria-Hungary, \$42,000,000; with Switzerland, only \$24,000,000; with Denmark, only \$21,000,000; with Sweden, \$23,000,000; with Norway, \$16,000,000; with Portugal, \$11,000,000; with Turkey in Europe, \$12,000,000; and with Greece, \$4,000,000. Yet the United States is putting out its every effort to invite traffic and trade with these foreign countries in everything the United States

Now, let us go further. Take North America. Our business with Porto Rico in 1913 was \$73,693,628, only \$1,000,000 more than the business with Alaska. Yet that Territory is almost within a stone's throw of our Atlantic seaboard.

With British Columbia, which adjoins us on the whole of our northern border, our business was only \$53,000,000, \$20,-000,000 less, if you please, than our business was during the same year with isolated Alaska, with its limited power of development because of lack of transportation facilities.

With the British West Indies it was only \$25,000,000; with Nova Scotia it was only \$29,000,000; with Panama it was only \$28,000,000; with Costa Rica, \$6,000,000; with Santo Domingo, \$9,000,000; with Guatemala, \$6,000,000; with Newfoundland and Labrador, \$6,000,000; with Haiti, \$7,000,000; with Honduras, \$6,000,000; with Nicaragua, \$4,000,000; with Salvador, \$3,000,000; and with British Honduras, \$3,000,000. I read this to the Senate for the purpose of showing that,

with the exception of Porto Rico, our commerce with Alaska exceeds our commerce with any other country to which I have

alluded and others which I might name.

I am going to ask that this be inserted in the Record in order to show the conditions as they actually exist as between the United States and Alaska and countries in Europe and Asia. It is astounding when one comes to compare the vast amount of our business with this isolated country, shut off as it is from all assistance on the part of the United States, with our busi-

ness with other countries not as far away from us as Alaska.

The PRESIDING OFFICER. If there is no objection, the matter will be inserted in the RECORD.

The matter referred to is as follows:

Comparative statement of the total commerce of Alaska and the commerce of specified insular possessions and foreign countries with the United States during years ended June 30, from 1904 to 1918, inclusive.

	from 1009 to 1010; enduance.										and the second

Mr. BACON. I should like to inquire of the Senator, with the permission of the Chair, whether the statement he now proposes to incorporate in the Record shows of what that commerce consists.

Mr. CHAMBERLAIN. No; it would not show it.

Mr. BACON. Is the Senator prepared to state it in a general

way?

Mr. CHAMBERLAIN. Not very well. I have not gone into that subject. It is too vast a subject to undertake to show just what the particular items were.

Mr. BACON. I am referring only to Alaska.

Mr. CHAMBERLAIN. I practically covered that a little while ago.

Mr. BACON. I was called out of the Chamber. I suppose large part of it included the gold exports.
Mr. CHAMBERLAIN. A good deal of it.

Mr. BACON. I mean the exports from Alaska to the United

Mr. CHAMBERLAIN. Yes. I will call the Senator's attention to the different items of Alaskan commerce.

Our largest business with Alaska was gold, \$195,916,520, but next in order and almost equal to it was \$147,953,077 as fishery

products alone. But I have asked to have inserted in the

RECORD just what that showing is.

Taking the fisheries of Alaska, I wish to call attention to them to show the mammoth business done in Alaska in this industry. I am going to ask to have inserted in the RECORD as a part of my address the pack of canned salmon on the Pacific coast, by years and waters, from 1864 to 1911. This I do for the purpose of comparing the canning that is done along the

whole Pacific coast.

Take the State of Washington during these years. The total pack of salmon—that is, cases of salmon, a case containing 48 1-pound cans—was 13,070,452 cases. On the Columbia River it was 17,503,530; on the coastal streams of Oregon, 1,983,770; California, 1,445,674. Alaska, now, mind you, isolated as it is, produced 36,389,737 cases, while British Columbia produced 16,644,721 cases. In other words, Alaska produced 41.81 per cent of the whole salmon pack of the western coast of this country, and that, too, Mr. President, in the face of the most overwhelming difficulties of transportation and other conditions.

The PRESIDING OFFICER. If there be no objection, the

table will be inserted in the RECORD.

The table referred to is as follows:

Pack (cases) of canned salmon on the Pacific coast, by years and waters, 1864 to 1911.

Mr. CHAMBERLAIN. I am calling attention to these things because there is sometimes a belief expressed that there is no commerce between the United States and Alaska, and it is preliminary to a discussion as to the necessity for the construction of a railroad and the betterment of transportation facilities there.

Mr. President, I am going to ask to have printed in the Record a comparative diagram—the figures only—showing the total commerce of Alaska and that of the countries mentioned therein. It is a comparison of the business of Alaska in 1910 and the latest information we have from other countries showing the balance in favor of Alaska. In that comparison we will take Alaska, Bulgaria, Formosa, Peru, German Colonies, Greece, Tunis, Servia, Colombia, Venezuela, Honduras, Korea, Ecuador, Belgian Kongo, Morocco, Santo Domingo, Haiti, Costa Rica, Guatemala, Egypt-Sudan, Panama, Salvador, Paraguay, Crete, Dutch possessions in America, Nicaragua, Italy-Eritrea, and Liberia.

Alaska beats them all in the commerce which it has in the United States. Still Alaska is looked upon as a sort of summer resort for people who can not stand the hot weather in Washington. I wish we could all have been up there last summer, because then possibly we would have found out what the real Alaska is.

The PRESIDING OFFICER. Without objection the matter will be inserted in the RECORD.

The matter referred to is as follows:

Comparative statement showing total commerce of Alaska and that of specified countries.

Alaska, 1910	\$60, 220, 132
Bulgaria, 1910	
Formosa, 1910	54, 205, 000
Peru, 1909	52, 516, 000
German colonies, 1909	52, 387, 000
Greece, 1909	46, 173, 000
Tunis, 1910	43, 598, 000
Servia, 1910	35, 135, 000
Colombia, 1910	
Venezuela, 1911	34, 181, 000
Honduras, 1910	
Korea, 1910	29, 729, 000
	20, 083, 000
Ecuador, 1910	19, 480, 000
	19, 050, 000
Morocco, 1910	
Santo Domingo, 1910	17, 259, 000
Haiti, 1910	17, 109, 000
Costa Rica, 1910	16, 798, 000
Guatemala, 1909	15, 230, 000
Egypt-Sudan, 1910	14, 084, 000
Panama, 1910	
Salvador, 1910	11, 043, 000
Paraguay, 1910	11, 034, 000
Crete, 1908	
Dutch possessions in America, 1909	7, 177, 000
Nicaragua, 1900	
Italy—Eritrea, 1909	
Liberia, 1908	1, 850, 000
Institut, 1000	1,000,000

Mr. CHAMBERLAIN. Mr. President, I am going to ask also to have printed in the Record a table showing the comparative commerce of Alaska and other specified countries with the United States during eight years from 1904 to 1911, inclusive.

The PRESIDING OFFICER. The Chair hears no objection, and it will be so ordered.

The matter referred to is as follows:

Comparative statement showing total average annual commerce of Alaska and other specified countries with the United States during eight years from 1904 to 1911, inclusive.

Alaska	
China	\$55, 862, 077 56, 402, 715
Hawaii	56, 402, 715
British India	51, 487, 809

British Honduras	2, 027, 458
Dittion Mondatas	2,021,100

Mr. CHAMBERLAIN. I have had that table inserted for the purpose of showing the commerce of Alaska as compared with the countries named.

Now, Mr. President, I am going to call attention to a balance sheet of the United States in account with Alaska from 1867 to 1911, both inclusive. This balance sheet is printed in the House and Senate hearings on the pending bill, and, if I am not mistaken, it was presented by Judge Wickersham, the Delegate from Alaska, or prepared under his supervision. I am not prepared to say as to that, but I know it was presented by him. I may add that he has been an indefatigable fighter for the rights of Alaska and the people of Alaska.

This balance sheet gives on the debit side of the column the production of Alaska in figures—the gold, silver, copper, gypsum, marble, tin, coal, sea and fur products, and the fishery products. The total cash receipts are \$446,640,984.79 on the debit

446, 640, 984, 79

side. On the credit side the total cash disbursements are given; that is, all the money that has been paid out for Alaska in all these years.

The PRESIDING OFFICER. If there is no objection, the matter will be printed in the RECORD. The matter referred to is as follows:

Balance sheet of United States in account with Alaska, 1867 to 1911, both inclusive.

Minerals— Gold	\$195, 916, 520, 00
Silver	1, 500, 441, 00
Copper	8, 237, 594, 00
Gypsum	547, 345. 00
Marble	185, 443. 00
Tin	
Coal	338, 189. 00
Sea and fur products—	F4 00F 440 00
Fur-seal skins	51, 835, 143. 00
Aquatic furs, except seals	12, 496, 063. 00
Furs of land animals	
Walrus products	
Whalebone	147, 953, 077, 00
Fishery products	17, 117, 354, 79
Total cash receipts	11, 111, 504. 10
	446, 640, 984, 79

Cotal cash disbursements: Original purchase price Treasury, 1867-1911 Post Office, 1867-1911	\$7, 200, 000, 00 23, 158, 126, 06 5, 458, 548, 19	
To balance due Alaska	35, 816, 674, 25 410, 824, 310, 54	

Mr. GALLINGER. But, Mr. President—
The PRESIDING OFFICER. Does the Senator from Oregon yield to the Senator from New Hampshire?

Mr. CHAMBERIAIN. I yield.
Mr. GALLINGER. Is it quite fair to have it represented that the United States has had the benefit of that enormous sum of money

Mr. CHAMBERLAIN. I do not mean to be understood as saying that the money was paid into the Treasury of the United States, but it has gone to cularge the commerce of the United States and to benefit her citizens generally.

Mr. GALLINGER. That is true, but private citizens have invested, perhaps not as large an amount as that, but enormously in producing that wealth. I make the observation for the reason that it is a very common statement—we find it in the newspapers and elsewhere-that the Government has invested so much money in Alaska, and Alaska has returned a very much larger amount, ten times as large perhaps; while, as a matter of fact, it is not money that goes directly to the Government.

Mr. CHAMBERLAIN. I recognize the force of the Senator's suggestions, and I agree with him, but I present it simply to show the business relations between the Territory and the United States. We are reaching out all the time for the commerce of different countries. We have many quarrels with Great Britain and Germany and Japan about the expansion of our commerce. We do all we can to get it, and they are doing all they can to get it. I am showing the immense commerce of Alaska, whether by private initiative or not.

Mr. GALLINGER. If the Senator will permit me

The PRESIDING OFFICER. Does the Senator from Oregon yield further to the Senator from New Hampshire?

Mr. CHAMBERLAIN. I yield.

Mr. GALLINGER. I fully agree with the Senator as to the importance of developing those industries and the commerce, and I also agree that the purchase of Alaska was perhaps the best piece of business that the Government ever was engaged in, and the great wealth in minerals that come from Alaska has done us an immense amount of good. I appreciate that fully. Yet I propounded the question I did a moment ago for the reason that in the popular mind there is an idea that Alaska has turned into the Treasury this enormous amount in return for a smaller contribution from the Government. That is all I

Mr. CHAMBERLAIN. I am glad the Senator called my attention to it, because I did not intend to be a party to misleading the public. It was simply for the purpose of comparison, to show the great amount of business which is done between the United States and Alaska and the balance in favor of Alaska.

Mr. President, I might discuss more at length the commerce of Alaska, but I think I have given enough to show that it is not a mere bagatelle. The business we do with her 65,000 of population amounts to a great deal to this country.

Mr. BACON. Mr. President—
The PRESIDING OFFICER. Does the Senator from Oregon yield to the Senator from Georgia?

Mr. CHAMBERLAIN. I yield. Mr. BACON. As a matter of information, I should like to inquire of the Senator whether in that aggregate of commerce he includes the fur-seal business?

Mr. CHAMBERLAIN. Yes; the whole business.

Mr. BACON. Of the Aleutian Islands?

Mr. CHAMBERLAIN. Everything; everything in the socalled Russian North America that we acquired by the purchase.

Mr. THOMPSON. Mr. President—

The PRESIDING OFFICER. Does the Senator from Oregon yield to the Senator from Kansas?

Mr. CHAMBERLAIN. I yield.
Mr. THOMPSON. What is the aggregate?
Mr. CHAMBERLAIN, I will say to the Senator that the total amount was \$446,640,984.79.

Mr. President, I will not undertake to read it to the Senate. although I intended to comment upon it, but I am taking more time than I had any idea I would take, and I ask to have inserted in the RECORD in connection with my remarks what was said by the railroad commission of Alaska on the commerce of the country at page 37 of the Railway Routes in Alaska accompanying the President's message.

The PRESIDING OFFICER. If there is no objection, per-

mission is granted.

The matter referred to is as follows:

COMMERCE.

mission is granted.

The matter referred to is as follows:

COMMERCE.

The Territory of Alaska was purchased from Russia in 1867 for \$7.200.000. Up to the close of 1912 it has produced minerals, fishery products, and furs to a value of about \$460.000,000. Alaska's commerce includes northward shipments of food products, merchandise, machinery, lumber, coal, etc., and return shipments of gold, sliver, copper, salmon, halibut, etc. The average annual value of this growing commerce during the five years ending with 1912 is nearly \$50.000,000. In addition to this, the Territory produces annually some lumber, farm products, etc., which are consumed locally and as to the value of which no accurate figures are available, but is probably about half a million dollars.

The average value of the merchandise shipped annually from the United States to Alaska during the five years ending with 1911 is \$18.74.256. The highest value during this period for any one year (1909) was \$17,705,330; the lowest (1911), \$15,170,100. It should be noted that the value of the shipments to Alaska for the first 11 months of 1912 was \$21,585,587. The total for the year will, therefore, exceed \$22,000,000, an amount several millions of dollars greater than the maximum for any one year, as above indicated. An average offer, exceed \$2,000,000, an amount several millions of dollars greater than the maximum for any one year, as above indicated. An average offer, exceed \$2,000,000, an amount several millions of dollars greater than the maximum for any one year, as above indicated. An average of representation of the strate and thom Bashn. This includes some shipments to Canadian Yunon reached along the valleys of the Copper and Susitna Rivers, but, unfortunately, there are no statistics of the value of this trade.

It is estimated that during this five-year period an average of some 42,000 tons of merchandise were shipped into the Yunon region. This includes the tradic into the Iditarod-Innoko region, into the Tanana region, and into the Canadian Yuk

Basin, where there is, however, one mine which has been shipping copper ore for two years. While much of the value of the outbound shipments is represented by gold, silver, and copper, the greater part of the actual tonnage is made up of the fishery products, which are not dependent on inland transportation.

This commerce is carried on by vessels which ply between Alaska and west coast ports. Its importance is indicated by the records of clearances and entrances of vessels. In 1910 a total of 451 domestic vessels, with a total tonnage of 396,740, entered, and 419, aggregating 384,967 tons, cleared Alaska ports. In 1911 the entrances were 514 vessels, with an aggregate tonnage of 426,986; and clearances, 495 vessels, with an aggregate tonnage of 421,905. Trade in foreign bottoms was as follows: In 1910, 939 vessels, with an aggregate of 183,284 tons, cleared. In 1911, 367 vessels, with an aggregate of 183,284 tons, cleared. In 1911, 367 vessels, with an aggregate of 187,849 tons, entered, and 331 vessels, with an aggregate of 156,647 tons, cleared. These figures for foreign bottoms include the clearances of the Canadian steamers on the Yukon.

The traffic on the Yukon and its tributaries is carried on by 58 river steamers, varying in capacity from 6 to 588 net tons and with an aggregate net tonnage of 14,081. There are also 12 steamers on the Kuskokwim, with a net tonnage of 1,568. To arrive at the total tonnage it will be necessary to add that of the scows and barges used on the Yukon, of which there are 56, aggregating 25,393 net tons. About 60 vessels clearing from Puget Sound are regularly engaged in Alaska traffic. This does not include the whaling ships, cannery tenders, or small gasoline boats.

The commission employed Mr. Harry L. Muchemore as statistician, and he spent some two months in collecting data from which the above figures were taken. A fuller report on commerce is presented in the Appendix B (p. 144).

Mr. CHAMBERLAIN. That report shows in briefer form than it is possible for me to put it the commerce between Alaska

and the United States.

Mr. President, some one asked me a while ago as to the number of miles of railway constructed in Alaska. I call attention to the Senate committee hearings, at page 288, where are given all the railroads constructed in Alaska. If Senators will take the trouble to examine the map hanging on the wall they will find that it shows practically a disconnected system of railways, which do not help the transportation situation at all.

Mr. CUMMINS. Mr. President, I wish the Senator from Oregon would identify these railroads in some way by their

ownership as he goes on.

Mr. CHAMBERLAIN. I will say in this connection that it is impossible for one to read the testimony before the committees and find out just who does own them, but I will say to the Senator that Delegate Wickersham, who is thoroughly familiar with the situation up in Alaska, who sat on the bench in the Territory and heard and learned the conditions as they actually existed, who has traveled all over the district, and who has had litigation one way and another with all these interests, has produced evidence tending to prove that there are hardly any of these railroad lines along the southern coast of Alaska that do not belong to the Alaska syndicate or in which the Alaska syndicate is not interested. That is not only true of the Cordova & Northwestern, but it is true with reference to the Alaska Northern, which runs from Seward to Kern Creek.

Mr. CUMMINS. Were the 71 miles of the Alaska Northern

road built by Canadian capital?

Mr. CHAMBERLAIN. The first 20 miles was built by Mr. John E. Ballaine, of Seattle. It was then known as the Alaska Central. He sold to Frost & Osborne, of Chicago and Toronto. Frost & Osborne got into financial difficulty, and the road went into the hands of a receiver, and finally the stock came into the control of a Canadian bank, which later failed. I think the evidence shows conclusively that the Morgans were interested in the stock of that bank; and not only that, but it convinces me that the same people were largely interested in the White Pass & Yukon Railway, that runs up from Skagway through American territory into British territory to the headwaters of the Yukon.

So all of the railroads in Alaska that amount to anything at all and that might under different conditions develop the country are in the hands of the men whose interest it has been to throttle the development of Alaska and get it all-not only the , railroads, but the industries of Alaska as well-into their con-I am warranted in making that statement not from any knowledge on my part, but from statements which have been made before committees of the House and of the Senate. one of the cross-examinations of one of the witnesses there he reluctantly admitted all of the things which I am now asserting.

The other railroads which exist are the Seward Peninsula Railroad, from Nome to Shelton, with a spur to Paystreak, aggregating 86½ miles, and they cost \$2,000,000. That is at Nome, and simply runs from Nome into some mining district which they hope to develop up there. Then there is the Tanana Valley Railroad, from Fairbanks to Chitina, with a spur to Chena, 45 miles long, which cost \$1,000,000. It was built to some of the mining districts for the purpose of aiding in the development of that section. The Council City & Solomon River Railway runs from Solomon to Penelope, 32½ miles, and cost \$1,000,000.

Mr. THOMAS. Mr. President, I should like to ask the Seu-

ator from Oregon a question.

The PRESIDING OFFICER. Does the Senator from Oregon yield to the Senator from Colorado?

Mr. CHAMBERLAIN. I do.

Mr. THOMAS. What is the gauge of these roads? Mr. CHAMBERLAIN. I will state them again.

Name of road and terminals.	Gauge.	Miles.	Estimated cost.
Copper River & Northwestern (Cordova to Kennicott).	Standard	200	\$20,000,000
Alaska Northern R. R. (Seward to Kern Creek). Seward Peninsula Ry. (Nome to Sheton with spur to Pay Streak).	3 feet	71 86. 5	5,000,000 2,000,000
Tanana Valley R. R. (Fairbanks to Chatinika, with spur to Chena).	do	45	1,000,000
Council City & Solomon River Ry. (Solomon to Penelope).	Standard	32.5	1,000,000
Wild Goose R. R. (Council to Ophir Creek) Yakutat & Southern (Yakutat to Situk River) White Pass & Yukon Ry. (Skagway to White Horse).	3 feetdo	7 9 110	200,000 100,000 6,000,000

1 Only 20 miles of the line are in Alaska.

One of the peculiar situations that developed in the examination of witnesses with reference to transportation matters in Alaska was that neither the Copper River & Northwestern Railroad nor the Alaska Northern Railroad was intended to develop the interior of Alaska; and the men who are connected with those roads now all came on the witness stand, as I recall it, and each and every one of them stated their purpose. One said that they intended to go to the Matanuska coal fields, and another stated that they wanted to get out to the Kennicott copper mines, to the Guggenheim interests, and that when they reached that point they had no other interest in the matter at all. The Guggenheims wanted to reach their copper; they owned the railroad to the mines, and they practically owned and controlled transportation from the open port on the ocean to their smelters in Tacoma and in California. So they had absolute control of the situation so far as transportation was concerned. It was only to put their own product in the market, and they never intended to extend that line. One of the managers of the White Pass & Yukon Railroad said, in opposing the bill for the construction of a railroad in Alaska, that he did not want the Government of the United States to build it. Why? He admitted that it would assist in developing Alaska; but he did not want it built simply because it would parallel his line up from Skagway to White Horse in Canada and the boats of the company from White Horse to Dawson on the Yukon and thence down to Fairbanks; and the only opposition to the proposition was that the Government of the United States was going into competition with a private enterprise.

As soon as the Cunningham claimants undertook to acquire title to the Bering River coal mines we find the Guggenheims making a contract with these claimants, under the terms of which they were to acquire these coal mines. Then the Cordova & Northwestern Railroad, controlled by the Guggenheims, started in to extend branch lines into the coal mines. They did not intend to go into the interior of Alaska at all. What interest had they in developing the country? They were building these railroads for the purpose of getting coal and getting their own copper output to their smelters, and they had control, as we all know, of all the smelters in this country; they absolutely owned and controlled the smelters on the Pacific coast; so that f a private individual developed a magnificent copper mine on the line of the Cordova & Northwestern Railroad he could not get its product to market, for the Guggenheim people not only fixed the rate of transportation, but they fixed the rate at which the copper should be smelted after it got to the smelters, because

the Guggenheims owned both.

It was the same way with the Alaska Northern Railroad. The owners of that road had no idea of going into the interior of The purpose of the Alaska Northern people was to get into the Matanuska coal fields, the largest in Alaska, and when they got in there to get control of the output. That was the end of their ambitions and desires

Mr. CUMMINS. Mr. President—
The PRESIDING OFFICER. Does the Senator from Oregon yield to the Senator from Iowa?

Mr. CHAMBERLAIN. I do.
Mr. CUMMINS. That road did not reach the coal fields—
Mr. CHAMBERLAIN. No. Why?

Mr. CUMMINS. But the company is practically in a state of dissolution now.
Mr. CHAMBERLAIN.

Yes.

Mr. CUMMINS. It is 60 miles or more from the coal fields.

Mr. CHAMBERLAIN. That is right.

Mr. CUMMINS. And the other road did not reach the coal

Mr. CHAMBERLAIN. Why?

Mr. CUMMINS. I wish the Senator would state that.

Mr. CHAMBERLAIN. I will tell the Senator why.

Mr. CUMMINS. I want that to become a part of the Sena-

Mr. CHAMBERLAIN. Before the Cordova & Northwestern Railroad was extended into the Bering River coal fields the President of the United States, seeing that the Alaska syndicate was making an attempt to monopolize the coal industry of that region, withdrew the coal resources from acquisition by any-Therefore railroad building stopped. If they could not get control of the mines, as they had attempted to do by contract, they did not care to go on and develop Alaska for the benefit of others; but the President withdrew the property and nobody could acquire title. The Alaska & Northern intended to go to the Matanuska coal fields, and the reason they did not do so, I will say to the Senator from Iowa, was because the President of the United States withdrew the Matanuska coal freshent of the United States withdrew the Matanuska coal fields from acquirement by anybody, and there was no incentive to those people to build farther. The record here is full of evidence that if the Guggenheims had been permitted to acquire title to the Bering River coal fields, and the Alaska Northern had been permitted to acquire title to the Matanuska coal fields, the roads would have been extended without any question of doubt; but that would not have benefited the interior of Alaska. That would simply have been a matter for their own special benefit.

Mr. THOMAS, Mr. President-

The PRESIDING OFFICER. Does the Senator from Oregon yield to the Senator from Colorado?

Mr. CHAMBERLAIN. I do.

Mr. CHAMBERLAIN. 1 do.

Mr. THOMAS. As I understand the Senator's position, then, it is substantially this: That the system of railways heretofore outlined for Alaska and partially constructed were practically private enterprises, collateral to the larger enterprise of coal monopoly and coal supply, of metalliferous mining monopoly and metalliferous mining supply, instead of being constructed as great public highways for the development of Alaska and

for the common use of the people.

Mr. CHAMBERLAIN. That is right; and I want to say something directly in that connection. I may be mistaken about names—I have not read the testimony over recently—but my recollection is that Mr. Dickeson, who was connected, I think, with the White Pass road, testified, in terms, that he opposed the construction of this railroad by the Government be-cause it would develop interior Alaska and take away from his line up the Yukon River to Dawson and from Dawson to Skagway business that he was now entitled to. What difference did it make to him? The only thing he cared for was the charging of the enormous rates that they were charging for the transportation of freight from the seacoast to Fairbanks and from

There has never been an effort made in Congress to assist Alaska in developing her resources that the same men who are here in opposition to this railroad legislation have not been here fighting it. It is the same crowd. I think I can look up in the gallery and see some of them now. They appear before every committee that has for its purpose a proposition looking to the opening up of the resources of Alaska, unless they are so opened up that they can acquire title, fill their capacious maws, and put everything in reach of their transportation facilities. I do not care what the measure happens to be, their effort has been constantly and always to see to it that whatever is done in Alaska shall not be in the interests of the ultimate consumer nor in the interests of the people of the country. Theirs is and has always been a purely selfish policy. I desire now to discuss the rates charged for transportation of passen-

gers and freight in Alaska. Mr. CUMMINS. Mr. President-

Mr. CUMMINS. Mr. Fresident—
The VICE PRESIDENT. Does the Senator from Oregon yield to the Senator from Iowa?
Mr. CHAMBERLAIN. I do.

Mr. CUMMINS. Before the Senator enters into the question of rates, I should like to know where, in the opinion of the Senator, the railroad to be built by the Government, if we pass this bill, should be built? I am much interested in knowing whether the project generally includes the taking over by the Government of the roads that are already built, and if they are to be taken over, at what price. I do not want to see the Government go in and spend \$100,000,000 or \$500,000,000—because there is no limit in this bill at all—to make railread property in Alaska, that is now comparatively worthless, valu- that discretion which the bill intends to give him after having

able, and then the Government to be put in a position so that it must take over these railroad properties at a valuation greatly increased by the very things the Government has done. I say to the Senator from Oregon very frankly that that is the only objection I have to the bill-at least that is one of

the objections I have to the bill as it is.

I am in favor of the Government building a railroad in Alaska or a series of railroads there; I am in favor of the Government operating a railroad or a series of railroads in Alaska; but I am afraid of the tremendous and undefined and uncontrolled power that this bill proposes to confer upon the President of the United States or any other officer of the Government; and I am particularly anxious, therefore, that the Senator from Oregon shall develop, as his committee must have had the question under consideration and must have reached some conclusion, the general plan that ought to be pursued for the opening up of Alaska, where the railroads should be built, and what purposes they must serve in transporting minerals, coal, agricultural products, and everything of that kind. think that we ought to know what the plan is for the building of the railroads there.

I do not feel like saying to the President of the United States, "Here is an unlimited sum of money; go on and build what-ever railroads in Alaska you think ought to be built, and take whatever property you think ought to be condemned." I think the Senator from Oregon will agree with me about that general principle, and I think that he ought to tell us, if it has been under consideration by the committee—and I doubt not that it has—how he thinks Alaska should be developed, where the railroads should be built, and to what extent they should be built.

Mr. CHAMBERLAIN. I will say to the Senator that there is not very much room for disagreement about the selection of the route, because Alaska is not only sui generis in being owned almost entirely by the United States, but she is sui generis in only having a very few gateways to the interior which are accessible at all seasons of the year.

Mr. CUMMINS. Mr. President-

Mr. CHAMBERLAIN. I will answer the Senator in a mo-Take navigation up to Nome or to the mouth of the Yukon or to the Kuskokwim River, and it is only open for three or four months in the year, at the outside, because of ice, so that the only open ports, the only gateways to Alaska-in other words, the only places where there are passes through the mountains and into the interior of Alaska all the year roundare confined to three or four points along the southern coast.

Mr. CUMMINS. That is what I understand. They are on the south shore. Now, at least three of them-two or three-are

already occupied.

Mr. CHAMBERLAIN. Practically two.

Mr. CUMMINS. Two. Now, it is proposed that the Government shall from those shores, those open ports or open bays or harbors, build roads up into the interior of the country so as to serve every purpose that a railway can serve in a populated and developed country. Those routes are already occupied to a degree. What I want to know is whether it is in the contemplation of the committee that the roads that are already there shall be bought, shall be condemned and taken over by the Government, and whether it is the idea that the Government shall extend the lines that have already been built by the syndicate to which the Senator has referred? I can not conceive that it would be economically defensible to build another line of road up the same gulch or gorge, in view of the amount of business there, and I think it makes a great difference whether the Government shall extend these lines—that is, shall build lines in extension of these lines into the interior—and condemn that property thus made valuable by the expenditure of the Govern-ment money, or whether it shall take that property before the Government undertakes to make it valuable by projecting it into the interior.

Mr. CHAMBERLAIN. I see the position which the Senator takes. The committee did have under discussion to a considerable extent the question as to the power which the President might have with reference to the condemnation or purchase of existing roads. If the Government should parallel the Cordova & Northwestern, for instance-I am not sure that the evidence showed whether they could or not, but assuming that the Government did parallel it-and then extend its line from Chitina, which is the northern point of the present road, into Fairbanks, it would absolutely paralyze and render worthless the Cordova & Northwestern. It is the same in reference to the Seward route.

I assume that under the powers given the President under this bill either to purchase or to condemn, he would exercise

had the whole situation overlooked by the men he is to appoint

to investigate the situation.

Mr. CUMMINS. Possibly; but I take it for granted that men of ordinary prudence would not build another line up the narrow gorges leading from the sea into the interior of the Certain railways have been built there and they are of a certain value. One of them, I think, is practically of no value, and the other is not of great value. They can not go on, or they do not go on, because there seems to be nothing to promise sufficient business in the interior to warrant their further extension. I want the Government to own the railroads there and to operate them, but I think that Congress ought to determine, in the first instance, whether it can buy or take those railroads at a fair price.

Mr. CHAMBERLAIN. They have the power to condemn

under the bill.

Mr. CUMMINS. I do not believe that you can substitute the discretion of the President for that of Congress with respect to the value of those two railroads.

Mr. CHAMBERLAIN. May I call the Senator's attention to

this clause of the bill?

The President may acquire, by purchase or condemnation, all property he may deem necessary for the purpose of carrying out the provisions of this act, and he may exercise in the name of the United States the power of eminent domain in the courts of Alaska in accordance with the laws now or hereafter in force for that purpose.

Mr. CUMMINS. Precisely; but suppose that you institute proceedings in condemnation or pursue negotiations and reach in either way a certain result as to the value of that railway property. I think Congress ought then to say whether it wants to take those railroads at those prices. I think that is too much power to give to any one man. Moreover, it might very well be that, instead of taking the property at a price determined by condemnation proceedings, we would prefer to build an inde-pendent line of our own. I do not believe that the Government ought to pay any more for these railroad properties than they are worth—worth now, worth in view of the fact that there is no motive for their extension; I do not believe that the Government ought to be called upon to pay a price that either of them might bear after the Government has decided to extend them so that they may become valuable. That is my point.

Mr. CHAMBERLAIN. Of course it would not do to undertake to tie the hands of the President by fixing the price. will say to the Senator now that whenever you undertake to ascertain the value of these railways through a committee of Congress you are right up against the same proposition that we have had to fight all the time. There must be discretion vested in somebody; we must trust some of the officers of the Gov-

Mr. CUMMINS. If that be so, I would rather see the bill amended so as to require the condemnation of those properties, and then allow us to determine, after they are condemned, whether the Government will extend them into the interior, in order to prevent the addition to the value of those properties which the definite action of Congress will inevitably give to

Mr. CHAMBERLAIN. I assume that the Senator would not want to destroy the property there in which investments have

actually been made.

Mr. CUMMINS. I should like to see the United States buy the existing roads, and I should like to see it give every penny that they are worth. Thece people, however, have gone forward and invested their money under conditions as they then were. It may be a good investment or it may be a bad investment. If it be a bad investment, I do not think the Government ought to make it a good investment; but whatever the property is fairly worth, that the Government ought to pay; and if we can not buy them at a price that would fairly represent their value, then we ought not to add to their value by extending them into the country and converting a bad investment into a good one.
Mr. CHAMBERLAIN. I think that is just the power that

the President is given under this bill now. Whatever officers he may appoint as his agents to construct the railroad or railroads in Alaska must negotiate with these people, and if in such negotiations a price is asked which is out of reason, then the President has the power of condemnation. It seems to me that the President ought to have that power; it must be vested somewhere, and he must have discretion; otherwise it would be impossible to get anywhere in the development of Alaska.

Mr. GALLINGER. Mr. President—

The VICE PRESIDENT. Does the Senator from Oregon

yield to the Senator from New Hampshire?

Mr. CHAMBERLAIN. I do. Mr. GALLINGER. I will ask the Senator if a very careful computation has been made as to the amount of money that will be required to construct the proposed railroad? I observe

that the bill names a sum of \$40,000,000, for which coupon bonds bearing a rate of interest of 3 per cent shall be issued by the Secretary of the Treasury; but a little while ago the Senator from Iowa [Mr. Cummins], perhaps with no more complete knowledge on the subject than I have, suggested that he did not think the Government ought to spend \$100,000,000 or \$500,000,000. I should like to ask the Senator what the possibility is of this expenditure reaching far beyond the \$40,000,000 named in the bill?

Mr. CUMMINS. I have read the bill, and I think the Senator from Oregon will agree with me that there is no limit whatever upon the authority of the President to enter into engagements in the name of the United States for the building of railways in Alaska or the purchase of railways already there.

Mr. GALLINGER. The closing section of the bill would

seem to indicate that.

Mr. CUMMINS. The \$40,000,000 for which bonds are to be issued is simply intended to provide the immediate funds necessary for the work. I take it that it is agreed that the President could go on and expend a hundred million dollars or more if he believed it to be wise to do so.

Mr. GALLINGER. That is the very point I wanted eluci-

dated-

Mr. CUMMINS. Yes; I think there is no doubt about that. Mr. GALLINGER. As to the probable ultimate expenditure under this bill

Mr. CHAMBERLAIN. That is a matter that can be very easily cured. It was the intention of the committee to limit it to the amount specified in the bill; but that is a matter that can be very easily remedied if there is any doubt on the subject.

Mr. CUMMINS. That really does not cover the point that I have been suggesting, because if we go into the business there-and I believe the Government ought to do it; I am with the Senator from Oregon upon that subjectgo further and complete the project, and the United States must do whatever it is necessary to do to develop the country, whether it costs forty million dollars or a hundred million dollars.

Mr. CHAMBERLAIN. I want to suggest to the Senator in that connection that the Alaska Commission did make estimates and did make recommendations from their standpoint as to where the roads ought to be built. On page 141 of the commission's report they suggest practically the extension of

the existing lines there.

Mr. CUMMINS. I know that, and I know that the purpose of this bill is to extend the lines that are already there.

Mr. CHAMBERLAIN. No-

Mr. CUMMINS. In part, at least; and I do not want to see these lines extended under such circumstances as will require us to pay a price for the railroads induced or influenced very

largely by what we ourselves do.

Mr. WALSH. Mr. President—

The VICE PRESIDENT. Does the Senator from Oregon yield to the Senator from Montana?

Mr. CHAMBERLAIN. Certainly.

Mr. WALSH. For the purpose of relieving the apprehension that seems to exist in the mind of the Senator from Iowa, I desire to say that the commission reports that it is not necessary to purchase or condemn the Copper River and Northwestern Railroads. They can run out of Cordova, across Marshall Pass to Copper City, or out from Valdez, without touching the Copper River Railroad at all.

Second, with reference to the Alaska Northern, reports have recently come in of the possibility of reaching Prince William sound by a tunnel 2 miles in length that will render it unnecessary to take the Alaska Northern. The Government is in a situation where it can say to the owners of these roads, "We will buy at such a figure, or we will construct along other lines," and the other lines would not parallel.

Mr. CUMMINS. Well, Mr. President, I have had it in my mind all the time that it was the policy of the Government to purchase these roads. I do not believe in building unnecessary salvesdes on in paralleling lines that already are sufficient to do

railroads or in paralleling lines that already are sufficient to do the business. It is bad economy and wasteful to do so. I want the Government to buy them at a fair price, and if they are losing ventures I want the Government to buy them as losing ventures

Mr. CHAMBERLAIN. Would not the Senator assume that a fair valuation of the railroads would be arrived at by condemna-

tion proceedings

Mr. CUMMINS. I can only, suggest to the Senator from Oregon that if a condemnation proceeding is carried forward after the Government has undertaken to extend them to the interior, so that they will reach a source of trade, the value found by the jury of condemnation would be much greater than though that were not a fixed fact. The Senator from Oregon can readily see that.

Mr. SMOOT. Mr. President—
The VICE PRESIDENT. Does the Senator from Oregon yield to the Senator from Utah?

Mr. CHAMBERLAIN. I yield.

Mr. SMOOT. It is true that the bill provides for a standard-guage railroad or railroads; but in my opinion those who are interested in this bill understand, from all of the testimony which has been given and all that has been said upon all sides of the question, that there is to be but one main road constructed by the United States. I believe the understanding in the minds of most of the people is that it will be the Alaska Northern Railroad route. I think that is understood. In fact, I know the people who are interested in that road are very much interested in this bill.

Mr. CHAMBERLAIN. The evidence seems to disclose that that road will go through the richest section of the country, up

through the Shushitna and other valleys.

Mr. SMOOT. I can not say whether it is the richest section or not.

Mr. CHAMBERLAIN. I say, the evidence seems to disclose that

Mr. SMOOT. I think the evidence discloses, however, that the Alaska Northern will meet with difficulty in passing over three high points, where the grade of the road will be very heavy. In the case of the Copper River road, of course, if that route should be adopted, the grade is a natural grade, at least to the Matanuska coal fields.

Mr. CUMMINS. That is the 71-mile road? Mr. SMOOT. No; that is the 200-mile road.

Mr. CHAMBERLAIN. There are only 71 miles of it built, however.

Mr. SMOOT. Yes; there are only 71 miles of it built.

I am in favor of the Government of the United States building one line of railroad. I would have very much preferred to see this bill provide only for a main line of railroad, not for railroads. Then, of course, provide for branch lines, sidings, switches, and so forth.

I can not see why the committee reported a bill giving the President authority to build two main lines of railroad. What is wanted is a railroad from Resurrection Bay or from Cordova Bay right through the country to Fairbanks. When that one line is built, it seems to me that is all that ought to be built by

the Government of the United States.

Mr. CHAMBERLAIN. I think the President has the power to stop whenever and wherever he feels disposed to stop after he receives the full report of his engineers. We discussed all of that matter in committee, and reached the conclusion that if the President had the power of condemnation or the right of purchase, he would have all the power that anybody wanted. I know the railroad interests up there that are opposed to this bill do not want any condemnation proceedings, because they say they would get the worst end of it; and they not only oppose condemnation, but they do not want any agreement to purchase. In other words, they do not want anything done that will interfere with the status quo in Alaska.

Mr. NORRIS. Mr. President-

The VICE PRESIDENT. Does the Senator from Oregon yield to the Senator from Nebraska?

Mr. CHAMBERLAIN. I will yield, but really I am anxious to get through.

Mr. NORRIS. I will not interrupt the Senator if he prefers that I shall not do so.

Mr. CHAMBERLAIN. No; I shall be glad to yield to the

Mr. NORRIS. The question I wanted to ask the Senator from Oregon was in regard to a particular provision of the bill. If he is going to discuss the details of the bill later, I will not ask my question now.

I wanted to ask the Senator—and I hope if he does not discuss it now, he will before he closes—as to the proviso at the end of section 1, commencing on line 18, page 8, as follows:

Provided, That the President may cause said road or roads to be operated by contract or lease—

And so forth.

I wanted to ask the Senator what the theory of the committee was in regard to that, and whether the committee contemplated that after these roads were built by the President they should be leased to private parties?

Mr. CHAMBERLAIN. If the President saw fit to do so.

Mr. CHAMBERLAIN. If the President saw fit to do so. Mr. NORRIS. Does the Senator think that ought to remain in the bill? Mr. CHAMBERLAIN. I think it ought, for this reason: The Government owns the coal mines, and they may be operated under a lease; and the committee thought the President ought to have the power to lease the railroads if he saw fit to do so. The main purpose of the bill was not to have the Government own and operate a railroad. The main purpose of it was to develop Alaska. If, in the President's opinion, that could be best accomplished by the leasing system, not as a money-making proposition but as a development proposition, he ought to have that power; and we felt that that was the proper power to give him.

Mr. NORRIS. I do not want to take up the time of the Seuator now, but it has always seemed to me that that was a serious objection and that that language ought to be stricken out. It seems to me that if we are able as a Government to build the road, we ought to be able as a Government to operate it.

Mr. CHAMBERLAIN. I will call the attention of the Senator to one railroad that has been mentioned by Mr. Fisher, in his testimony before the Senate committee, that is owned by a city—Cincinnati—and operated under a lease system, resulting not only in the development of a certain section of the country and the benefiting of Cincinnati itself, but in profit to it as well. It is now leased to some company that is operating it. At all events, that is the only one I know of, and I had that in mind, at least, when this matter was being prepared. It seemed to me the Government might see fit to lease the road rather than to operate it after it was completed.

Mr. CUMMINS. If the Senator from Oregon will permit me just to make a suggestion, I will interrupt him no more, because I want him at some time during the course of the debate on this bill to clear my mind of some doubt I have with regard to it. It is perfectly plain to me, just from the language of the bill, that what is intended is that the President shall build a road into the interior from the present inland termini of the

two roads that are already there.

Mr. CHAMBERLAIN. Let me interrupt the Senator right there. I want to say that that subject was not discussed by any member of the subcommittee that prepared this bill. None

of them had that in mind.

Mr. CUMMINS. Then the bill ought to be changed, because the language that is used indicates that there is where the Government is to build the road, on one or the other of the routes or both. The amount of money provided for by the issue of bonds indicates that that is what must be done, and that that money is not sufficient, I take it, to purchase both of these roads.

Does not the Senator from Oregon see just what will happen? Another part of the bill gives this railroad the power to connect with any existing lines of railway, to make joint freight rates, and to establish joint routes over the Government line and any connecting privately owned line. Just as surely as the seasons come, if the Government takes up this railroad building at the internal termini of these two railroads and extends them into the country, into the coal fields, into other mining properties, and into the agricultural region, then if we ever come to purchase or condenn those parts of the railway system lying between the Government-owned railroads and the sea we will have to pay a very much larger sum of money for them than they are worth at this time.

Mr. CHAMBERLAIN. I think there is no question about

that suggestion of the Senator.

Mr. CUMMINS. That has seemed to me to be putting the cart before the horse. If we are going to use these railroads as a part of the Government system, I think we ought to take them now or ascertain what we can get them for, and then, after we find out what we can get them for, determine before we take one step further whether we shall condemn them or purchase them, or whether we shall build independent lines of our own.

Mr. CHAMBERLAIN. If the course suggested by the Senator is followed, the fate of Alaska will be the same in the future as it has been in the past. It means another year of interminable effort on the part of those people who have been hemmed in from the world, with nothing done for Alaska.

It seems to me we must assume that the agents and officers appointed by the President of the United States will endeavor in perfect good faith to ascertain before any line of construction is begun what those roads can be acquired for. I believe there is no part of our public service that has shown a better record for efficiency and honesty than the military and naval arm of the service. Those are the men who will have this matter in charge. Can we not trust them?

I see the force of what the Senator says; but can we not trust these men when the power is given to the President under

the bill to go there and do what seems best for the Government of the United States; to ascertain, it may be, the cost of the roads that are now on the ground and perhaps to purchase them, if the President thinks the figures at which they are offered are right; and if they undertake to hold up the Government in that respect as they have attempted to hold up other people along other lines, then to condemn their property, if need be, or build a parallel line somewhere else.

Mr. CUMMINS. But the Senator from Oregon assumes something that I have not found in the bill, although it may be

Mr. CHAMBERLAIN. What is that?

Mr. CUMMINS. I do not believe the bill gives to the President any power either to condemn or to purchase either of these railroads.

Mr. CHAMBERLAIN. What does this language mean?-

The President may acquire, by purchase or condemnation, all property he may deem necessary for the purpose of carrying out the provisions of this act, and he may exercise, in the name of the United States, the power of eminent domain in the courts of Alaska, in accordance with the laws now or hereafter in force for that purpose.

Mr. CUMMINS. What are "the provisions of this act"?
Mr. CHAMBERLAIN. To extend a railroad from an open

port to the interior.

Mr. CUMMINS. No; we return to the first lines of the bill,

and we are informed-

That the President of the United States is hereby authorized and directed to cause to be located such main lines for railroads from points on tidewater to the interior as will in his judgment best promote the settlement of Alaska, dovelop its resources, and provide adequate and suitable transportation for coal to the Army.

And so forth.

Mr. CHAMBERLAIN. That is, from the interior to the seaboard, according to the last clause the Senator read.

Mr. CUMMINS. Certainly; but I do not gather from the bill that it was the purpose of the committee which drafted it that we should proceed with the condemnation of these lines of railway before we determine to build extensions of them into the interior. If that was the purpose, it ought to be made very much clearer than it is here, in my opinion.

Mr. CHAMBERLAIN. I am sure the Senator from Iowa and myself agree as to the propriety of the construction of a railroad into the interior of Alaska. We may differ a little as to the methods by which it ought to be accomplished. I feel that the bill gives all the power that the Senator rather insists ought to be exercised. We differ, in that the Senator does not think the President of the United States ought to have that power, but thinks the matter ought to be determined in advance, while I say the President of the United States has the power, as he ought to have it, and ought to determine it after the bill has been passed, and leave it to his agents to make proper report.

Mr. KERN. Mr. President—
The VICE PRESIDENT. Does the Senator from Oregon yield

to the Senator from Indiana?

Mr. CHAMBERLAIN. I yield to the Senator.

Mr. KERN. May I inquire of the Senator whether he can conveniently conclude his remarks to-day?

Mr. CHAMBERLAIN. I will say to the Senator that I can not very well do so, because I have yielded a good deal of my time to my colleagues. I can not finish inside of an hour, and perhaps not in two hours if Senators are going to keep inter-

rupting me.

Mr. KERN. May I ask the Senator if he will be willing to yield at this time for an executive session, and conclude his

remarks to-morrow?

Mr. CHAMBERLAIN. I have no objection.

EXECUTIVE SESSION.

Mr. BACON. I move that the Senate proceed to the consid-

eration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After 15 minutes spent in executive session the doors were reopened, and (at 5 o'clock and 3 minutes p. m.) the Senate adjourned until to-morrow, Tuesday, January 13, 1914, at 12 o'clock meridian.

HOUSE OF REPRESENTATIVES.

Monday, January 12, 1914.

The House met at 12 o'clock noon. The Chaplain, Rev. Henry N. Couden, D. D., offered the fol-

lowing prayer

lowing prayer:
We bless Thee, infinite Spirit, our heavenly Father, that though the years come and go with ceaseless rapidity Thou art ever the same, upholding, sustaining, guiding Thy children in the onward march of civilization. We thank Thee for the wisdom, knowledge, and achievements which have come down to us out of the past; for the broad fields of endeavor stretching before us, inviting to yet greater attainments for the individual, the Nation, the race. May we lose no time in vain regrets for past mistakes and failures, but with increased energy and zeal do the work Thou hast given us to do to-day.

Trust no future, howe'er pleasant!

Trust no future, howe'er pleasant! Let the dead Past bury its dead! Act, act in the living present! Heart within, and God o'erhead!

For Thine is the kingdom and the power and the glory forever. Amen.

The Journal of the proceedings of December 23, 1913, was read and approved.

REGENT OF THE SMITHSONIAN INSTITUTION.

The SPEAKER appointed Mr. Connolly of Iowa one of the Regents of the Smithsonian Institution in place of Mr. Pepper, deceased.

LEAVE OF ABSENCE.

By unanimous consent, leave of absence was granted as fol-

To Mr. Kirkpatrick, indefinitely, on account of death in his

family.

To Mr. Sharp, for 10 days, on account of illness.

To Mr. Crisp, for 10 days, on account of illness.

IRVIN S. PEPPER.

Mr. ASHBROOK. Mr. Speaker, I ask unanimous consent to extend my remarks in the Record by printing a eulogy delivered by the gentleman from Missouri [Mr. Russell] at the funeral of the late Representative Pepper at Ottumwa, Iowa, on the 26th of December last.

The SPEAKER. The gentleman from Ohio asks unanimous consent to extend his remarks in the Record by printing a eulogy by the gentleman from Missouri [Mr. Russell.] on the life and character of the late Representative Pepper, of Iowa, delivered at his grave. Is there objection?
There was no objection.

The eulogy is as follows:

EULOGY OF JOSEPH J. RUSSELL DELIVERED AT THE FUNERAL OF THE LATE CONGRESSMAN IRVIN S. PEPPER, DECEMBER 26, 1913.

[From the Courier, Ottumwa, Iowa, December 26, 1913.]

I have been requested to say a few words in behalf of the Members of the lower House of Congress. What I shall say will be personal in their nature; I feel that it is more appropriate that they should be.

We are here by appointment of the Speaker of the House of Representatives to pay a last tribute of respect to the memory of your distinguished dead, to mingle our tears with yours, and to join with all the people of this great State in their spontaneous expressions of universal sorrow.

It was my good fortune to meet Mr. PEPPER soon after his It was my good fortune to meet Mr. Farras soon and. Inselection and before he had been sworn in or taken his seat. I was at once attracted to him by his splendid, open countenance, his natural frankness, and his generous, manly spirit, and soon thereafter I became closely attached to him as a personal friend. As our acquaintance became more intimate the time of friendship that bound us together became stronger the ties of friendship that bound us together became stronger and stronger.

During his service in the House I met him almost daily, both officially and socially. I knew his ambitions and he knew mine. Our mutual confidences and our mutual sympathies, it seemed to me, gave vitality to our ambition and strength to the hope of the future success of us both. The last day that he spent in Washington we took dinner together, and he advised me at the time of his contemplated trip to this, the State that he loved

so much, and the purposes of his mission.

Soon afterwards I learned that he was seriously sick with a soon afterwards I learned that he was seriously sick with a dreadful disease, and I frequently inquired of his secretary of his condition. On last Friday, one week ago to-day, I was informed that he was out of danger, and went at once to my office and wrote him a brief letter congratulating him upon the information which I had received. That letter, I am now informed, was read to him by his brother or sister on the last day of his life. In my letter at that time I addressed him as day of his life. In my letter at that time I addressed him as "My dear Pep," a term which to-day, when I speak in his presence as he sleeps in death, might seem disrespectful, but it was not so then; it was to his associates in Washington a term of endearment, and one that was inspired by the warmest personal friendship.

On Saturday, the following morning, his secretary showed to mo a telegram stating that our friend had suffered a relapse and was much worse. I at once felt that this was the beginning of the end, knowing as I did of his long and serious sickness, and of his necessarily weakened physical condition. On the following Monday morning when the sad message came an-nouncing his death, and when the official flag was hung at half mast, it seemed to me that a cloud of gloom at once covered the Capital City, and I know that a feeling of sadness filled the hearts of all who knew him.

Two weeks ago to-day a bill was under consideration in the House which carried an item for a pension for the deserving widow of an old Union soldier in Mr. PEPPER's district. amendment was offered and an effort made to strike that item from the bill. I at once rose in my place to resist the amendment, stating to the House that this item in the bill was introduced by Mr. PEPPER, who was at that time in his home State seriously sick, and as he was not able to speak for himself I desired to speak for him. I defended the item, the amendment was defeated, and the item remained in the bill and was approved and passed by the House. It will be a great satisfac-tion to me till the day of my death to remember that I seized this opportunity, the last one that I could ever have during his life, to do him a personal favor. Knowing him and his loyal friendship as I did, I am perfectly conscious of the fact that if the circumstances had been reversed he would have done as much for me.

On one occasion when his beloved father, who is now stricken with grief, was visiting his son in Washington, upon his invitation and request I went with him and his father to Alexandria, Va., where we attended the Masonic Lodge over which George Washington once presided as its master. I now remember very distinctly of the appropriate and beautiful remarks that Mr. PEPPER made on that occasion, expressing his devotion to the Masonic Order and to its teachings. He believed, as all Masons

believe, that-

It is not all of life to live, Nor all of death to die.

I trust that it will not be inappropriate to-day to refer to one of the teachings of this honorable and venerable institution, that of the immortality of the soul. Our Masonic brethren compare human life to the hour glass. Behold how the little particles contained in that instrument slowly and almost imperceptibly pass away, and yet in one short hour they are all exhausted. So wastes man; to-day he puts forth the tender buds of hope, tomorrow he blushes and blooms and bears his honors thick upon him; the next day a chilling frost destroys all, and when he thinks his greatness is still aspiring he falls like autumn leaves to enrich our mother earth.

This thought would be dark and gloomy were it not for our belief in immortality, but we are also taught and believe that I

there is in man a divine spark which bears a close affinity with the Supreme Architect of the universe which shall never die. This enables us to look forward with hope and confidence to a blessed immortality.

In the cemetery at Columbia, Mo., where the university of that State is located, the monument at the grave of Dr. Read, an ex-president of the university, bears this inscription: "I tried to do my duty." These were the last words spoken by him. I think that I may with propriety appropriate these words to-day expressive of the life and efforts of our departed friend whose mortal remains now sleep before us. I know, and every Member of Congress knows, that he tried to do his duty and succeeded well.

In conclusion permit me to say to his father and his surviving brothers and sisters, you have lost a jewel from your family circle, but it should be some consolation to know that he has left to you the priceless inheritance of a spotless name. The people of the district that he represented have lost a useful and an able Representative in Congress, one who was devoted to them and a tireless worker for the interests and the welfare of those who had honored and trusted him. The American Congress has lost an active, an influential, and a beloved Member. This the great State of Iowa has lost one of its purest and most promising public men. The country has lost an honest, an efficient, and a faithful public servant.

May he rest in peace until we shall meet and greet him again in a better and a brighter world in that spirit land beyond

the grave.

ENROLLED BILL SIGNED.

Mr. ASHBROOK, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bill of the following title, when the Speaker signed the same

H. R. 8142. An act to authorize the construction, maintenance, and operation of a bridge across the Bayou Bartholomew, at or

near Wilmot, Ark.

ENROLLED BILLS PRESENTED TO THE PRESIDENT FOR HIS APPROVAL.

Mr. ASHBROOK, from the Committee on Enrolled Bills, reported that this day they had presented to the President of the United States for his approval the following bills:

H. R. 11003. An act to provide for expenses of representatives of the United States at the international maritime conference

for safety of life at sea; and

H. R. 7837. An act to provide for the establishment of Federal reserve banks, to furnish an elastic currency, to afford means of rediscounting commercial paper, to establish a more effective supervision of banking in the United States, and for

DISTRICT OF COLUMBIA APPROPRIATION BILL.

Mr. PAGE of North Carolina. Mr. Speaker, I move that the House resolve itself into Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 10523, the District of Columbia appropriation bill.

The motion was agreed to.

Accordingly the House resolved itself into Committee of the Whole House on the state of the Union, with Mr. HULL in the

The CHAIRMAN. The House is now in Committee of the Whole House on the state of the Union for the further consideration of the bill of which the Clerk will read the title.

The Clerk read as follows:

H. R. 10523. A bill making appropriations to provide for the expenses of the government of the District of Columbia for the fiscal year ending June 30, 1915, and for other purposes.

The CHAIRMAN. When the committee rose an amendment was pending, which, without objection, the Clerk will again report.

The Clerk read as follows:

The Clerk read as 1010ws:

On page 44, after line 17, insert:

"No part of any money appropriated by this act shall be paid to any person employed under or in connection with the public schools of the District of Columbia who shall solicit or receive, or permit to be solicited or received on any public-school premises, any subscription or donation of money or other thing of value from pupils enrolled in such public schools for presentation of testimonials, or for any other purposes other than for the promotion of school athletics, school gardens, and commencement exercises of high schools."

Mr. MADDEN. Mr. Chairman, I reserve a point of order to that.

Mr. McCOY. Mr. Chairman, I offer a substitute. Mr. MADDEN. I make the point of order, Mr. Chairman. The CHAIRMAN. The substitute is not in order until the

point of order is disposed of.

Mr. McCOY. Mr. Chairman, a point of order was made

against the amendment when we were in session before and was overruled, and the amendment was held to be in order.

The CHAIRMAN. The Chair is informed that the point of order was not acted upon.

Mr. MADDEN. I make the point of order, Mr. Chairman. Mr. PAGE of North Carolina. Will the gentleman state the ground of his point of order?

Mr. MADDEN. My ground is that it is legislation on an appropriation bill and not in order under the rule.

Mr. PAGE of North Carolina. Mr. Chairman, I submit that this is merely a limitation on the expenditure of money that is carried for the purpose of conducting the school. Because of the fact that it is a mere limitation it is in order, and I think that the Record will show that the Chairman of the committee ruled that the amendment was in order on the last day that the bill was under consideration.

The CHAIRMAN. The Chair is of the opinion that the proposed amendment proposes such a limitation on the appropriation as would bring it within the rule. The point of order is

therefore overruled.

Mr. McCOY. Now, Mr. Chairman, I offer the substitute.

The Clerk read as follows:

On page 44, at the end of line 23, after the word "testimonials," add the words "charitable gifts," and at the end of line 24 add the words "not having strictly to do with school activities."

Mr. McCOY. Mr. Chairman, the amendment as I have proposed it I think leaves the section so that it meets all the committee had in mind in framing the legislation which they proposed in the bill. In other words, it prevents the solicitation in schools for gifts of money to be used for purposes other than for school purposes. I think that the purpose of the legislation suggested in the bill was a proper purpose, although I think also that the scope of the legislation was entirely too

Mr. MURDOCK. Will the gentleman yield?

Mr. McCOY. I will.

Mr. MURDOCK. What abuses have there been that this legislation seeks to correct; what funds have been solicited at the

Mr. McCOY. Mr. Chairman, I understand that in some cases, even this fall, collections have been taken up in the public schools to make gifts to the poor of the District at Thanksgiving time, and on a recent occasion funds were being solicited for the presentation of a testimonial. I think that such solicitation of funds in the schools should not be permitted, but I do think-and I believe that the chairman of the subcommittee agrees with me-that it ought to be possible to solicit in the public schools subscriptions for such things as the school papers or for theatrical performances the proceeds of which are to be used for athletic purposes and playgrounds.

Mr. MURDOCK. And the gentleman's substitute accom-

plishes that?

Mr. McCOY. My substitute prevents the kind of solicitation which I believe is objectionable—that is, for purposes outside of school activities; but it permits the solicitation of contributions for strictly school activities, the activities of the

pupils.

Mr. BRYAN. Mr. Chairman, I am opposed to this amendment, and I was just about to say so when the committee rose the day before Congress adjourned for the holiday recess. Outside of the general proposition, I am opposed to it on account of the penalty that is attached. The penalty provides that no teacher shall have any of the money appropriated by this act if a collection is taken in violation of the terms of that particular section. For instance, if some teacher should, in an unguarded moment, permit a collection to be taken to help out some boy who had suffered from an accident, then she or he. the teacher, could not receive any of the money appropriated by this act. In other words, the job would be entirely forfeited. not for one month but for the remainder of the term, until more money had been appropriated.

Mr. STAFFORD. If the substitute proposed by the gentle-man from New Jersey [Mr. McCov] is adopted, it will not be a limitation, but will be substantially in the phraseology incorporated in the appropriation bill under consideration, so that the argument of the gentleman is not applicable at all.

Mr. BRYAN. Does the amendment to the amendment entirely

eliminate the penalty?

Mr. STAFFORD. Entirely so.

Mr. BRYAN. Then, if the amendment eliminates the penalty, the only objection I have to it is the general objection. I am, of course, in favor of the amendment to the amendment as improving the original suggestion of the committee, but I am opposed to the whole proposition, because I do not believe that it is the proper function of this Congress to legislate on those minor school provisions. I believe that the school board here

the District of Columbia make regulations as to whether collections shall be taken or not, they certainly have not enough ability to run the schools. Congress ought not to burden the Federal statutes with a whole lot of minute regulations about these minor affairs. I believe that the matter of collections and whether collections should be taken ought to be left to the board.

Mr. ASWELL. Mr. Chairman, if we are to make this limitation upon the school-teachers, why not include the police force

and the Congress itself and everyone eise?

Mr. BRYAN. Mr. Chairman, the suggestion is a good one. If we limit the school-teachers in this way by congressional act, if this is a subject large enough to entertain the attention of Congress, then why should we not provide that policemen shall not take collections and that Members of Congress shall not? I think it is absurd to bring this matter before Congress, to attempt to put on the Federal statutes a provision in reference to these collections. During the last session, just before Christmas, my two little children came in with envelopes, in which they were going to put some money. It was not compulsory. It was for the poor; for those who were not going to get any presents. Every one of the school children had been given an envelope, and they were to bring the envelopes back and drop them in a hat, and no one could tell whether there was money in them or not. The child could seal the envelope and drop it in the hat, where everyone was to return the envelope, and there would be no way of telling whether the child who could not donate had failed to donate or not. I do not think that hurt anything or anybody. I think it taught the children a good lesson. I insist that it ought to be left to the school board to say whether or not these collections should be taken. But as for this almost inhuman penalty proposed of sacrificing the job of a teacher or a principal who permits a collection, I have no patience whatever with the suggestion. The dispenser of the public funds will not know whether to pay any teacher the salary due till he learns whether there has been any collections taken, and in case some grouchy person complains that a collection has been taken, he will be justified in holding up the warrants for every teacher on the premises, from principal down through the grades, and I suppose the janitor also would become involved.

Mr. WILLIS. Mr. Chairman, I desire to interrogate the gentleman from New Jersey, if I may have his attention. I was unable to hear the reading of his amendment and unable to get his explanation. Is it sufficiently broad to exempt from the operation of this amendment the school garden work and the athletics? Will be state again just what his amendment pro-

vides? State it for the benefit of all.

Mr. McCOY. Mr. Chairman, the gentleman from Ohio asked what my amendment proposes to do and whether it would permit certain activities. The amendment is to substitute, after the word "testimonials," in line 23, the words "charitable gifts," and at the end of line 24 the words "not having strictly to do with school activities." It was my purpose to draw it so that it would be sufficiently broad to include permission to collect for the sort of thing of which the gentleman from Ohio speaks and has in mind, which I think, is a school activity

Mr. WILLIS. I agree with the gentleman in his opinion,

and I think his amendment will cover that.

Mr. McCOY. I think that it will.

Mr. PAGE of North Carolina. Mr. Chairman, I am opposed to the amendment offered by the gentleman from New Jersey, for the reason that if it is adopted we might as well not legislate at all in connection with this matter. In my judgment, the phraseology of the substitute offered by him will leave the gap stand as it is now for the solicitation of subscriptions for any purpose, because the terr "school activities" is a matter that would be determined largely by the teacher in the school, and they could name anything on the face of the earth as being a school activity, and there would be no check whatever put upon what your committee has regarded as an abuse in the solicita-tion of subscriptions from the children in the public schools.

Mr. McCOY. Will the gentleman permit? Mr. PAGE of North Carolina. Certainly.

Mr. McCOY. Suppose the proposed substitute were changed so as to read "the activities of the scholars of the school"? Would that make any difference?

Mr. PAGE of North Carolina. That may make it somewhat better, Mr. Chairman, but it is very hard, indeed, to state what could or could not be done under any amendment, and if we are going to do anything we ought to do something that is effective in checking what your committee regards as an abuse in the public schools. Now, the Congress of the United States has protected the employees of the Government in every department ought to make those regulations, and that if they can not in from the abuse of solicitation, just as we are trying to protect

the school children in the District of Columbia, and I can see no reason why the language of the amendment pending, the committee amendment, should not be adopted, nor can I see any harm that will come to the legitimate activities of the school by its adoption.

Mr. WILLIS. Will the gentleman yield?

Mr. PAGE of North Carolina. I yield. Mr. WILLIS. I do not have the RECORD before me, and I do not recall the fact of whether the gentleman accepted the amendment I proposed as to school gardens.

Mr. PAGE of North Carolina. The amendment as it is now proposed, the committee amendment, includes other than for the promotion of school athletics, school gardens, and commencement exercises of high schools. I think that leaves open every legitimate channel for the solicitation of contributions from the children in the schools.

Mr. SHERLEY. Will the gentleman yield for a question? Mr. PAGE of North Carolina. I yield to the gentleman from

Mr. SHERLEY. I would like to know why the gentleman

makes those exceptions?

Mr. PAGE of North Carolina. Those exceptions are made for reasons which were presented by certain members of the Committee of the Whole-that it was impossible, so far as the commencement exercises were concerned in the high schools, to carry them out, as there was no provision of law made for certain small expenses, and that the members of the graduating classes or their friends could make contributions for certain activities in connection with those graduating exercises.

Mr. SHERLEY. What suggested itself to my mind was this basic proposition: That whatever of this nature ought to be done in a public school ought to be done at the public expense, and that we ought, in abolishing an abuse, abolish the whole

Mr. PAGE of North Carolina. I agree entirely with the prin-

ciple that the gentleman suggests.

Mr. McCOY. Then will the gentleman from Kentucky be willing that there should be an appropriation for all these

things included in the bill?

Mr. SHERLEY. No; because some of them ought not to exist at all. But I would be willing to have an appropriation made for every legitimate thing. I speak with some knowledge of the matter. I think I know something of the public schools. went from the lowest grade to the highest in my city in obtaining an education; I have been in touch with public-school matters in my city, and I know the abuses that arise by virtue of subscriptions to promote some particular pet hobby of some particular person.

Mr. McCOY. If the chairman of the committee will permit me, suppose the pupils wish to get up a theatrical entertainment for the purpose of raising funds to run their baseball nine or

their football eleven. What about that?

Mr. SHERLEY. There is nothing that can be written in this law that will prevent pupils on their own initiative, among themselves, doing anything they see fit to do. But what is being aimed at here is using the pupil and making him seem to take the initiative when in point of fact he is simply following the suggestion of somebody else.

Mr. PAGE of North Carolina. Now, Mr. Chairman— Mr. ROBERTS of Massachusetts. Will the gentleman permit

an interruption?

Mr. PAGE of North Carolina. No. I must insist that I have the floor for a moment for one observation that I have to make. will yield to the gentleman from Massachusetts a little later. I want to say, Mr. Chairman, to the membership of this committee that, in my judgment, there can be no worse practice in connection with the public-school system than the solicitation within the schools of these subscriptions for various purposes. Why, it developed in the hearings before your subcommittee that they solicited subscriptions for purely charitable purposes, the funds being turned over to the Board of Charities, the Associated Charities of the District of Columbia, to be dispensed, the contributions being solicited from children who themselves in many instances were proper objects of charity, embarrassing them by their inability to contribute when their fellows were contributing.

Mr. McCOY. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman yield?

Mr. PAGE of North Carolina. Yes; I yield to the gentleman.

Mr. McCOY. Would not the proposed substitute cure that

Mr. PAGE of North Carolina. I can not say it would cure it, because then the school authorities might say that the solicitation of funds for charitable purposes was a school activity.

Mr. McCOY. But, then, my amendment says that it shall not be permitted.

The CHAIRMAN. The time of the gentleman has expired.

Mr. SLAYDEN. Mr. Chairman, I am not sure whether the
language in the substitute offered by the gentleman from New Jersey [Mr. McCov] accomplishes the purpose intended, but I believe that the gentleman is in sympathy with the effort on the part of the committee to provide a remedy for a real abuse,

and one that should be corrected without delay.

I sincerely hope that in haggling over the specific language that is to go into the law the Members of the House will not lose sight of the fact that this abuse does exist and should be corrected. It is not merely in the schools, but it is in every organized work of any nature, public or private. When the superintendent of a great railway corporation resigns or is transferred, or when the manager of a great commercial enterprise resigns or goes to some other occupation, collections are made to present him with a testimonial. Many people contribute to these things who do not feel that they are able to do it and who ought not to be made to do it, as they are, by the compulsion of the sentiment which surrounds them. I can not believe, I regret to say, that the new association which is cutting some figure now in the newspapers, at least, commonly called the "Spugs," affords the relief that ought to be had, but there ought to be some relief, and I believe there ought to be a general mandate of law forbidding the solicitation of contributions for testimonials of any kind for anybody with respect to everything and place on which we have the authority to legislate.

Mr. BRYAN. Will the gentleman yield for a question?

Mr. SLAYDEN. Yes.
Mr. BRYAN. I suppose the gentleman from Texas has had experience, when a classmate in one of the grades died, for instance, and they would take up a collection of 10, 15, or 20 cents apiece to buy a floral wreath?
Mr. SLAYDEN. Yes.

Mr. BRYAN. Under this provision, if a teacher were to per-

mit that, she would lose her job?

Mr. SLAYDEN. Oh, Mr. Chairman, I think not. I think the suggestion of the gentleman from Kentucky absolutely and conclusively answers that. No statute can forbid me as an individual to give what I please of my own funds. It is the organized soliciting by the compulsion of the organization which surrounds the individual at the moment that is objectionable.

Mr. BRYAN. But the amendment discharges a teacher if she permits it on the premises. Furthermore, how is the man who pays the salary or draws the warrant going to know? Is he going to require an affidavit from each teacher before he issues the warrant?

Mr. SLAYDEN. I have thought that the gentle command of the law would prevent the teacher doing that, without any penalty whatever. I hope some law in line with the suggestion

of the committee will be enacted.

Mr. ROBERTS of Massachusetts. I want to ask the chairman of the subcommittee if he sees any impropriety or any harm coming from the school children editing, managing, and publishing a school paper, and soliciting among their school-mates contributions or subscriptions to that paper on school property.

Mr. PAGE of North Carolina. I see nothing in the amend-

ment I have offered to prevent that.

Mr. ROBERTS of Massachusetts. The last six words in line 24 will prevent that. They can not solicit money for the presentation of testimonials or for any other purpose.

Mr. PAGE of North Carolina. Yes. Any person employed in, or in connection with, the public schools is forbidden to do

Mr. ROBERTS of Massachusetts. But those people, employed in or in connection with the public schools, can not permit anybody else to solicit on school property, under the language of the amendment.

Mr. PAGE of North Carolina. There is nothing that keeps

any child from making his contribution.

Mr. ROBERTS of Massachusetts. But the gentleman understands that in getting the subscriptions to their school paper

they do it on school property.

I know in one of the high schools of Washington the pupils publish a magazine, which comes out, I think, monthly, and they solicit their schoolmates to subscribe to and maintain the school publication, and they do it on school property. Now, I see no harm whatever in that. I do recognize an abuse such as the gentleman has pointed out, but here is something that I can not think anybody will look upon as an abuse. Yet under the language of this amendment, on page 44, the teacher who permitted the children to solicit subscriptions to a school magazine or school paper would be violating the mandate of Congress.

Mr. PAGE of North Carolina. I will simply say to the gentleman that I do not care to say that I personally see any harm in the activity he has outlined, and I do say that it need not necessarily be stopped by the language of this amendment. It may be done somewhere else than on the school premises, and if it is worthy of being done there will be a way found by which these school children can do it, not in violation of this amendment, and that it is impossible to specify in the language of the amendment all the exceptions that might suggest themselves to the minds of gentlemen of the committee.

Mr. ROBERTS of Massachusetts. I do not agree with the gentleman on that. I believe it is very easy to point out in your amendment the class of abuse you are seeking to prevent. It is an extremely easy thing to do, and not have such broad language. This language will prevent things that I myself believe are most desirable for the school children to be en-

Mr. SHERLEY. I suggest to the gentleman that the very case he puts can be made an abuse, and if you allow a wide latitude, frequently it will be abused; whereas if you leave it simply a matter of individual initiative there will be no difficulty about it.

Mr. ROBERTS of Massachusetts. Will the gentleman point out wherein there is any abuse in soliciting a subscription for a school publication?

There could be plenty of abuse. Mr. SHERLEY. every scholar who possibly can subscribe, nor does every scholar like to be put in the attitude of being one of a few who do not subscribe.

Mr. ROBERTS of Massachusetts. The pupils do not know who subscribe and who do not.

Mr. SHERLEY. I can imagine a kind of solicitation that would be not only objectionable but highly wrong.

Mr. ROBERTS of Massachusetts. According to the chairman of the committee [Mr. Page of North Carolina], that solicitation can still be carried on just outside of the school premises.

Mr. SHERLEY. There is a good deal of difference between individual initiative that comes from one outside and action that comes in the school, from the school as a center.

Mr. ROBERTS of Massachusetts. This is not done in school hours. It is done in the recess or before or after school hours,

on school property. Mr. MONDELL. Mr. Chairman, I hope that the provision in the bill, as amended by the gentleman from North Carolina [Mr. Page], will be adopted. The necessity for this legislation arises out of the fact that it has come to be the practice in some of the schools of the District to make collections for the presentation of testimonials, and in some cases collections for charitable

and semicharitable purposes. Now, many of these purposes are excellent, many of them are proper, and many of the parents of the children would be glad to make the contributions. The practice, however, is, as a general proposition, not a good one; a serious objection to it is that the solicitation of these contributions may seriously embarrass and humiliate those children in the public schools whose parents can not afford such contributions.

I have four children attending the schools in the District. I have been glad to give to my children the small sums that have been solicited from time to time, but I realize the fact that there are many parents so situated that it would be difficult for them to make these contributions, and the children who do not make them are necessarily humiliated and necessarily embar-rassed among their fellow students.

Mr. MURDOCK. Will the gentleman yield?
Mr. MONDELL. Certainly.
Mr. MURDOCK. I agree with the gentleman from Wyoming; but has not the school board authority to correct this evil?

Mr. MONDELL. I think so; and it ought not to be necessary to do it by legislation, but it seems to be necessary, and there-

fore we are doing it,
Mr. MURDOCK. How is it over the United States throughout the cities and towns? Is it not prohibited by school-board regulations?

Mr. MONDELL. I think it is largely done by the town coun-

cil, and we are the town council.

Mr. BRYAN. The town council does not do it, but the school

Mr. MONDELL. I thank the gentleman for the correction, but we are the school directors of the District.
Mr. McCOY. Will the gentleman yield?

Mr. MONDELL. Yes.

Mr. McCOY. I do not know whether the gentleman heard

the substitute that I proposed.

Mr. MONDELL. Yes; I did; but I do not think the substitute, while I have personally no objection to it, is as good as the amendment offered by the gentleman from North Carolina. I think his amendment is better because it is more specific, and it accepts these particular classes of contributions which the children may very properly be asked to participate in, namely, those having to do with school athletics and the school gar-dens. That includes practically every activity I now think of that the children ought to be asked to contribute to. I fear that the amendment offered by the gentleman from New Jersey [Mr. McCov] would leave the matter so largely to the discretion of the authorities that it might have no effect whatever.

Mr. McCOY. Could not we try it for one year?

Mr. MONDELL. I think the amendment offered by the gentleman from North Carolina is better.

Mr. WILLIS. Will the gentleman yield?
Mr. MONDELL. Yes.
Mr. WILLIS. It has been brought to my attention that the language proposed by the gentleman from North Carolina would include the collections for laboratory matters and lockers, and matters of that kind. Does not the gentleman think that would be a dangerous prohibition?

Mr. MONDELL. I am not so sure in regard to that, but there has been something of an abuse and an attempt is made to remedy it, and I think the provisions here in the language proposed by the gentleman from North Carolina covers about all the activities that it is necessary to cover, perhaps there are others.

Mr. WILLIS. Does not the gentleman think the language proposed by the gentleman from New Jersey embodies exactly what he has in mind—"in having strictly to do with school That is what the gentleman wants, is it not?

Mr. MONDELL. Possibly so, but it is pretty general. I should be afraid that the school-teacher inclined to ignore the law might believe that under that his or her authority was pretty wide. I ascribe nothing but the best of motives to those who have approved such contributions. They may not have realized the objection to the practice I have referred to.

Mr. BRYAN. Does not the gentleman think that a penalty of absolute discharge of the teacher, the losing of her position or his position permanently, is an entirely unreasonable and unfair penalty?

Mr. MONDELL. Such a penalty would be severe, but they

ought not to violate a plain provision of the law.

The CHAIRMAN. The time of the gentleman from Wyoming has expired; all time has expired, and the question is on agreeing to the substitute offered by the gentleman from New Jersev.

The question was taken; and on a division (demanded by Mr. Page of North Carolina) there were 16 ayes and 68 noes. So the substitute was lost.

Mr. McCOY. Mr. Chairman, a parliamentary inquiry.
The CHAIRMAN. The gentleman will state it.
Mr. McCOY. Is it too late to move to strike out the last word? I move to strike out the last word.

Mr. SISSON. I make the point of order that it is too late. Mr. McCOY. I move to strike out the paragraph.

The CHAIRMAN. The question now recurs in regard to the amendment offered by the gentleman from North Carolina. Mr. McCOY. I move to strike out the last word of the amendment.

Mr. SISSON. I make the point that it is too late to strike out the last word, because they have voted down the amendment of the gentleman from New Jersey.

The CHAIRMAN. The gentleman from New Jersey moves to strike out the last word of the amendment, and the gentle-

man will proceed.

Mr. McCOY. Mr. Chairman and gentlemen of the committee, before voting on this amendment proposed by the gentleman from North Carolina [Mr. Page] I hope that the committee will have clearly in mind exactly what it does. provides in substance, though not in so many words, that a teacher who permits the solicitation of funds upon school premises shall thereby be barred from receiving any money under this bill.

Mr. SISSON, Mr. Chairman, a parliamentary inquiry. The CHAIRMAN. The gentleman will state it.

Mr. SISSON. Does the ruling of the Chairman reopen de-bate on this matter? I would like to know exactly where we stand, because this matter will come up during the entire proceedings while the present occupant of the chair is in the

The CHAIRMAN. The gentleman from New Jersey, in the opinion of the Chair, had the right, when the question came up on agreeing to the original amendment, to move to strike out the last word. The committee has charge of the question of limiting debate.

Mr. McCOY. Mr. Chairman, I think that the strenuous attempt of my friend from Mississippi [Mr. Sisson] to shut

me off shows that he is convinced-

Mr. SISSON. Mr. Chairman, I have no desire to cut the gentleman off or to cut off any other gentleman, providing he is in order; but I do not believe, notwithstanding the decision of the Chair, that that was not the rule prior to the time the distinguished occupant of the chair made that ruling; but

Mr. McCOY. Mr. Chairman, I think that the gentleman realizes fully the seriousness of the objection to the proposed amendment. Personally, I should prefer that the bill stand as it is, bad as I think it is, rather than to have this amendment adopted, because, as I stated previously, if any teacher in a public school through inadvertence or otherwise, or failure to observe closely enough what was going on, should permit a pupil of that school to solicit a contribution for the school newspers should permit the pupil to solicit anybody to purchase a paper, should permit the pupil to solicit anybody to purchase a ticket for some theatricals that were to be given in the school, or for any of the hundred and one things that the pupils rightly do, that teacher would lose an entire year's salary.

Mr. ASWELL. Mr. Chairman, will the gentleman yield for

a question?

Mr. McCOY. Certainly. Mr. ASWELL. I would like to ask the gentleman a question. Is it not a fact that this practice prevails in every part of the

Mr. McCOY. So far as I know.

Mr. ASWELL. And in every town of the country? Mr. McCOY. That is true.

Mr. ASWELL. And is it not a further fact that the purpose of public education is to provide citizenship, and is it not a good thing for those children to participate in the charities about them, and is it not a fact that it is a most remarkable thing that this Congress should take time here this morning to legislate upon a matter so insignificant as that? I think it is an outrage. [Applause.]

Mr. PAGE of North Carolina. Mr. Chairman, 'n reply :> the objection the gentleman raises in respect to the penalty imposed for a violation of the law, it strikes me that if an abuse is worth preventing at all it ought to be prevented, and the only way to prevent it is to place a penalty which will make those in authority observe the law as it is written by Congress.

Mr. ASWELL. Mr. Chairman, will the gentleman yield? Mr. PAGE of North Carolina. Certainly. Mr. ASWELL. Why does the gentleman confine this to the

schools? Why does the gentleman comme this to the schools? Why does he not include all of the public officials?

Mr. PAGE of North Carolina. It is not confined to the schools. I made that statement awhile ago.

Mr. ASWELL. Is the gentleman prohibiting subscriptions from Members of Congress in their offices?

Mr. PAGE of North Carolina. The law forbids the solicitation of subscriptions from the employees of the departments in every department of the Government.

Mr. ASWELL. Does the gentleman think that Congress can prohibit that sort of thing?

Mr. PAGE of North Carolina. Or on the Capitol Grounds, for that matter, and I think that would include Members of Congress, if the gentleman cared to pursue the matter further. Mr. FESS. Mr. Chairman, will the gentleman yield?

Mr. PAGE of North Carolina. Certainly.

cut out, on line 20, the words "or permit to be solicited or received"?

Mr. PAGE of North Carolina. No; because I believe that would destroy absolutely the purpose of the amendment. The gentleman from New Jersey [Mr. McCoy] says that he would prefer the original language of the bill. Your committee offered the original language of the bill, and a point of order was made to it from that side of the House. We therefore sought to write it so that it would not be subject to a point of order, and we have done it in this way because it was necessary to do it in order to escape the point of order and carry it in the bill.

Mr. FESS. Will the gentleman yield?

Mr. PAGE of North Carolina. Mr. Chairman I ask for a

vote-does the gentleman have some further observation?

One more question.

Mr. PAGE of North Carolina. All right; one more question. Mr. FESS. Does not the gentleman think that he is placing a limitation here that ought to be placed by the school board?

Mr. PAGE of North Carolina. Oh, I say to the gentleman frankly, yes; but the school board does not exercise the authority that it ought to exercise in these matters, and therefore Congress must do it.
The CHAIRMAN. Debate is exhausted-

Mr. SISSON. Mr. Chairman, I make the motion to strike out the last three words.

Mr. STAFFORD. Mr. Chairman, is that in order? Mr. SISSON. Mr. Chairman, in answer to what the gentleman from Louisiana [Mr. Aswell] said, the Government has protected every department in the Government, has protected the Members of Congress here in the Capitol Grounds, and the public schools happen to be the only department of Government that is not protected from this sort of evil-

Mr. ASWELL. Will the gentleman yield?
Mr. SISSON (continuing). And it is for that reason we believe that this ought to go into this bill.

Mr. ASWELL. Is it not a common practice in the gentle-man's own town that subscriptions are thus taken up? Has the gentleman ever tried to prohibit it at home, and is it not a common practice?

Mr. SISSON. The difference is that I am not on the school board in my town. I have not any duties to perform there, but

do have one to perform here. The CHAIRMAN. The question is on the amendment offered by the gentleman from North Carolina.

The question was taken, and the Chairman announced that the ayes seemed to have it.

On a division (demanded by Mr. Aswell) there were-ayes

59, noes 17. So the amendment was agreed to.

The Clerk read as follows:

For instruction of indigent blind children of the District of Columbia, in Maryland or some other State, under a contract to be entered into by the commissioners, \$7,000, or so much thereof as may be necessary.

Mr. ROBERTS of Massachusetts. Mr. Chairman, I move to strike out, on page 46, line 9, the word "indigent."

The CHAIRMAN. The gentleman from Massachusetts offers an amendment which the Clerk will report.

The Clerk read as follows:

Amend, page 46, line 9, by striking out the word "indigent."

Mr. PAGE of North Carolina. Mr. Chairman, I reserve a point of order against the amendment,

Mr. ROBERTS of Massachusetts. Mr. Chairman, in 1857 Congress incorporated the Columbia Institution for the education of the deaf, dumb, and blind and treated the whole subject of education of these unfortunates as a charity. vided in its legislation from that time down until 1901 for the education of the indigent deaf, dumb, and blind. In other words, while public money is appropriated for the education of children generally of the citizens and no taint of pauperism was ever attached to that public education, yet when you come to the case of the unfortunates, the deaf, the dumb, and the blind, in order to receive any benefits from public funds in the way of education they must declare themselves paupers. It seems to me it is a serious enough handicap to any person to be afflicted either with deafness, dumbness, or blindness, one that should give them the advantages and benefits of public education without compelling them or their parents to declare themselves paupers. However, Congress treated these unfortunates down to 1901 as paupers if they were to get any benefit from the appropriation made for their education. In 1901 a glimmer of light and reason and common sense seemed to strike the Congress, because in the act of that year it removed this stigma of pauperism from the deaf and dumb, so that from 1901 down to the present time the deaf and dumb can have the advantage of public appropriations of money and be educated in the Columbia Institution without the parents or the parties themselves declaring pauperism. Now, since the stigma of pauperism was removed from those who are to receive the benefits of this public appropriation we have provided for the education of colored deaf mutes at public expense, and I want to point out to the committee and to the chairman of the subcommittee that when we provided for the education at public expense of colored deaf mutes we did not attach to it the stigma of pauperism, but we still leave that stigma attached to the white blind, who want to get the benefit of education at public expense, and it seems to me the time has come when we should remove from this class of unfortunates the humiliation of pauperism before they can get the advantage of this small appropriation of \$7,000.

Now, I want to say to the committee and to the chairman of the subcommittee that the whole treatment of the education of the blind has undergone and is now undergoing rapidly a wonderful change throughout the country. We have come to realize that this class of people have a brain that is capable of

education, and by that education making the possessor of the brain self-supporting and bringing a great ray of light and happiness to the lives of those who are, perhaps, the most unfortunate of all the three classes that have been mentioned; and it seems to me that now is the time when Congress should remove any imputation of pauperism from these unfortunate blind who wish to take advantage of this \$7,000 appropriation.

The CHAIRMAN. The time of the gentleman from Massachusetts has expired. The question is on agreeing to the amendment offered by the gentleman from Massachusetts.

Mr. PAGE of North Carolina. Mr. Chairman, I am in sympathy with the purpose that the gentleman from Massachusetts [Mr. Roberts] has in view in offering the amendment to this bill, which is that the blind children of the District of Columbia or of any other political subdivision should have help toward their education at public expense.

As chairman of this subcommittee, and as a member of it, I

am not familiar with the law authorizing this appropriation in the beginning, and since the question has arisen I have tried to find in the law the authority for the appropriation but have not found it. I therefore would like to ask the gentleman from Massachusetts if he has at hand the law authorizing originally this appropriation?

Mr. ROBERTS of Massachusetts. I can get it for the gentleman in a very few minutes, if the gentleman will pardon me a

moment.

Mr. PAGE of North Carolina. Certainly. Mr. ROBERTS of Massachusetts. The origin of the Columbia

Mr. PAGE of North Carolina. I want to say to the gentleman that I am perfectly familiar with that particular phase of the

question-the bequest of Mr. Kendall.

Mr. ROBERTS of Massachusetts. If the gentleman will pardon me a moment, that is the beginning. Amos Kendall gave over a certain amount of property here in the District of Co-lumbia for the education of the deaf, dumb, and blind, on condition that the property be maintained by public appropriations or by private charity, and for a period of some six or seven years Congress, beginning in 1858, appropriated money for the employment of teachers and the payment of incidental expenses of that institution, and the institution educated the deaf, dumb, and blind. Then, after the expiration of some six or seven years, by act of Congress the blind were excluded from the Columbia Institution, and what is called an indefinite appropriation was made for the education of the indigent blind, to be expended by the Secretary of the Interior. The indigent blind, under the act, were to be educated in an institution in Maryland or in some other State.

From that period down to 1889—that is, from about 1865 down to 1889—this expense of education of the indigent blind was borne by the Treasury of the United States.

Mr. PAGE of North Carolina. Now, let me ask the gentleman

a question.

Mr. ROBERTS of Massachusetts. In just a moment. In 1889, by act of March 2 of that year, one-half of that expense was placed on the District and the other half was to be borne by the Treasury. That is, for the education of the indigent blind. It was called an indefinite appropriation, because the Secretary of the Interior could send as many children as he saw fit to this institution, or some other, and pay whatever the expense might be.

The half-and-half plan was continued from 1889 down to The act of May 26, 1908, repealed the indefinite appropriation, so called, and appropriated \$6,000 for the purpose of educating these indigent blind. Six thousand dollars was appropriated for one or two years following, and in the third session of the Sixty-second Congress the appropriation was increased to \$7,000. That is the amount that is carried this year. So that the indefinite appropriation continued from somewhere about 1864 or 1865 down to 1908, when the indefinite feature was repealed and a fixed appropriation was inserted in the law. I can give the gentleman the exact date that the indefinite appropriation began if he will give me time to look into my notes.

Mr. PAGE of North Carolina. Let me suggest to the gentleman that the law under which we are now operating provides only for an appropriation for the indigent blind. Does the gen-

tleman admit that?

Mr. ROBERTS of Massachusetts. So far as that has been the law for indigent blind, yes.

Mr. PAGE of North Carolina. That is the law.

Mr. ROBERTS of Massachusetts. Yes.

The CHAIRMAN. The time of the gentleman has expired.

Mr. ROBERTS of Massachusetts. I ask unanimous consent
for an additional five minutes.

The CHAIRMAN. The gentleman from Massachusetts asks unanimous consent for five minutes. Is there objection?

There was no objection.

Mr. ROBERTS of Massachusetts. I think the chairman of

the committee desired to ask me a question.

Mr. PAGE of North Carolina. I wanted to elicit from the gentleman whether or not he admitted that the statute now provides that an appropriation shall be made for the indigent blind? I ask the gentleman that, having reference to the reservation of the point of order against his amendment.

Mr. ROBERTS of Massachusetts. I do not admit that. I

think as a matter of fact there is no basic law. From all my

examination-

Mr. PAGE of North Carolina. If the gentleman will permit me, in the Revised Statutes, second edition, on page 942, he will find that there is a law. Section 4869 of the Revised Statutes reads as follows .

Whenever the Secretary of the Interior is satisfied by evidence produced by the president of the Columbia Institution for the Instruction of the Deaf and Dumb that any blind person of teachable age can not command the means to secure an education, he may cause such person to be instructed in some institution for the education of the blind in Maryland or some other State at a cost not greater for each pupil than is or may be for the time being paid by such State, and to cause the same to be paid out of the Treasury of the United States.

That is the law.

Mr. ROBERTS of Massachusetts. Admitting, if the gentleman please, that that is the law, wherein does the gentleman think there is any harm in striking out that feature "indigent" from the law? What hardship is to be imposed on the Federal Government or the District of Columbia, and why should we not as we can your properly change the law by striking out not, as we can very properly, change the law by striking out the word "indigent"?

Mr. PAGE of North Carolina. If the gentleman will allow me, I think the objection is that it shifts the burden from the

parent of a blind child to the Government.

Mr. ROBERTS of Massachusetts. That is just what I am getting at, and I shall in a moment offer another amendment which will make it apparent here in the District of Columbia that there is a duty on the public to educate these blind children just as much as there is a duty on the part of the public to educate the deaf and dumb or to educate those who have normal faculties

Mr. PAGE of North Carolina. I think they do educate the deaf and dumb.

Mr. ROBERTS of Massachusetts. But let me tell the gentleman that it is only since 1908 that we have educated the deaf and dumb without making them declare themselves paupers. The whole thing started in the education of the deaf, dumb, and blind, and they were considered and treated as paupers down to 1908, when, for some reason, that stigma of pauperism was removed from the deaf and dumb, but Congress failed to remove it from the blind, because, I think, it was done in an appropriation for the Columbia Institute, which did not have blind children among its pupils.

Mr. PAGE of North Carolina. I think the gentleman is mis-

Mr. ROBERTS of Massachusetts. Oh, I am not mistaken

Mr. PAGE of North Carolina. As to the removing of the word "indigent" from the deaf and dumb?

Mr. ROBERTS of Massachusetts. No; I am not mistaken

If the gentleman will look-

Mr. PAGE of North Carolina. If the gentleman will refer to section 4864 of the Revised Statutes, he will find that the law applying to the deaf and dumb is also that they shall be those who are indigent and their parents unable to pay

Mr. ROBERTS of Massachusetts. If the gentleman will look at the act passed on March 1, 1901, which is found in Thirty-first Statutes at Large, page 844, he will see that that act provides specifically that hereafter deaf mutes of teachable age, of good mental capacity, and properly belonging to the District of Columbia, shall be received and instructed in said institution, their admission thereto being subject to the approval of the superintendent of public schools of the District of Columbia, and said institution shall not be regarded nor classified as an institution of charity.

Prior to that all the appropriations for the deaf and dumb-Mr. PAGE of North Carolina. If the gentleman will allow me, that only regulates admission and puts it in the hands of the superintendent, and the purpose was to get it out of the hands of somebody else.

Mr. ROBERTS of Massachusetts. I think the gentleman is wrong, because the deaf and dumb go in there now without

being declared paupers.
Mr. PAGE of North Carolina. Mr. Chairman, I make the point of order.

The CHAIRMAN. The gentleman from North Carolina makes the point of order. The Chair sustains the point of

Mr. ROBERTS of Massachusetts. Mr. Chairman, I desire to offer the following amendment.

The CHAIRMAN. The gentleman from Massachusetts offers an amendment, which the Clerk will report.

The Clerk read as follows:

Page 46, after line 12, insert the following paragraph: "For instruction of blind children in the public schools of the District of Columbia, \$1,000, or so much thereof as may be necessary."

Mr. PAGE of North Carolina. Mr. Chairman, I reserve a point of order against that amendment.

The CHAIRMAN. The gentleman from North Carolina reserves a point of order against the amendment.

Mr. ROBERTS of Massachusetts. Now, Mr. Chairman, as I stated a moment ago, the whole theory of the education of unfortunate children—deaf and dumb and blind—has undergone a radical change throughout the United States. The subject matter has been agitated since 1866, when Dr. Samuel Gridley Howe, of the Perkins Institution for the Blind, in Massachusetts, advocated the education of the blind children in public schools at public expense. In 1902 Frank H. Hall, then superintendent for the blind of Jacksonville, Ill., urged the board to teach the blind children with the seeing children, and the matter was agitated for some 10 years in the State of Illinois, until 1900, when the city of Chicago, the first community in the United States to adopt the plan, opened three public schools for the education of the blind with the seeing children. Since that time the public education of the blind in public schools has been adopted in Cincinnati in 1905, in Milwaukee in 1907, in Racine in 1909, in Cleveland in 1909, in Newark, N. J., in 1910, and in Jersey City in 1911.

In the year 1913, in the city of Washington, this matter was taken up by those interested in the subject with the Commissioners of the District of Columbia and with the board of education and Dr. Davidson, then superintendent of schools, and all agreed that the blind of the District should be educated in the public schools at public expense,

I am advised that a recommendation has been made for a deficiency appropriation of \$1,000 to prepare for the work of educating the blind and supplying the teachers, for the reason that the appropriation under which the school board at present is working was not sufficient to permit of that expenditure, in order that the work might be taken up in the District immediately. This bill we are now considering, of course, provides for the next fiscal year.

The school authorities, the Commissioners of the District, the superintendent of schools, all agree here in the District that we should educate the blind with the sighted children and that it should be done at the public expense, and the amendment I have offered is merely to provide the money to carry out that purpose in the next fiscal year. I certainly hope that this committee will look upon this class of unfortunates with open minds and sympathetic hearts and will give them equal opportunity with the sighted children.

Why should we pick out the most unfortunate class of people in our community and make them educate themselves at their own expense, or declare themselves paupers, when we take all the children who have normal faculties and educate them at public expense? What good reason can any person give me for that discrimination? For God's sake, is it not handicap enough on a person-man, woman, or child, or the parents of that child-to be afflicted with blindness, deafness, or dumbness, without compelling that child or the parents to provide the whole education out of their own funds? And especially so when his next-door neighbor may be the child of a millionaire or the child of a pauper and receiving the best instruction that the public school can give at public expense. Is it not worth while to try to make these blind people self-supporting and provide them with the means of earning a livelihood, without leaving them forever shrouded in darkness and ignorance? I hope the members of the committee will see that this is but a simple act of justice to that most unfortunate class of people in our community. I hope the amendment as offered will be

Mr. PAGE of North Carolina. I am not only myself, but the members of the committee, and I take it every gentleman in the House, are in sympathy with the modern movement for the education of the blind, deaf, and dumb children in any community; but inasmuch as the amendment offered by the gentleman from Massachusetts does not, in my judgment, in any degree meet the necessities of the case, if any necessity exists, I make the point of order that I reserved against his amendment.

Mr. ROBERTS of Massachusetts. What is the point of order? Mr. PAGE of North Carolina. That it is not authorized by

Mr. ROBERTS of Massachusetts. Mr. Chairman, I would like to be heard on the point of order. This is an appropriation bill that provides for the public instruction of children. seems to me that it is perfectly proper on this bill to provide for the wants of children who may be blind, deaf, or dumb, and as to how they shall be educated.

Mr. PAGE of North Carolina. If the Chair will permit me, I have called attention as to what classes of children under the law shall be appropriated for at public expense

The CHAIRMAN (Mr. SLAYDEN). The Chair is unable to find any law which provides for the instruction of these children at the public expense or that authorizes their education, and the Chair thinks the point of order is well taken.

Mr. ROBERTS of Massachusetts. Mr. Chairman, I offer another amendment, preceding the amendment now in the hands

of the Clerk, by the addition of the words:

Provided, That no portion of the money herein appropriated for public education shall be expended unless \$1,000, or so much as may be necessary, shall be expended for the education of blind children in the public schools.

Mr. PAGE of North Carolina. Mr. Chairman, I desire to submit that that is not a limitation, and I make the point of order against it

The CHAIRMAN. The gentleman from Massachusetts will

report his amendment in writing.

I make the point of order Mr. PAGE of North Carolina. against the amendment, that that does not make it in order, nor is it a limitation upon this appropriation, because it is in the face of express law, which is substantive law, and therefore is not in order.

Mr. ROBERTS of Massachusetts. Wherein does it change the

substantive law?

Mr. PAGE of North Carolina. It changes substantive law. in that the law now provides that only indigent blind children shall be appropriated for.

Mr. ROBERTS of Massachusetts. The law does not forbid the education of other children. There is no law forbidding

The CHAIRMAN. The gentleman from Massachusetts must submit his amendment in writing.

Mr. ROBERTS of Massachusetts. Mr. Chairman, I will ask the gentleman from North Carolina if he will pass this provision until I can write out the amendment?

Mr. PAGE of North Carolina. I have no objection to that. The CHAIRMAN. Without objection, the amendment offered will be passed for the present. The Clerk will read.

The Clerk read as follows:

METROPOLITAN POLICE,

Major and superintendent, \$4,000; assistant superintendent, with rank of inspector, \$2,500; 3 inspectors, at \$1,800 each; 11 capitalins, at \$1,500 each; chief clerk, who shall also be property clerk, \$2,000; clerk and stenographer, \$1,500; clerk, who shall be assistant property clerk, and stenographer, \$1,500; clerk, who shall be assistant property clerk, \$1,200; 3 clerks, at \$1,000 each; 4 surgeons of the police and fire departments, at \$720 each; additional compensation for 20 privates detailed for special service in the detection and prevention of crime, \$4,800, or so much thereof as may be necessary; 13 lieutenants, 1 of whom shall be harbor master, at \$1,320 each; 46 sergeants, 1 of whom may be detailed for duty in the harbor patrol, at \$1,250 each; 477 privates of class 3, at \$1,200 each; 107 privates of class 2, at \$1,080 each; 56 privates of class 1, at \$900 each; amount required to pay salaries of privates of class 2 who will be promoted to class 3 and privates of class 1 who will be promoted to class 2 during the fiscal year 1915, \$4,881.53; 6 telephone operators, at \$720 each; 14 janitors, at \$600 each; messengers—1 \$700, 1 \$600; inspector, mounted, \$240; 55 captains, lleutenants, sergeants, and privates, mounted on bleycles, at \$50 each; 64 lleutenants, sergeants, and privates, mounted on bleycles, at \$50 each; 18 drivers, at \$720 each; 3 police matrons, at \$600 each; to possess police power of arrest; in all, \$915, 201.53.

Mr. PAGE of North Carolina, Mr. Chairman, I offer an

Mr. PAGE of North Carolina. Mr. Chairman, I offer an amendment, which I send to the Clerk's desk and ask to have read. It is to correct the text of the bill.

The Clerk read as follows:

On page 47, line 15, strike out the sum "\$915,201.53" and insert in lieu thereof the sum "\$907,101.53."

The CHAIRMAN. The question is on agreeing to the amend-

Mr. MADDEN. Mr. Chairman, I would like to ask the gentleman from North Carolina if this law provides for any additional policemen?

Mr. PAGE of North Carolina. It does not.
Mr. MADDEN. Just the number that is provided for in the current appropriation law?

Mr. PAGE of North Carolina. I think exactly the number; and it is the allowance recommended by the commissioners.

The CHAIRMAN. The question is on agreeing to the amend-

ment offered by the gentleman from North Carolina.

The amendment was agreed to.

Mr. MONDELL. Mr. Chairman, before we passed the item relating to the public schools it was my purpose to make a few observations, but the item was passed rather unexpectedly to me, and I would like to make them now. This bill provides \$450,000 for the continuation of work on the Central High School building. The limit of cost for that building is \$1,200,000; \$300,000 was provided in the current law. My understanding is that the plans and specifications for that building are now prepared and that the commissioners are ready to advertise for bids, with a view of beginning construction work. In this condition of affairs an effort is being made, I am told-in fact, a bill has been introduced in the Senate-which provides for a division of the funds for this school so as to provide for two high schools instead of one-one on the ground on which the new Central High School is contemplated, and one in the eastern part of the District. I understand that recently the commissioners have been importuned to suspend operations, to take no action looking toward the beginning of construction or the letting of contracts, pending possible action by Congress on the proposition to modify the present plans for the Central High

Mr. SISSON. Mr. Chairman, will the gentleman yield?

Mr. MONDELL. Certainly.

Mr. SISSON I understood the gentleman to say that the commissioners had been importuned to stop the work on this high school?

Mr. MONDELL. They have been importuned or requested to suspend all action looking to the letting of the contracts and

e beginning of construction, Mr. SISSON. Does the gentleman know who made this re-

Mr. MONDELL. My understanding is-and I get my information entirely from the newspapers-that a certain Senator, who has introduced a bill to modify the plan for the new Central High School, with a view of reducing the sizes of the proposed buildings, had requested the commissioners in writing to suspend action on the present project. I simply rise to express the hope that the commissioners will not take any action which will in any way delay the construction of this building in accordance with the plans heretofore adopted under the present limit of cost as provided by Congress. This new Central High School is very badly needed, and the plan proposed is one that will give the city a high school of which all the citizens of the District may well be proud. If we attempt to cut down or reduce the plan at this time, it will result, in my opinion, in a school or schools entirely inadequate for the growing needs of

Mr. SISSON. Will the gentleman permit an interruption?

Mr. MONDELL. I will. Mr. SISSON. The gentleman, of course, does not concede that a Member of Congress or a Member of the Senate could

suspend the operation of law.

Mr. MONDELL. Well, inasmuch as the commissioners have been asked to suspend the operation of law I do not know but what it would be a good idea for some one somewhere to express the hope and expectation they would not do anything of the sort, and it is for that purpose that I am now on my

Mr. SISSON. But the gentleman is not assuming anybody has

the right to stop the operation of law.

Mr. MONDELL. I am not assuming anything of that sort; no. sir. Now. Mr. Chairman, just one other matter. missioners estimate for an addition to the Powell School, situated on the heights in Mount Pleasant, and I regret that the committee did not see fit to approve that suggestion and include that item in the bill. I think it is necessary. Adjacent to the Powell School and now utilized for school purposes is a very old and somewhat dilapidated two-story frame building. That building is, in my opinion, dangerous. One of my children is building is, in my opinion, dangerous. now attending school in that frame building, and I do not think it is entirely safe. I do not believe that we ought to keep the children of the District in an old frame building heated with stoves; the danger is altogether too great. The District owns a half block of ground adjacent to the Powell School. The addition is needed, and it is needed particularly in order that children may not be required to use this old and, I fear, not over-safe frame building, and therefore I regret that this addition was not provided for.

The CHAIRMAN (Mr. SLAYDEN). The time of the gentleman has expired, and the Clerk will read.

The Clerk read as follows:

Probation system: Probation officer, Supreme Court, \$2,000; stenographer and typewriter and assistant, \$800; police court—probation officer, \$1,500; assistant probation officer, \$1,200; contingent expenses, \$500; in all, \$6,000.

Mr. ROBERTS of Massachusetts. Mr. Chairman, I see the gentleman in charge of the bill has returned to his seat, and I am going to ask the gentleman if he will now recur back to page 46, line 12, to the matter of the education of the blind? have my amendment now prepared.

Mr. PAGE of North Carolina. We might just as well do so at

this time as any other.

Mr. ROBERTS of Massachusetts. Mr. Chairman, I offer the following amendment.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 46, line 12, after the word "necessary," insert the following: "Provided, That no part of the money appropriated by this act for public education shall be expended until provision shall be made for the education of blind children of teachable age in the District of Columbia."

Mr. PAGE of North Carolina. Mr. Chairman, I make the

point of order against that.

Mr. ROBERTS of Massachusetts. Mr. Chairman, on that point of order I would like the gentleman to indicate what the

point of order is.

Mr. PAGE of North Carolina, Mr. Chairman, the gentleman has sought, in the form of his amendment, to make it a limita-tion upon this appropriation. The point of order I make is that there is a specific provision of law now existing that provides only for the education of indigent blind children in the District of Columbia and that the gentleman's amendment is in violation of and is contrary to existing law. That is the point of order I make against this amendment.

Mr. ROBERTS of Massachusetts. Mr. Chairman, I agree with the gentleman that there is a specific law providing for the education of indigent blind children, but I want to call the attention of the gentleman to the fact that there is no law against the education in the public schools of blind children of wealthy parents-in other words, of blind children who are not paupers-and the law also provides that the indigent children shall be educated, not in the public schools but in an institution over in Maryland or in some other State. Now, I want to say, Mr. Chairman, there is a general law providing for the public education of all children in the District of Columbia, And I will say further to the Chair that if the money were available this current year the board of school commissioners would today be educating blind children in the public schools of the District of Columbia. My amendment simply provides that none of the money appropriated for the next fiscal year for public education shall be expended until provision has been made for education of blind children-not indigent blind children, but blind children.

It seems to me that is clearly a limitation on the bill, because it is directing how the education shall be conducted and what classes of children shall receive education. It limits the power of the executive authorities to expend this money unless they expend whatever is necessary for the education of blind chil-dren—not indigent blind, but blind. It is really for all children

in the District.

Now, under the organic law there is nothing to prevent the school authorities in this District from educating the deaf, dumb, and blind in the public schools at public expense if they see fit. The only thing that has prevented it heretofore has been the lack of interest or the lack of money, or both. But to-day those conditions have changed, and I maintain, Chairman, that under the law as it stands to-day the board of education have power, if they see fit, to educate not only the deaf and dumb but also the blind, with all other children of the District, in the public schools. This is a limitation which compels them to educate the blind if they spend any of the money at all for public education which we are appropriating.

Mr. SISSON. Mr. Chairman, does the Chair desire to hear further? I do not care to be heard unless the Chair is in

doubt.

The CHAIRMAN. I want to ask the chairman of the com-

mittee with reference to the existing law, or the gentleman from Mississippi [Mr. Sisson], if he will answer the question.

Mr. SISSON. Mr. Chairman, the existing law makes provision for certain classes of children, and if the Chair will look at the Revised Statutes of the United States, page 942, section 4869, he will find that the classes are segregated.

The CHAIRMAN. I would like to have the gentleman from

Mississippi state the law.

Mr. SISSON. Here is the law with reference to blind children. The gentleman from Massachusetts [Mr. Roberts] is seeking to do indirectly what he can not do directly, and seeking indirectly to repeal this section. This section provides:

Whenever the Secretary of the Interior is satisfied, by evidence produced by the president of the Columbia Institution for the Instruc-

tion of the Deaf and Dumb, that any blind person of teachable age can not command the means—

There is an institution provided in the organic act.

Mr. ROBERTS of Massachusetts. This is for the blind. Mr. SISSON. The gentleman is just a little hasty about it, because this affects the blind only. This section simply vests with the president of the institution the authority to do what he is instructed to do. The language proceeds—

to secure an education he may cause such person to be instructed in some institution for the education of the blind in Maryland or some other State at a cost not greater for each pupil than is or may be for the time being paid by such State, and to cause the same to be paid out of the Treasury of the United States.

Now, there is a specific direction in reference to dealing with blind children; in reference to dealing with indigent blind The gentleman's amendment seeks to put the blind children in a different class and seeks to repeal with a proviso a substantive act in reference to blind children. The law does not now so provide. There is absolutely no provision for the employment of means or the appropriation of money for teaching blind children whose parents are able to teach them. The only provision of law is that in reference to the indigent blind, and this provision is the provision of law whereby in the District of Columbia the blind children are cared for. That is the only provision of law. The gentleman can not put a charge upon this bill unless he shows a specific act authorizing the expenditure, because it is not limiting the present expenditure of money. He is endeavoring to add additional expense. He is endeavoring to change existing law under the guise of a limitation and place a different law upon the statute books by his proviso.

Mr. ROBERTS of Massachusetts. Mr. Chairman, just a word or two in reply. The gentleman from Mississippi [Mr. Sisson] states that my amendment increases the expense. man will just read the amendment, he will see that it does not increase the expense at all. I do not ask for any specific appropriation, not even one penny. I say that none of the money appropriated for education shall be expended unless provision is made for educating the blind out of that appropriation; not

an additional appropriation.

Mr. SISSON. If the gentleman will permit-

Mr. ROBERTS of Massachusetts. Just a moment. The gentleman cites the law that covers this case. I want to call the attention of the Chair to the fact that that law applies only to one class of blind-the indigent blind. It has no bearing whatever upon the blind who have means or whose parents have means. My provision applies to the blind who have means or whose parents have means, and there is no law which prohibits the public education of any class of people unless they are feeble-minded or indigent. My provision reaches a class of people who are not feeble-minded and not indigent.

The CHAIRMAN. Will the gentleman from Massachusetts

indulge the Chair for a question?

Mr. ROBERTS of Massachusetts. Yes.

The CHAIRMAN. If the gentleman's amendment should be adopted, would the effect of it be to deny to the indigent blind children of the District of Columbia the advantage which this bill proposes to give them until an institution for the education of the blind of teachable age had been established in the Dis-

trict of Columbia?

Mr. ROBERTS of Massachusetts. Oh, no. My amendment does not interfere at all with the continued education of indi-gent blind over in Maryland. That can go on if the parents of the indigent blind prefer to declare themselves paupers in order to get the advantage, if they deem it such, of an education in an institution in Maryland. That goes on just the same, provided Congress will appropriate the money from year to year to pay the expense of it. That is up to Congress to say whether they will appropriate money for the education of indigent blind outside of the District when the wealthy blind are being educated at public expense in the public schools of the District of Columbia. It is only a matter of inference what will happen to the indigent blind hereafter. You can reason that if the provision is made for the education of the blind in the public schools there will be no indigent blind to go outside of the District for an education; but it will not follow by any means, because, as is well known, there are indigent children not afflicted with blindness whose parents can not afford to send them to the public schools, and it might happen that if blind children were educated in the public schools there would be cases of parents not being able to support their blind children in the public schools and they would want the advantage of this act for the education of indigent blind at the institution over in Maryland.

The CHAIRMAN. The Chair is ready to rule. It seems to

gentleman from Massachusetts [Mr. Roberts] is in the form of a limitation, in effect it will be a change of the existing law; and while the Chair is not familiar with the statute read by the gentleman from Mississippi [Mr. Sisson], the gentleman's reading of it went unchallenged, and the Chair assumes it to be entirely correct. The Chair is forced to the conclusion that the amendment is not in order. The point of order is sustained. The Clerk will read.

The Clerk read as follows:

Police court: Two judges, at \$3,600 each; clerk, \$2,200; deputy clerks—1, \$1,600, 1, \$1,500, 2 at \$1,200 each, 1, who shall be a stenographer and typewriter, \$900; deputy financial clerk, \$1,500; 7 balliffs, at \$900 each; deputy marshal, \$1,000; janitor, \$600; engineer, \$900; assistant engineer, \$720; fireman, \$480; 2 assistant janitors, at \$300 each; matron, \$600; 3 charmen, at \$360 each; telephone operator, \$480; in all, \$30,060.

Mr. HINEBAUGH. Mr. Chairman, I offer an amendment. The CHAIRMAN. The gentleman from Illinois offers an amendment, which the Clerk will report.

The Clerk read as follows:

Page 57, line 11, after the word "court," strike out the words "2 judges, at \$3,000 each," and insert in lieu thereof the words "3 judges, at \$3,000 each."

Mr. PAGE of North Carolina. Mr. Chairman, I reserve a point of order against that amendment.

Mr. HINEBAUGH. Does the gentleman from North Carolina want four judges? I offer this amendment very largely because of the facts that appeared at the hearing on this subject. The commissioner testified:

commissioner testified:

I might say that the condition at that police court has got to receive the serious attention of the Congress very soon. The crowded condition of affairs is really startling, so much so that it refects itself in all the various branches of the work there. You will find there an overburdened and an overworked court, with its attendants and clerical force. I have been down there very recently, and I do not see how the cases are disposed of in anything like an effective manner. They are so crowded there that it is impossible for the assistant corporation counsel to know the facts in but a small fractional part of the cases, and, indeed, they are tried without his presence in the court room there, From start to finish the situation is, in my humble opinion, quite lamentable.

Mr. Chairman, it ought not to be necessary for me to say to the majority members of this committee that I have been thoroughly in accord with their program of economy, and they have found me practically all along the line agreeing with them on that proposition; but I do believe that there are instances where so-called economy is not economy, and I believe this is one of them. The testimony clearly shows that the conditions in the police court of the District of Columbia are, as the commissioner says, indeed lamentable. If it is a fact, as he says, that there are so many cases that the corporation counsel is not even able to be present when they are being heard, surely the courts are unable to give them the attention that they deserve. In this amendment I suggest an additional judge, and reduce the salaries from \$3,600 to \$3,000, which would make an additional judge at an additional expense, so far as salary is concerned, of only \$1,400.

Mr. MADDEN. I should like to ask the gentleman, if the corporation counsel is charged with the prosecution of these cases, and is unable to appear in the cases tried by two judges,

how would it be if there were three judges?

Mr. HINEBAUGH. I will answer that by saying he probably would have an assistant who would help him, if necessary. I only point to that as an indication showing the crowded condition of the docket, and the large number of cases.

Mr. MADDEN. Is the corporation counsel the prosecuting officer in these police courts?

Mr. HINEBAUGH. I think he is supposed to perform that

Mr. MADDEN. I supposed that he furnished the necessary legal information to the officials of the District, but did not go into the police courts as a prosecutor.

Mr. HINEBAUGH. That may be true.

The CHAIRMAN. The Chair supposes that the conversation between the two gentlemen from Illinois has no bearing on this amendment.

Mr. MADDEN. It has.

The CHAIRMAN. It was not spoken so that anyone at the desk could hear it.

Mr. HINEBAUGH. As I stated, Mr. Chairman, this amendment will add an additional judge and will relieve the situation at the courts. It will also do this: I am reliably informed that under the present conditions the dockets are so crowded that offenders who are brought before the police magisthese petty trates require the attendance of police officers, and it frequently happens that half a dozen policemen are sitting around the court room nearly all day waiting until these trivial cases can be disposed of. If we had an additional judge, an additional the Chair very clear that while the amendment offered by the court, so that these cases could be disposed of as they should be,

it would relieve a large number of policemen who are now sitting around two police courts waiting for cases to be dis-

Mr. PAGE of North Carolina. Mr. Chairman, speaking to the merits of the amendment, and not to the point of order which I have reserved, I desire to say that there was no estimate made to the committee for an increase of the judges of this court. There was no representation made in the hearings which would indicate that there was any great congestion in the courts.

I also want to make an observation that the creation of another judge would not only call for an increase in the aggregate of salaries paid to the judges of the police court, but it would also call for an immediate appropriation for enlarged court facilities. There would have to be a court room provided for the new judge asked for in the amendment, which has not been estimated for, and no intimation has been given that it was urgent or necessary.

Mr. MADDEN. You would also have to provide him with a

clerk, would you not?

Mr. PAGE of North Carolina. Yes; and other additional court officers, of course, in proportion to the number of judges who would hold the police court. Now, I have said so much in regard to the merits of the amendment offered by the gentleman from Illinois, but in order that we may save time, and wishing to be courteous to the gentleman from Illinois, who as a member of the subcommittee has given his time and attention and has been of very material service to the whole committee in the formation of this bill along the lines of economy, with the utmost courtesy to the gentleman, I must make the point of

The CHAIRMAN. The point of order is sustained, and the

Clerk will read.

The Clerk read as follows:

For material and labor for piping, conduit work, and extension of central heating plant, \$4,500.

Mr. MONDELL. Mr. Chairman, I offer the following amendment, after line 23, page 63.

The Clerk read as follows:

Line 23, page 63, insert the following:

"For the preparation of plans and specifications, necessary grading of site, and toward the erection of hospital buildings, including power house and domestic service building, to be located and erected on the site new owned by the District of Columbia at Fourteenth and Upshur Streets, with authority to contract for the completion of said buildings at a total cost not to exceed \$300,000, \$60,000."

Mr. PAGE of North Carolina. Mr. Chairman, to that I reserve

a point of order.

Mr. MONDELL. Mr. Chairman, I present this amendment, which I admit is subject to a point of order, simply to call attention to the importance of the project which it contemplates. In the Book of Estimates this statement is made in regard to

It is extremely important that work on the proposed hospital building should be commenced at once. The old frame buildings now used for hospital purposes at the Washington Asylum and Jail are utterly unfit for hospital uses and the patients now there can not be provided for until new buildings are erected.

That is an official declaration outlining and suggesting a situation that the committee having jurisdiction over the affairs of the District of Columbia should take cognizance of. I realize that it is not the province of the Committee on Appropriations to provide for this new construction, but there is a committee of this House whose duty it is to examine into these matters and inquire into the needs of the District.

It is a fact that at this time, if this bill passes with appro-

priations as recommended by the committee, there will remain in the District treasury after the District has paid its half of the appropriation the sum of \$1,500,000, approximately, all of which could be used for the purpose of providing these necessory additions to the facilities for the care and benefit of the people of this Capital City. We are officially informed by men people of this Capital City. We are officially informed by men charged with the responsibility in regard to the District of the necessity for the immediate construction of this hospital, and I venture to express the hope that the District Committee will at no distant date take up this matter, examine it carefully, and, if in their judgment a hospital is as necessary and urgent as the commissioners believe, that they may present to us legislation under which it may be provided for.

Mr. PAGE of North Carolina. Mr. Chairman, I make the

point of order.

The CHAIRMAN. The point of order is sustained.

The Clerk read as follows:

Transportation of prisoners: For conveying prisoners to Washington Asylum and Jall, including salary of driver, not to exceed \$720, and purchase and maintenance of necessary horses, wagons, and harness,

Mr. COX. Mr. Chairman, I move to strike out the last word for the purpose of getting some information. I desire to ask

some member of the committee what it costs or what is allowed the keepers of the jail here in the District for the boarding of prisoners per day? That is an issue out in my State at the present time, and I want to get some information upon it.

Mr. PAGE of North Carolina. The Government feeds them. The jailer does not get any specific appropriation for the amount

of their board.

Mr. COX. In Indiana we have a statute which gives to the sheriffs of the various counties 40 cents a day for the boarding of each prisoner. He gets that 40 cents a day whether he actually feeds the prisoner 40 cents' worth of food or not. What I want to find out is whether a similar condition exists in the District of Columbia?

Mr. PAGE of North Carolina. It does not, and I am sorry to hear that it still exists even in some of the counties of the

gentleman's district.

Mr. COX. Not only in some of the counties, but all over the State of Indiana.

Mr. PAGE of North Carolina. That system does not exist in the District of Columbia, and I agree with the gentleman that it is a bad system.

Mr. COX. What plan is in force here now providing for the boarding of these prisoners?

Mr. PAGE of North Carolina. There is an appropriation of \$35,000. The amount is based on the cost in the past of the supplies for the number of prisoners kept in the jail.

Mr. COX. Then do I understand this to be the rule-that the keeper of the jail is paid whatever he is required to expend for the boarding of the prisoners, whether it amounts to 40 cents a day or not?

Mr. PAGE of North Carolina. Oh, yes; that is true. He has this appropriation of \$35,000, and he provides out of that for the board of the prisoners in the jail under his charge.

Mr. COX. Then he is not allowed so much per day per

prisoner?

Mr. PAGE of North Carolina. No.

Mr. SISSON. My recollection is that the statement is made in the hearings that it costs about 30 cents and odd a day per prisoner

The Clerk read as follows:

In all, for Tuberculosis Hospital, \$56,000.

Mr. MONDELL. Mr. Chairman, I offer the following amendment, which I send to the desk and ask to have read.

The Clerk read as follows:

After line 10, page 68, insert as a separate paragraph the following: "Hospital for inebriates: For a hospital for inebriates, \$75,000."

Mr. PAGE of North Carolina. Mr. Chairman, I make the point of order against the amendment.

Mr. MONDELL. Will the gentleman reserve it?

Mr. PAGE of North Carolina. I reserve the point of order. Mr. MONDELL. Mr. Chairman, I do not desire to take up the time of the committee, but I simply wish to call attention to the fact that this is one of the many items that were approved by the Commissioners of the District, one of several new projects which they approved which the Committee on Appropriations could not provide for, but which another committee has jurisdiction to make provision for. In the Book of Estimates we have this statement:

At present the District of Columbia has no facilities for treating inchriates properly. An inchriate is treated as a criminal and inchriation is treated as a crime. The modern theory is that inchriation is a disease for which the victim should be treated in a hospital and not in a jail. It is to meet this theory and the existing demand for such an institution that the recommendation for this appropriation is made. It is recommended that the hospital be located on property already owned by the District, where the Tuberculosis Hospital is located, and where it is proposed to build a municipal hospital.

A numicipal hospital was recommended by the Commissioners of the District and this hospital for inebriates is recommended by the Commissioners of the District. Many other recommendations are made by the commissioners which the Committee on Appropriations can not approve or provide for simply because that committee has no jurisdiction over new projects. I again express the hope that the committee that has jurisdiction over these matters may find time, in connection with its other activities relative to the District, its criticism of the District, its attempts to load burdens upon the District, to take some constructive action looking to providing for these needs of the District and its people. The District has the money with which to build these needed hospitals. One million and a half dollars will remain of their revenues after they have paid half of all of the appropriations provided in this bill, and yet these needed facilities can not be provided because the committee charged under the law with caring for and having jurisdiction over these matters has not had the time or the

disposition, whichever it may be, to investigate these matters and pass upon them favorably.

Mr. PAGE of North Carolina. Mr. Chairman, I make the point of order.

The CHAIRMAN. The Chair sustains the point of order, and the Clerk will read.

The Clerk read as follows:

In all, for Industrial Home School for Colored Children, \$18,490: Provided, That all moneys received at said school as income from sale of products and from payment of board, of instruction, or otherwise, shall be paid over to the commissioners to be expended by them in the support of the school during the fiscal year 1915.

Mr. JOHNSON of Kentucky. Mr. Chairman, I reserve a point of order on the proviso in that paragraph, and, pending that, I would like to ask the gentleman from North Carolina [Mr. Page] if that does not leave practically unlimited the appropriation which may go for this industrial home? In other words, \$18,490 is appropriated for it and a great deal of that money will be used for the purchase of lumber and various other stuffs which when manufactured might be worth a great deal of money, and if it is sold and then put to the use of the institution it would increase the appropriation to what extent I do not know, and I would be glad to have the information as

to what extent it might increase it.

Mr. PAGE of North Carolina. Mr. Chairman, I will say to
the gentleman in that connection that this proviso is out of line with the policy pursued generally by this committee in the framing of this bill, but there was very great importunity upon the subcommittee that this proviso be put in. The income from the products of the colored school for 1912 was \$3,394.26; in 1913 it was \$290.08. The products are nearly all consumed on the place and only the surplus is sold. That is the record as shown in the past of that which was sold and the receipts from it that

could be under this proviso.

Mr. JOHNSON of Kentucky. Am I correct in the conclusion this is law only for the current year?

Mr. PAGE of North Carolina. Yes; that is right; this is

law only for the current year.

Mr. JOHNSON of Kentucky. I withdraw the point of order. The CHAIRMAN (Mr. HULL). The point of order is withdrawn, and the Clerk will read.

The Clerk read as follows:

TEMPORARY HOMES.

Municipal lodging house and wood and stone yard: Superintendent, who shall also act as foreman, \$1,200; cook, \$360; night watchman for six months, at \$25 per month, \$150; maintenance, \$1,820; in all, \$3,530.

Mr. MONDELL. Mr. Chairman, I offer an amendment to follow the paragraph just read as a new paragraph.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amend, page 71, after line 15, by inserting a new paragraph, as "Municipal lodging house: For a new municipal lodging house, to be erected on the site of the present municipal lodging house, \$50,000."

Mr. PAGE of North Carolina. Mr. Chairman, I reserve a

point of order against the amendment.

Mr. MONDELL. Mr. Chairman, this amendment is subject to a point of order, and I thank the gentleman for reserving rather than making the point of order. I will not take up the time of the committee, but will simply say I have offered this as another illustration of a new and needed project in the District, one that has been repeatedly recommended and one which the committee having jurisdiction of these matters should consider. The Committee on Appropriations can not make provision for this new municipal lodging house. The Commissioners of the District insist that it is badly needed. ent municipal lodging house is an old building, has to be constantly repaired, is too small, is very greatly crowded; a new building is needed. I desire again to call attention to the fact that the people of the District of Columbia have abundant funds, after paying half of all the appropriations proposed by this bill, to provide for this and for other needed projects to which I have referred. All the large municipalities of the country have municipal lodging houses. It is a disgrace to the Capital City of the Nation that the only municipal lodging house we have is an old, inadequate structure, entirely too small for the needs of the District. A new lodging house is needed, and it should be provided for by the committee having jurisdiction over such matters.

Mr. PAGE of North Carolina. Mr. Chairman, I make the

point of order.

The CHAIRMAN. The point of order is sustained, and the Clerk will read.

The Clerk read as follows:

For pay of troops, other than Government employees, to be disbursed under the authority and direction of the commanding general, \$24,000.

Mr. JOHNSON of Kentucky. Mr. Chairman, I make the point of order on so much as is contained in lines 5, 6, and 7 on page 76, providing for the payment of troops. There is no authorization for it, and I therefore make the point of order against it. I will say to the Chair that the law can be found in volume 25,

Mr. PAGE of North Carolina. Mr. Chairman, without having looked up the law as to the authorization of this item, I recall distinctly that this point of order was made in the current appropriation bill a year ago and that the point of order was

Mr. JOHNSON of Kentucky. Oh, no.

Mr. PAGE of North Carolina. Was the point of order sus-

Mr. JOHNSON of Kentucky. I will say to the gentleman the point of order was made and sustained, and it went over to the Senate, and the Senate readjusted it, and in that way it found its way into the current law.

Mr. PAGE of North Carolina. I have not before me any information and I would ask that the matter be passed over for the moment and we will revert to it. I ask unanimous consent

that the item may be passed for the present.

The CHAIRMAN. Without objection, the item will be passed

over for the present.

There was no objection. The Clerk read as follows:

REFUND OF ERRONEOUS COLLECTIONS.

To enable the commissioners, in any case where special assessments, school tuition charges, rents, or fees of any character have been erroneously covered into the Treasury to the credit of the United States and the District of Columbia in equal parts, to refund such erroneous payments, wholly or in part, including the refunding of fees paid for building permits authorized by the District appropriation act approved March 2, 1911, 81,000, or so much thereof as may be necessary: Provided, That this appropriation shall be available for such refunds of payments made within three years.

Mr. PAGE of North Carolina. Mr. Chairman, I desire to offer a committee amendment. In line 19, after the word "within," insert the words "the past," so as to make it read, "within the past three years."

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amend, page 76, line 19, by adding, after the word "within," the words "the past."

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was agreed to.

The CHAIRMAN. The Clerk will read. The Clerk read as follows:

The Clerk read as follows:

Sec. 4. That the services of assistant engineers, draftsmen, levelers, rodmen, chainmen, and inspectors temporarily required in connection with water-department work authorized by appropriations may be employed exclusively to carry into effect said appropriations, and be paid therefrom, when specifically and in writing ordered by the commissioners, and the commissioners in their annual estimates shall report the number of such employees performing such services and their work and the sums paid to each: Provided, That the expenditures hereunder shall not exceed \$13,200 during the fiscal year 1915.

The commissioners are further authorized to employ temporarily such laborers, skilled laborers, and mechanics as may be required in connection with water-department work, and to neur all necessary engineering and other expenses, exclusive of personal services, includental to carrying on such work and necessary for the proper execution thereof, said laborers, skilled laborers, and mechanics to be employed to perform such work as may not be required by existing law to be done under contract, and to pay for such services and expenses from the appropriation under which such services are rendered and expenses incurred.

Mr. MADDEN. Mr. Chairman, I would like to ask the gen-

Mr. MADDEN. Mr. Chairman, I would like to ask the gentleman from North Carolina if he can tell the House how much revenue is derived from the water department of the District?

Mr. PAGE of North Carolina. I think I can. The report

contains the statement that the estimated revenues for 1915 will amount to \$749,000.

Mr. MADDEN. Do they not give the actual revenue?

Mr. PAGE of North Carolina. No; they do not.

Mr. MADDEN. They ought to give the revenue for the last fiscal year, ought they not?

Mr. PAGE of North Carolina. I think we have those figures and will give them to the gentleman. That information is included in the report of the commissioners to Congress

Mr. MADDEN. Is the committee able to state whether all the revenues from the water department are used by the commissioners in the extension and maintenance of the water system?

Mr. PAGE of North Carolina. Practically all the water rev enues are used in the extension and maintenance of the water system in the city, and while there is possibly a small balance left over each year, the great bulk of those revenues are expended for the purpose of the improvement of the water system.

Mr. MADDEN. Does the committee know anything about what the charges are for the use of water to the consuming

public-what the rates are?

Mr. PAGE of North Carolina. Yes. That is stated in the hearings. The rates are lower than in possibly any other city in the United States. To the ordinary householder the charge is \$4 or \$4.50 a year, without regard to the amount consumed; and then there is a price to manufacturers, which is an exceedingly low price-lower than in any other city that your committee compared the city of Washington with.

Mr. MADDEN. The thought I had in mind was that perhaps the committee might find a way by which they could reduce the water-rate charges to the consuming public by the utiliza-

tion of surplus funds.

Mr. PAGE of North Carolina. In the preparation of this bill I think the committee and previous committees in looking over the revenues from the water department have felt that the system was not yet so thoroughly perfected as to warrant a recommendation for a reduction of rates. The committee thought it was wiser to expend the water revenues in the expansion of the system rather in the reduction of the rates, because the water rates here are already cheaper than those of

any other city with which we could compare them.

Mr. SISSON. If the gentleman will permit me, I may say that Col. Harding, in answering a question propounded by me, said that for an expenditure of \$4.50 each family gets 56,100 gallons, whereupon the gentleman from Illinois [Mr. HINE-DAUGH] remarked that that was an amount that would hardly ever be consumed by an ordinary family, and Col. Harding answered "Yes." The matter was thoroughly gone into by the

committee.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

The Clerk read as follows:

SEC. 5. That the commissioners are authorized to employ in the execution of work the cost of which is payable from the appropriation account created in the District appropriation act for the fiscal year 1905, approved April 27, 1904, and known as the "Miscellaneous trustfund deposits, District of Columbia" all necessary inspectors, overseers, foremen, sewer tappers, skilled laborers, mechanics, laborers, special policemen stationed at street railway crossings, one inspector of gas litting, two janitors for laboratories of the Washington and Georgetown Gas Light Cos., market master, assistant market master, watchman, horses, carts, and wagons, and to incur all necessary expenses incidental to carrying on such work and necessary for the proper execution thereof, such services and expenses to be paid from said appropriation account.

Mr. STALEGORD, Mr. Chairman, I reserve a point of order

Mr. STAFFORD. Mr. Chairman, I reserve a point of order

against the paragraph.

The CHAIRMAN. The gentleman from Wisconsin [Mr. Stafford] reserves a point of order against the paragraph.

Mr. PAGE of North Carolina. Against which paragraph does

the gentleman reserve a point of order?

Mr. STAFFORD. Section 5, page 83. This appears to be of an omnibus character, and I assume that it is new legislation. I think it would not be amiss to have the chairman make some explanation of the purpose of this omnibus clause.

Mr. PAGE of North Carolina. I would say to the gentleman that while it is unquestionably legislation, it is not new legislation. This identical language has been carried in the bill for several years prior to this time, and was not inserted at this time by this committee.

Mr. STAFFORD. I attempted to locate it in last year's appropriation act, but I could not find it, and I assumed that it

was new legislation.

Mr. PAGE of North Carolina. No; the gentleman's assump-

tion is not correct.

Mr. STAFFORD. Will the gentleman inform the committee what is the purpose of this provision, which requires it to be carried each year in the appropriation bill? If it is necessary, and it is carried in the bill each year, why would it not be better to have it incorporated into permanent law, rather than carry it each year in this temporary form?

Mr. PAGE of North Carolina. Conceding that it belongs here, and that it ought to become permanent law, I beg to remind the gentleman that the committee bringing in this bill has not the authority conferred upon it by the rules of the House to make permanent law in regard to matters in the District of Columbia.

Mr. STAFFORD. In some urgent cases the committee has seen fit to make exceptions, and this might be a case of that kind. Will the gentleman kindly explain why it should be permanent law and the purpose of it? I read the provision

permanent law and the purpose of 11? I read the provision rather carefully and was not able to obtain, from reading it, any good idea of the scope of it.

Mr. PAGE of North Carolina. This is a trust fund, as I understand it, that is deposited by householders and others against whom a charge is assessed when there is a cut of these gas mains and other things. In addition to that, when gas is turned on in a house the householder is required to make a

deposit with the gas company. That is refunded under certain conditions after his occupancy of the house ceases, after the turning off of the gas.

Mr. STAFFORD. I understand that the purpose of this provision is to reimburse the United States for expenditures that it may have made for the benefit of some private individual or corporation. I notice here a provision as to special policemen stationed at street railway crossings.

Mr. PAGE of North Carolina. Yes; that is one of the purposes and one of the things that the paragraph does.

Mr. STAFFORD. It is merely a matter of accounting, then? Mr. PAGE of North Carolina. It is a matter of accounting,

largely.

Mr. STAFFORD. Would it meet with the favor of the committee, if the chairman believes it ought to be permanent law, to have some one offer an amendment making it permanent law providing that hereafter the commissioners are authorized, and so forth?

Mr. PAGE of North Carolina. No; it would not be-

Mr. STAFFORD. I do not wish to do anything against the desire of the committee.

Mr. PAGE of North Carolina. That would not be acceptable to the committee, for the reason that without more consideration as to the necessity for its permanency the committee do not think it well to make it permanent. It is simply the desire of the committee to carry it as it has been carried, at least for the present.

Mr. STAFFORD. Mr. Chairman, having received sufficient enlightenment from the distinguished chairman of the committee as to the purpose of this section, I withdraw the point of order.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

SEC. 9. That all laws and parts of laws to the extent that they are inconsistent with this act are repealed.

Mr. JOHNSON of Kentucky. Mr. Chairman, I make a point

of order against that paragraph.

Mr. PAGE of North Carolina. Why does the gentleman make

the point of order?

the point of order?

Mr. JOHNSON of Kentucky. Because it is legislation.

Mr. PAGE of North Carolina. I concede the point of order.

The CHAIRMAN. The point of order is sustained.

Mr. PAGE of North Carolina. Mr. Chairman, reverting to the question that we passed over, in regard to the militia, I concede the point of order raised by the gentleman from Kentucky.

The CHAIRMAN. The Chair sustains the point of order as to the paragraph on page 76, beginning with line 5.

Mr. PAGE of North Carolina. Mr. Chairman, I move that the committee do now rise and report the bill to the House with the amendments, with the recommendation that the amendthe amendments, with the recommendation that the amendments be agreed to, and that the bill as amended do pass.

The motion was agreed to.

The committee accordingly rose; and the Speaker having resumed the chair, Mr. Hull, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill (H. R. 10523) making appropriations to provide for the expenses of the government of the District of Columbia for the fiscal year ending June 30, 1915, and for other purposes, and had directed him to report the same back to the House with sundry amendments, with the recommendation that the amendments be agreed to and that the bill as amended do pass.

The SPEAKER. Is a separate vote demanded on any amend-

ment? If not, the Chair will put the amendments in gross.

The amendments were agreed to.

The bill as amended was ordered to be engrossed and read a third time, and was accordingly read the third time.

The SPEAKER. The question is on the passage of the bill. Mr. WINGO. Mr. Speaker, I demand a division.

Mr. WINGO. Mr. Speaker, I demand a division.

The House divided; and there were—ayes 48, noes 5.

Mr. WINGO. Mr. Speaker, I make the point of no quorum.

The SPEAKER. The gentleman from Arkansas makes the point of no quorum. The Chair will count. [After counting.] Eighty-seven Members, not a quorum. The Doorkeeper will Eighty-seven Members, not a quorum. The Doorkeeper will lock the doors, the Sergeant at Arms will notify absentees, and the Clerk will call the roll.

The question was taken; and there were—yeas 236, nays 36, answered "present" 7, not voting 154, as follows:

Mr. WALKER with Mr. LAFFERTY.
Mr. BROWNING, Mr. Speaker, I voted "aye," but I am paired with the gentleman from New Jersey, Mr. Scully, and I withdraw that vote and answer "present."

Mr. HINDS. Mr. Speaker, I wish to withdraw my vote of "yea" and answer "present," because I am paired with the

yea and answer present, because I am parred with the gentleman from Georgia, Mr. Crisp.

Mr. NEELEY of Kansas. Mr. Speaker, a moment ago, on the second call of the roll, I thought I heard my name and answered. It turns out that I voted for some one of the Browns. I later voted when my name was called.

The SPEAKER. Which one of the Browns did the gentleman vote for?

Mr. NEELEY of Kansas. I do not know,

Mr. UNDERWOOD. Mr. Speaker, I voted "aye," but I have a standing pair with the gentleman from Illinois, Mr. Mann. who is absent on account of sickness. I therefore desire to withdraw my vote and answer "present."

The SPEAKER. On this vote the yeas are 236, the nays are 36, present 7. A quorum is present, the bill is passed, and the Doorkeeper will open the doors.

On motion of Mr. Page of North Carolina, a motion to reconsider the vote whereby the bill was passed was laid on the

OPIUM BILLS.

Mr. UNDERWOOD. Mr. Speaker, I ask unanimous consent to take up two bills on the Speaker's table with Senate amend-They are known as the opium bills.

The SPEAKER. The gentleman from Alabama asks unanimous consent to take from the Speaker's table the bill (H. R. 1967) regulating the manufacture of smoking opium in the United States, and for other purposes, with Senate amendments thereto. Is there objection? [After a pause.] The Chair hears none

Mr. STAFFORD. Mr. Speaker, let us have the bill reported.

Mr. UNDERWOOD. Mr. Speaker, I do not think that it requires unanimous consent. I move that the House concur in the Senate amendments.

The Senate amendments were read.

Mr. UNDERWOOD. Mr. Speaker, I will say to the House that the first amendment increases the penalty from \$200 to \$300, and the second amendment of the Senate broadens the definition of smoking opium so that it covers a larger field. I think that is all.

Mr. COOPER. Mr. Speaker, what is the provision with re-

gard to imprisonment? Is it in the alternative?

Mr. UNDERWOOD. I do not remember the original bill sufficiently well to recall that fact at this time.

Mr. COOPER. A mere increase in the fine of \$100 per pound

Mr. COOPER. A mere increase in the one of \$100 per pound will not amount to anything as a preventive.

Mr. UNDERWOOD. I will state to the gentleman that all we are dealing with are the Senate amendments. The Senate increases the amount from \$200 to \$300 a pound.

Mr. COOPER. That will do nothing, in my judgment. Mr. MURDOCK. This is a House bill.

Mr. UNDERWOOD. This is a House bill with Senate amendments, and the only question is whether we will agree to the Senate amendments

Mr. COOPER. Is there not some one here who can tell what

the House bill did provide?

Mr. UNDERWOOD. I have the bill before me. I will state that the gentleman from New York, Mr. Harrison, had these bills in charge before he became governor of the Philippine

Islands. The paragraph reads as follows:

That an internal-revenue tax of \$200 per pound shall be levied and collected upon all opium manufactured in the United States for smoking

I was mistaken when I said that this was a penalty. As a matter of fact, it is a tax. In other words, this bill as written

taxes the sale of opium very highly.

Mr. PAYNE. The tax makes a very severe penalty, makes it

Mr. UNDERWOOD. Yes; that is it.

Mr. COOPER. But it legalizes it and recognizes it as a legitimate industry and puts that price of \$200 a pound upon it.

Mr. UNDERWOOD. Mr. Speaker, I do not think the gentleman from Wisconsin grasps the purpose of the bill. This is a bill to levy a tax. It is one of a series of bills that have been agreed to by an international conference of many of the leading nations of the world. This bill is being enacted to carry out that agreement. This proposition is to levy a tax. There is a tax on opium to-day, a very small one, comparatively. This bill is written to make a very high tax, to prevent the manufacture or sale of opium. In other words, it is putting the tax so high that it is practically prohibitive.

Mr. PAYNE. Mr. Speaker, if the gentleman from Alabama

will permit, I will state that the Committee on Ways and Means considered the proposition and came to the conclusion that they could not prohibit the manufacture of smoking opium; that they had no power to do that. Hence they came as near prohibiting it as they possibly could, by putting on a prohibitory tax. The Senate has increased the amount of that tax.

Mr. COOPER. Mr. Speaker, the reason I have asked these questions is because within the last few days I have received a communication from members of a society interested in the suppression of the traffic in habit-forming drugs, in which communication the statement is specifically made, without qualification, that to-day we have no effective statutes upon that subject, but that there are constantly being imported, in total disregard of the spirit of the law but not, possibly, of the letter, quantities of drugs of that kind, and that these are being used everywhere and sold everywhere, to the great injury of the health of

Mr. UNDERWOOD. Mr. Speaker, I will say to the gentleman that the purpose in passing this bill is to carry out that very idea and to protect the people against the use of these

habit-forming drugs.

Mr. COOPER. An increase of \$100 a pound will not stop

anyone who manufactures opium for smoking.

Mr. UNDERWOOD. That is the increase over the House bill. Mr. COOPER. I voted against this bill, if it is the Harrison bill, because I thought at that time it was full of loopholes and pointed out two or three. That bill ought not to have passed the House of Representatives—the bill which Mr. Harrison of New York fathered in this House.

Mr. UNDERWOOD. I misunderstood the gentleman's posi-I thought he was in favor of this class of legislation.

Mr. COOPER. I am in favor of legislation which is prohibitive, but I am not in favor of an act which pretends to prohibit but which does not. I recall the provisions of the bill very well, if it is the original Harrison bill, which went through

this House months ago—way back, I should say, in May.
Mr. UNDERWOOD. The gentleman overlooks the fact we have not got the power to write a bill that would prohibit the importation of opium, but we have the governmental power that will allow us to levy a tax that has the same effect to prohibit the importation of opium, and it is through the tax we expect to prohibit it from coming in.

Mr. COOPER. Does the gentleman say that we have not the right to prohibit the importation of opium for smoking purposes in the United States?

Mr. UNDERWOOD. I do not think we have the right-Mr. PAYNE. It is the manufacture, not the importation; the manufacture

Mr. UNDERWOOD. It is the manufacture of opium, not the importation.

Mr. STAFFORD. Will the gentleman yield for a question?

Mr. UNDERWOOD. Yes.
Mr. STAFFORD. I might anticipate the gentleman, but I have in my hand a copy of the bill that he intends to bring up next, which seeks to prohibit the importation of opium except when it is to be used for medicinal purposes.

Mr. UNDERWOOD. Yes.
Mr. STAFFORD. I believe my colleague has that bill in mind and he will find that bill has an imprisonment penalty in the alternative in addition to a money fine. That is the bill undoubtedly the gentleman has in mind.

Mr. UNDERWOOD. Certainly; they are companion bills. This bill is a bill to prohibit the manufacture—that is, to tax the manufacture out of existence—and the other bill, which I will call up in a moment when this is disposed of, is a bill in

reference to the importation. I ask for a vote, Mr. Speaker.

The SPEAKER. The question is on agreeing to the Senate

amendments

The question was taken, and the Senate amendments were agreed to.

PROHIBITION OF IMPORTATION OF OPIUM.

The SPEAKER laid before the House the bill H. R. 1966, "An act to amend an act entitled 'An act to prohibit the importation and use of opium for other than medicinal purposes,' approved February 9, 1909," with Senate amendments.

The Senate amendments were read.

The question was taken, and the Senate amendments were agreed to.

On motion of Mr. UNDERWOOD, a motion to reconsider the votes by which the bills were passed was laid on the table.

ORDER OF BUSINESS.

Mr. UNDERWOOD. Mr. Speaker, I understand that the gentleman in charge will be able to report the Post Office appropriation bill in about 20 minutes, and I ask unanimous consent that the House take a recess for 20 minutes.

Mr. STAFFORD. Mr. Speaker, reserving the right to object, do not know whether the chairman of the Committee on the

Post Office and Post Roads is present-

Mr. UNDERWOOD. That is why I asked to take a recess.
Mr. STAFFORD. But at the last meeting of our committee there was an understanding that the Post Office appropriation bill was not to be considered within five days after the convening of Congress following the recess. Several members of the Committee on the Post Office made that special request in anticipation of their absence, so I certainly would not like to have any agreement that would be in conflict with the understanding that was made.

Mr. MADDEN. Mr. Speaker, I am a member of the Committee on the Post Office and Post Roads, and I do not understand it that way. I understood this to be the fact: That the committee instructed the chairman to report the bill on the first day of the session unless he had matters coming from the Postmaster General that would have to be incorporated in the bill. in which case he would wait five days before he reported the bill and call the committee together to consider the items. That was my understanding. That was the flat instruction—to report the bill; and it was left optional with him whether to report or to call a meeting of the committee.

Mr. UNDERWOOD. I will say to the gentleman from Wisconsin [Mr. Stafford] that in this matter I am asking the House to await the convenience of the chairman of his committee, and-

Mr. STAFFORD. I have no objection to that request

Mr. STAFFORD. I have no objection to that request.

Mr. UNDERWOOD. When he comes in he will take the matter up with the gentleman. I am not informed about it.

Mr. MURDOCK. Is it the purpose of the gentleman to have

general debate on it?

Mr. UNDERWOOD. No. The purpose is to report the bill

to-night, so that it may be printed and taken up to-morrow.

Mr. STAFFORD. Well, Mr. Speaker, I see other members of the committee here, and in view of my distinct recollection of what transpired in the committee I would like to see whether I am in error or whether the gentleman from Illinois [Mr. MADDEN] is in error.

Mr. UNDERWOOD. I will say to the gentleman from Wisconsin that I think the gentleman from Tennessee [Mr. Moon] will be on the floor in a minute, and then he can discuss the Not being a member of the question with one who knows.

committee myself, I am not informed as to what transpired.

Mr. COX. Mr. Speaker, I was present when the agreement was made, and I quite agree with the gentleman from Illinois [Mr. MADDEN]. I am quite sure that the gentleman from Wisconsin is sincere in his statements, but I understand the case is exactly as reported by the gentleman from Illinois.

Mr. CLAYTON rose.

The SPEAKER. The gentleman from Alabama is recognized. REMOVAL OF CAUSES TO FEDERAL COURTS.

Mr. CLAYTON. Mr. Speaker, I ask to take from the Speaker's table Senate bill 3484, to amend paragraph 8, section 24, chapter 2, of the Judicial Code, and consider the same as a substitute for House bill 9994, which is on the House Calendar, from the Committee on the Judiciary of the House with a favorable

Mr. Speaker, I may say that this Senate bill and the House bill are substantially the same. Section 24 of the Judicial Code provides that a cause may be transferred from a State court to a Federal court provided the amount involved is \$3,000. In this same section there is this proviso:

That the foregoing provision as to the sum or value of the matter in controversy shall not be construed to apply to any of the cases men-tioned in the succeeding paragraph of this section.

Paragraph 8 of the section, which is one of the succeeding paragraphs, provides that the Federal courts shall have juris-

Of all suits and proceedings arising under any law regulating commerce except those suits and proceedings exclusive jurisdiction of which has been conferred upon the Commerce Court.

Now, some of the Federal courts have construed that proviso and that exception to mean that if it is an action for damages, say, against a railroad company, on account of the loss or injury, say, to live stock-and those are the most frequent cases happening that call for this legislation-this proviso and this subsection 8, which I have read, take it out of the general operation of the law, and they contend that the cause can be transferred to a Federal court. They say such a cause involving damages can be transferred to a Federal court irrespective of the amount involved; and under that ruling the Federal courts have taken very small cases, some, I believe, from courts of justices of the peace, and some for \$100, and, I believe, some for less than that from other sources. This bill seeks to remedy that, and seeks to carry out the intention which Congress had in limiting the amount for which a cause can be transferred to at least \$3,000, and it cures the defects in the existing statute.

The bill is unanimously reported from the Committee on the Judiciary of the House, and I am advised it is unanimously reported from the Committee on the Judiciary of the Senate, and it has passed the Senate unanimously. I have asked that the Senate bill be taken up and considered now and passed in lieu of the House bill, which is on the calendar with a favorable report.

Mr. STAFFORD. Mr. Speaker, will the gentleman yield? The SPEAKER. Does the gentleman from Alabama yield to

the gentleman from Wisconsin?

Mr. CLAYTON. I do. Mr. STAFFORD. Do I understand that the bill reported by

Mr. STAFFORD. Do I understand that the bill reported by the House Judiciary Committee is on the calendar?

Mr. CLAYTON. It is.

Mr. STAFFORD. Is it on the Unanimous Consent Calendar?

Mr. CLAYTON. I have not the calendar before me.

Mr. STAFFORD. What is the exceptional reason why this bill should be given place over many others that are on the Unanimous Consent Calendar or that have been reported by committees of the House? committees of the House?

Mr. CLAYTON. Nothing except the urgent nature of the case, and the Senate bill is on the Speaker's table. I think it is a matter of privilege.

The SPEAKER. The gentleman from Alabama [Mr. CLAY-TON] calls up this bill under clause 2 of Rule XXIV:

But House bills with Senate amendments which do not require consideration in a Committee of the Whole may be at once disposed of as the House may determine, as may also Senate bills substantially the same as House bills already favorably reported by a committee of the House, and not required to be considered in Committee of the Whole,

be disposed of in the same manner on motion directed to be made by such committee.

So that the question whether this bill is on the Unanimous

Consent Calendar or not has nothing to do with it.

Mr. PAYNE. I understand this is identical with a House bill which has been favorably reported.

The SPEAKER. It is so nearly identical with it as to come within the rule.

It does not need unanimous consent, then. Mr. PAYNE.

The SPEAKER. No; it does not need unaulmous consent.
The gentleman from Alabama [Mr. Clayron], chairman of the Committee on the Judiciary, moves that Senate bill 3484 be taken up and disposed of, a House bill identical with it having been reported from the House Judiciary Committee, and being

now on the calendar.

Mr. GREEN of Iowa. Mr. Speaker, I just wish to add to what the gentleman from Alabama has said, that there is a great need for the passage of this bill. Every day the railroads are taking little trifling cases, that amount to from \$25 to \$100, and transferring them from the State courts to the Federal courts.

Mr. PAYNE. I want to suggest that this debate is all out of order until the bill is reported.

The SPEAKER. Of course no bill can be passed without being read. That would be the worst sort of practice to set up. The Clerk will report the bill.

The Clerk read as follows:

The Clerk read as follows:

Be it enacted, etc., That the act entitled "An act to codify, revise, and amend the laws relating to the judiciary," approved March 3, 1911, being chapter 231 of Thirty-sixth Statutes at Large, be amended by inserting at the conclusion of section 28, chapter 3, of said act, the following:

"And provided further, That no suit brought in any State court of competent jurisdiction against a railroad company or other corporation or person engaged in and carrying on the business of a common carrier to recover damages for delay, loss of, or injury to property received for transportation by such common carrier, under section 20 of the act to regulate commerce, approved February 4, 1887, as amended June 29, 1906, April 13, 1908, February 25, 1909, and June 18, 1910, shall be removed to any court of the United States where the matter in controversy does not exceed, exclusive of interest and costs, the sum or value of \$3,000."

Mr. STAFFORD. Mr. Speaker, I wish to reserve a point of rder. Do I understand that a similar House bill has been order reported from the committee?

Mr. CLAYTON. Yes; I made that statement.
Mr. STAFFORD. I do not find it on the calendar, and sometimes we are all in error—even as distinguished a gentleman as the chairman of the Judiciary Committee.

Mr. CLAYTON. Very often in error—very much more often than the gentleman from Wisconsin. However, House bill 9994 has been reported and is on the calendar.

Mr. STAFFORD. I do not find any such bill reported by the Committee on the Judiciary on the House Calendar.

Mr. COX. If the gentleman will look on page 10 of Calendar No. 32, he will find it there.

Mr. STAFFOLD. I withdraw my statement and apologize to the chairman of the Judiciary Committee.

Mr. CLAYTON. Mr. Speaker, I hope there may be no fur-

ther objection to this bill.

The SPEAKER. If there be no objection, the motion of the gentleman from Alabama to call up this bill will be considered as carried. Now, the question is

Mr. GREEN of Iowa, Mr. Speaker, a parliamentary inquiry. The SPEAKER. The gentleman will state it.

Mr. GREEN of Iowa. Is debate in order now?

The SPEAKER. Debate is in order, the same as on any other bill.

Mr. GREEN of Iowa. Mr. Speaker-

Mr. CLAYTON. Mr. Speaker, I have not yielded the floor. The SPEAKER. The gentleman from Alabama has the floor if he cares to use it.

Mr. GREEN of Iowa. I beg your pardon. The gentle yielded to me a moment ago, and I thought that continued.

Mr. CLAYTON. Does the gentleman desire some time? Mr. GREEN of Iowa. I should like about three to five minutes

Mr. TOWNER. Mr. Speaker, this is my bill, and I should like 15 minutes

Mr. CLAYTON. I hope the gentleman will not take 15 minutes to discuss this meritorious bill. I know he is in favor of it, and I know he is the author of the House bill on the subject, but I think that the printing of the report, made by the gentleman from Missouri [Mr. DYER], with which the gentleman from Iowa is perfectly familiar, will enable us to get along with less time. But I yield to the gentleman 15 minutes. The SPEAKER. The gentleman from Iowa [Mr. Towner] is

recognized for 15 minutes.

Mr. TOWNER. Mr. Speaker, Senator Kenyon, of Iowa, introduced a bill in the Senate during the last session having for

its object the legislation now under consideration. His bill was redrafted by the Senate Judiciary Committee, reported favorably, and passed just before the holiday recess. I introduced a bill in the House October last to effect the same result. The bill with slight changes was reported by the Judiciary Committee of the House favorably, and is now on the calendar for action by the House. The bill which passed the Senate is the same in substance as the House bill, and for that reason the chairman of the Judiciary Committee, Mr. CLAYTON, moves to substitute the Senate bill, consider, and pass it.

It is well understood that causes may be transferred from

State to United States courts in cases of diverse citizenship when any considerable amount is involved. Originally the amount was fixed at \$500, then it was increased to \$2,000, and finally to \$3,000, where it now exists, except in the cases we are

now to consider.

This limitation of amount as a condition of transfer was and is very valuable to the people in cases against railroad companies where the corporation has its "citizenship" State while its lines extend through several States. In all the States other than the one which granted the charter were it not for the limitation referred to small cases, involving even less than \$100, could be transferred by the railroad company from the State court in the locality in which the complainant resides and through which the line runs to a United States court located perhaps a hundred or more miles away. the law prevented these transfers unless the amount involved was more than \$3,000.

Such was the condition until January, 1912, when the new Judicial Code went into operation, wherein the laws affecting the removal of causes were revised and codified. clause was inserted which provided that the limitation of amount should not apply in cases "of all suits and proceedings

arising under any law regulating commerce.'

In Adams Express Co. v. Croninger (266 U. S., 491) it was held that under the provisions of the interstate-commerce act and its amendments all cases against railroad companies for loss or damage were "suits and proceedings" under the law regulating commerce.

Last summer Judge Amidon held that in all cases against railroad companies for loss or damage to property which is being transported in interstate commerce the companies had the right to transfer the cases from State to United States courts, no matter what the amount in controversy. (McGoon v. Northern Pacific Ry. Co., 204 Fed. Rept., 998.)

Since this decision was published hundreds of cases have been transferred where the amount in controversy was less than \$3,000. Cases where less than \$100 was involved, cases brought before justices of the peace, have been removed to the United States courts, and the plaintiffs, if they desired to press their cases to judgment, were compelled to go to a distant city, at large expense, and try them in a United States court.

A farmer could not recover for the loss of a cow without

facing the necessity of a long, expensive litigation at a distant point in a strange court. It results in all such cases in an abso-

lute denial of justice.

I think I am justified in saying that there was no intention or expectation of thus changing the law. No one thought at the time of its enactment that such an interpretation would be placed upon it. But nevertheless the condition exists and ought to be remedied.

All that is attempted to accomplish by these bills is to place the law in the condition it was intended and supposed to be-to prevent the right of transfer unless the amount in controversy exceeds \$3,000 in all such cases.

Mr. MURDOCK. Will the gentleman yield? Mr. TOWNER. Certainly.

Mr. MURDOCK. Was the right of transfer given in the law of 1887

Mr. TOWNER. Yes; and existed always.

Mr. MURDOCK, But specifically in the law of 1887? Mr. TOWNER. I think so.

Mr. MURDOCK. What further changes were made in the law

subsequently

Mr. TOWNER. Nothing; except that since that time the amount in controversy for which jurisdiction could be retained in the State court has been increased from \$2,000 to \$3,000, at which amount it existed until this year, when they first began to interpret the judicial code as taking away the limitation of amount and allowing transfers in all cases, no matter what amount was involved.

Mr. WILSON of Florida. Will the gentleman yield?
Mr. TOWNER. Certainly.
Mr. WILSON of Florida. As I understand the situation, this Is an amendment to prohibit the transfer of such cases as the tleman from Iowa [Mr. Green].

gentleman mentioned; for example, the running over and killing of a cow by a railroad company, to prevent the transfer of such suits for damages for the wrongful act to the Federal courts?

Mr. TOWNER. Yes.

Mr. WILSON of Florida. I favor the bill and think it good, but I notice in the proviso that you use this language, and I want to ask the gentleman if he thinks it covers the case that he has referred to:

Provided, however, That in suits now pending or hereafter brought in State courts based upon any contract or agreement for transportation or for failure to perform a duty imposed by law to person or property, or for delay, injury, damage, or loss to any property in the carriage, transporting, receiving, and delivery thereof, against any common carrier or carriers, railroad, or transportation company, and when the matter in controversy, exclusive of interest and costs, is less than \$3,000, the jurisdiction shall be and remain in said State courts until final determination, and shall not be transferred on motion or otherwise to any court of the United States.

Does the gentleman think that that language covers the case of wrongful killing of stock by a railroad when it is not being transported?

Mr. TOWNER. I think so; but that is not applicable here, because we are considering the bill passed by the Senate and not the House bill.

Mr. WILSON of Florida. Is not this the Senate bill?

Mr. TOWNER. We are considering the Senate bill as a substitute; but the gentleman is reading from the bill H. R. 9994,

Mr. WILSON. Yes.

Mr. GREEN of Iowa. Will the gentleman from Iowa yield?

Mr. TOWNER. I will yield to my colleague.

Mr. GREEN of Iowa. This is an amendment to what is called the Carmack amendment?

Mr. TOWNER. It refers to the same subject matter.

Mr. GREEN of Iowa. It was the Carmack amendment that the Supreme Court held brought it within the removal statute, but the Carmack amendment only applied to transportation cases.

Mr. WILSON of Florida. I was reading from the House bill, which the gentleman from Alabama said was substantially the same as the Senate bill, and what I wanted to inquire is whether it covers the case of wrongful killing of stock by being run over and injured or killed by a railway train when the stock is not being transported.

Mr. TOWNER. I think the House bill would have covered such cases as the gentleman refers to; but that need not now be discussed, for we are considering the Senate substitute.

Mr. BORLAND. Will the gentleman yield?
The SPEAKER. Does the gentleman from Iowa yield to the gentleman from Missouri?

Mr. TOWNER. I will yield; yes.

Mr. BORLAND. Mr. Speaker, the question the gentleman asked was whether this would cover damages for the killing of stock by running over them at road crossings, and that sort

Mr. WILSON of Florida. Stock on the track.

Mr. BORLAND. With the permission of the gentleman from Iowa, I would state that I do not think it could cover such a case. The law says "property received for transportation," and unquestionably there might be a great many stock-killing cases that are now in the State courts and that never have been affected by this decision at all, and that never did go to the Federal courts. This says "property received for transportation.'

Mr. TOWNER. It is the limit also of the act sought to be amended.

Mr. BORLAND. Yes.

Mr. WILSON of Florida. Mr. Speaker, I will say to the gentleman from Iowa and the gentleman from Missouri that the example given here was the case of the killing of stock by running over it on the tracks, and that is the reason I asked the question.

Mr. PETERSON. Is not the gentleman from Iowa unhappy in his illustration? Of course, running over a cow on a railroad track would not constitute a case that is subject to the jurisdiction of the United States. He is, therefore, a little unhappy in his illustration.

Mr. TOWNER. Perhaps, as to the cow on the track. still the cow might have been killed under circumstances which would have been unquestionably transportation in interstate commerce, and the difficulty is that in all such cases, when such small amounts are involved, the railroad companies can defeat recovery by transferring the cases to the United States courts, and that is what we are trying to prevent.

Mr. CLAYTON. Mr. Speaker, I yield five minutes to the gen-

Mr. GREEN of Iowa. Mr. Speaker, I would not have asked for recognition originally if I had observed that my colleague, Judge Towner, was on the floor. From the fact that he was on the other side of the House I missed him, and for that reason I asked for recognition; but now, at this time, I wish to speak a little further concerning the matter inquired of by the gentleman from Florida [Mr. ELDER].

The case to which he refers is not removable unless the amount involved exceeds \$3,000. It does not come within the provisions of the Carmack amendment, which was so construed as to make these small cases removable. There is no necessity for this provision of the bill being made any broader than it is now. It covers all of the cases that are included in the decision of the Supreme Court in the Carmack amendment; but under this decision our Federal courts, in my State at least, are being crowded with cases that involve anywhere from \$25 to \$100 growing out of damage suits on shipment cases; and, as my colleague has properly pointed out, the cost of trying them in the Federal courts often amounts to more than is involved in the

Mr. FOWLER. Mr. Speaker, will the gentleman yield for a question?

Mr. GREEN of Iowa. With pleasure.

Mr. FOWLER. Is the gentleman a member of the committee which has reported out a similar bill to this one?

Mr. GREEN of Iowa. I am not. Mr. FOWLER. I thought the gentleman was and had had an opportunity to make a thorough investigation, though I suppose he has made that thorough investigation, being an attorney interested in such questions?

Mr. GREEN of Iowa. Yes.

Mr. FOWLER. What I desire to know is whether the courts have construed the Federal Code which was passed in 1910 as giving the right to remove cases where the amount involved is less than \$3.000, growing out of the incident of the transportation as, for instance, the killing of a cow on the track by a relived engaged in interest, by a relived engaged in interest, in the company of track by a railroad engaged in interstate commerce?

Mr. GREEN of Iowa. Not so far as that, if I correctly

understand the gentleman.

Mr. FOWLER. They have not gone that far? Mr. GREEN of Iowa. No.

Mr. FOWLER. They have been limited to the carriage and transportation of the article?

Mr. GREEN of Iowa. Growing directly out of the carriage and transportation, which was covered by what was called the Carmack amendment.

Mr. FOWLER. Not indirectly as an incident to that trans-

portation. Is that true?

Mr. GREEN of Iowa. That has not been passed on, to my knowledge, by the Supreme Court, but I do not think it would

Mr. FOWLER. Has there been any case within the gentle-man's knowledge where a removal has taken place for an injury which is incident to that transportation, such as an injury to a servant or a citizen?

Mr. GREEN of Iowa. I know of no such case as that, while I know of hundreds of cases that have been removed.

Mr. FOWLER. I thought the statement was made here on the floor of the House that such a holding has been made by some of the courts, and that removals had taken place in cases where a cow had been killed on the tracks.

Mr. GREEN of Iowa. No; I do not know of any such claim

being made.

Mr. FOWLER. Well, permit me to suggest, if there is such a case I would love to see the color of the hair of the judge who so held. [Laughter.]
Mr. MURDOCK. Will the gentleman yield to me?
Mr. GREEN of Iowa. With pleasure.
Mr. MURDOCK. Will the gentleman explain just what the

Carmack amendment was or what it amended?

Mr. GREEN of Iowa. It would take more time than the gentleman from Alabama has allowed me and the gentleman gave more than he desired to give.

Mr. MURDOCK. It seems to me it is necessary to illumine this question.

Mr. CLAYTON. I shall not object to the gentleman taking the necessary time to answer the gentleman's question.

Mr. GREEN of Iowa. The Carmack amendment in a general

way, provided—
Mr. MURDOCK. It was an amendment to what, in the first

place?

Mr. GREEN of Iowa. An amendment to the interstate-commerce act and provided a regulation in reference to the recovery of damages in transportation cases, and I might say passed

with no intention such as was subsequently put into it by the Supreme Court.

Mr. MURDOCK. That is what I wanted to draw out, and wanted to know what this Carmack amendment was.

Mr. CLAYTON. It made the initial road liable for the loss

or injury to the property in transit after it passed out of the possession of the initial road.

Mr. MURDOCK. Now, it seems it contained some phrase or sentence which was afterwards interpreted in such a manner as to make the passage of this law necessary. Just what was

Mr. CLAYTON. It does; but it does not at all relate to cases where live stock crossed the railroad; it does not relate to that at all, but relates entirely to the matter covered by the Carmack amendment

Mr. MURDOCK. I would like to ask the gentleman from Alabama this: What was the phrase in the Carmack amendment which afterwards, judicially interpreted, made this measure that we have up to-day necessary? What was that phrase?

Mr. CLAYTON. I had the Judicial Code here a while ago——

Mr. GREEN of Iowa. I will say to the gentleman from Kansas, if the gentleman will permit, there was no particular phrase. When these cases for damages sustained in interstate transportation first came up before the Federal courts on appeal from the State courts the objection was made that the State law did not control the right of recovery; but prior to the enactment of the Carmack amendment the Supreme Court of the United States held that as Congress had not legislated with reference to the matter that the State law would govern. The Carmack amendment to the interstate-commerce act made the initial or first carrier liable to the holder of a bill of lading for any loss or damage to the goods included therein caused either by the first carrier or any other to which the goods may have subsequently been delivered for further transportation. After the passage of this amendment the Supreme Court then held that State laws did not apply to this subject, Congress having legislated thereon. And it was further decided by the lower Federal courts that all cases arising under this amendment were removable to the Federal courts, as the removal statutes provided that all cases which involved a construction of any portion of the interstate-commerce acts could be removed to the Federal courts regardless of the amount involved.

Mr. CLAYTON. I have not the Carmack Act before me, but I have the Judicial Code. This Judicial Code, as the gentleman knows, was passed subsequent to the Carmack amendment, the Judicial Code undertaking to be a compilation of all such laws as the Carmack law and the civil statutes generally that might properly come under the designation of a judicial code. Section 24 of this code reads:

That the district court shall have original jurisdiction as follows: Of all suits of a civil nature at common law or in equity brought in the United States, or by any officer thereof authorized by law to sue, or between citizens of the same State—

And so forth and so on-

or where the matter in controversy exceeds, exclusive of interest and costs, the sum or value of \$3,000.

Now, that is perfectly plain.

Mr. MURDOCK. So far. Mr. CLAYTON. Then here comes in the proviso:

Provided, however, That the foregoing provision as to the sum or value of the money in controversy shall not be construed to apply to any of the cases mentioned in the succeeding paragraphs of this any of section.

Now, what is the succeeding?

Eighth. Of all suits and proceedings arising under any law regulat-g commerce, except those suits and proceedings exclusive jurisdiction which has been conferred upon the Commerce Court.

Mr. MURDOCK. It was that phrase that made the limitation?

Mr. CLAYTON. Yes; and this simple little bill rectifies that, so that if the gentleman shipped a carload of cattle from his home in Kansas and they got to Chicago and by fault of the railway injury happened to those cattle or death happened to those cattle, involving less than \$3,000, you can extend your action in the State court and not be subject to having to proceed

to the Federal court.

Mr. MURDOCK. I am glad the gentleman explained it. I understand it now for the first time.

Mr. SHERLEY. In other words, this bill does what we

thought we were doing when we passed the Judicial Code and raised the limit from \$2,000 to \$3,000.

Mr. CLAYTON. Yes. Mr. SHERLEY. I hope to see an additional law passed which will prevent jurisdiction on the ground of adverse citizenship, on the basis of a corporation being a citizen of a State where it is created, when in fact it is as much a citizen of the State where it is doing business as a corporation could be.

Mr. CLAYTON. I agree with the gentleman on that. Now, I want to say one word more, and then I will yield time. I want to say something more, Mr. Speaker, and the remarks of the gentleman from Kentucky [Mr. Sherley] have suggested it to me. The surprising thing to those who have had reason to carefully study the Judicial Code is that so few errors were committed in that compilation. It may be a wrong construction on the part of the courts. But the courts have so held, and I think it is the duty of Congress to rectify the law so that the courts can not longer make such rulings as have been made. Now I will yield.

Mr. GREEN of Iowa. Just one moment further, if the gentleman please?

Mr. CLAYTON. Surely. Mr. MURDOCK. Mr. Speaker, will the gentleman yield?

Mr. GREEN of Iowa. In just a moment.

Mr. MURDOCK. I want to suggest to the gentleman that this is the process of the recall of judicial decisions.

The SPEAKER. The gentleman from Iowa has not yielded the floor.

Mr. MURDOCK. He yielded to me. The SPEAKER. He has no right to yield. The gentleman from Alabama [Mr. CLAYTON] has the floor.
Mr. GREEN of Iowa. The gentleman from Alabama yielded

a moment to me.

The SPEAKER. The gentleman from Iowa is recognized for two minutes.

Mr. GREEN of Iowa. In answer to the gentleman from Kansas [Mr. Murdock] I will say this, that when these cases for damages in interstate transportation came up before the Federal courts on appeal from the lower courts it was objected that the State courts would have no jurisdiction because it was purely an interstate matter, but at that time the Supreme Court of the United States held-that is, prior to the enactment of the Carmack amendment, which has just been read—that inasmuch as the Congress had not legislated with reference to shipment contracts, the State courts, until Congress had enacted that legislation, could take jurisdiction; but after the passage of the Carmack amendment, assuming jurisdiction over bills of lading and contracts of shipment, it was said that Congress had taken entire jurisdiction of the matter, and the whole matter was put in the control of Congress and was now subject to the statutes as an amendment to the interstate commerce act. That is the situation.

Mr. CLAYTON. Now, I yield three minutes to the gentleman

from Missouri [Mr. Borland].

The SPEAKER. The gentleman from Missouri [Mr. Bor-LAND] is recognized for three minutes.

Mr. BORLAND. Mr. Speaker, this is a very necessary piece of legislation and ought to pass. The Carmack amendment gave a right of action against the initial carrier for damage to commodities transported in interstate commerce, and that amendment was carried into the Judicial Code. In the form in which it got into the Judicial Code in conjunction with the general jurisdictional provisions of the Federal court, the courts have construed it to mean that jurisdiction of all cases arising under the interstate-commerce law is in the courts of the United States, and that cases can be removed from the State courts to the Federal courts regardless of the amount involved. Consequently they take jurisdiction of all of these cases brought by small shippers of live stock and other commodities where damages are claimed against the railroad for losses incurred in shipment. It does not make any difference how small the loss is—it may be \$100, or \$80, or \$24—the cases have been removed from the State courts to the Federal courts. Manifestly that is a great oppression upon the small shipper of live stock. It causes great delay, and sometimes entirely consumes in costs the

amount of his recovery.

I have introduced, I will say, in passing, a bill exactly of this same nature, H. R. 10315, at the request of the live-stock shippers of the Southwest. Before my bill was considered this bill had been passed by the Senate, and I am heartily in favor of this proposition. If the Federal courts are to continue to take jurisdiction of these small cases, they will need a justice of the peace to help them out, or a Federal commissioner to try these little cases, because it is utterly impossible for the Federal courts, with the business they have, to try these little damage cases. These cases for damages in shipment have been accumulating rapidly in the Southwest and West under this Carmack amend-

Mr. MURDOCK. Mr. Speaker, will the gentleman yield?

The SPEAKER. Does the gentleman from Missouri yield to the gentleman from Kansas?

Mr. BORLAND. Yes. Mr. MURDOCK. Is the purpose of the corporation in appealing these cases to the Federal court chiefly to defeat the litigant

by wearing him out?

Mr. BORLAND. I think it has been the policy of railroads ever since they have had litigation to defeat and wear out the litigants. They are inclined and prone to do that under any, pretext, and if a claim involves less than \$3,000 it ought to be tried in the State where it is brought, and tried to a final conclusion.

Mr. MURDOCK. Is the gentleman sure that there is no phrase in this bill that will defeat that proposition?

Mr. BORLAND. No; I am not; but the bill seems to be prepared as carefully as can be, and the Congress is still in session,

I will remind the gentleman. Mr. GARNER. Mr. Speaker, will the gentleman yield for

another question?

The SPEAKER. Does the gentleman yield?

Mr. BORLAND. Yes. Mr. GARNER. Is it not a fact that the Federal judges throughout the country are asking that this legislation be passed in order to relieve them of the litigation that is brought in the Federal courts from all parts of the country?

Mr. TOWNER. Yes; I know that that is true. Mr. GARNER. I know that two Federal judges in my State have called my attention to this legislation and stated that the law as it now stands was cluttering up their dockets, and that it was absolutely ridiculous to remove a case involving \$100 or \$50 from a justice's court up to them to be tried, and that there was need for this character of legislation.

Mr. BORLAND. I do not know what the attitude of the Federal judges is about it, but I know the attitude of the live-stock shippers, and they are unanimous for this legislation, and also unanimous for a similar piece of legislation which I have introduced and which is before the Interstate Commerce Committee. The railroads have put into their bills of lading a short limitation of time within which the shipper must give notice of damages and another short and unreasonable length of time in

which he must bring suit.

In many cases that time is so short that he can not ascertain the facts through his factor or commission merchant or correspondent within the time that the bill of lading limits him; and the courts have actually decided that on the theory that he accepted a lower rate for the transportation of his goods he is bound by that time limit in his contract. On the other hand, if the railroad company had made a mistake on its side, and had quoted him too low a rate, and afterwards concluded that it would sue him for the difference between that and the true rate, there would be no limitation of time at all against the railroads up to the ordinary time fixed by the statute of limitations. But the railroads have put a limitation of 90 days within which a live-stock shipper or small shipper of any commodities transported in interstate commerce must ascertain the facts, serve notice, and bring suit if he expects to hold the carrier. have a bill to remedy that. I am sorry it can not be embraced in the same section, because it remedies a defect of the interstate-commerce law.

As to this particular measure, I think there ought to be a

unanimous vote in favor of it.

Mr. PAYNE. Will the gentleman yield me two minutes?

Mr. CLAYTON. I yield to the gentleman from New York two

minutes. Mr. PAYNE. Mr. Speaker, it is very curious that Congress always tries to lay the blame for its blunders on somebody else. The gentleman from Kansas [Mr. MURDOCK] thinks the corporations wanted to wear people out. I do not think any corporation had the slightest idea that this Carmack amendment would be put in that bill until Congress passed it. The gentleman from Alabama assumed that the decision of the court was wrong. Yet there is not a man in this House who will read the language of that Carmack amendment and the law to which it was applicable-

Mr. MADDEN. Except the lawyers.

Mr. PAYNE. There is not a man who will read it who will not come to the conclusion that the court was correct in its decision. In other words, the blunder was made by the Congress of the United States, and this is simply an effort to correct that blunder. That is all there is of it.

Mr. CLAYTON. Mr. Speaker, I have already said that I would ask to print the report of the House committee on the similar House bill, H. R. 9994, and I ask that it be printed as

a part of my remarks.

The SPEAKER. The gentleman from Alabama asks unanimous consent to print as a part of his remarks the report of the House committee on the House bill. Is there objection?

There was no objection. The report is as follows:

There was no objection.

The report is as follows:

The Committee on the Judiciary, having had under consideration the bill (H. R. 9994) to amend section 24, chapter 2, of the Judicial Code of the United States, report the same back with the recommendation that the bill do pass.

In the law fixing the jurisdiction of the circuit courts of the United States it was originally provided that in a suit brought by a citizen of one State in the courts of that State against a citizen of another State the cause may be removed upon petition of the latter from the State court to the circuit court of the United States, provided "the amount in dispute, exclusive of costs, exceeds the sum or value of \$500."

By the act of August 13, 1888, the amount was increased to \$2,000, so that causes could not be removed unless the amount in controversy exceeded \$2,000.

Subsequently the amount was again increased to \$3,000.

It is well known that this limitation of the right of removal is of especial value in suits against railroads, especially the large companies whose lines extend through many States and whose "citizenship" is held to be in the State from which the company's charter was obtained. In actions brought against the company in a State through which the line runs, and probably in which the plaintiff lives, and the injury or loss occurred, suits brought for trivial amounts could be transferred from the State to the United States courts, on the motion of the railroad company, were it not for this limitation of the right of removal to amounts exceeding \$3,000.

In the Judicial Code, enacted March 3, 1911, and in force since January 1, 1912, wherein the laws affecting the removal of causes from State to United States courts were revised and codified, it was provided (ch. 2, sec. 24) that the district courts shall have original jurisdiction "where the matter in controversy exceeds, exclusive of interest and costs, the sum or value of \$3,000" and "is between citizens of different States."

That would have left the law substantial

so that the statute taken together is to the effect that in cases brought by a citizen of one State against another no right of removal exists unless the amount in controversy exceeds \$3,000, except in "suits and proceedings arising under any law regulating commerce." In all such cases the right of removal would exist, no matter what the amount in controversy was

such cases the right of removal would exist, no matter what the amount in controversy was.

It is not likely the effect was intended which a literal application of this latest utterance of the legislative power gives. For it makes of no value the limitation of amount in the right of removal in nearly all cases against the railroads.

In Adams Express Co. v. Croninger (226 U. S., 491) it was held that section 20 of the interstate-commerce act as amended by the act of June 29, 1906, abrogates all State and common law liabilities on interstate shipments of property. If in any case this statute does not give the plaintiff the right of recovery, he has none. That being true, all cases against railroad companies for loss or damage on interstate shipments of necessity must arise under a "law regulating commerce."

It follows that in all cases when the controversy arises as to an interstate contract for carriage, no matter what the amount in dispute, they must be tried in the United States courts under the law as it now stands.

stands.

The condition of the law and the repeal by the Judicial Code of the limitation on the right of removal was not called to the attention of the bar and the courts until May 14, 1913, when Judge Amidon handed down the decision of McGoon v. Northern Pacific Railway Co., United States District Court of North Dakota, reported in 204 Federal Reporter, 998.

In that case several separate actions were brought against the Northern Pacific Railway Co. for damage to live stock shipped by plaintiffs on defendant's road from North Dakota and Montana to Chicago. In no action was the amount in controversy \$3,000. The suits were removed on defendant's petition from the State to the United States court, and in that court a motion was made to remand the suits to the State court—

moved on defendant's petition from the State to the United States court, and in that court a motion was made to remand the suits to the State court—

1. Because the amount in controversy is less than \$3,000, the sum required to justify their removal.

2. Because the suits did not involve a Federal question.

It was held that a suit by a shipper against a railroad company to recover for damages or injury to property while being transported in interstate commerce is one arising under the interstate-commerce act as amended, of which a Federal district court is given exclusive original jurisdiction by the Judicial Code, which confers jurisdiction on such courts of all suits and proceedings arising under any law regulating commerce; and such a suit is removable under section 28, without regard to the amount involved.

The motions to remand were denied.

Since this decision was published hundreds of cases, many of them involving small amounts, have been removed. Every day now cases are removed at the instance of the defendant railroad companies when the amount in controversy is less than \$3,000.

An attorney writes:

"Under the recent construction given to paragraph 8, section 24, chapter 2, of the Judicial Code of the United States, the railroad companies are permitted to transfer all cases brought for damages on account of delay or injury to shipment of goods, regardless of the amount in controversy. How this operates was demonstrated at our Federal court, where a little justice of the peace case from Eldon was transferred to the District Court of the United States for trial. We do not believe that Congress ever intended that cases of this character should all be tried in the Federal court. It is a hardship and an injustice to require a person whose claim is small to go into the Federal court to litigate it."

Another writes:

"I have a case which is transferred to the United States court where the matter in controversy is less than \$500. Under the law as it is now construed if a person ships 30 cents' worth of app

Another lawyer with a very extensive practice writes:

"So far as I know all district judges are now removing causes when an interstate shipment is involved, no matter how small the amount in controversy."

A trial judge of a State court writes:

"I have followed Judge Amidno's decision with reluctance and have removed all cases regardless of the amount involved. Unless the law is changed I see no way to avoid Ir, and it will work great hardship an another judge writes:

"I was compelled to remove a suit from my court to the United States court in which the plaintiff claimed a damage of \$100, by reason of injury to horses in transit from Mount Ay to Chicago. I did not want to follow Judge Amidon's decision, but found upon examination of the present provisions of the law that there was no way to avoid Ir.

"At a recent term of district court here 10 cases in which I appeared for plaintiffs were removed to the Federal court. In one of these cases a lady shipped her household effects from Red Oak, Iowa, to a point in Montana. Subsequently she concluded to remain in Iowa, and ordered her goods reshipped. When received several boxes had been opened and much clothing stolen. The furniture was so badly damaged where claim and she brought suit in the State court. The railway company removed it to the United States court. She is poor and will be unable to prosecute the case and must lose her claim."

Another case:

A farmer ships a carload of cattle for feeding. In transferring from the feeding yards to the car the company's employees allow a steer to see the court of the state of Jowa alone since Judge Amidon's decision.

A railroad lawyer, who has no sympathy with such procedure, says that more than 250 cases have been removed in the State of Jowa alone since Judge Amidon's decision.

A railroad lawyer writes:

"We have had a number of cases against railroads for clients who have to tell them to take their loss and say nothing about it, for they cannot afford to take their witnesses, hire attorneys, and travel over 10

The SPEAKER. The question is on the third reading of the Senate bill.

The bill was ordered to a third reading, and was accordingly read the third time and passed.

On motion of Mr. CLAYTON, a motion to reconsider the vote by which the bill was passed was ordered to lie on the table.

By unanimous consent, the bill H. R. 9994 was ordered to lie on the table.

Mr. TOWNER. Mr. Speaker, I ask unanimous consent that those gentlemen who have spoken on this bill have the privilege of extending their remarks in the RECORD.

The SPEAKER. The gentleman from Iowa [Mr. Towner] asks unanimous consent that those Members who made remarks on the bill which has just passed the House have the privilege of extending their remarks in the RECORD.

Mr. CAMPBELL. Reserving the right to object, I assume that the remarks which will be printed will relate to the subject matter of these bills.

Mr. TOWNER. Certainly.

The SPEAKER. The gentleman from Iowa [Mr. Towner] asks unanimous consent that all gentlemen who have spoken on the railroad bill, which has just passed the House, be permitted to extend their remarks in the RECORD on that subject. Is there objection?

Mr. UNDERWOOD. Mr. Speaker, I think there ought to be

limit on the time

Mr. TOWNER. Make it five legislative days.

The SPEAKER. Within five legislative days. Is there objection?

There was no objection.

POST OFFICE APPROPRIATION BILL.

Mr. MOON, from the Committee on the Post Office and Post Roads, reported a bill (H. R. 11338) making appropriations for the service of the Post Office Department for the fiscal year ending June 30, 1915, and for other purposes, which was read a first and second time, referred to the Committee of the Whole House on the state of the Union, and, with the accompanying report (No. 165), ordered to be printed.

Mr. STAFFORD. Mr. Speaker, I reserve all points of order

on the bill.

The SPEAKER. The gentleman from Wisconsin [Mr. STAF-

FORD] reserves all points of order.

Mr. MOON. Mr. Speaker, on account of the absence of two or three members of the Committee on the Post Office and Post Roads, and the desire of others to postpone the consideration of this bill for a short while, I give notice that it will not be called up for consideration until next Thursday.

Mr. STEENERSON. Mr. Speaker, I ask unanimous consent

to file the views of the minority on this bill.

Mr. MOON. Mr. Speaker, at the request of a member of the committee, the gentleman from Michigan [Mr. Samuel W. SMITH], I desire to give him an opportunity to file minority views on this bill

Mr. STEENERSON. I will file my views to-morrow. Mr. MOON. The minority, I think, will file separate views.

The SPEAKER. The gentleman from Minnesota [Mr. STEEN-ERSON] asks unanimous consent to file his views on this bill, and the gentleman from Tennessee [Mr. Moon] asks unanimous consent that the gentleman from Michigan [Mr. Samuel W. SMITH] have the right to file his views.

Mr. STAFFORD. I ask unanimous consent that all members of the committee who desire to do so may avail themselves of

the privilege of filing minority views.

The SPEAKER. The gentleman from Wisconsin asks unanimous consent that every member of the committee who desires to do so have leave to file his views. Is there objection?

There was no objection.

ADJOURNMENT.

Mr. UNDERWOOD. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 4 o'clock and 45 minutes p. m.) the House adjourned until to-morrow, Tuesday, January 13, 1914, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1. A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, reports on examination and survey of Oklawaha River to Lake Dora, Fla. (H. Doc. No. 514); to the Committee on Rivers and Harbors and ordered to be printed, with illustration.

2. A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, reports on examination and survey of Richmond Harbor, Cal. (H. Doc. No. 515); to the Committee on Rivers and Harbors and ordered to be printed,

with illustration.

3. A letter from the assistant clerk of the Court of Claims, transmitting a certified copy of the findings of fact and conclusion in the case of the Trustees Baptist Church of Bloomfield, Ky., v. The United States (H. Doc. No. 519); to the Committee on War Claims and ordered to be printed.

4. A letter from the assistant clerk of the Court of Claims, transmitting a certified copy of the findings of fact in the case of Sallie A. Kinnaird, administratrix of the estate of William H. Kinnaird, v. The United States (H. Doc. No. 520); to the

Committee on War Claims and ordered to be printed.

5. A letter from the Secretary of Labor, transmitting a detailed statement of expenses of officers and employees of the Department of Labor in attending meetings and conventions during the period from June 30 to December 1, 1913 (H. Doc. No. 560); to the Committee on Expenditures in the Department of Labor and ordered to be printed.

6. A letter from the Secretary of the Treasury, inviting attention to the urgent need of an appropriation for special physicochemical and metabolic studies of pellagra (H. Doc. No. 559); to the Committee on Appropriations and ordered to be printed.

letter from the Librarian of Congress, transmitting a

employees of the Library of Congress at meetings or conventions that have been incurred from June 30, 1913, to December 1, 1913 (H. Doc. No. 574); to the Committee on Appropriations

and ordered to be printed.

A letter from the Secretary of Commerce, transmitting a statement of expenses incurred by officers and employees of the Department of Commerce in attending meetings or conventions of societies and associations during the period from June 30 to December 1, 1913 (H. Doc. No. 561); to the Committee on Expenditures in the Department of Commerce and ordered to be printed.

9. A letter from the Board of Commissioners of the District of Columbia, transmitting a copy of a report by the auditor of the District of Columbia showing the expenses incurred and paid by the District of Columbia for certain of its employees in attending meetings of associations or conventions under authority of the commissioners from June 30 to December 1, 1913 (H. Doc. No. 575); to the Committee on Appropriations and

ordered to be printed.

10. A letter from the Secretary of the Treasury, transmitting copy of a communication of the acting superintendent of the State, War, and Navy Department Building, submitting an estimate of appropriations in the sum of \$5,000 for fuel, lights, repairs, and miscellaneous items for the new Navy Department annex for the fiscal year ending June 30, 1915 (H. Doc. No. 566); to the Committee on Appropriations and ordered to be

printed.

11. A letter from the Acting Secretary of the Treasury, transmitting copy of a communication from the Secretary of Commerce submitting certain estimates of appropriation for the service of the Coast and Geodetic Survey for the fiscal year ending June 30, 1915 (H. Doc. No. 567); to the Committee on

Appropriations and ordered to be printed.

12. A letter from the Secretary of the Treasury, transmitting copy of a communication of the Acting Superintendent State, War, and Navy Department Buildings, submitting urgent estimates of appropriations required for the new Navy Department Annex for the service of the fiscal year ending June 30, 1914 (H. Doc. No. 565); to the Committee on Appropriations and ordered to be printed.

13. A letter from the Postmaster General, transmitting a schedule of papers and documents which are not needed in the transaction of public business and which have no permanent value or historical interest (H. Doc. No. 576); to the Committee on Disposition of Useless Executive Papers and ordered to be printed.

14. A letter from the Acting Secretary of the Treasury, transmitting copy of a communication of the Attorney General submitting an urgent estimate of deficiency in the appropriation for rent of court rooms, United States courts, for the fiscal year ending June 30, 1914 (H. Doc. No. 564); to the Committee on Appropriations and ordered to be printed.

15. A letter from the Secretary of the Treasury, transmitting copy of a communication of the Secretary of State submitting urgent estimates of appropriations required by the Department of State during the fiscal year ending June 30, 1914 (H. Doc. No. 563); to the Committee on Appropriations and ordered to

be printed.

16. A letter from the Secretary of Commerce, transmitting copy of a communication from certain steamship companies relating to a provision for the safeguarding of the coast of Alaska (H. Doc. No. 577); to the Committee on Interstate and Foreign Commerce and ordered to be printed.

17. A letter from the Secretary of the Interior, transmitting

copies of reports, together with maps, from the superintendent in charge of the Shoshone Indian School and the assistant engineer of the Shoshone irrigation project, in Wyoming, per-taining to the construction of roads and bridges on the Wind

taining to the construction of roads and bridges on the Wind River Reservation (H. Doc. No. 516); to the Committee on Indian Affairs and ordered to be printed, with illustrations.

18. A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, report on examination of Au Gres River, Mich. (H. Doc. No. 517); to the Committee on Rivers and Harbors and ordered to be printed, with illustration.

19. A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, reports on examination of New York Harbor, N. Y. Upper Bay, and plan and estimate

New York Harbor, N. Y., Upper Bay, and plan and estimate of cost of improvement, with a view to improving channel opposite anchorage grounds (H. Doc. No. 518); to the Committee on Rivers and Harbors and ordered to be printed, with illustration.

20. A letter from the clerk of the Court of Claims, transmitting the findings of fact and conclusions of law in the French spoliation claims, relating to the vessel sloop Eliza, in the cases of Charles T. Lovering, administrator of Joseph Taylor, v. The detailed statement of all expenses of attendance of officers or United States, and John H. Moriarty, administrator of James

Scott, v. The United States (H. Doc. No. 558); to the Committee on Claims and ordered to be printed.

21. A letter from the clerk of the Court of Claims, transmitting the findings of fact and conclusions of law in the French spoliation claims, relating to the vessel brig Rensalaer, in the cases of Joseph Ogden, surviving executor, etc., of Jane Ann Ferrers, v. The United States, and in other cases (H. Doc. No. 530); to the Committee on Claims and ordered to be printed.

A letter from the Acting Secretary of the Treasury, transmitting a communication from the Auditor for the Post Office Department submitting a list of postmasters found to be indebted to the Government in the fiscal year ended June 30, 1913, and who on December 29, 1913, had not paid the amounts due into the Treasury of the United States (H. Doc. No. 568); to the Committee on Expenditures in the Post Office Department and ordered to be printed.

23. A letter from the clerk of the Court of Claims, transmitting the findings of fact and conclusions of law in the French spoliation claims, relating to the vessel ship Jefferson, in the case of Charles T. Lovering, administrator of Joseph Taylor, v. The United States (H. Doc. No. 554); to the Committee on Claims and ordered to be printed.

24. A letter from the clerk of the Court of Claims, transmitting the findings of fact and conclusions of law in the French spoliation claims, relating to the vessel schooner Bellona, in the case of Elijah K. Hubbard, administrator of Jacob Sebor, v. The United States (H. Doc. No. 546); to the Committee on Claims and ordered to be printed.

25. A letter from the clerk of the Court of Claims, transmitting the findings of fact and conclusions of law in the French spoliation claims, relating to the vessel schooner John, in the case of Ludlow Ogden, administrator of George Barneswall, v. The United States (H. Doc. No. 545); to the Committee on Claims and ordered to be printed.

26. A letter from the clerk of the Court of Claims, transmitting the findings of fact and conclusions of law in the French spoilation claims relating to the vessel ship *Pigou*, in the case of Elijah H. Hubbard, administrator of Jacob Sebor, v. The United States (H. Doc. No. 553); to the Committee on Claims and ordered to be printed.

27. A letter from the clerk of the Court of Claims, transmitting the findings of fact and conclusions of law in the French spoliation claims relating to the vessel schooner Gideon, in the cases of George Haskell, administrator de bonis non of Solomon Haskell, v. The United States, and Eben B. Foster and Augustus F. Lemon, administrator of Ignatius Haskell, v. The United States (H. Doc. No. 544); to the Committee on Claims and ordered to be printed.

28. A letter from the clerk of the Court of Claims, transmitting the findings of fact and conclusions of law in the French spoliation claims relating to the vessel brig Jay, in the cases of Charles T. Lovering, administrator of Joseph Taylor, v. The United States, and Charles F. Hunt, administrator of Joseph Russell, surviving partner of Jeffrey & Russell, v. The United States (H. Doc. No. 529); to the Committee on Claims and ordered to be printed.

29. A letter from the clerk of the Court of Claims, transmitting the findings of fact and conclusions of law in the French spoliation claims relating to the vessel schooner Mercury, in the case of Brooks Adams, administrator of Peter C. Brooks, v. The United States (H. Doc. No. 543); to the Committee on

Claims and ordered to be printed.

30. A letter from the clerk of the Court of Claims, transmitting the findings of fact and conclusions of law in the French spoliation claims relating to the vessel brig Sally, in the case of Brooks Adams, administrator of Peter C. Brooks, v. The United States (H. Doc. No. 528); to the Committee on Claims and ordered to be printed.

31. A letter from the clerk of the Court of Claims, transmitting the findings of fact and conclusions of law in the French spoliation claims, relating to the vessel schooner Richmond, in the cases of R. Manson Smith, administrator of Francis Smith, v. The United States, and Henry A. T. Granbery, administrator of John Granbery, v. The United States (H. Doc. No. 542); to the Committee on Claims and ordered to be printed.

32. A letter from the clerk of the Court of Claims, transmitting the findings of fact and conclusions of law in the French spoliation claims, relating to the vessel brig Esperanza, in the cr.se of Elijah K. Hubbard, administrator of Jacob Sebor, v. The United States (H. Doc. No. 527); to the Committee on Claims and ordered to be printed,

33. A letter from the clerk of the Court of Claims, transmitting the findings of fact and conclusions of law in the French

cases of T. B. Bleecher, J. R. and Charles C. Leary, receivers of the New York Insurance Co., v. The United States, and Augustus W. Clason, administrator, etc., of Isaac Clason, v. The United States (H. Doc. No. 550); to the Committee on Claims and ordered to be printed.

34. A letter from the clerk of the Court of Claims, transmitting the findings of fact and conclusions of law in the French spoliation claims, relating to the vessel schooner Benevolence, in the case of Isaac H. Coffin, administrator of Abiel Wood, v. The United States (H. Doc. No. 541); to the Committee on Claims and ordered to be printed.

35. A letter from the clerk of the Court of Claims, transmitting the findings of fact and conclusions of law in the French spoliation claims, relating to the vessel ship Diana, in the cases of Elijah K. Sebor, administrator of Jacob Sebor, v. The United States, and Richard Delafield, administrator of John Delafield, v. The United States (H. Doc. No. 549); to the Committee on Claims and ordered to be printed.

36. A letter from the clerk of the Court of Claims, transmitting the findings of fact and conclusions of law in the French spoliation claims relating to the vessel schooner Two Friends, in the case of Robert Hartshorne, administrator of Richard Hartshorne, surviving partner of Rhinelander, Hartshorne & Co., v. The United States (H. Doc. No. 540); to the Committee on Claims and ordered to be printed.

37. A letter from the clerk of the Court of Claims, transmitting the findings of fact and conclusions of law in the French spoliation claims relating to the vessel schooner Adventure, in the case of John H. Maynadier, administrator of Jeremiah Yellott, v. The United States (H. Doc. No. 539); to the Committee on Claims and ordered to be printed.

38. A letter from the clerk of the Court of Claims, transmitting the findings of fact and conclusions of law in the French spoliation claims relating to the vessel schooner Atlantic, in the cases of Charles T. Lovering, administrator of Joseph Taylor, v. The United States, and Charles T. Lovering, administrator of Joseph Taylor, v. The United States (H. Doc. No. 538); to the Committee on Claims and ordered to be printed.

39. A letter from the clerk of the Court of Claims, transmitting the findings of fact and conclusions of law in the French spoliation claims relating to the vessel schooner Lark, in the case of Charles T. Lovering, administrator of Joseph Taylor, v. The United States (H. Doc. No. 537); to the Committee on Claims and ordered to be printed.

40. A letter from the clerk of the Court of Claims, transmitting findings of fact and conclusions of law in the French spollation claims relating to the vessel sloop Eliza, in the case of Charles T. Lovering, administrator of Joseph Taylor, v. The United States, and in other cases (H. Doc. No. 551); to the Committee on Claims and ordered to be printed.

41. A letter from the clerk of the Court of Claims, transmitspoliation claims relating to the vessel brig Recovery, in the case of Eliza N. Blunt and Eliza S. Blunt, administratrices of John Sinclair, v. The United States (H. Doc. No. 526); to the Committee on Claims and ordered to be printed.

42. A letter from the clerk of the Court of Claims, transmitting the findings of fact and the conclusions of law in the French spoliation claims relating to the vessel brig Pearl, in the cases of the President and Directors of the Insurance Co. of North America v. The United States and Ezra Bander, administrator of Philip Case, v. The United States (H. Doc. No. 525); to the Committee on Claims and ordered to be printed.

43. A letter from the clerk of the Court of Claims, transmitting the findings of fact and the conclusions of law in the French spoliation claims relating to the vessel schooner Molly Farlie, in the case of the Insurance Co. of the State of Pennsylvania v. The United States (H. Doc. No. 536); to the Committee on Claims and ordered to be printed.

44. A letter from the clerk of the Court of Claims, transmitting the findings of fact and conclusions of law in the French spoliation claims relating to the vessel brig *Hiram*, in the cases of William A. M. Fuller, administrator of John Leamy, v. The United States and in other cases (H. Doc. No. 524); to the Committee on Claims and ordered to be printed.

45. A letter from the clerk of the Court of Claims, transmit-ting the findings of fact and conclusions of law in the French spoliation claims relating to the vessel schooner Patriot, in the cases of William Bush, administrator of Thomas Keen, v. The United States and in other cases (H. Doc. No. 535); to the Com-

mittee on Claims and ordered to be printed.

46. A letter from the clerk of the Court of Claims, transmitting the findings of fact and conclusions of law in the French spoliation claims relating to the vessel sloop Ranger, in the spoliation claims, relating to the vessel ship Joseph, in the cases of Brooks Adams, administrator of Peter C. Brooks, v. The United States, and in other cases (H. Doc. No. 557); to

the Committee on Claims and ordered to be printed.

47. A letter from the clerk of the Court of Claims, transmitting the findings of fact and conclusions of law in the French spoliation claims relating to the vessel brig Industry, in the case of James G. Freeman, receiver of the Boston Marine Insurance Co., v. The United States (H. Doc. No. 523); to the Committee on Claims and ordered to be printed.

48. A letter from the clerk of the Court of Claims, transmitting the findings of fact and conclusions of law in the French spoliation claims relating to the vessel brig *Luna*, in the cases of Henry B. Cabot, administrator of William Gray, v. The United States and in other cases (H. Doc. No. 522); to the Com-

mittee on Claims and ordered to be printed.
49. A letter from the clerk of the Court of Claims, transmitspoliation claims relating to the vessel schooner Industry, in the cases of Jeremiah Nelson, administrator of Jeremiah Nelson, v. The United States and in other cases (H. Doc. No. 534); to the Committee on Claims and ordered to be printed. 50. A letter from the clerk of the Court of Claims, transmit-

ting the findings of fact and conclusions of law in the French spoliation claims relating to the vessel ship Commerce, in the cases of Eliza F. Noyes, administratrix of Benjamin Frothingham, v. The United States and in other cases (H. Doc. No. 548); to the Committee on Claims and ordered to be printed.

51. A letter from the clerk of the Court of Claims, transmitting the findings of fact and conclusions of law in the French spoliation claims relating to the vessel schooner Delight in the cases of William S. Squires, administrator of Henry Pratt, surviving partner of Pratt & Kintzing, v. The United States, and in other cases (H. Doc. No. 533); to the Committee on Claims and

ordered to be printed.

52. A letter from the clerk of the Court of Claims, transmit-ting the findings of fact and conclusions of law in the French spoliation claims relating to the vessel ship Ann and Mary in the cases of Louise A. Starkweather, administratrix of Richard E. Hallett, v. The United States, and in other cases (H. Doc. No. 552); to the Committee on Claims and ordered to be printed.

A letter from the clerk of the Court of Claims, transmitting the findings of fact and conclusions of law in the French spoliation claims relating to the vessel schooner Three Friends in the cases of Brooks Adams, administrator of Peter C. Brooks, v. The United States, and in other cases (H. Doc. No. 532); to

the Committee on Claims and ordered to be printed. 54. A letter from the clerk of the Court of Claims, transmitting the findings of fact and conclusions of law in the French spoliation claims relating to the vessel brig Iris in the cases of John C. Hollister, administrator of Thomas Ward, v. The United States, and in other cases (H. Doc. No. 521); to the Committee

on Claims and ordered to be printed. 55. A letter from the clerk of the Court of Claims, transmitting the findings of fact and conclusions of law in the French spoliation claims relating to the vessel sloop Rising Sun in the cases of Elijah K. Hubbard, administrator of Jacob Sebor, v. The United States, and in other cases (H. Doc. No. 556); to the

Committee on Claims and ordered to be printed.

56. A letter from the clerk of the Court of Claims, transmit-ting the findings of fact and conclusions of law in the French spoliation claims relating to the vessel ship Polly, in the case of Joseph S. Webster, administrator of Thomas Webster, v. The United States (H. Doc. No. 547); to the Committee on Claims

and ordered to be printed. 57. A letter from the clerk of the Court of Claims, transmitting the findings of fact and conclusions of law in the French spoliation claims relating to the vessel schooner Chance, in the cases of Waldo H. Warner, administrator of Simeon Williams, v. The United States and Albert Galpin, administrator of Hahn Woodhouse, v. The United States (H. Doc. No. 531); to the

Committee on Claims and ordered to be printed.

58. A letter from the clerk of the Court of Claims, transmitting the findings of fact and conclusions of law in the French spoliation claims relating to the vessel sloop Catherine, in the case of Henry J. Dubois, administrator of John Peterson, v. The United States and in other cases (H. Doc. No. 555); to the Committee on Claims and ordered to be printed.

59. A letter from the Acting Secretary of War, transmitting a draft of a bill for the better protection of national military parks (H. Doc. No. 578); to the Committee on Military Affairs

and ordered to be printed.

60. A letter from the Acting Secretary of the Treasury, transmitting copy of a communication of the Secretary of War, submitting a supplementary estimate of appropriation for the service of the fiscal year ending June 30, 1915 (H. Doc. No. 562); to the Committee on Military Affairs and ordered to be printed. Committee on Interstate and Foreign Commerce.

By Mr. WALLIN: Petition of various residents of Schenectady County, N. Y., favoring the enactment of House bill 6060, relating to the immigration of aliens; to the Committee on Immigration and Naturalization.

Also, petition of the Woman's Christian Temperance Union of the State of New York, favoring the adoption of House joint resolution 168, relating to the sale of liquors; to the Commit-

tee on the Judiciary.

Also, resolutions of local Socialist Party of Rotterdam Junction, N. Y., petitioning a congressional investigation of strike

conditions in Michigan; to the Committee on Rules.

Also, resolutions of the Socialist Party of Johnstown, N. Y., favoring a congressional investigation of strike conditions in Michigan; to the Committee on Rules.

Also, petition of Kuhn, Loeb & Co., of New York, lavoring an amendment to House bill 6060, restricting classes of immigrants; to the Committee on Immigration and Naturalization.

Also, memorial of the administrators of the National Society for the Promotion of Industrial Education, favoring passage of

Senate resolution 5, providing for a national commission on vocational education; to the Committee on Education.

By Mr. WILLIS: Petition of Curtis V. Livingston and 157 other citizens of Urbana, Ohio, favoring the passage of the Burnett bill to provide a literacy test for immigrants; to the Committee on Immigration and Naturalization.

By Mr. WHITE: Petition of the Farmers' Institute of Guernsey County, Ohio, favoring the passage of the bill for the sub-mission of an amendment to the Federal Constitution to the States for their ratification for national prohibition; to the Committee on the Judiciary

By Mr. WOODRUFF: Petition of citizens of Cheboygan, Mich., requesting that an appropriation be made for dredging Cheboygan River; to the Committee on Rivers and Harbors.

SENATE.

Tuesday, January 13, 1914.

Prayer by the Chaplain, Rev. Forrest J. Prettyman, D. D. The Journal of yesterday's proceedings was read and approved. MESSAGE FROM THE HOUSE,

A message from the House of Representatives, by J. C. South, its Chief Clerk, announced that the House had passed the bill (S. 3484) to amend an act entitled "An act to codify, revise, and amend the laws relating to the judiciary," approved March 3, 1911, being chapter 231 of Thirty-sixth Statutes at Large.

The message also announced that the House had passed a bill (H. R. 10523) making appropriations to provide for the expenses of the government of the District of Columbia for the

fiscal year ending June 30, 1915, and for other purposes, in which it requested the concurrence of the Senate.

The message further announced that the House had agreed to the amendments of the Senate to the bill (H. R. 1966) to amend an act entitled "An act to prohibit the importation and use of opium for other than medicinal purposes," approved February 1909.

The message also announced that the House had agreed to the amendments of the Senate to the bill (H. R. 1967) regulating the manufacture of smoking opium within the United States, and for other purposes.

ENROLLED BILLS SIGNED.

The message further announced that the Speaker of the House had signed the following enrolled bills, and they were thereupon signed by the Vice President:

H. R. 1966. An act to amend an act entitled "An act to prohibit the importation and use of opium for other than medicinal purposes," approved February 9, 1909; and H. R. 1967. An act regulating the manufacture of smoking

opium within the United States, and for other purposes.

PETITIONS AND MEMORIALS.

The VICE PRESIDENT presented memorials of the Daniel H. Comber Club, of Philadelphia, Pa.; of George Washington Branch, American Continental League, of Danbury, Conn.; of the Vinegar Hill Club, of Philadelphia, Pa.; and of John Hancock Branch, American Continental League, of Lynn, Mass., remonstrating against an appropriation being made for the celebration of the so-called 100 years of peace among English-speaking peoples, which were referred to the Committee on Foreign Relations

Mr. WORKS presented a petition of sundry citizens of Los Angeles, Cal., praying for the enactment of legislation for the relief of persons who served in the United States Military Telegraph Corps during the Civil War, which was referred to the Committee on Pensions.

Mr. CUMMINS presented a petition of sundry citizens of Treynor, Iowa, praying for the enactment of a national cooperative rural bank law, which was referred to the Committee on

Agriculture and Forestry.
Mr. NELSON presented resolutions adopted by Local Lodge No. 615, International Association of Machinists, of Proctor; of the Building Trades Council of Minneapolis; of Local Lodge No. 110, International Brotherhood of Electrical Workers, of St. Paul; and of North Shore Lodge, No. 647, International Association of Machinists, of Two Harbors, all in the State of Minnesota, favoring the enactment of legislation to make lawful certain agreements between employers and laborers and persons engaged in agriculture or horticulture, and to limit the issuing of injunctions in certain cases, and for other purposes, which were referred to the Committee on the Judiciary.

He also presented resolutions adopted by the St. Paul Association of Credit Men, of Minnesota, favoring appropriations for the completion of a system of levees along the Mississippi River for protection against floods, which were referred to the Committee on Commerce

He also presented a memorial of the German American Alliance of Minnesota, remonstrating against the adoption of an amendment to the Constitution to prohibit the manufacture, sale, and importation of intoxicating liquors, which was referred to the Committee on the Judiciary.

He also presented a memorial of Workmen's Circle Branch,

No. 266, of St. Paul, Minn., and a memorial of the City Central Committee of the Socialist Party of Duluth, Minn., remonstrating against the passage of the so-called Burnett immigration bill, which were referred to the Committee on Immigration.

Mr. BRISTOW presented a petition of sundry citizens of Conway Springs, Kans., praying for an investigation into the conditions existing in the mining districts in Michigan, which was referred to the Committee on Education and Labor.

He also presented memorials of sundry citizens of Wichita, Nekoma, and Osborne County, all in the State of Kansas, remonstrating against the enactment of legislation compelling the observance of Sunday as a day of rest in the District of Columbia, which were referred to the Committee on the District of Columbia.

He also presented a petition of sundry citizens of Asherville, Kans., praying for the adoption of an amendment to the Con-stitution to prohibit the manufacture, sale, and importation of intoxicating liquors, which was referred to the Committee on the Judiciary.

He also presented a petition of sundry citizens of Minneapolis, Kans., praying for the enactment of legislation to further re-

strict immigration, which was referred to the Committee on Immigration.

He also presented petitions of sundry citizens of Kansas City, Kans., praying for the enactment of legislation authorizing the classification of the salaries of employees of the Bureau of Animal Industry, Agricultural Department, which were referred to the Committee on Agriculture and Forestry,

He also presented a petition of sundry citizens of Colony, Kans., praying for the passage of the so-called Federal farmloan bill, which was referred to the Committee on Banking and

Mr. CHAMBERLAIN presented a petition of sundry citizens of Astoria, Oreg., praying that an investigation be made of the conditions existing in the mining districts of Michigan, which was referred to the Committee on Education and Labor.

Mr. NORRIS presented a memorial of sundry citizens of Beaver City, Nebr., remonstrating against the enactment of legislation compelling the observance of Sunday as a day of rest in the District of Columbia, which was referred to the Committee on the District of Columbia,

He also presented a petition of sundry citizens of Glenville, Nebr., praying for the enactment of legislation to further re-strict immigration, which was referred to the Committee on

Immigration.

Mr. PERKINS presented a memorial of sundry citizens of Los Angeles, Cal., remonstrating against the enactment of legislation compelling the observance of Sunday as a day of rest in the District of Columbia, which was referred to the Committee on the District of Columbia.

Mr. McLEAN presented a memorial of George Washington Branch, American Continental League, of Danbury, Conn., remonstrating against an appropriation for the celebration of a hundred years of peace among English-speaking peoples, which

was referred to the Committee on Foreign Relations. Mr. POINDEXTER presented a petition of sundry citizens of the State of Washington, praying that an appropriation be made to continue the present improvements for deepening the entrance of Grays Harbor, in that State, which was referred to the Committee on Commerce.

AMENDMENT OF THE CONSTITUTION.

Mr. SUTHERLAND. I am directed by the Committee on the Judiciary to report back adversely, and with amendments, the joint resolution (S. J. Res. 26) proposing an amendment to the Constitution of the United States, and I submit a report (No. 147) thereon. The joint resolution provides for a more ready amendment of the Constitution. I do not make the usual motion to postpone indefinitely the joint resolution. I understand that the Senator from Iowa [Mr. CUMMINS] desires that it shall go to the calendar.

Mr. CUMMINS. I ask that it be placed on the calendar for

future consideration.

The VICE PRESIDENT. It will go to the calendar.
Mr. CUMMINS. At a later time the minority will ask leave to submit their views upon the joint resolution.

R. W. BRANSON.

Mr. BRADLEY, from the Committee on Claims, to which was referred the bill (S. 156) for the relief of R. W. Branson, reported it with amendments and submitted a report (No. 148)

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows: By Mr. SMITH of Arizona:

A bill (S. 3957) granting title to the town of Winslow, Ariz., to certain lands for cemetery and park purposes; and

A bill (S. 3958) excluding mineral lands from Executive-order reservations; to the Committee on Public Lands.

By Mr. SMITH of Georgia:

A bill (S. 3959) for the relief of heirs or estate of John M. H. Martin, deceased (with accompanying paper); to the Committee on Claims.

By Mr. OLIVER:

A bill (S. 3960) granting an increase of pension to Adam Daum (with accompanying papers); to the Committee on Pen-

By Mr. BRISTOW:

A bill (S. 3961) granting an increase of pension to Morris P.

A bill (S. 3962) granting an increase of pension to Joseph W. B. McClintock;

A bill (S. 3963) granting an increase of pension to George W.

Carroll (with accompanying papers);
A bill (S. 3064) granting a pension to Joanna Hall (with accompanying papers); and

A bill (S. 3965) granting an increase of pension to William Greer (with accompanying papers); to the Committee on Pen-

By Mr. BRADY:

A bill (S. 3966) granting an increase of pension to E. Alice Camp; and

A bill (S. 3967) granting an increase of pension to Abram R. Darling (with accompanying papers); to the Committee on Pen-

By Mr. SMOOT:

A bill (S. 3968) giving a new right of homestead entry to former homesteaders; to the Committee on Public Lands. By Mr. NELSON:

A bill (S. 3969) granting an increase of pension to John H. McCreary (with accompanying papers); to the Committee on Pensions.

By Mr. HOLLIS:

A bill (S. 3970) granting an increase of pension to Nettle Jackson (with accompanying papers); to the Committee on Pensions.

A bill (S. 3971) to provide for a permanent exhibit of the resources of the States of the Union in or near Washington, D. C .; to the Committee on Industrial Expositions.

By Mr. CHAMBERLAIN:

A bill (S. 3972) granting an increase of pension to Horace M. Patton; to the Committee on Pensions.

By Mr. ASHURST:

A bill (S. 3973) granting a pension to William Armbruster; to the Committee on Pensions.

By Mr. BURLEIGH:

A bill (S. 3974) granting an increase of pension to James H. Stinson; to the Committee on Pensions.

By Mr. McLEAN:

A bill (S. 3975) granting an increase of pension to Julia M.

Gorham (with accompanying papers); and A bill (S. 3976) granting an increase of pension to Patrick J. Moran (with accompanying papers); to the Committee on Pen-

By Mr. MARTIN of Virginia:

A bill (S. 3977) granting a pension to A. F. Venable; and A bill (S. 3978) granting a pension to Willis D. Clark; to the Committee on Pensions.

A bill (S. 3979) for the relief of Martha H. Schultz; and

A bill (S. 3980) for the relief of the estate of John D. Hicks, sr.; to the Committee on Claims.

By Mr. BRADLEY:

A bill (S. 3981) for the relief of the heirs or estate of J. Howard Sheffer, deceased (with accompanying paper); to the Committee on Claims.

A bill (S. 3982) granting a pension to Hannah Meece; A bill (S. 3983) granting an increase of pension to Jobe Mor-

ris (with accompanying papers); and

A bill (S. 3984) granting an increase of pension to Henry C. Taylor (with accompanying papers); to the Committee on Pensions.

By Mr. PITTMAN:

A bill (S. 3985) providing for the leasing and control of coal lands in Alaska; to the Committee on Mines and Mining.

By Mr. O'GORMAN:

A bill (S. 3986) to promote Robert Andrew Abernathy, lieutenant commander, United States Navy (with accompanying paper); to the Committee on Naval Affairs.

REGULATION OF POLYGAMY.

Mr. WEEKS. Mr. President, during the special session I introduced by request a joint resolution proposing an amendment to the Constitution of the United States for the regulation of polygamy in the United States. I wish at this time to present a supplementary resolution referring to the same subject, with amendments, and I ask that it be referred to the Committee on the Judiciary.

The joint resolution (S. J. Res. 96) proposing an amendment to the Constitution of the United States was read twice by its title and referred to the Committee on the Judiciary.

OMNIBUS CLAIMS BILL.

Mr. THOMPSON submitted an amendment intended to be proposed by him to the omnibus claims bill, which was referred to the Committee on Claims and ordered to be printed.

NEW YORK STATE CLAIMS.

Mr. O'GORMAN submitted an amendment authorizing the Secretary of the Treasury to reopen, adjust, and audit the claims of the State of New York, etc., intended to be proposed by him to the general deficiency appropriation bill, which was

referred to the Committee on Appropriations and ordered to be printed.

R/ILROADS IN ALASKA.

Mr. SMOOT submitted an amendment intended to be proposed by him to the bill (S. 48) to authorize the President of the United States to locate, construct, and operate railroads in the Territory of Alaska, and for other purposes, which was referred to the Committee on Territories and ordered to be printed.

SUPPLY OF OIL FOR NAVAL USES.

Mr. GORE submitted the following resolution (S. Res. 244) 7/hich was read, considered by unanimous consent, and agreed

Resolved, That the Secretary of the Navy and the Secretary of the Interior are hereby authorized and directed to investigate and report as to the feasibility, expense, and desirability of the Government constructing, maintaining, and operating a pipe line for the transportation of oil from the midcontinent oil field in Oklahoma to some convenient port on the Guif of Mexico, together with storage and other necessary facilities; and also as to the feasibility, expense, and desirability of the Government acquiring oil lands or leases from the Indian and other owners and producing or purchasing oil with a view to providing and conserving at all times an adequate and available supply of oil for the NAVY, and for other purposes.

MONOGRAPH ON IMPEACHMENT OF FEDERAL JUDICIARY (S. DOC. NO. 358).

Mr. ROOT. Mr. President, immediately after the trial of the impeachment case against Judge Archbald, Mr. Wrisley Brown, who conducted the original investigation in that case and was designated by the managers in behalf of the House of Representatives to assist in the trial, prepared a monograph on the impeachment of the Federal judiciary, which is very instructive and will be of very great value when taken in connection with the proceedings in the Archbald case. I ask unanimous consent that it may be printed as a public document.

The VICE PRESIDENT. Is there any objection? The Chair

hears none, and it is so ordered.

DIRECT LEGISLATION (S. DOC. NO. 360).

Mr. OWEN. I ask to have printed as a public document an article by Prof. Frank E. Parsons on popular government through initiative, referendum, and recall.

The VICE PRESIDENT. Without objection, it is so ordered.

AGRICULTURAL EXTENSION WORK.

Mr. SMITH of Georgia. Mr. President, I desire to give notice that at the close of the morning business on Saturday next I wish to address the Senate in support of a bill for cooperative agricultural extension work between the agricultural colleges in the several States and the Department of Agriculture.

HOUSE BILL REFERRED.

H. R. 10523. An act making appropriations to provide for the expenses of the government of the District of Columbia for the fiscal year ending June 30, 1915, and for other purposes, was read twice by its title and referred to the Committee on Appro-

THE UNITED STATES STEEL CORPORATION.

The VICE PRESIDENT. The Chair lays before the Senate a resolution which comes over from a preceding day. It will

The Secretary read Senate resolution 241, submitted yesterday by Mr. Lane, as follows:

The Secretary read Senate resolution 241, submitted yesterday by Mr. Lane, as follows:

*Resolved**, That the Interstate Commerce Commission is hereby directed to conduct an examination and inquiry for the purpose of ascertaining whether there exist facts or evidence that in the opinion of the commission would justify the Government in instituting suits or legal proceedings for recovery of fines, penalties, or forfeitures from the United States Steel Corporation, its subsidiaries, or any common carrier because of unlawful rebates, offsets, and preferences received and accepted by the above-named corporation or its constituent companies within the last six years.

The Interstate Commerce Commission is hereby directed to hear all witnesses and testimony in pursuance of this resolution at open public hearings to be held before one or more members of the commission.

The Interstate Commerce Commission is hereby further directed to forthwith subpean and bring before it William H. Green, of Creighton, Nebr., to give testimony before said commission relative to unlawful rebates, offsets, or preferences received and accepted by the United States Steel Corporation and its subsidiary corporations from common carriers, as aforesaid.

And should said William H. Green, when before the commission, name any other person or persons as having knowledge of facts or evidence showing payments of unlawful rebates, offsets, or preferences to said United States Steel Corporation or subsidiary thereof, as aforesaid, then the Interstate Commerce Commission is hereby directed to forthwith subpean and examine before it any such person or persons: Provided, That nothing in this resolution shall be construed as affecting the discretion of the commission with respect to the taking of the testimony of any witness or causing such witness to produce books or papers when it appears that such witness is an employee, agent officer, or director of the United States Steel Corporation, any subsidiary thereof, or of any common carrier.

The commissio

particulars of all material facts and evidence as revealed by the in-quiry herein provided for, together with the opinion of the commission

The VICE PRESIDENT. The question is on agreeing to the resolution.

Mr. CUMMINS. Mr. President, when the resolution was presented yesterday I was unable to gather its full import and I suggested that it ought to be referred to the Committee on Interstate Commerce. I did that because I am opposed to imposing further labor upon an already overburdened department of the Government, namely, the Interstate Commerce Commission.

I have read the resolution since and become familiar with it, and I do not think that it is necessary that it shall go to a committee, but I desire to make a suggestion to the Senator from Oregon. Instead of authorizing or directing the Inter-state Commerce Commission to make this inquiry, it seems to me that it ought to be directed to the Department of Justice. We must take account of the condition of things in the Interstate Commerce Commission. It has more work than it can possibly do. It is far behind, and necessarily far behind, in the investigation and decision of applications or complaints made against excessive railway rates. It is now employed, as we all know, in beginning the valuation of our railway property. To require it to make an investigation of this sort, which does not belong to it, but which does belong properly to the Department of Justice, is to deny to the people of this country the relief which they have a right to expect at the hands of the Interstate Commerce Commission in the decision of com-

plaints that are now pending before it.

I believe that the Senate ought to protect the commission against this additional work. If the facts that are alleged here are true-and I have no reason to doubt the information of the Senator from Oregon—they constitute a criminal offense, made so by the interstate-commerce law, and those who are guilty should be punished; and if they are to be punished they must be punished through the medium of the Department of Justice. That department maintains an investigating bureau, and I suggest to the Senator from Oregon that he amend the resolution so that the Department of Justice shall do this work instead of the Interstate Commerce Commission. I intend to take the same position with regard to every unnecessary thing that is asked of the Interstate Commerce Commission. I know just how overburdened it is, and it is not fair, it seems to me, to put this work upon it when the work can be done by the Department of Justice just as well.

Mr. LANE. Mr. President, I will say to the Senator from Iowa that I have no prejudice about where this matter is investigated further than I wish a speedy, thorough, and complete investigation. If that can be secured to better advantage by the Department of Justice, I have no objection to that course. But it seemed to me that it was legitimate work for the Interstate Commerce Commission, and that they are prepared to handle the work.

Mr. NEWLANDS. Mr. President, it is impossible for me to hear the Senator from Oregon owing to the noise in the Senate Chamber.

The VICE PRESIDENT rapped with his gavel.

Mr. LANE. The Senator from Nevada is to be congratulated; he would not learn much, I fear, from hearing me, and probably he is better off. What I do desire and wish to accomplish is the one object of securing a complete investigation of these charges, which I believe to be true. As I said before, I assume that the Interstate Commerce Commission, being more familiar with the subject, is better fitted for this type of an investigation. That is the reason why I asked for its reference there, and I even supposed that it properly belonged there. I should like to ask the Senator from Idaho [Mr. Borahl] if he thinks that this investigation would be better carried on by the Department of Justice? I wish to ask what, in his opinion, is the better course? I am not familiar with the metter. I say frankly. matter, I say frankly.

Mr. BORAH. Mr. President, I sympathize with the views expressed by the Senator from Iowa [Mr. Cummins] with reference to the crowded condition of affairs before the Interstate Commerce Commission, but this resolution may result in very short and a very brief investigation.

Mr. LANE. I think it will.

Mr. BORAH. The resolution, as I read it, calls for the hearing of one witness. Then, if the commission should come to the conclusion that there is nothing worth while, that there are no connections which ought to be followed up, there the matter ends. While I think the position which the Senator from Iowa takes is generally correct, I should be in favor of sending this particular resolution to the Interstate Commerce

Commission, because I think it likely that it will involve but

a very brief investigation.

That was my opinion and my view of the matter. The work of the Interstate Commerce Commission is behind, no doubt, and it will drag on indefinitely. I therefore asked that the resolution be referred to the commission, with the assumption that the preliminary investigation, at least, will be brief, that it will not take much of their time, and that it is more important than many of the matters which are now pending before them.

Mr. CUMMINS. If the Senator from Oregon has any reason to think that the investigation could not be properly made by

the Department of Justice, I yield to that condition.

Mr. LANE. I must confess my ignorance of the manner in which the investigation would be carried on by the Department of Justice. It seems to me that it legitimately belongs to the Interstate Commerce Commission, and I see no reason-none has been advanced-which appeals to me for making a change.

Mr. GALLINGER. Mr. President-

The VICE PRESIDENT. Does the Senator from Oregon yield to the Senator from New Hampshire?

Mr. LANE. I yield.

GALLINGER. There is one unusual provision in this resolution, and that is the naming of a certain individual who shall be forthwith called. I would ask the Senator from Oregon what is the need of that? Whether this investigation be made the Interstate Commerce Commission or by the Department of Justice, very naturally they will be given knowledge concerning the man named in the resolution. It seems to me it does not strengthen the resolution, and it is an unusual provision in a resolution of this nature.

Mr. LANE. Mr. President, I think the Senator from New Hampshire is quite right in that; I think myself it is unusual. It was merely put into the resolution to aid and to point out directly and specifically how the commission could begin work and immediately receive the information, thereby shortening

Mr. GALLINGER. I think it ought not to remain in the resolution. But of course the committee, if the resolution is referred, will consider that matter; otherwise I should move to strike out the language.

Mr. NEWLANDS. Mr. President-

The VICE PRESIDENT. Does the Senator from Oregon yield to the Senator from Nevada?

Mr. LANE, I yield.

Mr. NEWLANDS. Will the Senator from Oregon permit me to suggest that his purpose would be furthered by a reference of the resolution to the Committee on Interstate Commerce? If that be done, I will call the committee together immediately and make a speedy report regarding the resolution.

Mr. President, I thank the Senator from Nevada for the offer, but I should prefer not to accept it. I should like to have the resolution go directly into the hands of the Interstate Commerce Commission, and I should like to have the Senate act upon it directly this morning. I do not want it put off into the hands of a committee. I do not want to begin

that process; I prefer the direct and shorter route.

Mr. NEWLANDS. Mr. President, I shall ask that the usual course be pursued with reference to this matter. resolution pertaining to a subject that is within the jurisdiction of the Senate Committee on Interstate Commerce, and it seems to me eminently appropriate that the resolution should go to that committee for its consideration and action before any action is taken by the Senate. The Senator from Oregon himself seems to be in some doubt-

Mr. CUMMINS. Mr. President, we on this side of the Chamber are unable to hear, though we should like to hear the

remarks of the Senator from Nevada.

Mr. NEWLANDS. I was stating, Mr. President, that this resolution involved a subject that is within the jurisdiction of the Senate Committee on Interstate Commerce, and I urged that the usual course be pursued of referring it to that committee. It is my purpose to call that committee together at an early day to consider the resolution, should it be referred to The Senator from Oregon [Mr. LANE] himself is in some doubt, as I understand, as to whether this investigation should be pursued by the Interstate Commerce Commission or by the Department of Justice. It seems to me that that is a matter that ought to be considered, and seriously considered, by the Interstate Commerce Committee before any action whatever is taken on the subject of the resolution. I therefore move that the resolution be referred to the Committee on Interstate Commerce

Mr. BORAH. Mr. President, I want to ask the Senator from Mr. LANE. I ask for the consideration and adoption of the Nevada if there is anything about this resolution which really resolution, Mr. President.

needs the action of a committee? It simply authorizes the Interstate Commerce Commission to call before it a witness to ascertain something which everyone ought to wish to know, and that is the status of rebates with reference to a certain organization. So far as I am concerned, I have no objection to a matter of this kind going to a committee, except the fact that we know that that means a postponement; and as to a simple resolution of this kind, it occurs to me that it is unnecessary to have it delayed in that way.

Mr. NEWLANDS. Mr. President, I will state that the objection which the Senator from Idaho makes to my proposal could be made as to any bill or resolution introduced in this body, and would entirely do away with the orderly procedure which the Senate has laid down for the consideration of such matters. There is a question to be considered here that has already been raised by the discussion between the Senator from Iowa [Mr. CUMMINS] and the Senator from Oregon [Mr. Lane]; that is, as to whether this inquiry should be made by the Department of Justice or by the Interstate Commerce Commission. It seems to me that the proper committee ought to consider that question as well as the other questions involved in the reso-

So far as delay is concerned, I simply have to say that I intend to call the committee together immediately for the consideration of this resolution; and there will be no delay in its

consideration or in a report.

Mr. LANE. Mr. President, I wish to say that I thank the Senator from Nevada for his very kind offer to take the resolution into the hands of his committee; but it is a simple proposition. The orderly procedure which goes on here in committee work is conducive to delay and to the loss of a great deal of time. I have not that very high regard for it, perhaps, that I ought to be governed with. I am not speaking now of the Senator's committee particularly, but about committees of this body in general. This is a simple proposition, direct, easily understood, and it does not have to be weighed or lathered into shape or anything of that kind, and can be put right through here. I shall insist, to the extent of my ability, that the resolution receive consideration at the hands of this body here and now, to-day, and that it do not go to a committee. I shall call for a vote on it, if it is necessary, by the yeas and nays.

Mr. TOWNSEND. Mr. President—
The VICE PRESIDENT. Does the Senator from Oregon yield to the Senator from Michigan?

Mr. LANE. I yield.

Mr. TOWNSEND. I wish to ask the Senator from Oregon if the particular case to which he refers in his resolution has already been called to the attention of the Interstate Commerce Commission? I ask this for the reason that that commission certainly has power to investigate all cases of rebates. I suppose that the Senator from Oregon must have some especial reason for bringing the matter up in this way, instead of himself taking it directly to the Interstate Commerce Commission.

Mr. LANE. In reply, Mr. President, I will say that I do not know whether or not the commission have information on the subject. I assume that they have not. I am under the impression that this is the first they have heard of it. I want to call it to their attention, for I think it is a matter of importance, so that the commission may begin an immediate investigation.

Mr. BORAH. Mr. President, this is one way to call it to the attention of the commission, and a very proper and a very dignified way. The matter could be brought to the attention of the commission by letter, but it has been done in this way heretofore, and I see no reason why it should not be done now.

Mr. President, I do not understand why there should be any opposition to this resolution. The objection made by the Senator from Iowa [Mr. Cummins] was purely one for the convenience of the commission, and for no other reason, as I understood. The resolution involves a very simple proposition. If it should develop that there are important facts, then the commission can proceed to a further investigation; but it leaves it to the commission to determine. If there are important facts, certainly no one desires to conceal them.

If the resolution is referred to a committee-I do not care what the committee is; I am not making any invidious comparisons-it must necessarily mean considerable delay; and when it comes out of the committee the same discussion and the same procedure will have to be had with reference to its passage. In the meantime, if the resolution is passed, the commission will have investigated the matter and may have concluded it before the committee could report.

Mr. NEWLANDS. Mr. President, the Senator from Oregon, as I understand, objects to the usual course of procedure with reference to this resolution—

Mr. LANE. I do.

Mr. NEWLANDS. Not because, as he says, he lacks any particular confidence in the Committee on Interstate Commerce, but because he lacks confidence in the whole system, as I understand, of committee references.

Mr. LANE. Because of the delay involved.

Mr. NEWLANDS. That seems to me a rather revolutionary statement. It is immaterial to me whether or not the Senate refers a particular resolution to the committee of which I am chairman. I simply felt it my duty in this case, as chairman of the committee, to insist upon the usual course of procedure. I am entirely willing to yield, of course, and to yield cheerfully, to the judgment of the Senate with reference to it. I submit, however, that there is no such exigency as demands immediate action upon this resolution. The matters complained of have been of long standing; they have probably already been the subject of some investigation, either by the Bureau of Corporations or by the Interstate Commerce Commission or by the Department of Justice.

The question is raised here whether, as a matter of orderly procedure, the investigation should be made by the Department of Justice or by the Interstate Commerce Commission. If this resolution goes to the committee, one of its first inquiries will be as to whether any such investigation is now being pursued either by the Department of Justice, by the Interstate Commerce Commission, or by the Bureau of Corporations; and, if such an investigation is being pursued, it will doubtless be un-

necessary to duplicate the investigation.

I have already given assurance to the Senator from Oregon that my proposal is not for the purpose of delay, but simply to promote orderly and deliberate consideration. It is my purpose immediately to call the committee together to consider and report upon the resolution. I, therefore, ask for a vote of the

Senate upon its reference.

Mr. ROOT. Mr. President, I am quite indifferent about this resolution, whether it is to be passed upon nov or go to the Committee on Interstate Commerce. If any Senator feels, as the Senator from Oregon evidently does, that there ought to be an inquiry into this specific subject, then there ought to be inquiry into it. I think, however, that we ought to consider to some extent a question that occurs to me-perhaps it is already settled, but, if it is not, we may be making an awkward and injudicious precedent by passing the resolution in just this form. The resolution does not merely call upon the Interstate Com-merce Commission for information, but it gives orders to the commission to do certain things, and orders it to do those things in a particular way. It is directed to hear all witnesses and testimony at open public hearings; it is directed to forthwith subpæna and bring before it a certain named person; it is directed to forthwith subpœna and examine any person named by it in a particular way, and so forth. Query, whether one House of Congress alone is competent to give orders to the Interstate Commerce Commission? This is not a joint or a concurrent resolution.

Mr. SMITH of Georgia. Is there any doubt about the fact

that it can not do so?

Mr. ROOT. It is quite a new idea to me, sir, that a commission having been created by law, endowed with certain powers and with certain discretion, can be ordered specifically and in detail as to the performance of its duties by one House of Congress. Suppose the House were to order the commission to do something different, what is the commission to do? I think, sir, if Congress is to give the order, it should be done by a concurrent resolution. I fear that we will establish a precedent which will tend to bad administration and get us all into trouble if we undertake to exercise this kind of power through a resolution adopted by one House of Congress.

Mr. LANE. Mr. President, I will ask the Senator—it may be that he is right, and perhaps I have not drawn the resolution as it should have been drawn—if he can suggest some way which would make it more active in that respect; that is, enable us to get quicker action? If he can do so, I will gladly accept his

suggestion

Mr. LIPPITT. Mr. President, if the Senator will yield to me, it seems to me very manifest, from the discussion that has already gone forth upon this resolution, that the proper disposition of it is the orderly course of procedure of referring it to a committee for examination and consideration as to the general principle that is involved and as to the detail of the exact method in which it should be done. It has already been shown on the floor that there are several different points of criticism of this measure. I am not a lawyer, but it would seem manifest

to me, from a layman's standpoint, that such an investigation as this belongs to the judicial department and not to the Interstate Commerce Commission. It also seems evident to me that the subject ought to be considered in a more careful way than can possibly be done in a few minutes on the floor of the Senate, and so I hope the resolution will be referred to the committee.

Mr. BORAH. Mr. President, this resolution reads:

Resolved, That the Interstate Commerce Commission is hereby directed to conduct an examination and inquiry for the purpose of ascertaining whether there exist facts or evidence that in the opinion of the commission would justify the Government in instituting suits or legal proceedings for recovery of fines, penalties, or forfeitures from the United States Steel Corporation, its subsidiaries, or any common carrier because of unlawful rebates, offsets, and preferences received and accepted by the above-named corporation or its constituent companies within the last six years.

I have no doubt but that if this resolution were passed the Interstate Commerce Commission would make the investigation. I have not very much doubt, from facts within my knowledge, that if they did make the investigation they would ascertain some very interesting facts, and some facts which ought to be known without any unnecessary delay. While the resolution might be drawn with greater regard for legal technicalities, and so forth, I do not feel myself like voting against the resolution, when I feel that it will accomplish precisely what we ought to have accomplished and what we ought to desire accomplished. Just at this particular time it is important that this information be had, and it ought not to be delayed.

Mr. NORRIS. Mr. President, I should like to say just a word with reference to what has been said by the Senator from

New York [Mr. Root].

It seems to me the Senate has been in the habit of doing this regularly right along, and, as the Senator from Idaho [Mr. Borah] has suggested, I think if we do pass the resolution there is not any doubt but that the Interstate Commerce Commission will follow the instructions in the resolution.

We have instructed the Interstate Commerce Commission several times recently to make investigations in regard to railroads—investigations similar, I think, to this and as broad in their scope as this. Even to-day we have already passed a resolution authorizing and directing the Secretary of the Navy, and the Secretary of the Interior to investigate and report. Suppose, as the Senator from New York says, the House passes a resolution on the same subject upon which we have passed a resolution to-day and one that conflicts with the resolution we have passed. What will these Cabinet officers do?

I think we might imagine a thousand things that might get us into difficulty; but until they happen it seems to me it is not well for us to pay much heed to what might be a possibility. Mr. BORAH. Mr. President, if the Senator will permit me a

Mr. BORAH. Mr. President, if the Senator will permit me a suggestion, there never could be any conflict between two resolutions which the Senate and the House might pass, because there would be so much time intervening between the time they both passed that the commission would have plenty of time to report upon both.

report upon both.

Mr. NORRIS. That might be if they both went to committees; but I am assuming that in neither case would they go to a committee. I think we have already done this morning, in regard to the Secretary of the Navy and the Secretary of the Interior, what we would do if we should pass this resolution in regard to the Interstate Commerce Commission.

It seems to me this investigation ought to take place. I myself believe that the Interstate Commerce Commission is perhaps the one body that commands the respect and confidence of the entire people of the United States more than any other body, and in saying this I am not casting any reflections on any department of the Government or any other body. It is a body which has to do with railroad companies, the subject with which this resolution deals. While I do not know anything about the details, from what I have read and various things I have heard I believe that if this resolution should be passed an investigation taking place under it would develop some very interesting procedures. It may be they could all be explained, but they are something that the country ought to know.

Mr. LODGE. Mr. President, I do not desire to discuss the resolution, but I should like to ask why the resolution is not on our desks in printed form. We are using the Record. This resolution was introduced at this hour yesterday. It is not a long resolution, and yet it has not come from the Printing Office. The resolution of the Senator from Arizona [Mr. Ashurst] has only just this minute come; it has just been handed to us. The work is not heavy, and especially resolutions which go over and come up automatically ought to be furnished to the Senate. It is something most extraor-

dinary that the Printing Office can not get up a resolution of this sort so as to have it on the desks of Senators.

Mr. BACON. Mr. President, I am not prepared to go entirely the length that the Senator from New York [Mr. Root] suggests in the observations he has submitted. One of the fundamental necessities of legislation is that either the Senate or the House shall, for its own purpose, have the power to secure all the information which it desires for purposes of legislation. It is with that recognition that we direct the heads of departments to furnish to the Senate, or that the House may require to be furnished for the purposes of the House, any information, whether in one shape or another, which may be available by a department which this House or the other House, in the exercise of its discretion, may deem to be necessary for it properly to legislate.

So far as concerns the fundamental thought in the suggestion of the Senator from New York, I think it is correct that as a fundamental proposition one House can not issue orders to a department or to a subdivision of a department which may be in the nature of a law, for the reason that the other House would have an equal right and the two might conflict. That far the Senator is right, and doubtless that is the thought which he desired to present. It is equally true, however, that each House has the right to require of a department, not that which may be generally classed as being in itself when performed in obedience to law, but that which will secure what is necessary for its work as a part of the legislative department of the Government.

I confess that this resolution in prescribing details goes a good deal further than efforts of this kind are generally found It is quite common, as stated by the Senator from Nebraska [Mr. Norris], for the Senate to pass a resolution directing a department to investigate and report. If this resolution had in it no provision for reporting to the Senate, I think the criticism would be unanswerable that we were doing something beyond our power; that in order to accomplish an investigation that was designed for the Government generally, or for general purposes, there should be a joint resolution and not a Senate resolution. When, however, the resolution winds up with a direction that the evidence, when secured, shall be reported to the Senate, it is limited in its scope to the purpose for which it is designed, and that is to furnish the Senate something which it may need in its work of legislation.

I think it is extremely important that the proposition should be carefully guarded that each House has the right to secure any information that is within the possession of any department of the Government and that no other department or branch of the Government has, when such information is requested by either House, a right to say no to it.

Mr. BORAH. Mr. President—

The VICE PRESIDENT. Doe yield to the Senator from Idaho? Does the Senator from Georgia

Mr. BACON. I yield to the Senator with pleasure.

Mr. BORAH. It seems to me that the suggestion of the Senator is a very important one, in view of the fact that about a year and a half ago an order was issued by the Executive Department that the heads of bureaus, and so forth, should not give information to Members of the Congress; and I noticed a few days ago that a somewhat similar order was issued by one of the Cabinet officers to his subordinates in regard to Members of Congress-that is to say, Senators and Representatives. It is impossible for a person to go to the head of these departments and get information, because nine times out of ten the heads of the departments do not have it. Their business and their onerous duties make it impossible for them to have it; and therefore, unless we can call for it in the form of a resolution which brings out the facts after an investigation we have at this time no means by which to get information from these departments, as a practical proposition.

Mr. BACON. I think the suggestion of the Senator from Idaho is entirely correct, and a very important one. This question has been debated in the Senate several times at very great length and with very great earnestness. I do not think there is any more important proposition to be established and maintained than the right of the Senate-there is also an equal right on the part of the House, but I am speaking now of the Senateto obtain from any department any information, no matter what it is, which it may deem important in the progress of its work and for the purpose of carrying on its work.

I spoke of the fact that there had been several debates on this subject. There was a very notable debate in the first administration of Mr. Cleveland. The matter was debated by some of the ablest men on both sides who ever sat in this body, and at great length, upon the report of a Committee on the Judiciary composed of men of great ability. I have forgotten

who all the members of the committee were; but such men as Edmunds and Hoar and Spooner and Evarts and other men of that class participated in the debate, which hinged on one proposition only. The Senate called for a certain paper which was alleged to be in the Attorney General's office. The Attorney General, under the instructions of the President, Mr. Cleveland. refused to send the paper upon the ground that it was not an office paper; that it was a private letter belonging to the President.

In that great debate, Mr. President-because it was a great debate, and any man who will read it will agree with me in the assertion-in that great debate by those eminent men the proposition was conceded on both sides that if it was an office paper the Senate had a right to demand it, and the executive department had no right to refuse it. That was thoroughly conceded. Such men as George, Vest, and Pugh on the Democratic side, and Evarts, Edmunds, Spooner, and other men of that class on the other side, discussing this question for days and days. All conceded and emphatically agreed upon that proposition.

Mr. GALLINGER. Mr. President—
The VICE PRESIDENT. Does the Senator from Georgia yield to the Senator from New Hampshire?

Mr. BACON. I yield to the Senator with pleasure.

Mr. GALLINGER. I agree with the Senator that beyond question either House of Congress has a right to pass a resolution asking for information that will enable that particular House to transact business; but certainly this is not a resolution asking for that kind of information.

Mr. BACON. I have not come to that part of the matter yet. Possibly I shall not differ with the Senator; but the question having been raised as to the right of the Senate to require information from a department, I think it is important that it should not be passed without the attitude of the Senate being well understood.

Mr. GALLINGER. That is undoubtedly correct.

Mr. BACON. In the days of Republican administrations I have to the best of my ability endeavored to support and maintain the right of the Senate to require any information, whether it be documentary or otherwise, in the possession of a department, when the Senate deemed it essential to the prosecution of its work. I occupied that position in the time of the Republican administrations, and I shall not recede from it in the time of a Democratic administration. It involves the maintenance of the prerogatives of the Senate and is in no sense a party question. I do not know that the order has been issued to which the Senator from Idaho alludes except upon his statement. I have not seen it. I trust that no order has been issued which would contravene the right of the Senate to require from a department the possession of any paper or other information which it may deem necessary and essential to its work.

As I said before, Mr. President, I do not wish to discuss that matter now, but I think if the issue is ever again raised it should be again discussed and determined by the Senate. can find no more satisfactory fund of information and instruc-tion as to the law of the question than we will find in the great debate to which I have alluded, which has been cited here in several subsequent debates. I am unwilling that there should be the slightest doubt on the subject of the right and power of the Senate in this regard. I think it can be practically demonstrated that it would destroy the usefulness of the legislative branch of the Government and practically enthrone the executive branch of the Government, if we should ever concede the proposition that any part of the executive branch of the Govthe legislative branch, and say, "You shall not come in," because that is what it means. If they can do it in one in stance, however unimportant, they can do it in all. If they can do it in a minor instance, they can do it in a great in-If they can do it in an instance which relates to a matter outside of the department of the officials of the Government, they can do it in an instance which concerns an official of the Government. They could absolutely block an investigation into the question whether an executive department of the Government was being wisely conducted or corruptly conducted. When you concede the proposition that it rests in the discretion of the executive department you have to go to its full length, and whenever you go to its full length you have absolutely emasculated the legislative branch of the Government so far as any control of the departmental functions and duties of the executive branch of the Government are concerned.

In this particular case I have no doubt that the matter ought to be referred to a committee. I think it ought to be done for two reasons. In the first place, I think, except in case of great

exigency, whenever a resolution or a bill relates to a subject matter with which a standing committee of the Senate is charged, whenever that committee thinks it should have consideration of it the Senate should give it the opportunity for its

consideration. I state that as a general proposition.

I disagree with my friend from Oregon [Mr. LANE] as to the undesirability of committees. The committee work is the most valuable part of the machinery of a legislative department, and it is only by the detail work that committees can do that legislative bodies can legislate intelligently and effectively and safely. So, as a general proposition, in any case when a bill or resolution is presented, and the committee which has charge of the particular subject matter proposed to be dealt with by the bill or resolution asks for its consideration, I shall always vote to give it that opportunity.

In this case I think there are particular reasons why the resolution should go to the committee. It may be very important that the resolution should be amended. I want to get the information which the resolution seeks to secure, and will certainly be no party to anything which will unduly delay the opportunity to get it, or anything which will defeat the effort to get it, but I think it is proper that it should go to the committee, and that it should consider the question not only as to whether the information is desirable, but as to whether the resolution is in proper shape to secure it, maintaining properly

the province and power of the Senate, and at the same time having a proper and due regard to the duties and obligations and work of the department that is to be called upon to

respond to it.

Mr. McCUMBER. Mr. President, I should like to ask the Senator from Oregon, if I may have his attention, about a little principle that seems to me to underly the whole request, and that is the question of the necessity for the resolution. I think that we are adopting resolutions to investigate a great many things in regard to which we have other machinery to perform those functions. I have assumed that it is the duty of the Department of Justice, whenever there is laid before that department of Justice, whenever there is laid before that de-partment any facts upon which there is a belief, an under-standing, or a suspicion of an offense being committed against the laws of the United States, to proceed to investigate the question itself; that it is a part of its duty to so investigate it. If these charges, which the Senator believes to be facts, are presented to the department, why we should be called upon to urge the department to proceed to do its duty is a little beyond my comprehension of our duty and the corresponding duty of the Department of Justice. If the Department of Justice re-fuses, and we have reason to believe that that department is not doing its duty after facts have been presented to it, I would see then the propriety of a resolution to investigate the facts to see whether or not the Department of Justice is performing its proper functions. But until there has been some refusal of the department to make its own investigation upon a presentation to that department of the facts, I confess I can not see why some other branch of the Government, or even the Senate or Congress itself, should be called upon to order an investigation.

Mr. LANE. Mr. President, I will say for the information of the Senator that in a large and a general way I consider this body here to be more nearly and directly the representatives of the people than members of the executive departments, who are appointed; and if any useful information came to us and some department should be kept busy with the routine of duty and overcrowded with work and was so busily engaged that its attention was not directed to the investigation, as a simple and plain duty to them, without prejudice to anyone, we should call their attention to it and ask them to investigate certain facts which had been brought to our attention and which were important to the people of this country. I see no reason why

that should not be done.

I do not know whether the Interstate Commerce Commission has had this matter brought to their attention or not. I presume not, or else they would have acted upon it. they have not acted upon it, the assumption is that it has not before been called to their attention, and therefore I presented

the resolution.

Mr. McCUMBER. If I may press the matter a little further, if it is the purpose of the resolution to secure facts upon which may be founded a criminal prosecution, facts upon which a criminal prosecution shall be based are facts which I suppose it is the duty of the Department of Justice to investigate; and while we may directly represent the people, the department to enforce the laws which we have passed is the Department of Justice, and that should be the proper receptacle, it seems to me, for any information calling for an investigation of the subject.

If these matters have been presented to the Department of Justice and it has failed to act, I can easily understand why we might act in the premises, but I can not understand why they can not easily be presented to the Department of Justice that department be asked to proceed to perform its duty; and if Congress believes it has failed in its duty, it may ask for the investigation itself. May I ask the Senator whether the facts upon which he founds his resolution have been presented to the Department of Justice and if that department has been asked to investigate them?

Mr. LANE. I will answer the Senator by saying that I do not know whether they have been presented to the Department of Justice or not. I know nothing about it. I am now trying to present them to the Interstate Commerce Commission for investigation, without prejudice to anyone directly, simply pointing out, as I believed I was doing, a line of action that thought would meet with the hearty support of every Member

of the Senate.

Mr. McCUMBER. I am not doubting the propriety of our obtaining the knowledge, but I am questioning the Senator to see whether in his own opinion he does not agree with me that the better method of securing action along this line would be to present the matter to the Department of Justice for its investigation.

Mr. LANE. I will say in answer— Mr. BORAH. Mr. President, may I ask the Senator from North Dakota a question before he sits down? Would the Senator present a resolution directing the Department of Justice

to proceed to make an investigation?

Mr. McCUMBER. No; I would first, if I had the information, present it to the department, and then if the department refused to act upon that information and I thought it had not made the proper investigation, and there were facts which we ought to know, I would proceed, possibly, to investigate them in some way. That is the only question; it is not what department shall make the investigation.

Mr. BORAH. We have always had the same proposition to meet whenever we have had a resolution presented seeking to impose on any department of the Government any particular action. We are immediately advised that that department is supposed to know its own business and has sense to perform the duties which are prescribed for it. The same question is here presented. A Senator may have information to the effect that facts exist which he himself is not able to secure. If information is given to a Senator to the effect that certain facts are in existence, he himself is not in a position to call witnesses before him and to ascertain the facts. We must necessarily refer the matter to a tribunal which has the power to do that thing and to secure the information which only comes to him in a nebulous way, but in a sufficient way to satisfy him that it is worth while to be investigated.

This resolution has many precedents. We have time and time again passed resolutions asking a department to make investigation with reference to certain matters. is based upon whatever information the Senator has, which may be full or incomplete. Nevertheless, it is not sufficiently accurate and conclusive upon which to legislate until the investigation has proceeded before a tribunal which has the right to administer oaths and gather the facts.

So in this instance the Senator from Oregon feels that he has sufficient information to satisfy him that the matter should be pursued further by those who may give verity to the report when it comes out. I am at a loss to understand why there should be any hesitancy about bringing to light these facts, if they do exist. If it be true that this corporation has been collecting rebates, and there is information to that effect to be had, there is no reason why it should not be gathered in a way concerning which there can be no question. On the other hand, if it is not true, as the resolution is drawn the investigation will be very limited, the expense will be very small, and no considerable injury will be done.

I venture to say that if this resolution were before the com-mission it would be investigated, this witness's testimony taken and reduced to writing and ready to report before this body could have passed this resolution. We have been now an hour and a half discussing the resolution, when the investigation itself, perhaps, would not take over two hours, unless it should prove to be true that it is a matter of tremendous importance, and then certainly no one would wish to stand in the

way of it.

Mr. ASHURST. Mr. President, I simply rose to inquire when the resolution offered by myself, to wit, No. 243, will come up. I did not want to have the morning hour expire without that resolution coming up.

The VICE PRESIDENT. The Chair is unable to stop the clock from ticking off the minutes. The Chair can not take this resolution off the floor. It can only go off in a parlia-

mentary way.

Mr. ASHURST. Inasmuch, therefore, as I have the floor at this time, I will ask that my resolution be laid before the

The VICE PRESIDENT. That can not be done pending the resolution which is before the Senate. The question is on the motion of the Senator from Nevada [Mr. Newlands] to refer the resolution to the Committee on Interstate Commerce.

Mr. CUMMINS. Mr. President, I am not willing to have it assumed that those who have opposed the resolution in its present form are reluctant to have an investigation of the subject matter. I have no objection to an investigation; I think it ought to be made; but I am opposed to imposing the burden upon the Interstate Commerce Commission. The Interstate Commerce Commission has nothing to do with investigating the facts with regard to the existence of a crime. The Interstate Commerce Commission has jurisdiction to investigate discriminations and rebates, for the purpose of bringing them to an end, for the purpose of laying the basis for a recovery on the part of those who are injured by granting rebates or preferences; but it has nothing whatever to do with an investigation the purpose of which is to disclose facts which constitute a crime. I am unwilling that a tribunal which has more work than it can do, and which no other tribunal can do, shall undertake to do work, however important it may be, that some other tribunal can do and ought to do.

Mr. BORAH. Mr. President, will it disturb the Senator if I should ask him what particular portion of the resolution he has

in mind with reference to prosecution of crimes?

Mr. CUMMINS. Certainly; I read it: That the Interstate Commerce Commission is hereby directed to conduct an examination and inquiry for the purpose of ascertaining whether there exist facts or evidence that in the opinion of the commission would justify the Government in instituting suits or legal proceedings for recovery of fines, penalties, or forfeitures from the United States Steel Corporation, its subsidiaries, or any common carrier because of unlawful rebates, offsets, and preferences received and accepted by the above-named corporation or its constituent companies within the last six

Mr. BORAH. That refers to civil suits.

Mr. CUMMINS. No; not at all. The Government can not bring any civil suits. The Government institutes a suit for a discrimination or a rebate. It must be a criminal suit.

Mr. BORAH. Suppose it is a criminal suit in the sense the

Senator has used the term, for the purpose of this recovery; if the Interstate Commerce Commission should make an investigation for any purpose, yet the facts might be such as to justify the Government to institute a suit.

Mr. CUMMINS. Certainly; and I would be very glad to have the facts investigated. I am only objecting to taking up the time of a commission that has work that no other body can perform and work which is absolutely necessary to the administration of justice and of law in this country. We could create a committee of the Senate in 20 minutes that would call this man before it, and within three days make the inquiry that is proposed if there is any reason to exclude the Department of Justice. I do not know whether there is or not. But if the Interstate Commerce Commission enters upon this investigation it must suspend its work upon some other work of which it has exclusive jurisdiction. It has no jurisdiction of this mat-ter at the present time. We are giving it jurisdiction in this resolution. If there is some other tribunal that is able to carry resolution. If there is some other tribunal that is able to carry forward this inquiry, it ought to be committed to that other tribunal.

Why not call Mr. Green before a committee of the Senate the day after to-morrow, or as soon as he can get here, and inquire of him under oath what he knows with regard to rebates granted by railway companies to the United States Steel Corporation? I do not want to prevent the inquiry. On the contrary, I want to facilitate it in every way. But we have in the past adopted, and we are in danger in the future of adopting, a practice which very seriously interferes with the legitimate work, the necessary work, of the Interstate Commerce Commission. My only purpose in objecting to the resolution was to ask whether this work can not be better done, more quickly done, and more certainly done by some other body. When the Senate comes to vote on the motion made by the Senator from Nevada I intend to vote for it, and I will vote for it because I think the resolution ought to be amended in order to put the inquiry before some other body. put the inquiry before some other body.

Mr. NEWLANDS. Mr. President, I simply wish to say that I am entirely in sympathy with the Senator from Oregon as to the purpose which he wishes to accomplish, but he is in doubt himself, or he was some time ago, as to whether the investiga-

tion should be directed to the Department of Justice or to the Interstate Commerce Commission. Mr. LANE rose.

Mr. NEWLANDS. Has the Senator solved that doubt yet? Mr. LANE. Yes; the Senator is very clear where he wants it to go. He was pretty clear all the time, but when the suggestion was made for the moment he thought it was worthy of consideration. He has not changed the original conclusion at which he arrived.

Mr. NEWLANDS. I understand, then, the Senator desires this matter to be investigated by the Interstate Commerce Commission and not by the Department of Justice.

Mr. LANE. That is right.

Mr. NEWLANDS. So far as I am concerned, I want a speedy determination of the matter. I recognize the fact that a committee of the Senate is the servant of this body to carry out its will, and that it is the right of the Senate of course, if it to take jurisdiction of the subject now, and to dispose of it without the usual reference to a committee. But I urge that the proper course is to have the resolution go to the committee because of the difference of judgment as to the form of the resolution and the difference of judgment as to the body which should make the investigation, and with a view to pre-

vent, if possible, a duplication of work.

As I have already stated, we have the Department of Justice, which is engaged in inquiries of this kind; the Interstate Commerce Commission, which is engaged in inquiries of this kind; and the Bureau of Corporations, which has made some of the most valuable additions to information on this subject and which is also pursuing investigations of this kind. It would be the duty of the committee to sift this matter and ascertain which of these organizations is or has been engaged in this sort of an investigation, with a view to prevent a duplication of work, and which one can do it most effectively and most quickly. It is with that view, and not with a view of postponing action upon this subject, that I urge the reference of this matter to the Committee on Interstate Commerce.

The VICE PRESIDENT. The question is on the motion of the Senator from Nevada [Mr. Newlands] to refer the resolution to the Committee on Interstate Commerce.

Mr. LANE. I ask for the yeas and nays on that motion. The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. CLARK of Wyoming (when his name was called). I have a general pair with the senior Senator from Missouri [Mr. Stone], who is detained from the Chamber by illness. In

the absence of that Senator, I withhold my vote.

Mr. BRYAN (when Mr. Fletcher's name was called). My colleague [Mr. Fletcher] is necessarily absent from the city.

He is paired with the Senator from Wyoming [Mr. WARREN].

Mr. GALLINGER (when his name was called). I am paired
with the junior Senator from New York [Mr. O'GORMAN]; but I transfer that pair to the Senator from Wisconsin [Mr. STEPHENSON] and vote. I vote "yea."

Mr. LEA (when his name was called). I transfer my general pair with the senior Senator from South Dakota [Mr. Crawford] to the junior Senator from Ohio [Mr. Pomerene] and vote. I vote "nay."

Mr. OLIVER (when the name of Mr. Penrose was called). My colleague [Mr. Penrose] is detained from the Chamber by illness. If my colleague were present, he would vote "yea."

Mr. SAULSBURY (when his name was called). I transfer my pair with the junior Senator from Rhode Island [Mr. Colt] I transfer to the senior Senator from Illinois [Mr. Lewis] and vote.

Mr. SMITH of Arizona (when his name was called). I paired with the Senator from New Mexico [Mr. Fall]. received a telegram from him this morning announcing his sickness at home. He wishes me to state that fact. By reason of that, and not knowing how he would vote if present, I withhold my vote on this question.

Mr. SUTHERLAND (when his name was called). I am paired with the Senator from Arkansas [Mr. Clarke], who, I understand, is absent. I transfer my pair to the Senator from Illinois [Mr. Sherman] and vote. I vote "yea."

Mr. CLARK of Wyoming (when Mr. Warren's name was called). My colleague [Mr. Warren] is unavoidably absent

from the city. He is paired with the Senator from Florida [Mr. FLETCHER].

Mr. WILLIAMS (when his name was called). with the senior Senator from Pennsylvania [Mr. Penrose], who is not present. I transfer that pair to the senior Senator from Indiana [Mr. Shively] and vote "nay." The roll call was concluded. .

Mr. MYERS. Has the Senator from Connecticut [Mr. Mc-LEAN] voted, Mr. President?

The VICE PRESIDENT. He has not.

Mr. MYERS. I have a pair with that Senator, and in his absence I withhold my vote.

Mr. REED. Has the Senator from Michigan [Mr. SMITH] voted, Mr. President?

The VICE PRESIDENT. He has not.

Mr. REED. I have a pair with the Senator from Michigan,

and therefore withhold my vote.

I take this occasion also to announce the unavoidable absence of my colleague [Mr. STONE], who is in poor health and not able to be in the Chamber to-day.

Mr. SHEPPARD. I wish to announce the unavoidable absence of my colleague [Mr. Culberson] and to state that he is paired with the Senator from Delaware [Mr. DU PONT]. This announcement may stand for the day.

Mr. LIPPITT (after having voted in the affirmative). I have a pair with the Senator from Montana [Mr. WALSH]. As he

has not come into the Chamber, I withdraw my vote.

Mr. GALLINGER. I am requested to announce the unavoidable absence of the Senator from Vermont [Mr. Page] and that he is paired with the Senator from Maine [Mr. Johnson].

Mr. JAMES. I have a general pair with the junior Senator from Massachusetts [Mr. Weeks]. I transfer that pair to the junior Senator from Tennessee [Mr. Shields] and vote "nay."

Mr. JACKSON. I have a general pair with the senior Senator from West Virgida [Mr. CHILTON], but I transfer that pair to the senior Senator from New Mexico [Mr. CATRON] and vote. I vote "yea."

The result was announced-yeas 32, nays 26, as follows:

YEAS-32

So Mr. Lane's resolution was referred to the Committee on Interstate Commerce.

CONDITIONS IN MINING DISTRICTS IN MICHIGAN,

The VICE PRESIDENT. The Chair lays before the Senate a resolution coming over from a previous day, which the Secretary will read.

The Secretary read the resolution (S. Res. 243) submitted by Mr. ASHUBST on the 12th instant, as follows:

The Secretary read the resolution (S. Res. 243) submitted by Mr. Ashubst on the 12th instant, as follows:

*Resolved**, That the Senate Committee on Education and Labor is hereby directed to make a thorough and complete investigation of the conditions existing in the copper mines in the Calumet, Hancock, and South Range copper mining districts, in the counties of Houghton, Keweenaw, and Ontonagon, Mich., for the purpose of ascertaining:

First. Full and accurate facts concerning the past history and present status of the relations of the employers and employees in the said copper mines in so far as the said history may have any direct or indirect relation to the existing labor troubles, and to this purpose and end said committee is authorized and directed to investigate and report as to the justice and reasonableness of an increase in the compensation of the employees; the reasonableness of an increase in the compensation of the employees; and the necessity and reasonableness of the employment of two men on all machine drills.

Second. The history of the organization of the various companies or corporations owning or working copper mines in the said district—that is to say, the committee shall ascertain how much money was originally invested in the purchase and acquisition of the said copper properties by the owners, the amount of the gross yield of the mines, and the value of the capital stock of such corporations at the present time. The committee shall especially investigate the facts and report as to the amount of dividends and assessments of the said copper mines, with the view especially of ascertaining the amount of the assessments levied by the Calumet & Hecla Mining Co. and the amount of money paid out as dividends by that company from its inception down to the present time.

Third. Whether or not any of the employers or employees in said district have declined to consent to a committee on arbitration, to be appointed by the President of the United States and the governor of the State of Michigan, jointly, to which committee all matters in dispute might be submitted, and by the findings of which committee all parties at interest should be bound.

Fourth. Whether or not any system of peonage is maintained in said copper-mining districts.

Fifth. Whether or not the immigration laws of the United States are being or have been violated in the said copper-mining districts; and if so, by whom.

Seventh. Whether or not the Secretary of Labor, or any other official or officials of the Government, may be of service in the premises. Eighth. Whether or not persons are being or have been convicted and punished in violation of the laws of the United States.

Ninth. Whether there exists or has existed a combination of coppermining companies in restraint of interstate commerce and trade for the purpose of advancing the price at which copper shall be sold to consumers in Michigan and other States, or for any other purpose.

Tenth. Investigate and report whether or not firearms, ammunition, and explosives have been imported into said State for the use of either party to the existing labor troubles; and the number, names, and general reputation of the men imported into said district to act as guards, deputy sheriffs, or in similar positions.

Eleventh. Investigate the efforts of the various labor organizations to unionize said copper mines, including demands made on employers and the methods used to enforce said demands.

Twelfth. Whether or not the said copper-mining companies have attempted to influence the action of officials, judicial or otherwise, in said district, or have interfered with the administration of justice in said district, or have interfered with the administration of pistice in said district, or have interfered with the administration of pistice in said district, or have interfered

Mr. ASHURST. Mr. President, it would seem unnecessary, indeed it would not probably be proper at this time for me to

make any extended remarks on this subject.

Mr. NORRIS. Will the Senator yield?

Mr. ASHURST. I do not intend to discuss the resolution.

Mr. NORRIS. Very well.

Mr. ASHURST. I only intend to ask for its reference to the appropriate committee. I yield, of course, however, to the

Mr. NORRIS. I have talked with the Senator on the subject, but if he is only going to do that I will not ask him to yield

Mr. SMITH of Georgia. Mr. President, upon the subject of the committee to which the resolution should be referred I should like to make a suggestion before action is had.

Mr. ASHURST. I have yielded to the Senator from Nebraska [Mr. Norris]

Mr. NORRIS. I have already talked to the Senator and asked if he would yield to me, but the purpose for which I wanted him to yield was to dispose of another matter before the Senate. If, however, he is only going to have the resolution referred to a committee I will not ask him to yield now.

Mr. ASHURST. I yield now to the Senator from Georgia. Mr. SMITH of Georgia. Mr. President, this resolution properly should go first to one committee and then to another committee. It involves work for the Committee on Education The body of the resolution pertains to the service of that committee, and for the purpose of considering the substance of the resolution and reporting upon it the Committee on Education and Labor should act. Before the necessary appropriation can be made the resolution must go to the Committee to Audit and Control the Contingent Expenses of the When a similar resolution or set of resolutions was before the Senate with reference to West Virginia, they were sent first to the Committee to Audit and Control the Contingent Expenses of the Senate and after that committee reported they were sent to the Committee on Education and Labor, and both committees reported. It seems to me that it is only fair to the Committee to Audit and Control the Contingent Expenses of the Senate that the work of perfecting the resolution should take place before it goes to them at all. Therefore I desire to express my concurrence with the suggestion the Senator from Arizona [Mr. Ashurst] made when he presented the resolution, that it be sent first to the Committee on Education and Lab.

Mr. ASHURST. Mr. President, I feel that a short— Mr. WILLIAMS. Mr. President, if the Senator from Arizona will pardon me

Mr. ASHURST. Certainly. Mr. WILLIAMS. I think the course suggested by the Senator from Georgia [Mr. SMITH] is an expedient one to take in this case. If the resolution is sent first to the Committee en Education and Labor, that committee can amend the resolu-tion so as to confine the scope of the proposed investigation entirely to subjects matter of Federal jurisdiction; and then, in that shape, it can be sent to the Committee to Audit and Control the Contingent Expenses of the Senate.

I have no doubt of the right of the Committee to Audit and Control the Contingent Expenses of the Senate to amend a bill which is sent to it, to report back to the Senate a bill recommending that an appropriation be made out of the contingent fund for an investigation, and in reporting back a bill not to report back the bill sent to it, but a bill amended and remodeled so as to confine the scope of the investigation to its legitimate purposes, federally speaking. That, however, has been disputed. In view of its disputation, it seems to me, it would be well to have this resolution go first to the Committee on Education and Labor, and have it prune and amend and confine it to its proper scope, and then have it come to our committee for us to see whether or not we shall recommend the appropriation.

Mr. ASHURST. Mr. President, with reference to the particular committee to which the resolution should go, I have, of course, and probably could have, under the rules, no choice. Both the Committee to Audit and Control the Contingent Expenses of the Senate and the Committee on Education and Labor are active committees, meeting very frequently and composed of most excellent members in every respect; so I do not care to which of the committees the resolution shall be sent.

Before I take my seat, however, I should say that I have not introduced this resolution with precipitation. Indeed, I deliberated two months before I concluded to introduce the same. After a conference with the Representative in Congress [Mr. MacDonald] from the district in Michigan in which these troubles now exist, I am at liberty to quote him and to say that he has told me that his district—the twelfth district of Michigan-is a part of the United States where constitutional government no longer exists; that the rights of citizens under our Constitution and our laws are overthrown, and the laws and Constitution defied.

When a Representative of a sovereign State in Congress says that in his district the Constitution and laws are overthrown, surely it does not misbecome a Senator to ask for an investigation, especially when I direct attention to the fact that the Representative from that district has introduced a resolution on the subject in another body of Congress and is attempting to secure its passage, and that that Representative himself asks—yea, courts and demands—a free, full, fair investigation as to the deplorable conditions in the copper district of the State of Michigan.

It would seem that nothing further should be said by me

upon this subject at this particular time. I ask for the reference of the resolution to the appropriate committee.

Mr. TOWNSEND. Mr. President, I do not wish to occupy any considerable amount of the time of the Senate. I have not

changed my mind from what it was yesterday with reference to the unwisdom of this investigation at this time.

I desire to send to the Secretary's desk and have read a telegram which I received this morning from the Copper Country Commercial Club.

The VICE PRESIDENT. Is there any objection? The Chair hears none, and the Secretary will read as requested. The Secretary read as follows:

HOUGHTON, MICH., January 12, 1914.

Hon. CHARLES E. TOWNSEND, Washington, D. C.

Hon. Charles E. Townsend, Washington, D. C.

Dear Sir: In discussion of Ashurst resolution kindly note that the federation has waived all demands for better wages and improved labor conditions, and that the strike is now based solely upon the recognition of the union. Ten thousand miners now at work protest against their recognition, while but 3,000 men are now on strike and supporting the claims of the federation. Gov. Ferris, prior to his departure from the copper country, after a thorough investigation, announced his belief that difficulties could be adjusted between the operators and their men if outside interference were withdrawn. This has from the beginning been the opinion of everyone familiar with local conditions. The men have an eight-hour day, increase of wages, and arbitration courts since December 1, and those now at work are entirely contented. A congressional investigation at this time can only serve to confirm in the minds of the strikers the delusion, carefully fostered by agitators, that the Government intends to take over the mines and place them in charge of the Western Federation of Miners.

COPPER COUNTRY COMMERCIAL CLUB,
G. L. PRICE, Corresponding Secretary.

Mr. TOWNSEND. Mr. President, I hold no brief to speak for either side of this controversy. I have been quite as much disturbed as anybody could be over the distressing conditions in the upper peninsula of Michigan. I have watched with great interest the various investigations which have been conducted: and I have felt that there was an honest, determined effort to get at the justice of the situation and end the strike. I have felt, however, that this particular resolution will tend to delay rather than to hasten the hoped-for condition.

I do not object, nor have I at any time objected, to a thorough and full disclosure of all the facts connected with the copper country strike. I feel that it is entirely proper to submit this resolution to 'he Committee on Education and Labor. I have confidence that no committee of the Senate will insist upon or permit an investigation in a State of a matter that is wholly within the jurisdiction of the State, and especially will it not make it without being possessed of information to convince it that there are facts which have not been disclosed and which will not be disclosed in any other way.

So, Mr. President, I have no objection to the resolution going to the committee, in order that the exact facts may be deter-

mined as to the basis upon which the investigation should be

Mr. MARTINE of New Jersey. Mr. President, I am in utter sympathy with the adoption of this resolution. I feel that naught but good can come from it. The arguments of interference with the rights of the authorities of the State of Michigan are precisely the same arguments that were used when the proposition was advanced as to the investigation of the unfortunate and sad affairs of West Virginia. I think there is no Senator who will say otherwise than that the efforts for further investigation in West Virginia resulted in benefit to the community, to the State, and to the parties interested.

I have received very many telegrams—not so many as the Senator from Arizona [Mr. Ashurst] stated he had received, but very many telegrams—pressing this investigation. From articles in the newspapers, in the magazines, and from sundry other sources I have been impressed with the condition of sadness and woe which exists in that community. I believe it would be to the advantage of the citizens of Michigan, to the advantage of all those engaged in business there, and to the advantage of all those engaged in business there, and to the advantage of the minute of t vantage of the miners themselves to have this investigation made.

I have cut from the New York World an article with refer-

ence to the situation that I ask the Secretary to read.

The VICE PRESIDENT. Is there any objection? The Chair hears none, and the Secretary will read as requested.

The Secretary read as follows:

[Editorial from the New York World of Monday, Jan. 12, 1913.] COPPER, THE PRIVILEGED.

COPPER, THE PRIVILEGED.

The World's denunciation of the rich copper industry as a pet of privilege abusing its favor of Government has been criticized as too severe. It has been doubly justified. It was borne out by the results of special investigation published 10 days ago. The proof is now clinched beyond cavil by Federal inquiry and report.

Copper has for a generation had what legislation it asked for. It had a tariff on ore as long as it wished; when that was abolished, with its consent, it kept a tariff on copper derivatives. From first to last it has been a child of protection.

Its profits have outvied Golconda. With a paid-in capital of only \$1,200,000, the chief Michigan concern has yielded \$121,050,000 in dividends in 42 years—an average of about 240 per cent a year upon the investment. Besides this, it has reinvested \$75,000,000 of the toll of Government favoritism and privileged monopoly in its plant.

The United States Department of Labor reports that this immensely wealthy industry has paid from \$2.89 to \$3.62 for a 10 to 11 hour day; that it had about 1,700 deputies on November 1, mostly employees, besides a large number of armed guards from New York; that strikers have been killed by company gummen; that the labor contract given to the strike breakers of this industry, so solicitous for "free and well-paid American labor," is printed in seven languages and promises them \$2.50 a day—less railroad fare.

The deportation of Moyer and other events since the period covered by the Federal inquiry raise the grisliest specter of all, that of political tyranny and abasement of the processes of justice. Houghton County, Mich., is not a community of self-governing American citizens. It is one chiefly of aliens brought thirther to serve the monopely, and ruled from Boston in defiance of law and in despite of democratic institutions.

Mr. MARTINE of New Jersey. I wish to say that the article

Mr. MARTINE of New Jersey. I wish to say that the article as it has been read simply reiterates the statements of 100 or more letters from reputable citizens of Michigan. I feel, in justice to them, and for the cause of humanity and right, that an investigation should be had. I feel that we can not press the matter too strongly.

Mr. GALLINGER. Mr. President, I will ask the Senator what newspaper is responsible for that article.

Mr. MARTINE of New Jersey. I cut it from the New York World of yesterday, sir. I could multiply the same general sentiments from a number of other papers and from a number of magazines

Mr. GALLINGER. I will ask the Senator if it is an editorial from the New York World?

Mr. MARTINE of New Jersey. It is an editorial from the New York World.

Mr. WEEKS. Mr. President, of course it is difficult to carry definite figures in one's mind about a great industry like copper mining. If the article which has just been read refers to the Calumet & Hecla Mining Co., the figures may be relatively true; but of all the other dividend-paying copper mines in the northern peninsula of Michigan it is a fact that the assessments have been about \$80,000,000, while the dividends which they have paid in the entire life of the companies have not been more than about \$2,000,000 more. There are a great number of so-called copper mines in the northern district of Michigan on which assessments to the extent of many millions of dollars have been levied which never have paid any dividends at all. So if that is a general statement as applying to the copper industry of that section, it is, in my judgment, entirely without

Mr. MARTINE of New Jersey. I presume that in common with almost every other industry these piping times of prosperity have multiplied on paper lots of exploiting schemes in copper, gold, silver, and almost every other line of industry. I am not responsible for defending a lot of exploiters who have started out to find copper where nothing but sand and rock Legitimate mining interests in Michigan have been contending, however, that the Calumet & Hecla mine and some others have been guilty of the abuse of hiring pauper labor, notwithstanding all their boasts of American protection, and they have found rich reason to protest. Men have protested over their own signatures. Hundreds of telegrams and letters have poured in, asking that something be done. I am not here to defend any illegitimate exploiting scheme, made to sell stock, which I presume is the character of the mines about which the Senator is talking.

Mr. WEEKS. I should like to ask the Senator from New Jersey if he recalls how long it has been since there has been

protection on the copper industry of this country?

Mr. MARTINE of New Jersey. I can not just mention the date nor the day; but, thank God, those days now are ended and a new condition prevails.

Mr. WEEKS. Does the Senator know anything about the

copper industry?

Mr. LODGE. If the Senator does not know, I can tell him.

The duty on copper was removed in 1897.

Mr. MARTINE of New Jersey. Thank God for that little ep. That was one of the things that began to open your eyes, and the duty has been removed from a good many other articles

Mr. GALLINGER. I should like to ask the Senator if it is a fact that the average rate of wages in the Calumet & Hecla

mine is \$3.64 a day?

Mr. MARTINE of New Jersey. I know absolutely nothing of my own knowledge about it. I only know what this article states and the other articles which have been published in magazines, the statements of which have not been controverted.

Mr. GALLINGER. Does the Senator know whether or not it is a fact that the contention as to wages has been yielded by the miners now and that the disagreement is on another point

entirely?

Mr. MARTINE of New Jersey. I heard something on that point just now in the way of a telegram that was read. I think, at the request of the Senator from Michigan [Mr. TOWNSEND].

Mr. GALLINGER. If it be a fact that the average rate of wages there is \$3.64 a day, how does that compare with wages

in New Jersey, as an illustration?

Mr. MARTINE of New Jersey. For like and similar conditions it may be all right. I believe that the wage of \$3.60 a day was for those working underground 10 hours a day.

Mr. GALLINGER. I will say to the Senator that it is the average wage, according to the information that comes to me,

and it is a very large wage.

Mr. MARTINE of New Jersey. I know nothing of that; but, aside from that, there is something more than money in the world. Great God! If we are only battling for money, with no rights of justice and humanity to mankind, our salaries and our time would be most illy spent. I believe there are condi-tions involved in Michigan, the same as there were in West Virginia, other than money, and I believe we can do no better service than to order a thorough investigation. If the thing is all right, then, pray Heaven, why object? Let God's sunlight come in and let the world know the conditions there.

Mr. GALLINGER. Mr. President, I do not object to this investigation or to any investigation, and yet I will venture the

suggestion that after a little while our Democratic friends will become tired of these investigations. If the Senator will take

the trouble to ascertain the number of investigations that have been conducted by both Houses of Congress during the present Congress I think he will be rather horrified at the situa-

Mr. MARTINE of New Jersey. I realize that there have been a great many; but these investigations would not have been had but for a condition. A condition was apparent that demanded that the investigations take place. I am frank to say, for my part, as to the little matter of the West Virginia investigation, that it was not altogether delightful and altogether pleasant.

Mr. ASHURST. In only a moment the resolution must go

over for another day, unless it is disposed of.

Mr. LODGE. The resolution, I suppose, goes over under the

Mr. ASHURST. It is not 2 o'clock yet. I ask that the resolution be referred to the Committee on Education and Labor.

Mr. TOWNSEND. Mr. President, I am sorry if anything I may say now will carry the resolution over. I finished what I had to say, until the Senator from New Jersey [Mr. Martine] suggested some matters in connection with Michigan I resent. I think the history of Michigan in every particular

The VICE PRESIDENT. The hour of 2 o'clock having arrived, the morning hour has expired, and the Chair lays before the Senate the unfinished business, which is Senate bill 48.

Mr. GALLINGER. The resolution goes to the calendar. The VICE PRESIDENT. The resolution will have to go to the calendar unless something is done about it.

THE TELEGRAPH AND TELEPHONE AS ADJUNCTS TO POSTAL SERVICE.

Mr. NORRIS. Will the Senator from Oregon yield to me that may make a request for unanimous consent?

Mr. CHAMBERLAIN. I yield. Mr. NORRIS. Yesterday the Senate passed a resolution (S. Res. 242) introduced by me calling upon the Postmaster General for certain information. After it had been passed the Senator from Georgia [Mr. BACON] entered a motion to reconsider, which I understand is now pending. I have had some consulta-tion, particularly with the junior Senator from Mississippi [Mr. VARDAMAN] and also with the chairman of the committee, and as far as I am concerned, from the statements which have been made to me by both those Senators that the matter will be reported out perhaps to-day, being informed by the chairman of the committee that the Committee on Post Offices and Post Roads meets at 2 o'clock and it is the intention to report the resolution out to-day if possible, and if not to-day as soon as it can possibly be done, with that understanding I have no objection myself to having the resolution reconsidered and referred to that committee.

Mr. VARDAMAN. Mr. President, I join very heartily with the Senator from Nebraska in the request that the vote by which the resolution was adopted be reconsidered and the resolution go to the Committee on Post Offices and Post Roads. The committee, as he states, will meet in a very few moments. I am very much interested in the resolution. I think it will be reported back directly; I trust it may, and that the information sought by it shall be given to the Senate. I hope the Senate will yield to the request of the Senator from Nebraska and reconsider the vote and that the resolution may go to the Com-

mittee on Post Offices and Post Roads.

The VICE PRESIDENT. The question is on the motion to reconsider the vote by which Senate resolution 242 was passed.

The motion to reconsider was agreed to. Mr. VARDAMAN. I move to refer the resolution to the Committee on Post Offices and Post Roads.

The motion was agreed to.

RAILROADS IN ALASKA.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (S. 48) to authorize the President of the United States to locate, construct, and operate railroads in the Territory of Alaska, and for other purposes.

Mr. CHAMBERLAIN. The Senator from Maryland [Mr. Jackson] desires to submit some observations to the Senate, possibly not along the line of this particular bill, but I am perfectly willing to yield, with the consent of the Senate, until he delivers the address he desires to make.

Mr. CLARK of Wyoming. Will the Senator yield to me for one moment before the pending bill is laid aside informally?

Mr. CHAMBERLAIN. I yield.

Mr. CLARK of Wyoming. The bill which is before the Senate is one of very great importance because of the magnitude of the appropriation that will be required and because it marks out a new policy for the Government to follow. I think the most valuable information which we may gather in regard to the bill

itself is found in the report which is made on railway routes in Alaska, included in the message of the President in 1913. I am informed that no copies are available other than the one which is in the possession of the Senator having the bill in charge. I think it is exceedingly important that before the bill passes to final consideration we should have all the information possible, and I shall hope that the Senator from Oregon will ask consent that there may be a republication of the document.

Mr. CHAMBERIAIN. I make that request, Mr. President.

The VICE PRESIDENT. Permit the Chair to suggest, if it is not impertinence on the part of the Chair, that there is now on the calendar a report from the Committee on Rules providing for a change in the rules of the Senate whereby all requests for printing public documents shall go to the Committee on Printing. If it is not impertinent to make the suggestion, the Chair would like this request to go to the Committee on Printing.

Mr. CLARK of Wyoming. There is no objection to that course, except that I desire to urge the Committee on Printing to act as soon as possible, for the reason that it is of immediate concern.

Mr. SMOOT. I will say that if the document has already been ordered by the committee to the amount of \$200, then, of course, we would have to report a resolution. If not, the committee can order copies to the amount of \$200 without the action of the Senate. I promise the Senator from Wyoming that we will take up the matter at once.

The VICE PRESIDENT. The request then goes to the Com-

mittee on Printing.

Mr. CHAMBERLAIN. I now yield to the Senator from Maryland [Mr. Jackson].

GOOD ROADS.

Mr. JACKSON. Mr. President, to address the Senate in advocacy of good roads or of Federal aid thereto is perhaps another instance of "carrying coals to Newcastle," for the supporting reasons are either perfectly obvious or have been repeatedly urged heretofore. These remarks, however, will at least serve to make my own position clear as an enthusiastic advocate of these great propositions and to call attention again to these objects, which, like others equally meritorious, need constant urging and discussion before they are realized. believe there is already sufficient sentiment in Congress to enact legislation appropriating some of the funds of this Nation toward the improvement of its highways, could that sentiment be crystallized into a common view as to the means to be adopted, and that such action would receive the unquestioned sanction of public opinion. Therefore the purpose of these remarks is to discuss the methods by which Federal aid should be extended as well as to bring to the attention of the Senate again the main propositions.

My own Interest in good roads arises, first, from the experience of Maryland, and, second, from my observations as a practical business man. Maryland is an excellent example of a State aroused to the advantages of good roads, and which has already begun to reap the great benefits that inevitably follow an improvement in the means of transportation, even though that interest was only lately born. In Maryland there are two systems by which \(\varepsilon\) part of the State money is thus invested. The first and older plan was inaugurated in 1904 and is an arrangement by which the State aids the counties in the construction of what may be called more properly the local roads. An annual appropriation of \$200,000 is available for this purpose and is apportioned among the counties in proportion to their respective road mileage. A county applies to the State roads commission for aid in improving a specified road. If the application is approved, the commission prepares plans and

The county then lets the contract for the construction subject to the approval of the commission and the actual work is done under the inspection and supervision of the State engineers. The cost is shared equally by the county and the State. The initiative usually comes from the property owners, who petition the county officers for the improvement and at the same time bind themselves for one-tenth of the total cost, which is apportioned among them according to road frontage. Thus we have a plan whereby the initiative of the county and of the property owners is fostered, while the expenditure of the funds is directed and supervised by the more efficient central authorities. Down to January 1, 1912, 166.31 miles of roads had been constructed under this plan. The unused portion of the annual appropriation lapses at the end of the fiscal year, but in order to give the widest opportunity to all the counties, at a given date in each year the apportionments standing to the credit of the various counties and unused by them is reapportioned among the remaining counties on the same mileage basis.

The second plan was inaugurated in 1908. In that year the State established a State roads commission, with authority to build a system of main arteries to connect the various county seats with Baltimore City, and incidentally with each other. This plan contemplates the construction of 1,227 miles of roads. Up to January 1, 1912, 168.14 miles had been constructed and 175.85 miles were then under construction. In addition, there had also been completed a continuous boulevard between Washington and Baltimore. To carry on this work a loan of \$8,646,000, which yielded \$8,349,976.13, has already been made. It is expected that succeeding legislatures will authorize annual loans to the amount it has been found can be profitably expended each year by the commission until the system has been completed.

The difficulties of road building in Maryland vary widely. In the east the land is practically flat, the soil light and sandy, in the central sections the land is hilly and the soil clay, while in the west there are mountains of considerable proportions. To build roads under such diverse conditions by a central authority required administrative and engineering ability of a high degree, but the problem has been successfully solved. Despite the increase in freight rates, labor, and materials, the average cost of the roads has not materially changed, but in some sections where conditions are favorable has actually decreased. The cost per mile has ranged from \$6,100.28 to \$71,263.84, the latter figures representing the cost of the construction of a short paved approach to a city street. age cost per mile for construction only was \$11,424.21. these latter figures are added the overhead and administrative charges, the average total cost becomes \$11,965.45. This favorable showing has been largely due to the facts that the public supported enthusiastically the work of the road commission, that politics were rigorously excluded from the commission, and that efficiency and economy were the sole standards used by the commission in making an appointment or in awarding a con-

These figures I have given to show what can be done in a comparatively small State in a short time and with a comparatively small expenditure. The roads have proved of immeasurable advantage to the people. The direct benefits in the form of economy and facility in transportation and in increased land values may be measured. The indirect advantage in the form of the betterment of conditions in rural life, while no less notable and important, can not be estimated in dollars and cents.

As I said above, the second reason for my interest in good roads comes from my experience as a manufacturer and from a common-sense application of business principles to community life. The people of a State or county are in one respect an industrial organization. They are mutually dependent; the prosperity of one class will be reflected in another. Every governmental expenditure may be regarded as being made for the promotion of the material and social welfare of the community. Just as a manufacturing organization requires a plant and machinery so does the community require machinery for the development of its industrial activities. Chief among the necessary equipment of the community are the roads. They are as no other single thing the machines of the industrial and social organization by which wealth is produced and happiness is promoted. And just as the manufacturer has learned that his factory must be most efficiently equipped, that every machine must be of the most advanced type, that he actually can afford to destroy an obsolete machine and invest money to purchase the best that science has discovered, and finally that he will invariably fail unless he does keep his machines at the highest point of efficiency, so the community should realize that its advancement in wealth and happiness will depend upon how good are its roads which, as I suggested above, are the chief machines in the community life. Expenditures should be limited only when these roads are brought to the highest state of efficiency commensurate with the duties they are to perform. I might add that I have never yet seen the highways of a community brought to the point of diminishing returns.

Whether one adopts the old theory that the activities of a State should be limited to those things individuals can not do for themselves, or the theory of the newer school which broadens the duties of a State to that class of activities which individuals will not perform for themselves, or whether one adopts the most modern view and expands the obligations of a State to that class of duties that individuals ought not be allowed to perform for themselves, under any one of these political theories, I say, the conclusion is inevitable that a part of the community effort, whether directed in the form of a State or of a smaller governmental agency, should be expended in the building and maintenance of modern highways. I can not point to a single expenditure of public moneys that is so certain to bring to

all of the people a greater measure of prosperity and happiness.

I said to all the people, and this is the true expression to describe the recipients of the benefits of good roads, and yet while these benefits are unquestionably general there is one class of the people to whom good roads bring a particular and immediate advantage and whose prosperity it should be the aim of any government to foster. I refer to the farmers and to those closely allied to the agricultural interests of the Nation. While it is almost universally true that the welfare of every State is intimately dependent upon its agricultural interests, that fact is unmistakably apparent in our own country. The earth is the primary source of all wealth. Those who devote their lives to the cultivation of the soil; to the study of the ways kind nature has provided for the nourishment of man; to the unraveling of the mysteries of germination, propagation, and production; to the acquirement of the knowledge by which the only storehouse nature has provided may be opened and its treasures yielded to our necessities; to the reclaiming of barren fields to bountiful harvests-these men should be the particular care of every enlightened government. Place burdens upon the farmer, discriminate against him in any way, and you are deliberately weakening the ties that bind all the people to the prosperity we so bountifully enjoy to-day. hand, if we encourage the tiller of the soil by giving him the best scientific knowledge available, by making his life more attractive, by giving him a system of good roads by which he can not only market his crops with economy and ease but also keep up that social intercourse with the outside world to his own and the community's benefit, we place the keystone in the arch of this Nation's permanent greatness.

Let me call your attention to the magnitude of the agricultural interests of the United States. In 1910 the value of the farm lands was \$28,475,674,169; of farm buildings, \$6,325,451,528; of farm implements and machinery, \$1,265,149,783; of the live stock on the farms, \$4,925,173,610; or a total capital invested in agriculture of \$40,991,449,090. In 1910 there were 6,361,502 farms with a total of \$78,797,000 acres, of which 478,452,000 acres are improved. The land in farms represents

46.2 per cent of the total land area of the country

In the same year there were 49,349,883 of the 91,927,266 people of the United States living in the country; that is, outside of places of 2,500 inhabitants and over. I assume that this number represents the farming class. These figures are impressive. They represent the magnitude of the interests most directly affected by good roads. Good roads place the farmer in closer contact with the cities and towns. The transportation of his crops costs him While exact figures are not obtainable, I feel sure that it costs the average farmer more to transport his crops to the railway station under present conditions than it does to ship the produce to the most distant market it reaches. Good roads improve the farmer's breadth of view. He is enabled to go to the towns more easily; he is enabled to visit his fellow farmers more frequently; he is enabled to send his children to better schools. Thus the advantages of association and better education are brought to the farmer and the old isolation of the farmer's life is ended.

Good roads thus in a variety of ways make farm life more attractive and will tend to check the drift from the farms to the cities. The total population of the United States from 1900 to 1910 increased 21 per cent; the urban population in the same period 34.8 per cent, while the rural population increased only 11.2 per cent. No figures could show with more startling clearness the drift away from the farms and toward the already overcrowded cities. I think this fact is of the most momentous consequence to the American Nation. Fewer people on the farms means less production, and less production means greater cost to the consumer. Fewer people on the farms means that our citizenship is to be less sturdy, less independent, less American. We are to be a Nation of city dwellers, a Nation of those who live in the congestion and squallor of cities, away from the breath and sunshine of God's country; a Nation whose political ideals are to be fashioned in the seething corruption of city ward politics rather than in the free and more wholesome country life. I believe this drift must be checked. Too long have we neglected to do something to make the farmer's life more attractive, to put him in easy touch with the good things urban I believe the improvement of the roads will do more than anything else to make farming more profitable, and that good roads to the farm are the most effective way to end the drift from the farm.

But while the farmer receives the first and most immediate benefit of improved roads, benefits just as real come to the whole community; and were this not so there would be no

justification in any State's expending public money for this pur-These general benefits come not only from the reflection and reaction of the farmers' prosperity upon the remainder of the community, but in the direct interest everyone has in better transportation facilities. The first class of benefits arise from the fact that the farmer becomes more prosperous; he can spend more, employ more labor, and contribute a greater share of the taxes. The second class of benefits arise from cheaper production and, consequently, lower cost to the consumer, for an improvement in transportation will have this effect; and from the opportunity the city residents will have to travel into the country, for there is an isolation of the city as well as of the country. Intercourse means education and understanding. Understanding means the end of sectionalism and prejudice. There is not a single benefit that comes from improved transportation, from travel, from social intercourse, from broadened intelligence that will not be increased by improving the highways of this country. There is not an industry, there is not a business, there is not a worthy phase of our modern life that will not be stimulated by better roads. Just as we were able to conquer, to people, and to rule a vast interior continent by building railroads, so by bettering our highways we will people anew our farms, revive community life, carry the best of the city to the country, and reinvigorate true Americanism.

Transportation is the very life of commerce. Every improvement in transportation is an aid to the commerce of that community. Transportation facilities are more necessary for trade development than a system of banks or a sound currency, for if transportation stops trade must stop, while if the transportation facilities are good trade may grow even though the banking system totters and the money is unsound. We can see these things clearly as to the great railroads. They are nevertheless as true in respect to the roads of the community. are the transportation routes of the people. Developments in automobile truck construction would seem to indicate that the roads thus utilized may soon become a serious rival of the railroads for the shorter hauls. Here again exact figures as to the growth of trade due to a betterment in transportation facilities are impossible. We do know that trade can not live without transportation. We have seen the results to commerce that follow the building of a railroad; a similar result, but in an infinitely more diffused form, must follow the improvement of

our highways.

Road building and improvement is not a modern innovation, While the Israelites were still in the bondage of Pharaoh the Egyptians seem to have realized the advantages of good roads. The streets of Babylon were paved 2,000 years before Christ. But the most notable road of history was the famous Appian Way, begun by Appius Claudius about 312 B. C., which led from Rome to Capua. This was the first of a great system of military roads radiating from Rome to her provinces. tending through France, these roads connected with a similar system in England, whose outlines are still visible and which in some instances have formed the foundation of modern roads. The purposes of these ancient roads were largely military, in order that Roman legions and Roman couriers could be moved quickly from place to place as necessity required. Commerce and industrial intercourse were then in their infancy, and each community was largely self-sustaining. In reviewing the history of road building, it seems to be true that good roads were both the cause and effect of increased trade; just as good roads promote intercourse and commerce, so did that commerce show the necessity and demand the construction of additional high-

The toll road developed as early as 1346, when Edward III of England granted a commission to the master of the hospital of St. Glies to collect tolls on vehicles passing on the road leading to the Old Temple, London, from the hospital of St. Glies. This was the forerunner of a great system which reached its highest development in the first part of the last century, by which the cost of maintenance was, in theory, paid for by those who used the road. In America there was a toll road authorized as early as 1792 from Lancaster to Philadelphia, a distance of 62.5 miles. There followed an almost unbroken period of expansion of turnpike building until the application of steam to transportation diverted attention and capital to other lines. By 1828 the expansion of the toll-roads system had ceased.

From that year down to the early nineties is a period where little attention was paid in America by States to the construction and improvement of roads. Road building and maintenance were almost entirely left to the counties or smaller governmental agencies. There are various reasons to explain this abandonment of an activity which was obviously for the benefit of the country. As I suggested above, the invention of the steam locomotive concentrated the attention the States were giving to

internal improvements upon railroad building and, furthermore, greatly increased the amount of money the States were spending for this purpose. This is the beginning of the great expansion in State borrowing, which in some cases led finally to repudia-

The payment by the United States of the debt created by the Revolutionary War and the consequent establishment of the credit of the Federal Government in Europe made it easy for the States to float large loans abroad, where by some confusion of thought the superior credit of the Federal Government was also attributed to the States. And yet, in spite of the ability to borrow, produced, as I have said, by a misconception, there was a scarcity of capital that a new country could command and a limit to governmental activities. As railroads and canals were the more immediate needs, it was natural that the greater interest of the States should be expended in their construction and road building allowed to cease. This condition lasted until the Civil War. At about the same time several States were compelled to repudiate their obligations, and thus the credit of States generally became impaired. The former injudicious borrowing also led the people in many instances to place in their State constitutions restrictions upon the contracting of loans. These and other reasons are responsible for the long period of inactivity in State road building.

Before there could be a revival in road building it was necessary that interests other than those of the farmers should be attracted to the desirability of road improvement. In the average community there would be perhaps two or three farmers living along a mile of country highway. These farmers did feel the necessity for the improvement of the road imme-These farmers diately in front of their respective farms, but they did not unite in a demand for systematic improvement of the roads, with the expected result that practically no roads were improved. The added interest necessary came with the invention of the bicycle. Thousands of people who were never before concerned with the desirability of good roads became interested. The formation of the League of American Wheelmen and the interest that this association gave to good road building will be recalled. But the interest aroused in good roads by the bicycle was small as compared to that created by the automobile. A better road was required for the automobile than for the bicycle; more persons were concerned in the industry; the interests were broader. The automobile brought the people from the cities to the country, and created-as no one thing heretofore had done-an almost unanimous sentiment for road and highway improvement.

Furthermore, one good road educated the public to its advantages and brought immediate demands for its extension and for the construction of similar roads. The interest in good roads expanded beyond the automobilist and began to be shared by all the people. A not unimportant factor in the revived interest in good roads was the realization of the increased value that good roads brought to real estate. Thus in every State in the Union there is practically a unanimous public opinion in favor of road improvement. The question of the desirability of such improvement has long ago been settled. The only question now before the people is the limit to the amount of improvement a State can make and the means by which the money can most profitably be expended.

The first expenditure made by a State for road improvement during the present period was by Vermont in 1892. December 31, 1911, there had been expended by 36 States for road improvement, for which I have the figures, \$126,419,120.15 and 15,523.30 miles of modern public highway had been constructed. I attach as a part of my remarks a table showing in detail what has been done by the various States in road building since 1892.

These figures clearly indicate that the States are facing this great undertaking efficiently and enthusiastically. But only a beginning has been made. There are 2,199,646 miles of roads in the United States. The very vastness of the undertaking to improve this amount of roads has brought about a general conviction that there must be some aid from the Federal Government before this country will have a system of public roads adequate to its needs and necessary to its future development. There is, of course, a very general tendency for the smaller governmental agency to place the burdens of an improvement upon the larger agency; so the counties prefer to shift the burden of road improvement to the State and the States to the Federal Government. But there are certain well-grounded reasons which indicate the justice and desirability of Federal activity in road building and distinguish this proposition from a mere desire on the part of the States to fatten at the expense of the public purse.

In the first place, when the States entered the Fed-

on imports to the national authorities. Practically they surrendered also their right to levy an excise tax on internal products, for it is obviously impossible to place a just excise tax without the power to levy a corresponding import duty. thermore, it is recognized by the almost unanimous opinion of experts that the general property tax, upon which the vast majority of States rely for their revenue, is proving a failure because of a change in the character of the wealth of the country and for other reasons not necessary to be mentioned in this connection.

The States are virtually precluded, however, from making this tax effective or of adopting the alternative proposition of an income tax because of the ease with which capital can be shifted from one State to another and because of constitutional limitations inherent in the present structure of the Government. Thus the State is in the position not only of having surrendered a vast potential field of taxation, but of having had rendered more or less ineffective the ability to tax still remaining. Consequently the revenues available to the unified State or Nation for internal improvement are not available to our several American States and find their way into the National Treas-Therefore if the due proportion of the total revenue of the country is to be available for the purpose of road building some subsidy must be granted by the Federal Government. true, of course, that the Federal revenues do now provide for certain expenditures for which the States would be compelled to make provision were they existing as independent sovereignties. And yet, however this may be, I am convinced that the division of expenditures and of the taxing power between State and Nation has resulted to the disadvantage of the State and that the people of this Nation will not be able to build roads in competition with unified governments unless some of the Federal revenues are devoted to State road building.

Again, road building in which the Federal Government participates can be made vastly more efficient than where the undertaking is entirely by the State. The Federal Government has vast opportunities for experimentation and for investigation, while the State's knowledge is usually limited by the experience gained within its own narrow confines. The Federal Government should be able to apply to advantage the lessons learned, for instance, in Maine to the problems of road building in Wash-

Still, again, the Federal Government has a direct interest in road building, for the roads now constructed by the States are used and will continue to be used for military purposes. It is certainly to the advantage of the Federal Government to have a system of highways over which troops may be marched with ease and dispatch.

It is also perfectly obvious that a government charged with the duty of affording postal facilities has a direct interest in the roads over which the mails must be carried. The Constitution provides that the Federal Government shall have the authority to establish and maintain post offices and post roads, and this provision would seem to supply full constitutional power to authorize Federal aid to State road building.

There is also a close analogy between Federal aid to the construction of good roads and Federal aid to the dredging of rivers and improvement of harbors. In each case the ultimate end is the furthering of commerce. As I have indicated above, I am of the opinion that good roads further commerce and bring advantages of intercourse quite as effectively and certainly with more diffused benefits than do those agencies which we are accustomed to regard as the chief instruments of commerce.

But any question of constitutional authority should be cast aside in view of a precedent that has been established. 29th of March, 1806, an act was approved by President Jefferson appropriating \$30,000 for the survey and construction of a national road from a point at or near Cumberland to a point on the Ohio River opposite Steubenville. This appropriation was made in a day of strict construction of the Constitution and ap-This appropriation was proved by a President distinctly opposed to an extension of the Federal power and to internal improvements by the Federal Gov-This was the beginning of the famous Cumberland or National Road, which was afterwards furthered so conspicuously by Henry Clay. Appropriations continued to be made for this road and its extension to Wheeling and beyond until 1838. A total of \$6,825,919.33 had been appropriated during that period and 130 miles were opened to traffic.

There has been maintained also in the Department of Agriculture an Office of Public Roads. Annual appropriations have been made for investigation and experimentation, and the inevitable drift of public opinion toward Federal aid was shown by a provision in the Post Office appropriation act approved August 24, 1912, creating a Joint Committee on Federal Aid in the Construction of Post Roads and appropriating \$25,000 eral Union they surrendered their right to collect taxes for the purposes of the committee. That committee, headed

by Hon. Jonathan Bourne, is now at work and is collecting valuable data and drawing elaborate plans to further this policy.

There is no doubt in my mind that public opinion is over-whelmingly in favor of the general proposition that the Federal Government should undertake to aid in the great work of improving the roads of the country. The only question is the manner in which it shall participate, and I come to consider what, in my judgment, are the essentials in any such proposal.

There are two chief plans by which some of the Federal revenues might be diverted toward road building. First, the Government might be authorized to undertake to build directly good roads. This plan has obvious disadvantages. The Federal Government can never be as cognizant of local needs as the people in the localities themselves. There would also be the inevitable conflict of jurisdiction between the State and Federal author-The disadvantages of this plan are so obvious and so generally understood that I will take no further time in dis-

cussing them.

It is generally agreed that the proper way for Federal money to be invested in road building is by a system of aid or sub-There have been various plans proposed sidies to the States. for the granting of Federal aid. I believe that while we may differ as to minor details there will be a general consensus of opinion that the following principles are essential in any system that may be proposed: In the first place the initiative should come from the State. The State is cognizant of its needs and should have the opportunity to select the road to be improved and to make this proposal to the Federal Government, which should in turn have the right to approve or disapprove. State has the chief interest in the location of the route, and yet the Federal Government also has an interest in that the route may be utilized for either military or postal purposes. tendency of the Federal Government would probably be to select routes that would afford a continuous road between centers of population and that would ultimately form a complete system of connecting highways throughout the country. The State, on the other hand, would probably place local needs first and would propose routes that would benefit a greater number of people. I am inclined to believe that this is the way governmental road building should be planned. A through highway, while of immeasurable benefit to a large number of people, does not reach all the people or disseminate the advantages of good roads among the greatest number of people; but in all probability, where the State has the right to propose the route and the Federal Government the right to approve, there would be a blending and unification of these two plans which would work to the advantage of all.

In the second place, the specifications should be approved by the Federal authorities. If the specifications proposed by the State should not measure up to the standard which the Federal authorities had found advisable, they should be made to conform to that standard before the Federal money is expended. And so the construction of the road should be subject to Federal inspection at all times in order that it might be absolutely certain that a road was being built which the Federal Government

could afford to aid.

I am also of the opinion that the road should be completed before the Federal Government is called upon to contribute. This would be an incentive toward completing the work and would tend to prevent the diffusion of money in a number of

unfinished projects.

There should also be an automatic check upon the total amount that the Federal Government could be called upon to contribute within a single year and upon the amount that should be allotted to a particular State. The former aim could be be allotted to a particular State. The former aim could be achieved readily by a fixed annual appropriation which should lapse at the end of the fiscal year. There should probably be a provision that at a particular time before the end of the fiscal year any unused portions of the fund appropriated to the various States should be reapportioned among those States which should have exhausted their allotments. The second necessary check should be provided by apportioning the total annual appropriation among the various States. The basis of this apportionment might be formed on one or more of a variety of factors. I believe that the ratio of the road mileage in the various States to the total road mileage in all of the States should figure in the apportionment, for this would give to those States which have shown commendable energy and zeal in building and laying out roads a reward for their activity. I believe that the population of the States as compared to the total population should also be a factor, for the obvious reason that the public moneys being derived by taxes from the people should be expended so as to benefit the greatest number of the people. I further believe that the areas of the various States as compared to the total area of the country should be the third factor in making the apportionment, for this would tend to

give the larger States a larger share of the appropriation, and this result seems to be eminently just and fair in view of the greater need for roads in the larger States. No one of the factors should be taken as final, but all should figure. I am inclined to believe that the most equitable apportionment would be found by allowing each of these factors to count one-third in determining the final ratio.

There should be some arrangement by which it could be made certain that the road would be maintained. Any expenditure for road building without a provision for maintenance is a clear waste of public money. If it were provided that the Federal Government should have the right to inspect the completed road at all times, and if it were found that any such road was not being maintained to the proper standard that no further apportionment should be made to that State until the maintenance should be satisfactory, I believe that this difficulty would be met.

There has been a suggestion that the Federal Government should give aid to the States once and for all by a great bond I believe that an annual appropriation is more desirable. In the first place, there is a limit to the amount of money that can be profitably expended in the building of roads in any State during a year. Then road building is a continuous operation. If it were possible to build a system of roads to-day that would be sufficient for all time to come, there would be reason in the argument that one year's taxes should not bear the burden of a permanent improvement and that a bond issue would be the proper way to apportion the expenditure during the time the improvement is serviceable. But, as a matter of fact, this is an impossible proposition. It will always be necessary to build roads. No State need ever embark upon a policy of road building with any hope of ever completely equipping itself. Demands for good roads in new places will be insistent and continuous. An expenditure for road building is more analogous to an annual expenditure for improvement than it is to a single investment for a plant. Since the expenditure will be continuous, it is better for the Federal Government to lend its aid by a system of annual appropriations than by giving the States a lump subsidy. I have barely alluded to the greater economy and frugality that will be induced by limited annual appropriations. Annual appropriations have the final advantage of allowing Congress to observe closely results and to end the subsidy whenever it believes the results are unsatisfactory.

As a final prerequisite in a scheme of Federal aid I would urge the desirability of not establishing a great central bureau at Washington. I believe that there is no necessity for another great department, and that the present governmental machinery is quite capable of handling the problem. I believe that the actual construction work should be done by the States and that the activities of the Federal Government should be

limited to approval and supervision.

These are the prerequisites in a system of Federal aid to State road building. I have given considerable study to this subject, and these are the basic principles as I see them. views are embodied in a bill introduced by me, Senate bill 1126, and now pending before the Committee on Post Offices and Post Roads. My bill provides that whenever a State shall have completed not less than 1 mile of modern public highway on a route approved by the Postmaster General and to the saton a route approved by the Postmaster General and to the sat-isfaction of the Secretary of Agriculture, the Secretary of the Treasury shall pay to the State one-half of the cost of its construction, with the proviso that no payment shall be made in excess of the rate of \$7,500 per mile for the one-half cost mentioned, and that no allowance shall be made for expenditures for rights of way, property damage, royalties, patents, or copyrights. The operation of the bill is confined to roads outside of towns with a population of 2,500 or over. The State is required to maintain the highway to the satisfaction of the Secretary of Agriculture on the penalty of having further sub-sidies refused. The bill carries an appropriation of \$10,000,000 annually. That sum seems to be all that can be profitably and economically expended during any one year. I believe that \$12,000 to \$15,000 per mile is a fair average cost of construction. I attach as an appendix to my remarks a table showing the average cost per mile of construction in the various States. If the Federal Government were to pay one-half the cost, with \$10,000,000 it could aid the construction of nearly 2,000 miles of road per year. My bill provides that the \$10,000,000 shall be apportioned among the States according to the number of miles of public roads therein as compared to the total road mileage in the United States. As I indicated above, I am inclined to believe that the factors of area and population should likewise enter into the apportionment, and I propose to amend my bill in this particular. No new governmental department is con-templated by the bill.

In conclusion, it seems to me that the time is ripe for action

upon this bill or a similar measure. I have attempted to out-

line some of the conditions and to indicate the desirability of good roads and of Federal aid thereto, at the same time apologizing for the repetition of arguments which are well understood. I can see no reason for further delay. All the conditions are favorable for immediate action. I do not believe it necessary to await the determination of the joint committee referred to above. Their plan, I understand, is elaborate. The beginning we may no important.

or a vaster policy. Each year of delay, however, means a continuation of the present embarrassment in the great work of building good roads and a further delay in the realization of the prosperity to which we are justly entitled. I therefore urge with all the sincerity and energy I possess prompt consideration and action on this bill or a similar bill in order that we may no longer hesitate to perform a duty so obvious and important.

APPENDIX.

RAILROADS IN ALASKA.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (S. 48) to authorize the President of the United States to locate, construct, and operate railroads in the

Territory of Alaska, and for other purposes.

Mr. SMOOT and Mr. CHAMBERLAIN addressed the Chair.

The PRESIDING OFFICER (Mr. Sheppard in the chair).

The Senator from Oregon is entitled to the floor.

Mr. SMOOT. I am aware of that, but I ask the Senator to

yield to me.

The PRESIDING OFFICER. Does the Senator from Oregon

yield to the Senator from Utah?

Mr. CHAMBERLAIN. I yield.

Mr. SMOOT. Before we proceed with the consideration of the Alaskan railroad bill a number of Senators desire to be present, and for that reason I suggest the absence of a quorum.

The PRESIDING OFFICER. The absence of a quorum is

suggested. The Secretary will call the roll.

The Secretary called the roll, and the following Senators an-

swered to their names:

Ashurst Bacon Bankhead Borah Brady Bristow Bryan Burton Chamberlain Clapp Clark, Wyo. Cummins Dillingham Gallinger

Goff Gore Hitchcock Jackson Jones Kern Lane Lane Lea Lippitt McLean Martin, Va. Martine, N. J.

Newlands Newlands Norris Oliver Overman Owen Pittman Ransdell Robinson Root Saulsbury Shafroth Sheppard Shields Smith Ari Smith, Ariz.

Smith, Ga. Smith, S. C. Smoot Sterling Sutherland Swanson Thornton Townsend Vardaman Walsh Weeks Williams

The PRESIDING OFFICER. Fifty-four Senators have answered to their names. A quorum of the Senate is present.

Mr. CHAMBERLAIN. Mr. President, I attempted yesterday to show the resources of Alaska, its commerce, and the possibilities of its development; and in establishing the conditions which exist there I have relied almost entirely upon the reports which have been made from time to time by the agents of the United States, whether in the Agricultural Department or the Geological Survey, supported, as they have been, by the testimouy of witnesses who were on the ground from time to time in connection with the industries of Alaska. I do not know that it is necessary for me to discuss at any greater length the possibilities of the Territory or what advantages might come from the construction of a railroad, so far as its resources are concerned.

Having discussed these questions, Mr. President, I am now going to call attention to some of the freight rates in Alaska as showing the absolute necessity of some effort being made, whether individual or corporate or national, to place the resources of Alaska within reach of the United States and the commodities which we have to offer for sale in reach of the people of that Territory. I am going to attempt to show that the rates now charged for the transportation of traffic, whether passenger or freight, are almost absolutely prohibitive. In this connection I ask that I may have inserted as a part of my remarks the rate sheet of the Northern Navigation Co. in connection with the Alaska Steamship Co. and the Pacific Coast Steamship Co., at page 637 of the Senate committee hearings on the pending bill.

The PRESIDING OFFICER. Without objection, it is so

ordered.

The rate sheet referred to is as follows:

EXHIBIT M.

Northern Navigation Co. in connection with Alaska Steamship Co. and Pacific Coast Steamship Co. THROUGH FREIGHT TARIFF.

[N. i. Co., No. 13A. A. S. S. Co., No. 205. P. C. S. S. Co., No. 17A.]
Between Seattle or Tacoma or San Francisco, by direct sailing, and points on Yukon, Tanana, Koyukuk, Iditarod, and Innoko Rivers in Alaska, via St. Michael.

Effective with opening of navigation, season 1912. Shipments for Koyukuk River points will not be accepted after August 1, nor for Yukon. Tanana, Iditarod, and Innoko River points after August 25, excepting by special agreement with authorized agent of the companies at Pacific coast point of origin. Subject to change without notice.

Rate in dollars per ton of 2,000 pounds.

¹ No agent; freight charges must be prepaid.

Articles: General merchandise not otherwise provided for in list of exceptions,
On and after August 20 rates from Pacific coast ports to all points advance \$5 per ton.
Minimum charge, \$5.
Through bills of lading issued.

LIST OF EXCEPTIONS.

Goods clearly analogous to the following will take same rates.

NOTE.—All goods must be packed and marked in such a manner as
to insure their delivery in good condition, and the carriers reserve the
right to refuse for carriage such goods as are not so packed and marked.

The following commodities will take general merchandise rate plus
the percentage of such rate shown opposite each article:

["O. R." signifies owner's risk; "K. D.," knocked down; "S. U.," set
up; "N. O. S.," not otherwise specified.]

Per cent. Automobiles, boxed or crated_____ In other words, 200 per cent of \$60, which would be \$120 added to it, or \$180 would be the rate instead of \$60. Bar fixtures, K. D.____ Bicycles, boxed or crated__ 50

HEAVY WEIGHTS.	

Single pieces or packages of machinery, boilers, or other freight, weighing:
Under 2,000 pounds, flat rate.
Weighing 2,000 pounds and under 4,000 pounds to flat rate add \$6 per ton.
Weighing 4,000 pounds and under 6,000 pounds to flat rate add \$9 per ton. Weighing 6,000 pounds and under 8,000 pounds to flat rate add \$13.50

per ton.
Weighing 8,000 pounds and under 10,000 pounds to flat rate add \$18 per ton.
Weighing 10,000 pounds and under 12,000 pounds to flat rate add \$22.50 per ton.
Weighing 12,000 pounds and under 14,000 pounds to flat rate add \$27

wighing 14,000 pounds and under 16,000 pounds to flat rate add \$31.50 per ton.

Single pieces or packages of machinery, bollers, or other freight—
Weighing 16,000 pounds and under 18,000 pounds to flat rate add

Weighing 18,000 pounds and under 20,000 pounds to flat rate add \$40.50 per ton.
Weighing 20,000 pounds and under 22,000 pounds to flat rate add

Weighing 20,000 pounds and under 22,000 pounds to flat rate add \$45.50 per ton.
Weighing 22,000 pounds and under 24,000 pounds to flat rate add \$49.50 per ton.
Weighing 24,000 pounds and under 26,000 pounds to flat rate add \$54 per ton.
Weighing 26,000 pounds and under 28,000 pounds to flat rate add \$58.50 per ton.
Weighing 28,000 pounds and under 30,000 pounds to flat rate add \$63 per ton.

\$63 per ton. Weighing 30,000 pounds and under \$32,000 pounds to flat rate add \$67.50 per ton.

Weighing 30,000 pounds and under \$32,000 pounds to flat rate add \$67.50 per ton.
Weighing 32,000 pounds and under 34,000 pounds to flat rate add \$72 per ton.
Weighing 34,000 pounds and under 36,000 pounds to flat rate add \$76.50 per ton.
Weighing 36,000 pounds and under 38,000 pounds to flat rate add \$81 per ton.
Weighing 38,000 pounds and under 40,000 pounds to flat rate add \$85.50 per ton.
Fire-box boilers must be put on skids.
Skids put on by the company will be at shipper's or consignee's expense.

¹ Special arrangement. ² Flat rate. ³ One-third flat rate.

⁴ One-half flat rate. 5 Special contract.

Note.—Oil clothing, oilcloth, linoleum, and all articles liable to spontaneous combustion must be marked with contents and "On deck." All such articles are carried on deck at O. R.

Note.—All perishable freight, including eggs, fresh fruits, meats, and vegetables, is taken at owner's risk of freezing and other climatic conditions, or decay; carried on deck or below at carrier's option. Perishable freight to be prepaid or charges guaranteed, except on potatoes and onions, which may be taken collect between July 1 and August 15.

Mr. CHAMBERLAIN. I am simply going to call attention briefly to the apparent rates which these companies have in common between them; that is, the flat rates from Seattle or Tacoma or from San Francisco by direct sailing to points along the Alaskan coast and to points up the Yukon River; and then I am going to show that while these are apparently the flat rates, the only rates that are charged for freight per ton, there are exceptions to all of these charges which absolutely make these apparently flat rates false on their face. In other words, the so-called flat rates are not at all the rates that are charged. The exceptions in the schedule of rates include nearly everything that may be transported from the States to Alaska. For instance, from the points which I have named. Seattle, Tacoma, or San Francisco, by direct sailing, I will take one place-to Dawson, for instance-not specifying the class or character of the goods, the rate is \$70 per ton When we get over to the exceptions we find north bound. that an additional percentage, ranging from 20 per cent to 150 per cent and sometimes to 200 per cent, according to the class of freight, is added to the so-called flat rate. stance, take automobiles, boxed or crated. While the rates to these different points mentioned in the rate sheet for automobiles or any other similar class of goods might be \$30 per ton, varying up to \$90 per ton as the flat rate fixes it, for automobiles boxed or crated you add 200 per cent to the flat rate. In other words, while the flat rate might be \$70 per ton, you must add 200 per cent, or \$140, to that on that class of goods, which makes the actual rate, instead of \$70 per ton of 2,000 pounds, \$210 per ton to that particular point.

You may go right down the list and you will find the same thing in almost every case. Take eights and eightetes, for instance, in boxes, not strapped, corded, and sealed, or not in tin or zinc-lined boxes-you add 200 per cent to the flat rate. So that in the case of nearly every class of merchandise, no mat-ter what it may be, whether it be food supply or clothing or what not, you add all the way from 20 per cent to 200 per cent to the flat rate.

There is no class of business on the face of the earth that can stand any such rate as that to these points in Alaska. That, however, is not all of the charge for transportation, if you These are the rates from Seattle and Tacoma and San Francisco to points which are reached either by the ocean-going steamer or by the river steamer up the Yukon. It is estimated by Dr. Brooks, who is more familiar than almost anyone else with the situation up there from actual experience on the ground, that the rate after the goods leave the river bank or the seashore varies from \$1 per ton per mile up; so that if an automobile had to be shipped from a point where it was landed from a vessel you would have to add to the rate of \$210 per ton at least \$1 per ton per mile. That is to say, if you should take it 30 miles inland, you would add \$30 per ton for the shipment of an automobile or any other piece of machinery 30 miles. from the seacoast.

Mr. WEEKS. Mr. President-

The PRESIDING OFFICER. Does the Senator from Oregon yield to the Senator from Massachusetts?

Mr. CHAMBERLAIN. I do.

Mr. WEEKS. I wish to ask the Senator from Oregon how many steamship lines there are plying between San Francisco or Tacoma or Seattle and Alaska?

Mr. CHAMBERLAIN. It may be said that there are practically two—the Alaska Steamship Co., which is owned by the so-called Alaska Syndicate, composed of the Morgan and Gug-genheim interests, and the Pacific Coast Steamship Co., 50 per cent of whose stock is said to be owned by the Harriman interests and 50 per cent by the Hill and Morgan interests. there is an independent line-the Humboldt Line-which has one steamer plying between these points.

Mr. WEEKS. Are there any English lines running from Vancouver to any part of Alaska?

Mr. CHAMBERLAIN. There may be some coal-carrying steamers. I do not know that there are any general freight and passenger steamers plying between those points, but the business of the Territory is controlled by the companies I name.

Mr. WEEKS. Has the Senator statements of these steamship lines, showing their earnings for any considerable period?

Mr. CHAMBERLAIN. I do not believe I have. They may be in the hearings, but I do not recall now that I have them.

Mr. WEEKS. One more question: How does the Senator anticipate that the building of a railroad in Alaska will affect

the ocean rates from the United States to Alaska?

Mr. CHAMBERLAIN. It will at least give private enterprise_ and industry an opportunity to put on independent lines. As it is now, not only is the freight-carrying trade controlled by the Alaska Syndicate or its allied interests, but the transportation inland, whether by water or by rail, is controlled by the same interests. For instance, the Alaska Syndicate controls, as I said, this steamship line that sails from ports in the United States up to Cordova, while the railway that carries freight from Cordova up into the Kennicott region is owned by the same interests, and they fix the rates practically as they please.

Mr. WEEKS. Does not it seem reasonable that if this transportation business were very profitable at this time, independent lines of steamers would be established by capital which was not connected with the companies to which the Senator refers?

Mr. CHAMBERLAIN. I am willing to concede that as a rule

transportation is not profitable in Alaska now.

Mr. WEEKS. I am talking about the ocean lines.

Mr. CHAMBERLAIN. I should like, if I could take the time, to go into the fight that has been had between the Humboldt Co., on the one side, and the opposition lines, the monopolistic lines, on the other, to undertake to regulate freight rates to Alaska.

Mr. WEEKS. I do not wish to interrupt the Senator. I was asking these questions simply for information.

Will the Senator allow me to make a suggestion? Mr. LANE.

Mr. CHAMBERLAIN. I yield to my colleague.

Mr. LANE. I can say, for the information of the Senator from Massachusetts, that the companies which control the steamers also control the docking facilities, and those are things that are very important and valuable in Alaska. The facilities for landing freight in the Bering Sea and also down along the coast are in the hands of the same companies. You can not go in there with an independent steamer and make a landing at some places at all; nor can you unload your freight and get it out up the Yukon River unless you have docking facilities, which you would have to acquire from their agents, and they will not let you have them.

Mr. WEEKS. Would it be expensive for an independent line

to construct docks?

Mr. LANE. Very expensive. In many cases they control nearly all the water front. In many cases they do control the entire water front. It is very difficult to get at. That is so, I believe, in Boston Harbor itself, and in New York. It applies to the city in which I live, on the Columbia River. They have those things pretty well under control, and it takes a good deal of capital, considerable capital, to compete with them. An independent company must go in "well heeled," to use a popular expression, if it tries to break into that line of business.

Mr. CUMMINS. Mr. President-

The PRESIDING OFFICER (Mr. THOMPSON in the chair). Does the Senator from Oregon yield to the Senator from Iowa? Mr. CHAMBERLAIN. I yield to the Senator.

Mr. CUMMINS. Why did not the committee recommend the establishment of a Government steamship line from Alaska to these points on the west coast? That would not cost a great deal of money, when viewed from the standpoint of the Government. I had hoped we might do on our west coast precisely what we have done on our east coast. The Panama Canal will be finished soon. We have a fleet of eight steamers, I think, now plying between New York and Colon. When the canal is finished why should not those steamers, and others that may be added to the fleet, go through the canal and do business on the west coast of this country? My own opinion is that we will need that fleet of steamers before we get the reliet we are seeking.

Mr. CHAMBERLAIN. I am inclined to agree with the Senator that there ought to be some provision of that kind on the part of the Government. It may follow that the Government itself will have to take that matter in hand. We had to deal mainly with the construction of a railread in Alaska, however, and it was the opinion of some members of the committee, at least, that if the transportation situation could be relieved in Alaska itself, the other things would follow.

Take the Humboldt Line, for instance. It is owned by a very wealthy company; and they have had to fight a powerful combination ever since their line of steamers has been running from San Francisco, except at times when they have been in combination with them.

Mr. SMOOT. Mr. President-

The PRESIDING OFFICER. Does the Senator from Oregon yield to the Senator from Utah? Mr. CHAMBERLAIN. I yield.

Mr. SMOOT. In that connection, let me suggest to the Senator that in all of the hearings it was plainly shown that if the situation in Alaska proper were relieved, there would be business of sufficient quantity to induce English and other foreign ships to come there, and the rates would be lowered to such an extent that an exorbitant rate could not be charged.

Mr. CUMMINS. But one of the difficulties is the matter of docking—the matter of wharf facilities. I gather from the hearings and from my general information that private interests have been rather industrious in securing such facilities along

the south shore of Alaska.

Mr. SMOOT. I wish to say to the Senator that already there has been withdrawn by our Government a large amount of shore for the very purpose of establishing docks and wharves, but up to the present time, especially under present conditions, there is not sufficient business in Alaska to justify the building of more than is built at the present time.

Mr. CUMMINS. I understand that.

Mr. SMOOT. But when the time comes when the business is increased there is no question but that other companies can get dockage or frontage.

Mr. CUMMINS. Is that true of Resurrection Bay? I think it is true as to Resurrection Bay. Mr. SMOOT.

Mr. CHAMBERLAIN. It is pretty generally true as to all

As to all the bays?

Mr. CUMMINS. I have heard a report with regard to Controller Bay, but I do not know just what the situation is in Resurrection Bay. I had an idea, however, that the available

sites in that harbor were generally taken.

Mr. CHAMBERLAIN. The Senator will remember that there was a good deal of controversy at the time of the Ballinger investigation, and the suggestion was made that the President had released enough lands at Controller Bay to give a railroad company practically the control of the dock situation there. think, however, that charge was measurably unjust. The testimony before the committee showed that some portion of the land was released from the reserve, but that there was enough left there for the Government or anybody else to construct opposition wharves and docks.

Mr. SMOOT. I think it showed that over one-half of the

land is available at this time.

Mr. CHAMBERLAIN. Mr. President, I shall not have time to go into this subject fully. I invite the careful attention of Senators to the hearings, because they contain full information, particularly if taken in connection with the report of the Alaska Railroad Commission.

Mr. HITCHCOCK, Mr. President—
The PRESIDING OFFICER. Does the Senator from Oregon yield to the Senator from Nebraska?

Mr. CHAMBERLAIN. I yield.
Mr. HITCHCOCK. I wish to suggest to the Senator from Oregon, too, that the bill to which he is speaking, and of which he is very largely the author, specifically provides for the reservation of land for stations, terminals, docks, and other purposes of a similar sort.

Mr. CHAMBERLAIN. Yes. Mr. HITCHCOCK. If it is difficult for an independent steamship line to find dockage facilities under the present conditions, undoubtedly those conditions will be very much improved when the United States Government, or the President, acting for the United States, has made these reservations and established these docks in connection with the railroad enterprise.

Mr. CHAMBERLAIN. That is true; and I may say in that connection that most of the privileges that have been obtained by companies were obtained before the withdrawals and before

the Government had the key to the situation.

Mr. CUMMINS. Mr. President—
The PRESIDING OFFICER. Does the Senator from Oregon further yield to the Senator from Iowa?

Mr. CHAMBERLAIN. I do.

Mr. CUMMINS. I will promise not to interrupt the Senator again very soon.

Before the Senator from Oregon finishes his review of the situation, I want him to couple up the bill that is before us with the situation. I should like to know more about what will probably be done, if the bill is passed, with regard to the two or three railroads that are already built there; whether it is the expectation that the Government shall acquire those railroads, or either of them, and build on into the interior, or whether it is expected that independent lines will be located from these seaports and built from tidewater to the interior,

My only objection to this bill is to its indefiniteness. By it are given vast powers to an officer of the Government-a very high officer, and one in whom we all have great confidence—but these things may not be done in his lifetime. Before I can determine what we ought to do I should like to know what was in the minds of the committee and what the members of the committee feel should be done with regard to building these railways. I say that only because I should like to have the Senator go through the bill and analyze the powers it gives to the President and apply those powers to the existing situation.

Mr. CHAMBERLAIN. I will say to the Senator that I shall

endeavor to do that later on, but I wanted first to get rid of the

transportation matter proper.

Mr. CUMMINS. Certainly. I shall not further interrupt the Senator until he reaches that point.

Mr. CHAMBERLAIN. I have barely touched upon the freight situation, but I call the attention of Senators to it simply because I want them to look at it and find out that rates in Alaska are prohibitive. I might say further in that connection, that while transportation from San Francisco or Seattle or Portland or Tacoma up to Alaska is practically under monopolistic control, there has been a combination between the White Pass & Yukon line and its steamers on the upper Yukon and the steamers on the lower Yukon which are owned by the Alaska Syndicate. It is true there is a little row on between them now, and the White Pass & Yukon Co. are building some steamers to ply between White Horse and Dawson, on the upper Yukon River, and possibly from Dawson down the Yukon to Fairbanks. There is some sort of competition there, but nobody can tell how long that competition will last. While the rates were high around by way of St. Michael and up the Yukon River they were high in the upper Yukon as well, because there was a combination between the upper and the lower river companies; so they have fixed rates at whatever point they deemed most advantageous to themselves.

In connection with the freight situation, I wish to call attention to and ask to have printed as a part of my remarks the through passenger tariff of the Northern Navigation Co., in connection with the Alaska Steamship Co. and the Pacific Coast Steamship Co., found on pages 643 and 644 of the Senate hear-

The PRESIDING OFFICER. Without objection, it will be so ordered.

The matter referred to is as follows:

THROUGH PASSENGER TARIFF.

Northern Navigation Co. in connection with Alaska Steamship Co. and Pacific Coast Steamship Co. [N. N. Co., No. 13-B. A. S. S. Co., No. 54. P. C. S. S. Co., No. 13-A.]

Between Seattle or Tacoma, or San Francisco direct, and points on Yukon, Tanana, Koyukuk, Iditarod, and Innoko Rivers, in Alaska, vla St. Michael.

Effective with opening of navigation, season 1912. Subject to change without notice.

Children between the ages of 5 and 12 years, half rate, and must be accompanied by parent or guardian.

Each adult passenger allowed 150 pounds of baggage, valuation not exceeding \$100.

Excess baggage rate, 10 cents per pound, and 10 per cent additional on valuation of excess of \$100.

Corpses, one first-class fare if accompanied by attendant; double first-class fare when not so accompanied.

Women carried first class only.

Clergy and missionary rates, two-thirds of tariff between all points.

Rates named do not include maintenance at transfer points.

Mr. CHAMBERLAIN. To show you how people have been imposed on in that section of the country, I am going to read just a little of the testimony of Judge Wickersham. He says, at page 645 of the Senate hearings:

I want to call your attention to one or two things in these commodity rates of the Copper River & Northwestern. For instance, hay, in carload lots from Cordova—and, mind you, it is only 196 miles from Cordova out to the end of their road on the Copper River—hay in carload lots of 16,000 pounds from Cordova to Chitina, 132 miles, cost 100 cents per 100 pounds. In other words, it costs \$20 a ton for 132 miles. If you take it up to Kennicott, it costs 147 cents, or \$29.40 per ton.

Further along he says:

I have a letter here headed "Alaska Steamship Co.," with a red flag on it—and very properly, too. It is as follows:

SEATTLE, WASH., February 14, 1913.

Mr. W. A. Steel, Room 551 Colman Building, Seattle, Wash. DEAR SIR: Confirming telephone quotations to-day. The following rates apply on new ore sacks—

Now, this is on new ore sacks-

less than carload quantities, Seattle to Strelna, on Copper River & Northwestern Railway:
Seattle to Cordova, \$12 per ton weight or measure; Cordova wharfage, \$1.60 per ton weight or measure; Cordova to Strelna, \$34.48 per ton weight, or a through charge from Seattle to Strelna of \$48.08 per ton. In addition to this you will have to look out for wharfage at seattle. Yours, truly,

C. J. JONES, Traffic Manager.

Judge Wickersham further says:

Now, figure it up. It is \$48.08 per ton on ore sacks going in there after ore for developing the country and helping the miner out!

Showing the absolute impossibility of any independent company engaged in the copper industry in Alaska doing business in competition with the Guggenheims or the Alaska Syndicate.

For instance, the Guggenheim people owned the mines at Kennicott, at the end of the Cordova & Northwestern Railroad. They owned the most valuable copper mines in the country. It was to their interest to see to it that no independent company could compete with them in the production or handling of copper. Not only did they own the transportation, not only did they own these valuable copper mines, the Bonanza mines, but they owned the transportation lines from the seacoast to Seattle and to Tacoma, where their smelter is situated, and they controlled the smelting as well. They fixed the rate of freight in and out and fixed the rate of smelting, so that they either charged the independent operators as much as the traffic would bear or else they absolutely prohibited them from doing business on any terms whatsoever.

Mr. BORAH. Mr. President—
The PRESIDING OFFICER. Does the Senator from Oregon yield to the Senator from Idaho?

Mr. CHAMBERLAIN. I yield.

Mr. BORAH. Is not this transportation line within the juris-

diction of the Interstate Commerce Commission?

Mr. CHAMBERLAIN. I want to call the Senator's attention to that. I remarked about that a moment ago. If I have time to go into that matter and to discuss the decisions of the courts and of the Interstate Commerce Commission, the Senator will find that there has been an interminable battle, finally reaching the Supreme Court of the United States. That court has determined that the Interstate Commerce Commission, notwithstanding it had held it had no jurisdiction, did have jurisdiction over these railroad rates.

Mr. BORAH, -So the Interstate Commerce Commission now

has jurisdiction, under that decision?

Mr. CHAMBERLAIN. It is supposed to have.

Mr. BORAH. There could not be any supposition about it, I presume, if the Supreme Court of the United States has so

Mr. CHAMBERLAIN. They have not done anything yet. Mr. BORAH. That is a different proposition. I was just thinking that the argument of the Senator, which seems to be very strong and conclusive upon this proposition, must necessarily carry us a step further, and that is to the complete

Government ownership of railroads.

Mr. CHAMBERLAIN. No; I do not see that at all. I am sorry I do not take the Senator's view of the matter. I say as a general proposition that I do not favor the Government ownership of railroads. If the conditions existed now which existed 10 years ago, when the railroad companies absolutely resisted every effort of Congress and the State legislatures to control them, and they showed an indisposition to obey the laws of this country, then I believe Government ownership would be inevitable.

Mr. BORAH. Inasmuch as this transportation company is within the jurisdiction of the Interstate Commerce Commission, and that commission has the same power over it that it has over a railroad running from the Atlantic to the Pacific, I do not see why it can not enforce reasonable rates there just as it can in the United States. If it does do so, it seems to me the rates should be as reasonable as they are in the United States. On the other hand, if it is true that the commission has not the power to give us reasonable rates, notwithstanding it has jurisdiction, does not the same argument prove conclusively that you must take control of at least one line from the Atlantic to the Pacific in order to regulate and control and keep alive competition between the railroads of the country?

Mr. CHAMBERLAIN. In reply to the Senator, permit me to say that the Government now, at an expenditure of about \$400,000,000, has practically put itself in the position of having a line between the Atlantic and the Pacific in the shape of the Panama Canal and the Government-owned railway there. That is the regulator of transcontinental freight rates, and always

will be as long as the United States controls it.

Mr. BORAH. Then, that is another step along the line of public ownership.

Mr. CHAMBERLAIN. And that I approve.

Mr. BORAH. We do not know just how soon we will take the other step

Mr. CHAMBERLAIN. The United States has taken a further step for controlling railroad rates along the Atlantic coast by putting on a line of steamers for the very purpose of controlling the rate situation on the Atlantic seaboard.

Mr. BORAH. That makes two steps. How many more steps it to complete Government ownership?

Mr. CHAMBERIAIN. I will say to the Senator that wherever it is necessary to protect the interests of its people the United States ought to go ahead and do it. Alaska, particularly, is so situated that these steps are necessary for the development of its resources and the protection of the people. In this connection we must assume that the men who are on the ground, the men who are familiar with conditions in Alaska and know the people and know the resources, speak from knowledge. I ask to have inserted in the Record as a part of my remarks what was said by Dr. Brooks, of the Geological Survey, on the what was said by Dr. Brooks, of the Geological survey, or the subject of rates and transportation on page 631 of the Senate hearings. He goes into the subject at length, and he makes the astounding showing that out of \$10,000,000 of freight that is paid for transportation in Alaska \$5,000,000 of it comes out of the gold production in that country.

The PRESIDING OFFICER. Is there any objection to the

request of the Senator from Oregon? The Chair hears none,

and it will be so ordered.

Mr. CHAMBERLAIN. I will just read what he says about that, because I want the Senate to understand it. Dr. Brooks is a very conservative man, and wherever he thinks there is a doubt on any subject with reference to the development of Alaska he does not hesitate to express his opinion, whether it is for his view or against it. He says:

No exact figures are available in regard to the amount of freight annually shipped to the Alaska portion of the Yukon Basin, but it is probably safe to say that this amounts to 30,000 tons, and that it costs over \$2,500,000 to land it at the end of steamboat navigation.

Now, I have shown to the Senate that that is not all the freight rate, because after it reaches the end of steamboat navigation it must be transported into the interior, and that is really the heaviest part of the transportation problem:

The mine freight must then be hauled by wagons or sleds, except at Fairbanks, where there is a railway. It is estimated that this haulage from steamers to mines for the Alaska Yukon costs from \$2,000,000 to \$2,500,000 a year. The total annual cost of freight for the Yukon Basin is, therefore, probably between \$4,500,000 and \$5,000,000, or nearly 50 per cent of the value of the entire gold output.

If that be true, does not that come out of the pocket of the man who goes down into the mine and mines the gold?

Mr. CLARK of Wyoming. I do not understand that this is freight on the gold output.

Mr. CHAMBERIAIN. No; on everything. Mr. CLARK of Wyoming. It is the freight on everything Mr. CLARK of the country. that goes into the country.

Mr. CLARK of Wyoming. Whether for use in the mines or otherwise?

Mr. CHAMBERLAIN. Oh, yes. I did not mean to say that it was only freight on the mineral product.

Dr. Brooks says, further:

The data at hand seem to justify the conclusion that Alaska's annual expenditure for transportation of supplies and equipment is between \$7,000,000 and \$8,000,000.

Now, note this:

Probably 30 per cent of this represents ocean freights, which must remain a fixed charge, even with the improvement of transportation lines into the interior. It would appear that on 70 per cent of this amount a very material reduction could be brought about by the con-struction of railroads and wagon roads.

I will not read further from Dr. Brooks at this point. I simply wanted to show that the freight rates actually paid in Alaska are equivalent to one-half of the gold production in that

In this same connection, Mr. President, I am going to call attention to and ask to have embodied in my remarks what Gov. Strong, of Alaska, has to say in his report just filed. I do not know whether it is in the hands of Senators or not. I got an advance copy of it from the printer. I want to put in the RECORD what he says about the coal lands in Alaska and the transportation question generally, because it comes fresh from a man who says in his report that he has visited every part of 'Alaska since he was appointed governor of the Territory. In addition to that, I will say that he has been in Alaska for a good many years and knows conditions there from actual experience and observation.

The PRESIDING OFFICER. Is there any objection? The Chair hears none, and it is so ordered.

The matter referred to is as follows:

THE COAL LANDS.

With a constantly increasing demand for coal, not only for domestic use, but for industrial purposes as well, the vast coal-hearing areas of Alaska are still withheld from development. It is not deemed necessary here to enter upon a discussion of the causes that have produced this condition. These have been told and retold many times during the past years. To say that the industrial development of Alaska, on a scale commensurate with the extent and variety of its resources, depends upon the development of the coal fields, is but stating a fact that is exceedingly trite. With practically unlimited quantities of the best quality of bituminous, semibituminous, and anthracite coals within the Territory, for many years its people have been compelled to import nearly all the coal needed for domestic fuel and for industrial purposes from foreign countries, largely from British Columbia, all purposes from foreign countries, largely from British Columbia, foreign coal for the use of the United States Government was witnessed at Unalaska. However, this is not an unfamiliar sight in Alaska. A strike of coal miners in British Columbia, which has been in existence for nearly two years past, has caused the coal-supply situation to become acute in some sections of Alaska, which are dependent upon that country for coal.

From an economic and industrial standpoint it may also be pointed out that if the coal areas of Alaska ware developed a temporation.

country for coal.

From an economic and industrial standpoint it may also be pointed out that if the coal areas of Alaska were developed a tremendous impetus would be given to quartz mining in nearly every section of Alaska. It is a well-known fact that in Alaska are immense deposits of metalliferous ores of various kinds which can only be worked profitably if coal and coke are obtainable at reasonable prices. The cost of both these products is now so great that development of many of these ore bodies is out of the question. Given a cheap fuel supply, smelters would be built and the ore treated at home with coal mined and coke manufactured within Alaska; mining would be stimulated vastly and trade and commerce would be greatly extended; prosperous industrial communities would be created and the population of the Territory would increase rapidly.

The principal coal measures of the Territory are found in the third judicial division—in the Bering River and Matanuska regions—and there are also extensive deposits in the fourth judicial division, on the Nenana River, and in the second judicial division, at Cape Lisburne and Chicago Creek. In the Fairbanks district, on the Tanana River, quartz mines are just beginning to be developed, and unless cheaper fuel can be readily obtained there the industry will be seriously handicapped or perhaps abandoned. The Nenana coal fields are distant from the quartz-producing section about 50 miles. At this time an inferior quality of wood, which is now used exclusively for fuel, costs, delivered at the mines, \$15 per cord, and the ore must carry high values to stand the cost of fuel. A similar condition exists in the Seward Peninsula region, northwestern Alaska, where a large number of power dredges are employed in alluvial mining. Some of these are compelled to resort to the use of gasoline and fuel oil from the California oil fields. This statement applies to some parts of southwestern Alaska, where fuel oil is also used. If Alaska coal could be obtained these operators would be enabled to save many thousands of dollars yearly, the scope of their operations would be largely extended, employment would be given to many more men, and generally industrial and business conditions would be greatly improved.

The people of Alaska are firm in the belief that the present administration will in the immediate future adopt a liberal policy that will have for its object the opening of the coal fields, or a part of them, on lines that will insure a permanent supply of coal at reasonable prices without the danger of a monopoly either in producing or selling. In Alaska patents have been granted to only two coal-land claimants. These patents were issued for claims carrying an inferior quality of coal. Patents for coal lands have been applied for in the Bering River and Matanuska sections, but none have been granted, while many applicatio

pass, awaring the time when they shall be permitted to mine and use their own coal.

With the coal mines of Alaska developed and producing, the people of southeastern and southwestern Alaska would be enabled to buy their coal for not more than \$8 per ton, and the people of northwestern Alaska and the interior at prices not to exceed \$10 per ton or less, allowing fair profits for the cost of mining and transportation.

The importation of coal into Alaska from the States and from foreign countries during the last fiscal year amounted to 102,169 tons, valued at \$492,301. Of this, 60,600 tons, valued at \$219,788, was foreign coal, and 41,569, domestic, valued at \$212,523. The coal importations, domestic and foreign, during the fiscal year 1912 were 71,452 tons, valued at \$365,551.

The market prices at which coal has been sold in Alaska during the past 14 years range from \$150 a short ton in Nome in 1899, to \$10 in Juneau and \$13 in Skagway in 1913. In Nome the established price is about \$20 per ton; at Cordova, \$17.50; Unalaska, \$15; Wrangeli, \$14; and Ketchikan, \$11.50.

Mr. CHAMBERLAIN. To meet and overcome the transportation difficulty as I have undertaken to develop it two bills have been introduced in the Senate. One of them was introduced by my distinguished colleague and friend, the Senator from Washington [Mr. Jones], and was known as Senate bill 133. The other was introduced by myself, and was known as Senate bill 48. These bills did not differ very essentially infundamentals. Both of them placed upon the President the responsibility for the selection of routes into Alaska, and the construction, equipment, and operation of such roads as might be constructed. After consideration of them both, the Senator from Washington and I were appointed a subcommittee to go over the bills and undertake. if possible, to reconcile our dif-ferences, and to report a bill which would not only meet our views but which we hoped might meet the views of the whole committee. We did get together and spent much time in going over the situation, and finally reported Senate bill 48, the bill which was introduced by me. I want to say, in deference to my friend the Senator from Washington, that it is a combination of both bills, embodying not only the best features of both but suggestions which were made by the War Department and other departments of the Government. That is the bill which is now pending before the Senate.

The history of this railway legislation is familiar to everyone, but some Senators have told me that they have not given the matter any consideration so far, and I am going to call attention to it briefly.

It will be remembered that in accordance with the provisions of section 18 of an act of Congress, public document 324, approved August 24, 1912, President Taft appointed a

To conduct an examination into the transportation question in the Territory of Alaska; to examine ralirond routes from the seaboard to the coal fields and to the interior and navigable waterways; to secure surveys and other information with respect to railroads, including cost of construction and operation; to obtain information in respect to the coal fields and their proximity to railroad routes; and to make report of the facts to Congress on or before the 1st day of December, 1912, or as soon thereafter as may be practicable, together with their conclusions and recommendations in respect to the best and most available routes for railroads in Alaska which will develop the country and the resources thereof for the use of the people of the United States.

Under the requirements of the act the President was required to appoint an officer of the Engineer Corps of the United States Army, a geologist in charge of Alaska surveys, an officer in the Engineer Corps of the United States Navy, and a civil engineer who had practical experience in railroad construction and has not been connected with any railroad enterprise in said Territory. President Taft, in pursuance of the section which I have just read to the Senate, appointed Maj. Jay J. Morrow, Corps of Engineers, United States Army, chairman; Alfred H. Brooks, geologist in charge of Division of Alaskan Mineral Resources, Geological Survey, vice chairman; Civil Engineer Leonard M. Cox, United States Navy; and Colin M. Ingersoll, consulting railroad engineer, New York City.

The commission appointed under the provisions of this act went to work immediately. I believe I may safely say that in all the history of the demands that have been made by Alaska that something should be done in the interests of the people, it is the only time that any board or body of men undertook to act promptly in reference to such demands or in reference to such legislation. That commission at once made an examination of all the feasible routes from the open ports on the southern coast of Alaska into the interior, and in less than six months after their appointment—on the 20th day of January, 1913—they submitted an exhaustive report to the President, with maps of feasible routes, statistics, and other important data affecting the Territory. This report was submitted to Congress by President Taft in a message bearing upon the same February 6, 1913. It is the document that was requested to be republished this morning for the use of the Senate.

I want to call attention to the message of President Taft. I am going to do it for the purpose of showing that this is not a party measure. It is not a political measure. It is a measure that has been advocated by distinguished men in all parties, and for the single purpose of developing Alaska, and greatly benefiting the whole country from a commercial point

President Taft said in his message of transmittal:

The Territory of Alaska contains large undeveloped mineral resources, extensive tracts of agricultural and grazing lands, and the climate of a large part of the Territory is favorable to permanent settlement and industrial development. The report contains much specific information and many interesting details with regard to these resources. It finds that they can be developed and utilized only by the construction of railways which shall connect tidewater on the Pacific Ocean with the two great inland waterways—the Yukon and the Kuskokwim Rivers

I do not think anyone will ever charge President Taft with being one of the radical, progressive men who favor general railroad ownership by the Government.

The resources of the inland region, and especially of these great river basins, are almost undeveloped because of lack of transportation facilities. The Yukon and Kuskokwim Rivers system includes some 5,000 miles of navigable water, but these are open to commerce only about three months in the year. Moreover, the mouths of these two rivers, on Bering Sea, lie some 2,500 miles from Puget Sound, thus involving a long and circuitous route from the Pacific Coast States. The transportation of freight to the mouths of these rivers and thence upstream will always be so expensive and confined to so limited a season as to forbid any large industrial advancement for the great inland region now entirely dependent on these circuitous avenues of approach.

inland region now entirely dependent on these circurous approach.

From these considerations the commission finds that railway connections with open ports on the Pacific are not only justified but imperative, if the fertile regions of inland Alaska and its mineral resources are to be utilized; but that with such railway connections a large region will be opened up to the homesteader, the prospector, and the miner. So far as the limited time available has permitted the commission has investigated and in its report describes all of the railway routes which have been suggested for reaching the interior, including the ocean terminals of these routes.

That is what President Taft had to say on the subject.

On the other hand, President Wilson, as we all know, in a forceful message to the Congress of the United States advocated this very thing. I am going to call attention a little later not only to these utterances of the Executive of the Nation, but I am going to call attention to the fact that the platforms of every party for more than 50 years have advocated aid by the Government of railroads and routes that may be used in connection with the Postal Service.

Mr. CUMMINS. In a colloquy with the Senator from Idaho [Mr. Borah] the Senator from Oregon rather left the impression that the high rates of freight prevailing in Alaska furnish the only reason for building a Government railway there. I am sure he did not mean that.

Mr. CHAMBERLAIN. I did not mean to be so understood.

Mr. CUMMINS. If that were the only reason for a Government railway it might be avoided by a regulation of the rates, but the real reason is that you can not get the railways to open up that country in any other way. Is not that the real reason that the Government is under the same obligation to furnish railways in Alaska that any government is to build highways?

Mr. CHAMBERLAIN. Let me say, in answer to the Senator, that that is true, but I want him to understand that the Government itself has prevented private initiative in the way of railroad construction by withdrawing everything that might possibly have had the effect of inviting railroad construction and development. Private initiative would not have been possible in Alaska anyhow, unless those who were backing the railroad could have acquired the resources of Alaska.

Mr. CLARK of Wyoming. Mr. President—
The PRESIDING OFFICER. Does the Senator from Oregon yield to the Senator from Wyoming?

Mr. CHAMBERLAIN. I yield.

Mr. CLARK of Wyoming. Has the Senator the assurance that after these railroads have been built a different condition of affairs will present itself as to the development of those resources by citizens of the United States?

Mr. CHAMBERLAIN. I have not any doubt but that it will produce a change in conditions. I will say to the Senator that I believe it will be within the power of the Government to regulate and control the resources of Alaska. As I said yesterday, it was almost physically impossible under former conditions to prevent men, if they wanted to defraud the Government, from taking up those resources and placing them into monopolistic control.

Mr. CLARK of Wyoming. That is not exactly the point to which my question was directed. I wanted to gather from the Senator, if he has a notion on the subject, whether any different policy will be pursued after the building of the railroad than

is being pursued now in regard to those resources.

Mr. CHAMBERLAIN. I have not any doubt that the Government will pursue a different policy. Let me say to the Senator that it must pursue a different policy. I will mention just one thing that will make it necessary for the Government to adopt some different policy with reference to the development of Alaska. When the Panama Canal is opened instead of the Navy of the United States using 160,000 tons of coal per year and it becomes necessary to get our whole fleet on the Pacific side, as doubtless will be the case some time in the very near

side, as doubtless will be the case some time in the very near future, the coal alone that the United States will have to take out there for its Navy will pretty nearly support a railroad.

Mr. CLARK of Wyoming. But my question was how it would affect the general industries of Alaska as related to the citizenship of the United States. The Government itself could mine its coal. The Government itself can mine its coal now with or without transportation; but the citizens of the United States can not mine coal in Alaska, notwithstanding the tremendous measure of coal there, notwithstanding the fact that hundreds of thousands of tons are sent from foreign countries to the Atlantic seacoast. What I should like would be some as-surance that even after these railroads are built the resources of Alaska would be put in such a shape that they might become available.

Mr. CHAMBERLAIN. Of course, Mr. President, no man on earth can say that citizens of the United States individually would be materially benefited by being permitted to go up there and develop the resources. It stands to reason that a great Government like this, with men at the head of it who have been placed there by the confidence that their fellow citizens have in them, would undertake to do that which would be best not only for Alaska but for the whole country. that under present conditions Alaska has been handled not for

the benefit of the whole country, but for the development of individual and special interests. There is no question about it.

Mr. CLARK of Wyoming. I shall have to take issue with that. In my judgment Alaska has been handled simply for the purpose of sealing up Alaska. If to-day the people of Alaska could be given a free hand to develop the interests of Alaska honestly and without fraud, Alaska would go ahead and prosper. On the contrary, she has been going back since the strong hand of the Government has been laid on the resources of Alaska and since individual enterprise has been entirely stifled.

Mr. CHAMBERLAIN. I am in sympathy measurably with the position which the Senator takes, but he was probably not here when I discussed that branch of the subject yesterday. I took the position that while generally I am opposed to the withdrawal of large areas from settlement and acquisition by the individual, I approved of the course of President Roosevelt in withdrawing this vast area for the simple reason that everything tended to prove that the Alaska Syndicate not only were attempting to acquire the gateways of Alaska, which they practically did acquire, but they were building a line of railway from its most important gateway to the Bering coal field, the great coal field of Alaska, and intended to acquire possession of that, as evidenced by the contract which they entered into with the Cunningham claimants. It is my opinion that but for the fact that those areas were withdrawn from acquisition by the Cunningham people the syndicate not only would have owned the gateway into that country, but they would have owned every acre of coal land in the Bering coal field.

Mr. WEEKS. Mr. President—
The PRESIDING OFFICER. Does the Senator from Oregon yield to the Senator from Massachusetts?

Mr. CHAMBERLAIN. I yield.

Mr. WEEKS. The Senator from Oregon has just made an interesting statement about the fleet going into the Pacific and the possibility that if it did the requirements for coal would be sufficient to support a railroad. I wish to ask him if he has ever made a comparison of the cost of mining coal and bringing it to the United States compared with mining coal in

Pennsylvania or West Virginia?

Mr. CHAMBERLAIN. I have not done so myself, but the hearings here disclose that there is not a very great difference. Even under the bad conditions which exist in Alaska with reference to the mining of coal, no matter where it may come from, it would not make very much difference how great the charge was, within reason, it would cost less to deliver Alaska coal on board ship at Resurrection Bay or Controller Bay or Cordova or any of those ports than it costs now to ship coal around the

I will call attention to one thing, and that is the condition which is likely to confront us at any time. I am not a pessimist about our relations with foreign Governments, but the Senator knows that the conditions are delicate in the Pacific right now. Coal delivered at San Francisco, for instance, from Norfolk or Baltimore, where it is taken on board the colliers, is delivered at San Francisco at from \$7.50 to \$8.25 a ton; if delivered in domestic bottoms, it costs \$2 more per ton, and most of it is shipped in foreign bottoms.

Mr. CLARK of Wyoming. Around the Horn?

Mr. CHAMBERLAIN. Around the Horn. It could not possibly cost that much delivered on board the ship itself in a harbor which is big enough and safe enough and open enough to admit the whole Navy of the United States, taking the coal directly on board.

Mr. WEEKS. How much will it cost to deliver coal from

San Francisco when the Panama Canal is completed?

Mr. CHAMBERLAIN. I have not the estimate on that. Mr. WEEKS. Would the Navy be in Alaskan waters? If the Navy were in the Pacific for defense purposes or for war purposes it would be hundreds of miles or thousands of miles likely from Alaskan waters.

Mr. CHAMBERLAIN. I call the Senator's attention to the fact that the nearest way to the Philippine Islands and the nearest way to Japan from the cities of Portland, San Francisco, Seattle, or Tacoma is up around through the Bering Sea.

Mr. WEEKS. I understand the difference between circle sailing and direct sailing, but that is not the point at all. We have certain points which we would have to defend in time of war in the Pacific. They would not be in Alaska; they would be down in Honolulu and at Guam and in the Philippines.

Mr. CHAMBERLAIN. That is assuming, if the Senator please, that the United States was going to be victorious in every scrap it had. I hope it may be, but that does not follow necessarily. We have to have coaling stations, and the cheapest coaling station is the place where the coal is actually produced, if in reach of our colliers or of the Navy.

Mr. President, I have been diverted a little from what I was

discussing

Mr. CUMMINS. I should like to divert the Senator a little longer on that point, if I may be permitted to interrupt him.

Mr. CHAMBERLAIN. I yield.

Mr. CUMMINS. There is a good deal of evidence that coal can be put down along the south shore of Alaska, that it can be landed at the ship's side in either of these two great harbors for \$4 a ton. That includes the cost of mining and the cost of transporting it to the shore. It goes without saying that the Government could save anywhere from \$5 to \$6 a ton if it were to use that coal instead of taking it around the Horn from the United States. Six dollars a ton on the coal that is used there now means 5 per cent interest on more than \$20,000,000. I think it is a simple calculation to show that it is really a good commercial venture for the United States to undertake to mine the coal there or see that it is mined and delivered to our ships on the Pacific coast.

Mr. CHAMBERLAIN. There is no question about that. The record here shows, as I recall it, in a general way since the Senator has addressed me on the subject, that it costs about \$2.50 to mine coal in Alaska and about \$2 for freight to San Francisco. That would make from \$4 to \$4.50 per ton. While

that coal is of excellent quality, actual tests show that it requires a little more Alaska coal for use in the Navy than of Pocahontas coal, but it is still sufficient for naval use, and there would be, as the Senator from Iowa says, a saving of from \$4.50 a ton to \$5 on every ton of coal consumed by the Navy.

Mr. CLARK of Wyoming. Mr. President—
The PRESIDING OFFICER. Does the Senator from Oregon yield to the Senator from Wyoming?

Mr. CHAMBERLAIN. I yield.

Mr. CLARK of Wyoming. Just on this point, and for information only-I think more than likely the information will be found in the publication which the Senator asked to have printed this morning-I wanted to ask the Senator whether there has been any real naval test of Alaska coal. Perhaps the Senator covered that in his remarks when I was not in the Chamber. I am free to confess that, so far as I am concerned, after having tried to make some investigation of the matter for a number of years, I have not personally the confidence in Alaska coal, either for general purposes or for naval purposes, that very many people have and that I think many excellent scientific authorities have. I should like to ask if the Senator has any definite information as to any tests that have been made as to the value of this coal for naval purposes or if any practical test has been made.

Mr. CHAMBERLAIN. I will say to the Senator that there has been a partial test made of this coal, but under very trying circumstances. A commission was appointed some time ago in charge of Dr. J. O. Downey, passed assistant surgeon of the United States Navy. He went in there and brought out, I think, probably five or six hundred tons of coal just as it was taken from the mines and it has been tested. The test shows a coal that the Navy can use, but it does not show up to the

best tests of coal that is now in use by the Navy.

Mr. SMOOT. Mr. President—

The PRESIDING OFFICER. Does the Senator from Oregon yield to the Senator from Utah?

Mr. CHAMBERLAIN. I yield. Mr. SMOOT. In this connection I want to say that I had a public man call on me the other morning who made the state-ment that he had been informed that the coal used in the test made by the Navy was from the Bering coal field, that it was not freshly mined coal, that it had been scooped up off the ground, and had lain in the weather for a number of years. I wish to say that there is no coal mined in the United States that could be exposed in the same way without being slacked and without becoming next to useless. I do not know that that is true, but I have confidence in the man who made the statement to me, and I wanted to ask Dr. Holmes, of the Bureau of Mines, if he knows anything about it, but he has been out of the city of late.

Mr. CLARK of Wyoming. My question was in the line of information on this bill. One of the main arguments in favor of this development of Alaska is that we are justified in building the railroad as a military necessity because we need the coal there for our Pacific Fleet. The inquiry that naturally suggests itself to my mind, in the first instance, is whether we have the thing there which we want to go after. So far as I have been informed and so far as I have been able to ascertain there never has been a test made, not a conclusive test at any rate, as to the value of the Alaskan coal for that purpose.

In fact it seems almost impossible that up to this time there could have been any effectual test made, because there has been substantially no development of the coal fields there. We do not know as to the quality nor as to the quantity nor as to the condition in which it is found. We do know that in large portions of the field it is practically valueless for transportation from the fact, as stated by the Senator I think yesterday, that in large portions of the field the natural convulsions have been such as to pulverize the coal and render it inefficient.

Mr. WILLIAMS. If the Senator from Oregon will pardon me, in one of the magazines of last month-I have forgotten which one it is; I will try to find it and bring it down to-morrow—there is a long article upon Alaska and its resources, and among other things a report of what purported to be the utterances of one of the naval officers of the United States who made a comparison of this coal with the Pocahontas coal and with some other coal, and he pronounced it superior to either.

Mr. CLARK of Wyoming. I think that was a chemical analysis of the coal.

Mr. WILLIAMS. That may be, but it purports to come from a naval officer of the United States, and I should not think that he would be engaged in chemical analyses. I should suppose that he would try it. I will try to find the article and bring it down to-morrow. I have forgotten now the magazine in which it appeared.

Mr. CLARK of Wyoming. I will say to the Senator that all these tests include a chemical analysis of the coal.

Mr. SMOOT. The test I had reference to, I will say to the Senator, was the only test that I understand has been made on a battleship or cruiser of the United States, and that was about 500 tons of coal taken from the Bering coal field.

Mr. WILLIAMS. Does the Senator remember which battle-

ship it was or what officer it was?

Mr. SMOOT. It was the armored cruiser Maryland.

Mr. WILLIAMS. Does the Senator remember who was the officer in command?

Mr. SMOOT. I do not remember.

The PRESIDING OFFICER. The Senator from Oregon will

Mr. CHAMBERLAIN. In connection with that situation, as has been suggested by the Senator from Iowa [Mr. Cum-MINS], coal from Alaska can be put on board vessels at less than one-half what it costs to go around by way of the Straits of Magellan. But the evidence shows, Secretary von L. Meyer testified before the House Naval Committee, and subsequent witnesses have testified, that the coal that is shipped from Norfolk or Baltimore around the Horn to be used on American naval vessels is practically all carried in foreign bottoms, in foreign-registered ships, and it is carried on them cheaper than it can be carried in American bottoms.

We have been buying coal from Japan and storing it in Pearl Harbor and the Philippines; we have been buying coal from Australia; we have been buying coal from powers that at any time we may come in conflict with and carrying it in vessels that belong to such powers. I think it was Secretary Meyer who said that in case of trouble with Great Britain, if we should undertake to put our own vessels to work to carry coal, it would paralyze the American commerce by the use of our mer-

chant vessels for transporting coal.

So it does seem to me to be the height of folly for the United States to hesitate to expend thirty-five or forty million dollars in an experiment, if you please, in the construction of a railroad in Alaska, when at the same time we are spending more money annually to transport coal in foreign bottoms and to pay for coal that comes from Japan and other foreign countries.

Mr. President, so far as tests are concerned, as the Senator from Utah [Mr. SMOOT] has very distinctly stated, the test of Alaska coal was made under a most difficult and trying situation, and it was the only test of the Bering River field. As the Senator says, there has been no underground mining there. There are only two coal-mining claims that have been patented in the whole of Alaska. There has been, therefore, practically no mining of coal in Alaska. How in the world, then, is it possible for the Government of the United States to send men into those mines carrying five or six hundred tons out on sleds, taking it from merely the surface, and make a test that is worth anything at all?

Mr. CLARK of Wyoming. My statement that there has been no mining done there was simply used as an argument in favor of the proposition that there probably had been no test, and that we were not able to know at this time whether or not that coal would be valuable, and of course with it, lurking back in my mind, was the question whether we ought not to determine that fact before we expend thirty or forty million dollars for

carrying out this purpose.

Mr. CHAMBERLAIN. There has been a test, but as I said, and as the Senator from Utah said, it was made under very trying circumstances, and made from surface coal and of poor

quality, and that only of the Bering River coal.

Mr. President, I want to impress the Senate again with the serious situation which confronts the United States in its transportation of coal as we have it now. Aside from the high cost of the coal delivered at San Francisco to be used in the Pacific Fleet, we are spending immense sums of money for the purpose of constructing coal bunkers at Pearl Harbor. The efforts of the United States have not been so far very satisfactory. We have not only to construct bunkers there in which we can put coal shipped from Japan when we are at peace or from Australia when at peace with Great Britain and from Pennsylvania all the time, but we must have other stations as well at which the coal we buy from these countries may be stored.

President Wilson said in reference to our duty to Alaska in his message to the Congress of the United States December

2, 1913:

A duty faces us with regard to Alaska which seems to me very pressing and very imperative; perhaps I should say a double duty, for it concerns both the political and the material development of the Territory. The people of Alaska should be given the full Territorial form of government, and Alaska, as a storehouse, should be unlocked. One

key to it is a system of railways. These the Government should itself build and administer, and the ports and terminals it should itself control in the interest of all who wish to use them for the service and development of the country and its people.

But the construction of railways is only the first step; is only thrusting in the key to the storehouse and throwing back the lock and opening the door. How the tempting resources of the country are to be exploited is another matter, to which I shall take the liberty of from time to time calling your attention, for it is a policy which must be worked out by well-considered stages, not upon theory, but upon lines of practical expediency.

That is in part an answer to the Senator from Wyoming. The Senator from Wyoming thinks it is a problem that has to be worked out so as to protect the United States and to place it under proper governmental regulations.

It is part of our general problem of conservation. We have a freer hand in working out the problem in Alaska than in the States of the Union, and yet the principle and object are the same, wherever we touch it. We must use the resources of the country, not lock them up.

Parenthetically, I may say, that is the difference between the policy of the present administration in regard to this matter and the preceding administration, or at least some of the officials of

the preceding administration. Their policy was to lock them up.

Mr. CLARK of Wyoming. But the avowed policy was not.

Of course, we know the effect of it. What I want to be satisfied of is that the effect of this avowed policy of the new ad-

ministration will result differently. We hope it will.

Mr. CHAMBERLAIN. It was not only the avowed policy, but it was the practical work of the former administration, or at least one of the Cabinet officers who had this matter directly in charge. But we have here in addition-and I am going through it after a while-not only the promise of the President, but we have the promise of his good right arm, in the person of the Secretary of the Interior, to utilize the resources of Alaska and not lock them up against the world and against our own people in particular. The President continues:

our own people in particular. The President continues:

There need be no conflict or jealousy as between State and Federal authorities, for there can be no essential difference of purpose between them. The resources in question must be used, but not destroyed or wasted; used, but not monopolized upon any narrow idea of individual rights as against the abiding interests of communities. That a policy can be worked out by conference and concession which will release these resources and yet not jeopard or dissipate them, I for one have no doubt, and it can be done on lines of regulation which need be no less acceptable to the people and governments of the States concerned than to the people and Government of the Nation at large whose heritage these resources are. We must bend our counsels to this end. A common purpose ought to make agreement easy.

I fully agree with the utterance of the distinguished Presi-

I fully agree with the utterance of the distinguished President of the United States on this subject, and I think that western Senators particularly will be in entire sympathy with

his announced policy.

In connection with that, I desire to submit a letter from the Secretary of the Interior, Mr. Lane, of May 15, 1913, to the chairman of the committee which had this bill under consideration. I am not going to read it, but I am going to ask to have it inserted as a part of my remarks. He advocates not only opening up all of the resources of Alaska along proper lines of conservation for use, and not for withdrawal from use, but he advocates as the best means and the best instrumentality for developing the resources of that Territory the construction of a railroad into Alaska. This letter is printed on page 417 of the Senate hearings on these bills. I ask to have the letter inserted in the RECORD, Mr. President.

The VICE PRESIDENT. Is there objection? The Chair hears none.

The letter referred to is as follows:

DEPARTMENT OF THE INTERIOR THE SECRETARY OF THE INTERIOR, Washington, May 15, 1913.

Washington, May 15, 1913.

My Dear Senator: My opinion is requested as to Senate bills 48 and 133. These measures, in a word, provide for the construction by the National Government of a railway system in the Territory of Alaska.

I favor the adoption of this policy. I believe it to be that under which Alaska will develop most safely and most speedily and under which the resources of that Territory will most certainly become available to the whole people.

There is but one way to make any country a real part of the world—by the construction of railroads into it. This has been the heart of England's policy in Africa, of Russia's policy in Western Asia, and is the prompting hope of the new movement in China. Whoever owns the railways of a country determines very largely the future of that country, the character of its population, the kind of industries they will engage in, and ultimately the nature of the civilization they will enjoy. The policy of governmental ownership of railroads in Alaska seems to me to be the one that will most certainly make for her lasting welfare.

seems to me to be the one that will most contain welfare.

To many of our people Alaska is little more than a land of natural wonders, here and there dotted with mining camps and fishing villages. If Alaska is to be nothing more, it is almost a matter of indifference as to who builds her railroads. I have talked with many who know that country well, and I am convinced that we should think of Alaska as a land not only of mines and fisheries, but of towns, farms, milis, and factories, supporting millions of people of the hardlest and most wholesome of the race. If this conception of a possible Alaska is a true one, our legislation should be such as to most surely bring about this possibility, and it seems to me there is less of hazard as to Alaska's

future if the Government of the United States owns the railroads which will make its fertile interior valleys accessible from the coast and bring its coal, iron, copper, and other mineral resources within the reach of the world.

This is a new policy for the United States. Very true. This is a

and bring its coal, iron, copper, and other mineral resources within the reach of the world.

This is a new policy for the United States. Very true. This is a new part of the United States, And policies properly change with new conditions. The one determining question in all matters of government should be: What is the wise thing to do? The ancient method of opening a country was to build wagon roads. The modern method is to build railroads. To build these railroad: ourselves and control them may be an experiment, but such a plan does not suggest scandals more shameful or political conditions more unhealthy than many we have known in new portions of our country under private ownership. And in the end we will be free to establish and maintain our own chosen relationship between Alaska and the rest of the United States unhampered by threats of confiscation or the restraining hand of any merely selfish influences. We can only secure the highest and fullest use of Alaska by making her railways wholly subordinate to her industrial and social life and needs—true public utilities.

Respectfully,

Franklin K. Lane,

FRANKLIN K. LANE,

Hon. Key Pittman, Chairman Committee on Territories, United States Senate.

Mr. CHAMBERLAIN. The principal objection urged against any railroad legislation in Alaska is one of policy. There was at time when the constitutionality of such measures was seriously questioned. Any legislation that was intended for the purpose of aiding a railroad or other public utility construction was opposed on constitutional grounds; but I believe now that no one seriously objects on that account to the construction of railroads; so I am not going to undertake to discuss the matter from that standpoint. I will, however, call attention to a state-ment in the report of the House committee on this bill. I see the eminent chairman of the House committee which had this bill in charge is present here to-day. He called attention in his report to the fact that when the first bill was introduced in Congress by Stephen A. Douglas for the granting of aid to railways, for railroad construction, in 1850, it was seriously objected to by Senator Davis, of Mississippi, on the ground of its unconstitutionality. Before the next session of the Senate, however, the Legislatures of Mississippi and Alabama had considered the question and instructed the Senators from their respective States to support the bill with an amendment extending its provisions to Mississippi and Alabama. Douglas accepted such an amendment offered by Senator King, of Alabama, and the bill passed the Senate and the House of Representatives, supported by the affirmative votes of the Senators from Illinois, Mississippi, and Alabama. Thus it came that the act of Congress of September 20, 1850, passed. That was the first act granting aid to railroads.

In order to further substantiate the statement I have made that this is not a political question, that from the standpoint of party policy at least, the policy of aiding in the construction of railroads has been one that has been uniformly advocated by all parties, I am going to have inserted in the RECORD, without reading, in order that the minds of my colleagues may be refreshed on that subject, the platforms of the Democratic and Republican parties, beginning with the Democratic platform adopted at Cincinnati on the 2d day of June, 1856, followed by the Republican platform a little later, and all of the party platforms down to 1868, advocating grants to railroads for the purpose of aiding in railroad construction, not only in the

West but in the South as well.

Mr. CLARK of Wyoming. Mr. President—

The VICE PRESIDENT. Does the Senator from Oregon yield to the Senator from Wyoming?

Mr. CHAMBERLAIN. I yield.

Mr. CLARK of Wyoming. I merely want to ask the Senator senator.

a question. These platforms, of course, are cited as showing the policy of the parties as to legislation of this sort. I have not read all of those platforms, and the Senator has stated that he wants to save us the trouble of reading them. I will ask him if in any of those party platforms there is advocated Gov-ernment construction, Government ownership, Government con-

Mr. CHAMBERLAIN. Oh, no. We are advancing a little all the time, I will say to the Senator from Wyoming. You know I am sometimes reminded by our extremely conservative statesmen of one line of Cardinal Newman's magnificent hymn,

"Lead, Kindly Light," wherein it says-

Keep Thou my feet; I do not ask to see The distant way: one step's enough for me.

We have been taking one step at a time. One step at a time has satisfied at all times. That one step is sufficient; and this proposition as to Alaska now is only taking one step in advance of the platforms to which I have called attention, which date back to 1856. The Democratic platform of 1868, however, called a halt upon the further granting of lands to States or to rail-

road companies for railroad construction.

Not only that, Mr. President, but I want to call attention to the Baltimore platform of 1912 just for a moment. I will go

just a little further for the benefit of the Senator from Wyoming, and call attention to the platform declarations of both parties, beginning in 1892 and ending in 1912, where the declaration in the Democratic platform is this-this is for the benefit of some of my Democratic friends-

We favor national aid to State and local authorities in the construc-tion and maintenance of post roads.

CONSERVATION.

Immediate action should be taken by Congress to make available the vast and valuable coal deposits of Alaska under conditions that will be a perfect guaranty against their falling into the hands of monopolizing corporations, associations, or interests.

But there is only one way to immediately develop the resources of Alaska, and that is by the Government itself taking a hand in railroad construction.

Mr. THOMAS. Mr. President-

The VICE PRESIDENT. Does the Senator from Oregon yield to the Senator from Colorado?

Mr. CHAMBERLAIN. I do.

Mr. THOMAS. The Senator from Oregon has doubtless familiarized himself with these platforms, and I should like to ask whether he has discovered anything in any of the platforms of the two great national parties which opposes or denies the power or right of Government ownership over lines of transportation?

Mr. CHAMBERLAIN. Absolutely nothing. Now, Mr. President, may I have permission to have this matter inserted in the

RECORD?

The VICE PRESIDENT. Is there objection? The Chair hears none, and permission is granted,

The matter referred to is as follows:

NATIONAL PLATFORMS ON THIS SUBJECT.

NATIONAL PLATFORMS ON THIS SUBJECT.

The Democratic national convention was held at Cincinnati on June 2, 1856, and nominated James Buchanan. The platform adopted contained this resolution:

"Resolved, That the Democratic Party recognizes the great importance, in a political and commercial point of view, of a safe and speedy communication, by military and postal roads, through our own territory between the Atlantic and Pacific coasts of this Union, and that it is the duty of the Federal Government to exercise promptly all its constitutional power for the attainment of that object."

Two weeks later, on June 17, the Republican national convention met at Philadelphia, nominated Fremont, and its platform declared:

"Resolved, That a railroad to the Pacific Ocean by the most central and practicable route is imperatively demanded by the interests of the whole country, and that the Federal Government ought to render immediate and efficient aid in its construction, and as an auxiliary thereto to the immediate construction of an emigrant route on the line of the railroad."

1860: The Democratic national convention, which met at Baltimore on the 18th of June and nominated Douglas—

"Resolved, That one of the necessities of the age, in a military, commercial, and postal point of view, is speedy communication between the Atlantic and Pacific States, and the Democratic Party pledge such constitutional Government aid as will insure the construction of a railroad to the Pacific coast at the earliest practicable period."

The Breckinridge Democratic convention, at Baltimore, nominated John C. Breckinridge for President and adopted the following:

"Whereas one of the greatest necessities of the age, in a speedy communical commercial, postal, and military point of view, is a speedy communical commercial postal, and military point of view, is a speedy communical commercial postal, and military point of view, is a speedy communical commercial postal, and military point of view, is a speedy communical commercial postal, and milita

"Whereas one of the greatest necessities of the age, in a political, com-mercial, postal, and military point of view, is a speedy communica-tion between the Pacific and Atlantic coasts: Therefore be it

tion between the Pacific and Atlantic coasts: Therefore be it

"Resolved, That the National Democratic Party do hereby pledge
themselves to use every means in their power to secure the passage of
some bill, to the extent of the constitutional authority of Congress, for
the construction of a Pacific railroad from the Mississippi River to the
Pacific Ocean, at the earliest practicable moment."

The Republican national convention met in Chicago on May 16, nominated Abraham Lincoln, and declared in its platforn:

"That a railroad to the Pacific Ocean is imperatively demanded by
the interests of the whole country; that the Federal Government ought
to render immediate and efficient aid in its construction; and that, as a
preliminary thereto, a daily overland mall should be promptly established."

to render immediate and efficient aid in its construction; and that, as a preliminary thereto, a daily overland mail should be promptly established."

1864: The Republican national convention for 1864 met in Baltimore, renominated Lincoln, and declared on the railroad question:

"Resolved, That we are in favor of the speedy construction of the railroad to the Pacific coast."

1868: The Democratic national convention in 1868 met at New York City on July 4 and nominated Horatio Seymour for President. The Democratic Party then abandoned the plan of donating the public lands in aid of the building of railroads, and adopted one near to that suggested in the bill now reported, as follows:

"That the public lands should be distributed as widely as possible among the people, and should be disposed of either under the preemption or homestead laws, or sold in reasonable quantities, and to none but actual occupants, at the minimum price established by the Government. When grants of the public lands may be allowed necessary for the encouragement of important public improvements, the proceeds of the sale of such lands, and not the lands themselves, should be so applied."

plied."

1892: The Democratic national convention of 1892 was held at Chicago June 21. Grover Cleveland, of New York, was nominated for President, and the platform approved Federal aid to waterways in aid of cheaper interstate commerce rates, and declared for the building of the Nicaragua Canal:

"SEC. 15. For the purpose of national defense and the promotion of commerce between the States, we recognize the early construction of the Nicaragua Canal and its protection against foreign control as of great importance to the United States."

The Republican national convention of 1892 met June 7 at Minneapolis, nominated Benjamin Harrison for President, and adopted this plan on—

"The Nicaragua Canal: The construction of the Nicaragua Canal is of the highest importance to the American people, both as a measure of defense and to build up and maintain American commerce, and it should be controlled by the United States."

1896: The Democratic national convention of 1896 met at Chicago July 7, nominated William J. Bryan, and in its platform declared:

"Improvement of waterways: The Federal Government should care for and improve the Mississippi River and other great waterways of the Republic so as to secure for the interior States easy and cheap transportation to tidewater. When any waterway of the Republic is of sufficient importance to demand ald of the Government, such aid should be extended upon a definite plan of continuous work until permanent improvement is secured.

1900: The Democratic national convention of 1900 met at Kansas City, nominated Mr. Bryan, and declared in its platform:

"The Nicaraguan Canal: We favor the immediate construction, ownership, and control of the Nicaragua Canal by the United States, and we denounce the insincerity of the plank in the Republican platform for an isthmian canal in face of the failure of the Republican majority on this subject to pass such a bill in Congress."

The Republican national convention of 1900 met at Philadelphia, nominated Mr. McKinley, and declared in favor of the—

"Isthmian Canal and new markets: We favor the construction, ownership, control, and protection of an isthmian canal by the Government of the United States."

1904: The Democratic national convention met at St. Louis on July 6, nominated Mr. Parker, and in its platform again approved waterway improvements and declared on the canal question:

"Isthmian Canal : The Democrate have always contended for—a great interoceanic canal, furnishing shorter and cheaper lines of transportation and broader and less trammeled trade relations with the other people of the world."

1908: The Democratic national convention met at Denver, nominated Bryan and Kern, and in its platform declare

"Post roads: We favor Federal aid to State and local authorities in the construction and maintenance of post roads.

"Panama Canal: We believe that the Panama Canal will prove of great value to our country and favor its speedy completion."

1912: The Democratic national convention met at Baltimore, nominated Wilson and Marshall, and in the party platform declared:

"Post roads: We favor national aid to State and local authorities in the construction and maintenance of post roads.

"Conservation: Immediate action should be taken by Congress to make available the vast and valuable coal deposits of Alaska under conditions that will be a perfect guaranty against their falling into the hands of monopolizing corporations, associations, or interests."

The Progressive national convention met in Chicago, nominated Roosevelt and Johnson, and declared:

"Alaska: We demand also that extortion or monopoly in transportation shall be prevented by the prompt acquisition, construction, or improvement by the Government of such rallroads, harbor, and other facilities for transportation as the welfare of the people may demand."

Mr. CHAMBERLAIN. Now, going further, I propose to show

Mr. CHAMBERLAIN. Now, going further, I propose to show that the policies which have been advocated in all of these platforms have not been simply platform declarations amounting to nothing. I wish to say that they have been actually carried out. As evidence of that, I call attention to the fact that under these grants for railroad construction there were constructed prior to 1882 in the different States 16,239.10 miles of railroad, and I am going to ask to have this matter inserted in the RECORD. It appeared in the hearings, and I have taken this from the hearings and verified the statements therein contained by an examination of Donaldson's "Public Domain," a book which discusses with great learning, great ability, and great research the public-land laws of this country and all that has been done under them.

Here are the States that have been benefited: Alabama, Arkansas, California, Colorado, the Dakotas, Florida, Idaho, Illinois, the former Indian Territory, Iowa, Kansas, Louisiana, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, Nevada, New Mexico, Oregon, Texas, Utah, Washington, Wisconsin, and Wyoming. It will be observed that in that list of States there are many States that are not public-land States at all, and yet we have aided by Government railroad grants some of our Southern States. For instance, take the State of Alabama, which had 882 miles of railway built by Government aid; take the State of Mississippi, which had 406 miles of railroad built in the same way. I will ask to have this table inserted

in my remarks at this point, without reading.

The VICE PRESIDENT. Is there objection? The Chair

hears none.

The table referred to is as follows:

State or Territory:	Miles.
Alabama	882.00
Arkansas	620.16
California	1. 228. 80
Colorado	
Dakota	
Florida	
	77.00

Mr. CUMMINS. Mr. President—
The VICE PRESIDENT. Does the Senator from Oregon

yield to the Senator from Iowa?

Mr. CHAMBERIAIN. I do.

Mr. CUMMINS. May I call the attention of the Senator from Oregon to the fact—and I think it will greatly strengthen what he has just now argued—that there is hardly a State in the Union that has not had a law at least authorizing the taxing of its property and its people to aid in the construction of railways? Some of the States have now repealed those laws, because they are no longer necessary, but very great aid has been extended by the governments of the various States in that way

extended by the governments of the various states in that way in the building of our system of railroads.

Mr. CHAMBERLAIN. Yes; and I am glad the Senator has called my attention to that. That is a fact. It might be said, speaking of this one story forward which I mentioned a while ago, that we find the States are now appropriating money for cooperating with the United States not only in the construction and opening up of highways, building of canals, and improving rivers and harbors, but helping it in the constructing of highways that are used for post roads as well as for commercial purposes.

It is customary to-day, Mr. President, to denounce land grants; it has become exceedingly unpopular; and our Democratic friends are liable to be abusing Republicans, sometimes holding them responsible, and, on the other hand, Republicans are abusing Democrats and holding them responsible for such legislation, but in the final analysis we find that under all administrations these grants have been made.

Mr. SMITH of Arizona. If the Senator will permit me to interrupt him, my curiosity has been somewhat excited by the large number of miles of road that were constructed in Mississippi, for instance. Does the Senator recall the particular occasion of that and what sort of grant it was or what sort of aid was extended? If it would not interrupt the Senator, I

should be glad to have him enlighten me on that point.

Mr. CHAMBERLAIN. I can show the Senator Mr. SMITH of Arizona. I was curious to know what facts led up to that

Mr. CHAMBERLAIN. I will tell the Senator in a moment. It has been in the form of land grants to States in some instances and to corporations in others, and before I get through I will touch upon that subject.

Mr. CLARK of Wyoming. Was it a grant of lands outside of the State?

Mr. CHAMBERLAIN. Yes; because Texas did not have any public lands within its limits at all.

Mr. CLARK of Wyoming. We were speaking of the State of Mississippi. I do not understand that Texas received any aid.

Mr. CHAMBERIAIN. Yes, sir.
Mr. CLARK of Wyoming. I should like to have the Senator

clear that a little in my mind.

Mr. CHAMBERLAIN. In Texas, where there was no public land, 342.87 miles of railroad were built with Government aid.

Mr. CLARK of Wyoming. Was that not a line that passed through Texas, and was it not a grant of land on either side of that road outside of Texas? It could not have been otherwise, it seems to me.

Mr. CHAMBERLAIN. I will not have the time to go into that question, but I am going to call the Senator's attention to a publication that will give him all this information and give every bill that was ever passed granting Government aid for railroad construction.

Mr. CLARK of Wyoming. I am not at all questioning the facts, but it was a matter of curiosity how land could be granted for aid in a State when there was no Government land in the State. Of course it might be done where a road passed through a State, such as Texas, for instance, and was built as a part of a land-grant road, where the grant lay on the sides of the road outside of the State.

Mr. CHAMBERLAIN. Probably that is the case, I will say to the Senator. Some road that went through a land-grant State received a grant, and they expended a portion of the money in Texas. I am not very sure about that. Now, I am Now, I am going to call the Senator's attention to a publication, if he wants to go into the subject further, that will aid him very

materially in getting at the whole history of this situation, showing the States where grants were made, the number of acres of land granted, and the particular acts conferring the grants. It is "A statement showing the land grants made by Congress to aid in the construction of railroads, wagon roads, canals, and internal improvements, together with data relative thereto, compiled from the records of the General Land Office, by order of the Secretary of the Interior," and dated 1908.

Mr. CLARK of Wyoming. That publication does not show the grant of land in any State where there were no public lands.

Mr. SMITH of Arizona. I do not understand that the Senator from Oregon referred to a grant of lands to the State, but to aid in the construction of railroads.

Mr. CHAMBERLAIN. Yes.

Mr. SMITH of Arizona. And my curiosity was excited by hearing the Senator mention States that had no public lands whatever. I was wondering what kind of aid was extendedwhether it was out of the Treasury of the United States as a direct grant to the State, or whether it was from some securities of the United States to aid such States as Mississippi and Alabama in the construction of railroads.

Mr. WILLIAMS. Mr. President, I will say to the Senator that at the time the land grant was made in aid of the con-struction of railroads in Mississippi, Mississippi had a great deal

Mr. SMITH of Arizona. It did have at that time? Mr. WILLIAMS. Yes; it did have at that time. Mr. SMITH of Arizona. That is the explanation I am seek-

Mr. CHAMBERLAIN. I will say to the Senator that what I am discussing now is particularly the grant of land to States and the number of acres granted to States and to corporations. Some of it was granted to the States, I will say to the Senator.

Mr. CLARK of Wyoming. Only for wagon roads. Mr. CHAMBERLAIN. For wagon roads; yes, sir.

Mr. CLARK of Wyoming. Not for railways.
Mr. CHAMBERLAIN. No. When I spoke of 16,239.10 miles of railroad constructed in the States through the aid of land grants, it does not cover the railroad mileage by any means. That is only down to 1882. I ask to have inserted in the Record, Mr. President, the areas of railroad grants by administrations and Congresses, showing the number of acres pat-ented or certified and the number of acres actually granted. The VICE PRESIDENT. Is there objection? The Chair

hears none, and it is so ordered.

The matter referred to is as follows:

Areas of railroad land grants, by administrations.

Administration and Congress.	Acres patented or certified.	Acres granted.
1850—President Fillmore (1st sess., 31st Cong.) 1852—President Fillmore (1st sess., 32d Cong.) 1853—President Fillmore (2d sess., 32d Cong.)	3,751,711.73 1,764,410.85 1,856,461.27	3,751,711.73 1,764,410.85 2,682,171.00
Total under President Fillmore	7,372,883.85	8,198,593.73
1856—President Pierce (1st sess., 34th Cong.) President Pierce (3d sess., 34th Cong.)	12,505,959.13 2,389,437.34	14,559,729.79 5,128,450.00
Total under President Pierce	14,886,396.47	19, 678, 179. 79
1862—President Lincoln (2d sess., 37th Cong.) 1863—President Lincoln (3d sess., 37th Cong.) 1864—President Lincoln (1st sess., 38th Cong.) 1865—President Lincoln (2d sess., 38th Cong.)	5,096,418.53 3,388,936.26 6,213,809.50 2,465,016.58	23,504,001.61 3,915,200.00 46,848,600.00 128,000.00
Total under President Lincoln	17,164,270.87	74,395,801.61
1866—President Johnson (1st sess., 39th Cong.) 1869—President Johnson (3d sess., 40th Cong.)	4,970,295.61 49,811.59	34,001,297.77
Total under President Johnson	5,020,107.20	34,001,297.77
1870—President Grant (2d sess., 40th Cong.) 1871—President Grant (3d sess., 41st Cong.) 1872—President Grant (2d sess., 42d Cong.)	875,785.40 327,903.69	1,000,000.00 17,903,218.00 327,903.69
Total under President Grant	1,203,689.09	19,231,121.69
Grand total	45,647,347.48	155, 504, 994. 59

Mr. CHAMBERLAIN. The auditor of railroad accounts, November 1, 1880, estimated the value of the public lands granted for canals, wagon and military roads, and railroads at \$391,804,610.16. Mind you, Mr. President, the valuation placed upon lands under these grants is only from a dollar and a quarter, the minimum price permitted to be charged, to two dollars and a half, the maximum price. Notwithstanding that small price, the grants made by this Government were valued at over \$391,000,000, an empire in value and in area as well, as I shall show a little later on; and yet some of us hesitate l

and halt about loaning \$35,000,000 or \$40,000,000 to Alaska for the purpose of permitting the Government itself to build a road to be utilized by itself and by the people of the whole country. Alaska only asks it as a loan. In the cases to which I have referred, grants to the railroads were absolute. granted to the railroad companies had been utilized by the United States itself, if the lands had been sold by the Government of the United States itself and utilized in railroad construction, it could have built every mile of railroad in the United States and would have had left a handsome margin in the Treasury of the United States, because the lands were worth far more than a dollar and a quarter an acre or two dollars and a half an acre. In Oregon one of the causes alleged in the complaint for the forfeiture of the Oregon & California Railroad Co.'s grant was that they were charging in excess of the maximum \$2.50 an acre—\$6.50 an acre and \$15 an acre; and some of that land to-day is worth as much as \$50 or \$100 an acre. So I say that we have given an empire to the railroads to assist in railroad construction.

I am not complaining about that. I am not one of those who is disposed to criticize Congresses or Presidents for having done that, because that action was instrumental in developing not only the South and Southwest, but it was instrumental in developing the magnificent western section of this country, which at one time on the Pacific coast, if you please, was looked upon as worthless, just as Alaska is now looked upon by some as

entirely worthless to the people of this country.

Now, let us look at the recapitulation of the grants to rail-I am going to ask to have inserted in the RECORD a recapitulation of the land grants to railroads, showing that the number of acres certified or patented to the States for the year ending June 30, 1883, was 200,457.49, that the number of acres certified or patented to the States under the grant was 36,248,-839.07, and that the amount of land given to corporations and to the States for railroad construction and to the different States. for wagon roads was 48,745,941.55. The number of acres necessary to fill the grants provided for all the railroads amounted to 155,504,994.59.

For the purpose of getting together the grants that have been made and showing the policy of the United States Government with reference to aid in the construction of railroads, I ask that the recapitulation referred to may be printed in the RECORD.

The VICE PRESIDENT. In the absence of objection, per-

mission is granted.

The matter referred to is as follows:

Land grants for railroads. RECAPITULATION

ABOUT TO BUTTON							
States.	Number of acres certified or patented for the year ending June 30, 1883.	Number of acres certified or patented under the grant up to June 30, 1883.

Acres necessary to fill grants provided all roads are constructed, including patents already issued, 155,504,694.59.

Mr. CHAMBERLAIN. Mr. President, as I said a while ago, Alaska is only asking for \$40,000,000, and it is only in the nature of a loan, to be paid back to the United States out of the sale of the resources of Alaska and out of whatever money it may receive in the way of leases wherever the leases are made.

Mr. President, going just a little further, I want to get into the RECORD, so that Senators may have it for convenience of

reference, a summary of the plans which have been adopted by the Government to aid in the construction of railroads. First, we will take the Philippine plan, under which the United States has not given any land grant. No Congress would ever pass a law giving grants of land there; but the United States has guaranteed interest on the bonds of the Philippine rail-roads, and I think they have built nearly 400 or 500 miles of road over there, which have been made possible by governmental assistance. Then there is the Union Pacific plan and the Northern Pacific plan. These show just exactly what the United States has heretofore done and how it has done it; and I am going to ask to have pages 281 and 282 of the Senate hearings inserted in the RECORD.

The VICE PRESIDENT. Is there objection? The Chair hears none, and permission is granted.

The matter referred to is as follows:

THE PHILIPPINE PLAN.

THE PHILIPPINE PLAN.

The most recent is the act to encourage railroad building in the Philippine Islands.

Here Congress authorized the Philippine Government to guarantee the interest only, not exceeding 4 per cent on bonds, to run not exceeding 30 years, to cover the entire cost of such line or lines as the Philippine Government should decide to build.

It was provided that the total amount of such guaranteed interest should not exceed \$1,200,000 per annum. This would be interest at 4 per cent on \$30,000,000, Assuming that railroads in the Philippines would cost \$30,000 per mile, the guaranty would cover about 1,000 miles of road. The taxation of the lines was fixed for 80 years and the material was admitted free of duty, as heretofore explained. Their rates were subject to the control of the Philippine Government. The selection of the companies to receive the aid was determined by competitive bidding—the best bidder to be the one who would contract to build the lines in the shortest time with the least guaranty. As a matter of fact the bidding was such that most of the lines were built without any guaranty at all.

THE UNION PACIFIC PLAN.

THE UNION PACIFIC PLAN.

In the case of the Union and Central Pacific Railroads the Government granted them, by way of gift, the odd sections of land for 10 miles on each side of the line. This amounted to 0,400 acres for each

miles on each side of the line. This amounted to 6,400 acres for each mile of road.

In addition to this gift, the Government loaned the companies the 6 per cent 30-year bonds of the United States to an average amount of \$23,000 per mile. These bonds were made a lien on the roads, but the companies were permitted to issue an equal amount of first-mortgage bonds, which were a prior lien to the Government bonds. One-half of the charges for carrying the mails and other Government business was retained, together with 5 per cent of the companies' net earnings, and held in the United States Treasury as a sinking fund for the payment of the Government's bonds. The price of the alternate sections of land retained by the Government was raised from \$1.25 to \$2.50 per acre. Under these grants a total of 2,643 miles of road was built. The land grants amounted to 24,500,000 acres. The bonds loaned amounted to \$53,000,000. The principal of the bonds was repaid to the Government in full. Interest on the bonds to the extent of about 2 per cent was also paid. In effect, it was a gift of one-half the land for 10 miles on each side the line and a loan of approximately one-half of the cost of the roads.

The selection of the grantees was made by Congress itself. The Union Pacific was created by act of Congress, while the Central Pacific was a California corporation, which had made some progress before the passage of the acts of Congress in building its line to the eastward from Sacramento, The two companies built the through line—one working from Omaha westward and the other from California eastward. They met near Ogden, Utah.

THE NORTHERN PACIFIC PLAN.

THE NORTHERN PACIFIC PLAN.

The aid granted to the Northern Pacific was a land grant only. The company was created by act of Congress and was granted by way of gift the odd sections for 20 miles on each side of the line, or 12,800 acres for each mile constructed through States and 25,600 acres per mile through Territories. There was no loan of bonds or other aid. The total mileage aided amounted to 2,262 miles, and the total land grant was 30,472,000 acres. As in the case of the Union Pacific, the Government raised the price of the alternate sections of land retained by it from \$1.25 to \$2,50 per acre. It was simply a gift of one-half the land for 20 miles on each side the line in States and 40 miles in Territories in return for construction of the road.

Mr. CHAMBERLAIN. Mr. President, I think I have said all I care to say about this matter. There is much that I might say, but if I were to talk here for a week I do not believe I could cover the subject any more fully than I have done. In the very nature of things what I have had to say has been somewhat disconnected and uninteresting, because I have been compelled to deal in statistics. In conclusion, in view of the policies of all political parties past and present and in view of the hopeless situation of the people of Alaska to-day, I appeal to the Senate to assist Alaska to the extent of passing the pending bill making a loan of \$40,000,000 to aid in developing that country and in bringing it into closer commercial relationship with the people of the United States. They are our friends; they are our brothers. Their interests and ours are mutual, and whatever is done to enlarge their opportunities, to make them happier, and to elevate their standards of citizenship tends to enrich the people of continental United States

and to inspire us to higher ambitions and a broader patriotism.

Mr. CLARK of Wyoming. Mr. President, before the Senator from Oregon takes his seat-

The VICE PRESIDENT. Does the Senator from Oregon yield to the Senator from Wyoming?
Mr. CHAMBERLAIN. I yield.

Mr. CLARK of Wyoming. I want to ask the Senator whether the committee has prepared and will offer any amendment as to the details of the bill?

Mr. CHAMBERLAIN. Whether the committee will do so? Mr. CLARK of Wyoming. Yes. There are one or two points to which I wanted to call attention—I have called the Senator's attention to them—which I think, perhaps, could be met by the committee. The first point to which I called attention was that there is no limit on the amount of mileage that may be constructed under this bill.

Mr. CHAMBERLAIN. While I have no authority to accept amendments to the bill, I will suggest to the Senator, or to any other Senator who wants to propose amendments, that they be offered and printed, and I promise to bring them to the attention of the committee.

Mr. CLARK of Wyoming. Of course, discussion of the bill will depend perhaps very largely on what the final thought of the committee or of the Senator who has the bill in charge may be. It would be useless to go to work and argue for an hour or two on an amendment which the committee itself might have in mind.

Mr. JONES. Mr. President, if I may be permitted to interrupt, I should like to suggest with reference to that point—

Mr. CLARK of Wyoming. That is only one particular point. Mr. JONES. With reference to that particular point I am satisfied the committee intended to place a limitation on the mileage in the amendment which they have reported. The bill as introduced by the Senator from Oregon [Mr. CHAMBERLAIN] did limit the mileage to 733 miles. That was recommended by the commission. It also recommended an increased appropriation; but I have always had it in mind—in fact, it was so clear that I was positive—that we had placed a limitation in the bill of a thousand miles of railway. As one member of the committee, I want to say that it has been my understanding all the time that we had recommended a limitation in mileage; and I am strongly in favor of such a limitation. I was under the impression that the Senator who had charge of the bill also thought that we had placed that limitation in the bill as reported to the Senate.

Mr. CHAMBERLAIN. I thought there was a limitation.
Mr. SMOOT. Mr. President, in that connection I wish to say to the Senator that I have already offered an amendment to the bill this afternoon. The amendment does not provide how many miles shall be constructed, but limits the construction to one main road. Of course, it allows the building of side tracks and spurs, just as under the present bill. The amendment also makes a change in the amount of appropriation from \$40,000,000 to \$35,000,000, the amount provided by the House. Then, it also provides that wherever an engineer in civil life is appointed by the President, if he receives a salary of more than \$3,000 per annum his appointment shall be confirmed by the Senate. The object of that is to limit the power of the President in appointing engineers from civil life. The Senator understands that there is no limit provided in the bill, and I thought that that limit ought to be made in the bill before it becomes a law.

Mr. THOMAS. Mr. President, I should like to inquire of the Senator from Oregon [Mr. CHAMBERLAIN], who has this bill in charge, whether he has given any consideration to the matter of the gauge of the railroads which are to be constructed under it.

The question is prompted by a communication I have received, and I suppose other Senators have received the same thing, from Mr. Harrison Emerson-I think that is the namewho has suggested that a series of narrow-gauge roads, some of them, I think, being about 2 feet, constructed in the gorges and canyons of Alaska, are amply sufficient for all of the burdens that can be laid upon a transportation system up there for a long time; that the expenditure consequent upon the construction of such a system is very much less than that of the construction of a standard-gauge system, for which there is at present no need whatever, there being no main lines or trunk lines which have up to this time penetrated that region of the country, and everything being, therefore, local in its nature and character.

If that is so, it would seem to me that it would not only be economy, but good business judgment, to provide in this bill for at least the exercise of a discretion upon the part of the Government officials to construct roads without reference to the gauge and at as narrow a gauge as is possible consistent with the burdens that will be imposed upon the road.

Mr. CHAMBERLAIN. I will say to the Senator that the committee did consider that question to some extent; but we thought we had vested in the President of the United States, and those who might be appointed under him, absolute power to adopt whatever system might seem most economical and best suited to the conditions.

Mr. THOMAS. That may be. My reading of the bill has been somewhat superficial up to this time. I have read it once or twice. While I noticed no reference to any particular gauge the general assumption would be that the standard gauge would probably be that adopted or contemplated by the bill, particularly in view of the fact that some of the more important pieces of road there are standard-gauge roads.

Mr. JONES. Mr. President, I will suggest to the Senator that all the bills introduced provided for standard-gauge railroads; and the committee, after hearings, struck out the word "standard" deliberately, with the intention of leaving en-tirely to the President the matter of the gauge of the roads.

Mr. THOMAS. Of course I accept the statements made by Senators who have given this matter direct and continued investigation. I am very glad that is the case, because my own impressions are coincident with those of Mr. Emerson, although, of course, my sources of information are not so great.

There is another query I should like to make which relates to the unused issue of Panama bonds. It was suggested to me some time ago by one of the Cabinet ministers that there was no reason in his mind why the \$176,000,000 of bonds provided for the Panama Canal which have not been sold or disposed of up to this time could not be, in part at least, utilized for the purpose of Alaska railway construction. If that be so, it certainly would seem to be preferable to a provision for another bond issue, which would be cumulative, and would serve to increase to that extent the interest-bearing bonded indebtedness of the United States.

Of course I understand that a good deal of money has been used out of the general revenues of the Government against these bonds, but I do not think to the extent of the sum which I have mentioned.

Mr. SMOOT. I think the amount used is even greater than the amount of bonds not issued; but, as I remember, the Panama Canal bonds were authorized for a specific purpose, namely, for the building of the Panama Canal.

Mr. THOMAS. Oh, yes. Of course it would require an amendment to this bill to make the change.

Mr. SMOOT. It seems to me it would be just as easy to provide for the issuance of bonds in this bill, as they are provided for, as it would be to amend the act authorizing the Panama Canal bond issue.

Mr. THOMAS. Certainly, unless the effect of the provision would be to limit the total issue to the amount at present provided for, which I think is \$175,000,000.

Mr. SMOOT. I think the amount that has not been issued is

something like \$187,000,000. Mr. THOMAS. In other words, the idea which was expressed

to me, and which I have in mind, is, if possible, making such a disposition of these bonds that we would not be required to increase the total indebtedness to the extent of \$40,000,000 as provided in this bill.

Mr. SMOOT. I do not believe the Government will issue any more of the Panama bonds after the Panama Canal is opened. The Senator knows we have gotten along so far by paying for the construction of the Panama Canal out of the general revenues of the Government.

Mr. THOMAS. Oh, yes; and we all want to limit the interest-bearing bonded indebtedness to as small an amount as is possible.

Mr. SMOOT. Absolutely; and I do not believe there will be any more Panama bonds issued by the Government.

Mr. THOMAS. Let me ask if the Senator means by that that it will not be necessary to market the issue of \$174,000,000 now remaining of those bonds?

Mr. SMOOT. Not necessarily. The Government need not issue another dollar of them.

Mr. THOMAS. Then, if I understand the Senator, his position practically is that having paid for the construction of the Panama Canal out of the general revenues, those bonds never will be issued?

Mr. SMOOT. I do not think there will be another dollar of them issued.

Mr. THOMAS. I am very glad to hear the Senator say so, because I have a sort of constitutional dread of seeing the interest-bearing bonded indebtedness of the United States in-

The VICE PRESIDENT. The bill is in Committee of the Whole and open to amendment.

Mr. SMOOT. I should like to ask the Senator in charge of the bill if he will not consent to have the bill laid aside at this time?

Mr. CHAMBERLAIN. I understand it is desired to have an executive session. I therefore request that the bill be temporarily laid aside.

PREFERENTIAL VOTING (S. DOC. NO. 359).

Mr. OWEN. I ask to have printed as a Senate document an article on "Preferential voting," by C. G. Hoag.
Mr. SMOOT. I did not hear the request of the Senator.

Mr. OWEN. It was a request to have printed an article by C. G. Hoag, general secretary of the league dealing with preferential voting, explaining the preferential method of voting.

Mr. SMOOT. Of course in the past I have said that I would demand that all of these articles go to the Printing Committee; but in view of the fact that one other request was passed to-day without that action, I shall not object to this. I really believe, however, that that is where a request of this kind ought to go.

The VICE PRESIDENT. There is pending on the calendar an amendment to the rules dealing with the matter. In the absence of objection, the request is granted.

Mr. BACON. Before we pass from that subject I wish to say that if I remember correctly the Committee on Rules has reported back favorably a resolution recommending the adoption of an amendment to the rules which would require the reference of these matters to a committee. While I have no reference whatever to the particular document that has been offered by the Senator from Oklahoma, I do think we ought to take up that resolution at some time and act upon it.

Mr. SMOOT. I will say that the resolution which was reported from the committee provides that there shall be a standing committee of the Senate, known as the committee on public documents, to which all of these requests shall be referred. I wish to say to the Senator that I am certainly opposed to the resolution in that form. I am perfectly willing that it shall come up for consideration, however. I wish also to call the Senator's attention to the fact that I submitted a resolution proposing to amend Rule XXIX of the Senate by inserting, in line 8, between the words "Senate" and "otherwise," the words shall by vote." Of course that arrives at the same object, but it does not appoint another committee and have a great part of the business of the Committee on Printing referred to another committee. I believe that is wrong.

Not only that, but while I am on the subject I wish to say to the Senator that if the resolution is adopted as it was reported to the Senate it will conflict with the law, and we certainly must amend the law before we undertake to amend a rule of the Senate that will conflict with the law.

Mr. BACON. I wish to say to the Senator and to the Senate that in reporting that proposed rule the committee recognized the fact that there was a question whether the subject of printing documents should be considered by a special committee or by a standing committee. It was reported in that form in full recognition of the fact that the matter would be discussed and determined by the Senate. The committee were not divided upon the question whether or not it should be considered by a Whether it should be a particular committee or a committee. general committee is a matter which the committee did not consider of sufficient importance for them to endeavor to take it away from the consideration of the Senate.

I do hope that at an early date an opportunity may be found for the Senate to act on this question. I think it is a very important one.

Mr. SMOOT. I wish to say to the Senator that the chairman of the Committee on Printing [Mr. Fletcher] is out of the city. I understand he will be here on the 26th of this month. I do not want the resolution brought up in his absence. I told the Senator from Florida before he left that I would request that the matter be not considered until his re-

turn to the city.

Mr. BACON. I have no doubt his wishes in that regard will be respected.

EXECUTIVE SESSION.

Mr. BACON. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After 10 minutes spent in executive session the doors were reopened and (at 4 o'clock eased.
Mr. SMOOT. I fully agree with the Senator in regard to that. Wednesday, January 14, 1914, at 12 o'clock meridian.

NOMINATION.

Executive nomination received by the Senate January 13, 1914. COMPTROLLER OF THE CURRENCY.

John Skelton Williams, of Virginia, to be Comptreller of the Currency, to fill the existing vacancy.

HOUSE OF REPRESENTATIVES.

Tuesday, January 13, 1914.

The House met at 12 o'clock noon.

The Chaplain, Rev. Henry N. Couden, D. D., offered the fol-

lowing prayer

Let Thy spirit, O God our Father, possess us, mind and soul, that, with perfect urbanity, in the rectitude of our behavior in all the relationships of life we may prove ourselves worthy sons of the living God; that the recording angel may inscribe our names on the book of life as those who love their fellow men; that the peace which passeth understanding may be ours. In Jesus Christ our Lord. Amen.

The Journal of the proceedings of yesterday was read and

approved.

DISTRICT OF COLUMBIA APPROPRIATION BILL.

Mr. WILLIS. Mr. Speaker, I desire to make a correction in the RECORD. On page 1530 of the RECORD of yesterday occurs the statement of a certain amendment to the District of Columbia appropriation bill. That amendment is stated in exactly the same form at page 1429 of the RECORD of December 22, 1913, when the same bill was under consideration. Following the presentation of that amendment on that day, December 22, 1913. the following colloquy occurred:

Mr. Willis. Would not the gentleman include in the exceptions the school gardens? That is what I am seeking to protect.

Mr. Page of North Carolina. Yes; I will except that.

Mr. Chairman. I ask unanimous consent to modify the amendment by including in the exceptions "school gardens."

The Chairman. The gentleman from North Carolina asks unanimous consent to modify his objection by including in the exceptions school gardens. Is there objection?

There was no objection.

In other words, the amendment to except the school gardens was included in the amendment that appeared on page 1429 of the Record, on December 22, 1913. I therefore ask unanimous consent that the amendment appearing on page 1530 of the

RECORD of yesterday be modified in accordance with what I have read, so as to show in the RECORD that the school gardens are excepted.

The SPEAKER. Without objection, the RECORD will be so

amended.

Mr. GARDNER. Mr. Speaker, reserving the right to object. is not the bill already engrossed? And is it possible for the House to make any change at this stage?

The SPEAKER. The House, of course, can not change the engrossed bill; but the Chair understood that the trouble was

with the RECORD.

That is correct; the trouble is with the Mr. WILLIS.

Mr. GARDNER. Is it not with the engrossed bill?

Mr. WILLIS. Mr. Speaker, I went to the desk yesterday when the amendment came up and myself read the amendment, and know that the language is in that amendment to except the school gardens. The difficulty is with the RECORD. appear in the engrossed bill in proper form. I simply desire to make a correction in the RECORD.

The SPEAKER. Without objection, the correction will be made in accordance with the statement of the gentleman from

Ohio.

Mr. SISSON. Mr. Speaker, I reserve the right to object. have just come into the Chamber and did not hear the statement of the gentleman from Ohio. I desire to state that the gentleman from North Carolina [Mr. Page] is not present.

Mr. WILLIS. I will state to the gentleman, Mr. Speaker, that I conferred with the gentleman from North Carolina [Mr. Page] this morning, and he agrees with me in the statement of facts; but to explain it to the gentleman, he will remember that when the bill was pending in the House on December 22, 1913, the amendment which appears on page 1530 of the RECORD of yesterday was introduced, and that I then asked the gentleman from North Carolina to modify his amendment so as to make an exception of the school gardens. He accepted that amendment, and I have just read that to the House.

Mr. SISSON. The gentleman simply wants to correct the

RECORD?

Mr. WILLIS. I simply desire to correct the RECORD in ac-

cordance with the facts.

The SPEAKER. Without objection, the correction will be made in accordance with the statement of the gentleman from Ohio. Of course, if it should appear that the bill has been engrossed without this modification, the House having no control over the engrossed bill itself, the gentleman will have to go to the Senate to have it amended. [After a pause.] The Chair hears no objection.

ENROLLED BILLS SIGNED.

Mr. ASHBROOK, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bills of the following titles, when the Speaker signed the same: H. R. 1966. An act to amend an act entitled "An act to pro-

hibit the importation and use of opium for other than medicinal

purposes," approved February 9, 1909; and H. R. 1967. An act regulating the manufacture of smoking opium within the United States, and for other purposes.

CHANGE OF REFERENCE-JUDSON C. M'CLURE.

Mr. COX. Mr. Speaker, I ask unanimous consent for a change of reference of the bill (H. R. 11365) granting a pension to Julian C. McClure, from the Committee on Invalid Pensions to the Committee on Pensions. This is a Spanish War soldier's pension bill, The SPEAKER, W

Without objection, the change will be made.

There was no objection.

RADIUM-BEARING ORES.

Mr. TAYLOR of Colorado. Mr. Speaker, I ask unanimous consent to change the reference of House joint resolution 185, authorizing the President to withdraw public lands containing carnotite, pitchblende, or other radium-bearing ores and min-erals, and also House joint resolution 186, authorizing the Secretary of the Interior to withdraw from entry any public lands containing radium, from the Committee on Mines and Mining to the Committee on Public Lands. These resolutions pertain to the withdrawal of public lands from entry. They are purely public-land matters. That committee has had exclusive jurisdiction over such matters for 108 years, since 1805, and I feel that that committee can not, in justice to its jurisdiction, sub-mit to having those bills referred to the Committee on Mines and Mining. I will say, parenthetically, that I am a member of both committees—

The SPEAKER. The matter is not debatable. Without objection, the change will be made.

Mr. FOSTER. Mr. Speaker, I object.

Mr. TAYLOR of Colorado. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. TAYLOR of Colorado. Have I the right to move to have the reference changed?

Mr. UNDERWOOD. Mr. Speaker, I do not think the gentleman has that right, unless he has the consent of the com-

Mr. TAYLOR of Colorado. Mr. Speaker, I not only have the consent of the committee, but the Committee on Public Lands has unanimously instructed ..e to make this request by a motion, and I therefore move that these two joint resolutions be referred to the Committee on Public Lands.

The SPEAKER. The gentleman from Colorado moves that the Committee on Mines and Mining be discharged from the further consideration of the two joint resolutions which he named, and that the resolutions be referred to the Committee on Public Lands.

The question was taken, and the Speaker announced the ayes

seemed to have it.

Mr. FOSTER. Mr. Speaker, I demand a division.

The House divided; and there were—ayes 67, noes 21.

Mr. FOSTER. Mr. Speaker, I make the point of order there

is no quorum present.

The SPEAKER. The gentleman from Illinois makes the point of order there is no quorum present, and evidently there is not. The Doorkeeper will close the doors, the Sergeant at Arms will notify absentees, and the Clerk will call the roll.

The question was taken; and there were—yeas 119, nays 188, answered "present" 3, not voting 123, as follows:

Mr. Hobson with Mr. MacDonald.

Mr. NEELY of West Virginia with Mr. LAFFERTY.

Mr. RUCKER with Mr. NELSON.

Mr. SABATH with Mr. PETERS of Maine.

Mr. KEATING with Mr. PLUMLEY.

Mr. SMALL with Mr. PORTER.

Mr. SPARKMAN with Mr. PROUTY.

Mr. WATKINS with Mr. ROBERTS of Nevada.

The result of the vote was announced as above recorded. A quorum being present, the doors were opened.

PRINTING AND BINDING, COMMITTEE ON WAYS AND MEANS.

Mr. UNDERWOOD. Mr. Speaker, I ask unanimous consent for the present consideration of the resolution which I send to the Clerk's desk.

The SPEAKER. The gentleman from Alabama asks unanimous consent for the present consideration of the resolution which the Clerk will report.

Davis

Dershem Dickinson Donohoe

The Clerk read as follows:

House resolution 367.

Resolved, That the Committee on Ways and Means shall be, and is hereby, authorized during the Sixty-third Congress to have such printing and binding done as may be required in the transaction of its

The SPEAKER. Is there objection?

There was no objection.

The SPEAKER. The question is on agreeing to the resolution. The resolution was agreed to.

WITHDRAWAL OF PAPERS.

Mr. Hawley, by unanimous consent, was granted leave to withdraw from the files of the House, without leaving copies, the papers in the case of John McArthur, H. R. 27346, of the Sixty-second Congress, no adverse report having been made thereon.

DISTRIBUTION OF THE PRESIDENT'S MESSAGE.

Mr. UNDERWOOD. Mr. Speaker, I move that the House resolve itself into Committee of the Whole House on the state of the Union for the consideration of House resolution 340, distributing the President's message.

The motion was agreed to.

The SPEAKER. The gentleman from Tennessee [Mr. Hous-

TON] will take the chair.

Accordingly the House resolved itself into Committee of the Whole House on the state of the Union for the consideration of House resolution 340, referring certain perflons of the annual message of the President of the United States to committees,

with Mr. Houston in the chair.

The CHAIRMAN. The House is now in Committee of the Whole House on the state of the Union for the consideration of

House resolution 340, which the Clerk will report.

The Clerk read as follows:

Resolution (H. Res. 340) referring certain portions of the annual message of the President of the United States to committees.

Resolution (H. Res. 340) referring certain portions of the annual message of the President of the United States to committees.

Resolved, That so much of the annual message of the President of the United States communicated to the two Houses of Congress December 2, 1913, as relates to trust legislation and the employers' llability act be referred to the Committee on the Judiciary.

That so much as relates to rural credits and banking and currency be referred to the Committee on Banking and Currency.

That so much as relates to commerce and the Life-Saving Service be referred to the Committee on Interstate and Foreign Commerce.

That so much as relates to agriculture be referred to the Committee on Agriculture.

That so much as relates to the relations of the United States with foreign nations be referred to the Committee on Foreign Affairs.

That so much as relates to to the Committee on Foreign Affairs.

That so much as relates to Territorial legislation and the revision thereof, Alaska and the Hawaiian Islands, be referred to the Committee on the Territories.

That so much as relates to all matters pertaining to the islands which came to the United States through the treaty of 1890 with Spain be referred to the Committee on Insular Affairs.

That so much as relates to the mining interests be referred to the Committee on Mines and Mining.

That so much as relates to the nomination of the President be referred to the Committee on Election of President, Vice President, and Representatives in Congress.

Mr. UNDERWOOD. Mr. Chairman, this resolution is the

Mr. UNDERWOOD. Mr. Chairman, this resolution is the usual resolution distributing the annual message of the President of the United States. It follows the usual course. know of but one point wherein the jurisdiction of committees is affected. The resolution states that so much of the message as relates to rural credits and banking and currency shall be referred to the Committee on Banking and Currency. are two classes of rural-credit bills pending in the House. One class embraces general rural-credit bills and there is another class of bills that propose to issue bonds. All bills that affect the public debt and the revenue go, of course, to the Committee on Ways and Means. Bills of that class are referred to the Committee on Ways and Means, whereas the other rural-credit bills go to the Committee on Banking and Cur-

The Committee on Ways and Means is of opinion that it would be wise to let one committee consider all of these bills and all the propositions, instead of having them pending be-tween two committees. Therefore this resolution will affect the jurisdiction of the Committee on Ways and Means in giving to the Committee on Banking and Currency those bills affecting rural credits, where the question of bonded indebtedconcerned. Otherwise the resolution is in line with the ordinary resolutions, and in conformity with the rules of

Mr. MURDOCK. I would like to ask the gentleman if the bills that have been referred to the Committee on Ways and Means will go to the Committee on Banking and Currency, and

by a formal motion?

Mr. UNDERWOOD. They can either be reintroduced or sent there by change of reference.

Mr. MURDOCK. But the matter is still in the hands of the House itself?

Mr. UNDERWOOD. Yes. I have an idea that in the end the Committee on Banking and Currency will have its own bill, but that committee is given jurisdiction to consider this ques-I think it is better to have one committee considering the whole question than have it divided between two.

Mr. MURDOCK. The point I want to make is that the matter of reference is still in the power of the House itself?

Mr. UNDERWOOD. Yes; this is only the reference of the message, and gives the Banking and Currency Committee jurisdiction over this particular matter that would otherwise fall within the jurisdiction of the Ways and Means Committee.

This is all I desire to say on the question myself, but I desire to yield 20 minutes to the gentleman from New Hamp-

shire [Mr. REED]. Mr. MONDELL. Mr. Speaker, before the gentleman yields I should like to call his attention to the second paragraph on page 2. The President's message treats to a certain extent of the subject of conservation. The House by a vote has recently referred two bills which might possibly be termed conservation bills to the Committee on Mines and Mining.

Mr. UNDERWOOD. Of course, this is just the distribution of the President's message. It does not tie up the House. The questions of conservation in the President's message are largely questions that go to the Committee on the Public Lands, and this gives the usual course of distribution. Of course, if the House hereafter desires to make special reference, there is nothing in referring the President's message that prevents the House doing so.

Mr. MONDELL. Before the gentleman yields I desire to

know if we can get a little time on this side.

Mr. UNDERWOOD. Certainly. I do not know whether it is in order to close debate in the committee, but I will ask unanimous consent that the debate on this resolution be limited to two hours.

Mr. SHERLEY. The committee can not limit debate.

Mr. PAYNE. Except by unanimous consent.
Mr. UNDERWOOD. I do not think that can be done, but I am willing to enter into an understanding with the gentleman from New York [Mr. PAYNE] that there shall be one hour's debate on this side and one hour's debate on the other side, and that then the debate shall close by unanimous consent, and we will report the resolution back, if that is satisfactory.

Mr. PAYNE. I have no objection to that.

Mr. UNDERWOOD. Then we will have that understanding. I will yield 20 minutes of my hour to the gentleman from New Hampshire [Mr. REED].

Mr. REED. Mr. Chairman, this Democratic Congress represents the deliberate purpose of the people to secure the enactment in their behalf of certain constructive legislation for the amelioration of conditions, oppressive, unjust, and long suffered. After a long time of waiting for the fulfillment of promises by the Republican Party, after repeated betrayals and disappointments, they turned to the great, historic Democratic Party and gave that party a commission to revise the tariff, establish the currency of the country upon a stable basis in accordance with modern scientific principles of banking, and to drive from their entrenched places of advantage all special privilege, of whatever name or description.

The Democratic platform of the year 1912 was the warrant for the political revolution against the Republican Party. That platform affirmed that the tariff under which this country has operated under Republican rule was a system of taxation which made the rich richer and the poor poorer, and that under its operation the American farmer and laboring man were the chief sufferers, failing entirely, as it did, to protect

their product or their wages.

And the pledge of the Democratic Party in that platform was for an immediate downward revision of the tariff. Its pledge was also to a systematic revision of the banking laws, and it boldly affirmed that private monopolies were indefensible and intolerable.

This Congress has thus far made the most wonderful record of achievement in the redemption of platform promises in the history of Congresses. We have thus far executed the warrant and the mandate of the people without fear or favor, and the tariff bill and the currency bill are the best evidences of the good faith of the Democratic Party.

From the very beginning that class of Republican talkers

whose chief interest in life is the supremacy of that party rule have warned the people of the black and disastrous consequences that would surely follow the enactment into law of these great constructive measures. I could not repress a smile

when recently, with the habit full upon him, the distinguished Republican leader, the gentleman from Illinois [Mr. Mann], rehashed the time-worn, frayed-at-the-edge cry of disaster, "America lies prostrate, its men out of employment, its factories closed, its industries without orders, its stocks depreciated, its money horded, with men everywhere seeking employment and millions of them out of employment."

Why, gentlemen, that gruesome picture was placarded from one end to the other of my New Hampshire district during the whole of the campaign of 1912. The Republican newspapers and there are few others in my district-repeatedly warned the people in full-page advertisement of the terrible disaster to the great manufacturing district that I represent that would surely follow a Democratic revision of the tariff. But that revision is now a fact, and upon my return home for the holiday recess I found conditions exactly the reverse and with evidences of prosperity everywhere.

Mr. MURDOCK. Will the gentleman yield?

Mr. REED. Yes.

Mr. MURDOCK. I believe the gentleman has in his district one of the largest woolen manufactories in the United States.

Mr. REED. No; not the largest woolen, but the largest cotton, worsted, and woolen. It is largely a cotton-manufacturing

Mr. MURDOCK. Judging from what the gentleman has said, he found that the conditions there were not as depicted by the Republican leaders?

Mr. REED. They are not. Mr. MURDOCK. The times are prosperous?

They are. Mr. REED.

Mr. MURDOCK.

Mr. MURDOCK. And the men are employed? Mr. REED. Full time, and with full complements. I am coming to that.

Mr. MURDOCK. I am glad to hear it. Mr. REED. I will touch upon that later in my speech. [Ap-

plause on the Democratic side.]

All the great manufacturing interests view the situation with the highest degree of optimism; factories all running full time and with full complement of help [applause on the Democratic side], and a general spirit of confidence for the future prevailing; all factories, shops, and stores working 55 hours weekly, in accordance with a law recently passed by a Democratic State administration, and magnanimously maintaining the 58-hour wage schedule; merchants everywhere congratulating themselves upon a good holiday business-and in my section of the country the holiday trade is considered a good barometer of business conditions. And I venture to say that if the gentleman from Illinois could assemble the manufacturers and business men of New England and recite to them his Dr. Cook story of "America prostrate," it would provoke such laughter as would warm the heart of the most pretentious vaudeville artist of any American circuit.

Gentlemen, I think the sentiment in New England is well reflected in a speech by that great merchant prince and wellknown Republican, former Postmaster General, Hon. John Wanamaker, before the Union League Club of New York. He said that he had no fear of any serious unsettlement of business or any long disturbance of prosperity with no room or reason for a panic. He took to task the leadership of the Republican Party which by broken pledges, he said, had worn

out the patience of good Republicans.

I believe, Mr. Chairman, on the whole, that the business interests of New England are well satisfied with the achievements of this Congress to date. In my experience those interests are not partisan. To them political parties are judged by their acts, and to-day the great commercial and industrial interests are waiting with open minds our action on the present-day problem of so limiting activities of large combinations and monopolies that there may be preserved to the people their right to participate in that great prosperity which most certainly awaits the business advancement of this the greatest of all Nations. In order to arrive at a just solution we can have no better guide of conduct than is found in the speech of acceptance of President Wilson, in which he said, "What we are seeking is not destruction of What we are seeking is not destruction of any kind, nor the disruption of any sound or honest thing, but merely the rule of right and of the common advantage." Legislation which confers special privilege upon individuals or classes in the common struggle of all for the promotion of their welfare and happiness can not in the long run be of lasting advantage. Equality of opportunity under the law is the only safe rule and guide of conduct, and this has been the traditional attitude of the Democratic Party. We certainly can not depart from it to-day. It would be a no more serious mistake to take from the rich rightly acquired property and give to the poor than

to take from the great body of laboring men, the sole and sinew of this Nation, their inalienable right to acquire and possess property, and hold it free to their own enjoyment.

In other words, the right of personal property is an inalienable right. It is and should be beyond the reach of either a congressional majority or a popular majority. It is the very foundation of liberty. I come from a State where this principle of equality is recognized in the fundamental law and emphasized beyond constitutional compacts as they have been generally written. The New Hampshire constitution goes so far as to set down in terms that infringement upon this principle is a justification for rebellion and revolution. These are the words:

Government being instituted for the common benefit, protection, and security of the whole community, and not for the private interest or emolument of any one man, family, or class of men, therefore, whenever the ends of government are perverted and public liberty manifestly endangered and all other means of redress are ineffectual, the people may, and of right ought to, reform the old or establish a new government.

The doctrine of nonresistance against arbitrary power and oppression is absurd, slavish, and destructive of the good and happiness of mankind.

Mr. MURDOCK. What is the date of that constitution? Mr. REED. That constitution, Mr. Chairman, was the first organic law adopted by any of the States now constituting the American Union, and bears the date of January 5, 1776.

It is perfectly manifest that the accumulation of wealth in this country during the last 20 years has been anomalous, and vast possessions have fallen into the hands of a comparatively small number of individuals. The great business interests have become consolidated so that to a very large extent whole lines have come under common direction and control, and as a result great economies in production and distribution have followed, but at the same time the opportunity for establishing the price to the consumer has also fallen into the same control, with the result that the old doctrine that competition regulates the price of the commodity has no further application. Now, this may constitute unlawful combination and monopoly or, on the other hand, it may not fall within the objectional line. An individual of great wealth may have an influential if not a controlling influence in many corporations pursuing the same business. He may not be a director or have official connection with any of these corporations, but there is no law that can be devised that can prevent the force of his opinion from being reflected in exactly the same way upon each of the corporations in which he is an influential stockholder.

This is the situation we have to meet, and the solution of the problem must be had always with reference to the fundamental proposition that I have advanced, namely, with due respect to the equality of all before the law-the right of personal property coupled with the other right of the people to be protected against the exactions of private monopolies. The present situation demands regulation, and hence it becomes our duty to prescribe by law such limitations upon the exactions of centralized business as shall be equitable and just to all the people.

But we have upon the statutes the so-called Sherman Act, designed to prevent unlawful combinations, and even as modified by the construction of the Supreme Court is to-day in the hands of the administration the efficacious instrument against

unlawful monopolies,

The Democratic Party does not assume the attitude of saying that monopolies are essential and that the only relief of the people lies in their regulation, but we take the position that there may be and doubtless are lawful combinations, and for such there should be regulation; and, on the other hand, there are unlawful combinations, which should be driven out of existence. The Sherman Act enforced by the Democratic adminis-

tration is the remedy for such.

In accomplishing this great work—and I do not hesitate to say that it will prove the greatest task of constructive legislation ever undertaken in the history of this Government—we will be confronted, as we have been in the tariff and currency legislation, by all .the prophets of evil, advance agents of calamity, whose only hope lies in our failure. We are to be told that business confidence will be destroyed, that enterprise will halt, and that panic and disaster will overtake the country. On this subject I have conversed with many business men, manufacturers, and bankers in my district and have found universal confidence that the same forceful and wise spirit of this Democratic Congress that has thus far been evidenced is relied upon to work out this problem safely, sanely, and advantageously. But how about the great body of the people—the laborers, the working people, those who possess little knowledge of the problems of investment of capital, that long-suffering army of men and women who have year after

year found the cost of living mounting higher and higher while their wages have entirely failed to keep pace with mounting prices? What are they expecting and demanding of us? With that class, Mr. Chairman, I am much more familiar and in closer touch, and I say to you that it is their sole determination to have legislation that will bring to them relief from the burdens under which they are laboring. They are demanding of us results, and they are not afraid. Pictures of closed factories, panics, and prostrate business have no terror for them. They were in the mood of revolution when they cast their votes for us last election, and they have not and will not re-cede from their position. More than that, at this very time they have confidence in this Democratic Congress, and we must not disappoint their expectations. To betray their confidence will certainly bring upon us that disaster so frequently predicted by our opponents.

It is an old maxim that revolutions do not turn backward; and, Mr. Chairman, this present-day revolution will not break The great body of the voters have seen a new light. Industrial liberty, the new freedom, and many other of the current phrases of like import are but signs of the times. They indicate an aroused public spirit born of oppressive conditions too long continued, and the movement will not subside until equitable results obtain. Leaders and parties may fall by the way, but this great movement of the people will go on, and I confidently believe that the Democratic Party is to be the vehicle of its fulfillment. In the accomplishment of its mission I am equally confident that it will hold fast to those ancient landmarks of civil liberty that have characterized it from the beginning-the maintenance of constitutional government, always a government of law; the maintenance of representa-tive government, by which alone the people can effectively make the laws; the maintenance of a government of coordinate branches, each a check upon the other, by which alone can the equality and liberty of all the people be conserved. This may be old-fashioned doctrine, but it is the historic doctrine of the Democratic Party, and with due regard to it all the reforms demanded by the people can be accomplished. Departure from it will be a step backward in the astounding development of the freest people that have governed themselves in the history of the world. [Applause.]

Mr. UNDERWOOD. Mr. Chairman, I will ask the gentleman from New York [Mr. PAYNE] if he will kindly occupy some of

Mr. MOORE. On behalf of the gentleman from New York [Mr. PAYNE], I yield 10 minutes to the gentleman from Wyoming [Mr. MONDELL].

The CHAIRMAN. The gentleman from Wyoming [Mr. Mon-

DELL] is recognized for 10 minutes.

Mr. MONDELL. Mr. Chairman, the gentleman who has just spoken comes of a hardy race, and his hardihood is evidenced by the fact that, in the face of closed and closing mills and factories, in the presence of stagnation Nation wide, in the light of enlarging soup houses, in the presence of propositions by great municipalities to issue millions of bonds for the purpose of giving employment to the unemployed, in the presence of diminishing returns to the great industries of the Nation, diminishing opportunities and returns to labor, diminishing opportunities and returns to labor. portunities for enterprise—in the face of all these things the gentleman lifts up his voice in hymns of praise of what the Democratic Party has accomplished,

It has accomplished exactly what we expected and anticipated it would accomplish. In the fair land I have the honor to represent there is a condition of stagnation such as we have never known or witnessed since the last Democratic administration. Men engaged in great productive enterprises find the prices of their products reduced, and men purchasing the finished material made from those products are paying more for them than they did when the Democratic Party came into

power. [Applause on the Republican side.]

Many articles were placed on the free list with the view of reducing the price of living, so our friends on the other side told us, and yet the cost of living continues to mount higher and higher all over the land, and the difficulty of meeting it becomes greater and greater as the smoke from the factory chimneys diminishes, as the buzz of the wheels of industry cease, as the returns from enterprises diminish, as the opportunities of em-

ployment and wage earning ends.

That is the condition of affairs under which the gentleman from the snow-clad hills of grand old New England feels that he must defend what has been done by his party and what has

occurred as a result of what has been done.

On this side we are not surprised at the result. If we have any surprise at all, it is that matters are not worse than they are; and the gentleman's party has reason to thank God that

owing to the disposition of the American people to make the best of a bad situation, conditions are not worse than they now are throughout the length and breadth of the land.

The people have been so long and persistently assured that there must be a change in tariff and other policies, there has been so much clamor for a change, there have been so many misstatements and exaggerations as to the benefits a change would bring, that a part of the people became reconciled to try a change, hoping it might be for the better, though fearing it would not. A part of the people hoped against hope that the changes in legislation would not bring the evils that they feared. Owing to this frame of public mind we have progressed better than the most optimistic could reasonably have expected in the face of the stagnant and depressed conditions which have come upon us. We hope that they will grow no worse, for we would not have the people of the country suffer in order that we politi-cally might be the beneficiaries of that suffering. We hope that further panic and disaster will not come, and we pray that conditions will not become as bad as it seems inevitable that they must under the unwise legislation already written on the statute books, and the questionable legislation now proposed on that side of the House.

It is time for our Democratic friends to be occupying themselves in prayer and supplication rather than in peans of praise. It is time for them to be hoping and praying that Providence may ward from our people the evils that are threatening, and may make more tolerable the conditions in which they now find themselves.

There is no disposition on this side to make conditions worse than they are. There is every disposition here, as there is all over the country, to help make conditions better, if possible. So far as I am personally concerned, I have not up to this time said a word on the floor of the House relative to the condition of the country as conditions have grown worse and worse, although I have witnessed in my own State, and have read in the newspapers of conditions in other regions such as only heretofore visited the Nation under Democratic administrations. Let us pray that they may become no worse. I commend to my friend from New Hampshire that he do not further attempt to paint a picture of prosperity on the present gloomy background of depression and misfortune, but rather occupy his time in supplicating the throne of grace that conditions may grow no worse. [Applause on the Republican side.]
Mr. REED. Mr. Chairman, it was the very statement reiter-

ated and reiterated again by the gentleman on that side, who has been characterized "the geyser from Wyoming," and his associates, that was responsible for my compiling the facts I

have just read on the floor of the House.

Mr. MOORE. Mr. Chairman, may I inquire in whose time the gentleman from New Hampshire is proceeding?

Mr. REED. I am proceeding in my own time which I yielded

Mr. LANGLEY. If the gentleman yielded back his time he has no time

The CHAIRMAN. The gentleman from New Hampshire had two minutes remaining.

Mr. LANGLEY. But he yielded it back, and did not reserve it. Mr. MOORE. If the gentleman did not reserve his time I do not see how he can proceed.

The CHAIRMAN. The gentleman from New Hampshire did

Mr. MOORE. Mr. Chairman, the gentleman from Alabama [Mr. Underwood] does not wish to use any time just now. I now yield 20 minutes to the gentleman from Washington [Mr. HUMPHREY

Mr. HUMPHREY of Washington. Mr. Speaker, a few days ago I presented to the House a list of 227 lumber and shingle mills in my State that were closed on the 1st day of last December just to demonstrate the great blessing that had fallen upon the country since it had been so divinely favored by free trade and Democracy. Some of my Democratic friends seemed to be somewhat perturbed and resentful because I did this. They did not and they have not and they can not dispute the facts, but they said that we on this side of the House were preaching calamity.

The list of closed mills that I read at that time tell a story

of panic and depression, of idleness and poverty, so insignificant in comparison with the list that I now hold in my hand and which I propose to lay before the House as to seem of little

import.

Suppose that it is admitted that the presentation of these facts and figures as to the business conditions of the country is preaching calamity; why should a Democrat complain? For 16 years of unexampled prosperity they unceasingly howled calamity; now that we have calamity, they are indignant because the facts are told. To preach calamity when there is none is Democratic; to preach it when it exists is Republican.

Mr. JOHNSON of South Carolina. Mr. Chairman, will the gentleman yield for a question?

The CHAIRMAN. Does the gentleman yield?

Mr. HUMPHREY of Washington. Mr. Chairman, if the gen-

tleman will wait, I will yield in a moment.

Mr. JOHNSON of South Carolina. But I would like to ask my question now.

Mr. HUMPHREY of Washington. Very well.

Was not the gentleman Mr. JOHNSON of South Carolina, Was from Washington a Democrat at one time?

Mr. HUMPHREY of Washington. No, sir.

Mr. JOHNSON of South Carolina. And did he not hold office in Grover Cleveland's administration?

Mr. HUMPHREY of Washington. No. I have many sins to answer for, but being a Democrat is not one.

Mr. SLOAN. Mr. Chairman, I object to the gentleman from South Carolina bringing such a serious charge against an honorable gentleman. [Laughter on the Republican side.]

Mr. HUMPHREY of Washington. I feel myself, Mr. Chairman, that it is unparliamentary. But, as I started to say, our Democratic friends are fearfully agitated because we tell the facts. But truth and Democracy to each other are seldom happy companions. If preaching calamity is a sin, then even our honored Speaker is hardly in a position to cast the first stone, or even the last one. Compared with the doleful predictions, tearful tales, and mournful exhortations that have come from the sad and eloquent lips of the Speaker in days gone by, the lamentations of Holy Writ are as pæans of praise. In those days there was prosperity everywhere, but the smoke of industry painting the sky the Speaker could not see and the hum of countless wheels he could not hear. But now, amid the gloom and silence of closing mills and dying fires, he is impressed

with prosperity.

The Speaker reminds me of an old gentleman I knew in my early days when I lived in Indiana. He was like the Speaker, something of a philosopher and somewhat emphatic in his language. He was greatly troubled with the toothache. One day I met him and said to him, "Uncle Rease, how is your toothache?" He said, "Well, you know I have had the toothache so long that I never notice it any more unless the damn thing stops."

[Laughter on the Republican side.]

When I talked the other day I exhibited the list of closed mills in the State of Washington. That list has been considerably increased since that time. But I did not intend to refer to that fact. There were some instructions before that the conditions complained of were merely local. This time I do not propose to go to the Pacific coast; I expect to read a story of disaster and business depression here in the East.

Here is a list giving the name and location of 123 steel mills that were all running a year ago, representing an annual output of 12,800,000 tons, or 38 per cent of the entire production of

the entire Nation.

Now, let some Democrat arise and say whether that is preaching calamity without facts to base it upon. I will read a list of the mills and the locations.

Mr. REED. Mr. Chairman, will the gentleman yield?

Mr. HUMPHREY of Washington, Certainly, Mr. REED. I suppose the gentleman knows that some of those factories which he presumably has in the list have since resumed operations, according to the accounts in the newspapers

from which, I presume, he compiled his statistics.

Mr. HUMPHREY of Washington. The gentleman knows no such thing. Here is what the gentleman does know. I thought some one on that side would ask such a question, so I sent a wire to Cleveland to find out about the facts and I have here in my hand the reply, which is addressed to me and which I received about 20 minutes ago;

Congressman W. E. Humphrey, Washington, D. C.: CLEVELAND, OHIO, January 13, 1914.

Washington, D. C.:

Officials of Steel Corporation and large independent mills at Pittsburgh advise they are not putting any additional men to work at this time. Indications now point to continued closing down of steel mills and blast furnaces. Reductions of working forces of men engaged in all metal-working trades, and wage reductions have already begun. This description of actually prevailing industrial conditions applies to all iron, steel, and other metal working districts throughout this country.

DAILY IRON TRADE.

I wired and asked the Daily Iron Trade whether the statement which appeared in yesterday's paper that 50,000 men were to be put to work in Pittsburgh was true. What I just read is There is another thing that I would like to have some gentleman on that side answer. How could they put 50,000 men to work again if they have never been idle? You have been constantly denying that there was any truth in such a

statement; but suppose they have put 50,000 men to work, that number would only represent 2 per cent of the men that were idle on the 1st day of January of this year, and since I have compiled this list there are other mills that have been closed.

I want to call attention to this list of 123 furnaces by States. In Pennsylvania 53 furnaces have been closed, representing an output of 5,804,000 tons. In Alabama there have been four furnaces closed, representing an output of 276,000 tons. It is worthy of notice that three of these furnaces are situated in the city of Birmingham, the home of the distinguished gentleman whose name the tariff bill bears. His explanation of this action of the mills in his State would be at least interesting. In Illinois there are 10, representing an output of 795,000 tons.

In New York 10, representing an output of 1,139,000 tons. In

Ohio, which comes second in production to Pennsylvania, there were 25, representing 3,476,000 tons. In Tennessee there are 8, representing an output of 286,000 tons. In Virginia there are 3, representing 100,000 tons. In Wisconsin there are 2, representing 130,000 tons. In Colorado 2, representing 240,000

Mr. KINDEL. What are the ones in Colorado? Mr. HUMPHREY of Washington. The Coal, Fuel & Iron Co. at Pueblo.

Mr. KINDEL. Did the coal strike there have anything to do with that?

Mr. HUMPHREY of Washington. I do not know; I simply know the mills were reported closed. I ask the gentleman if he knows that that is not correct.

Mr. KINDEL. No; I do not know. Mr. HUMPHREY of Washington. If anyone denies that any furnace in the list is not closed, I will be glad to correct it. am taking my statement from a trade paper that assures me they are correct. Indiana has 3, representing 290,000 tons. Maryland 2, representing 96,000 tons. West Virginia 2, representing 216,000 tons. A total representing an annual output of 12,598,000 tons, or 38 per cent of the entire output of the iron and steel trade in this country, and every one of those mills were running when the Democratic Party went into power. [Applause on the Republican side.]
Mr. MOORE. Mr. Chairman, will the gentleman yield?

Mr. HUMPHREY of Washington. Yes; I will yield. Mr. MOORE. The statement just made would indicate that great many skilled laborers have been thrown out of work

during the past year, would it not?

Mr. HUMPHREY of Washington. Well, taking the allied industries—those allied with the steel industry—it represents and demonstrates there are over a million men idle just now.

Mr. MOORE. Would not that account very largely for the 10,000 men knocking at the doors of the Ford Automobile Works at Detroit to-day?

Mr. HUMPHREY of Washington. I will refer to that in a moment.

Mr. SLOAN. Will the gentleman yield?

Mr. HUMPHREY of Washington. I will.

Mr. SLOAN. This million out of employment-is not that simply the logical result of the new freedom relieving them from their well-paying jobs? [Laughter and applause on the Republican side.]

Mr. HUMPHREY of Washington. I just want to summarize now, because the insinuation has been made on that side of the House-was made the other day by the Speaker-that when we made these statements we were doing it without facts upon which to base them. I want to challenge anybody upon that side of the House, here or hereafter, to dispute the correctness of these figures. You ask why is it that we make these statements. In the first place, the Democratic Party, backed by the President, has repeatedly assured us that if any of these mills closed that an investigation would be made to ascertain why they closed. Now, I am going to put this list in the RECORD, where the Secretary of Commerce can see the name and the exact location of each closed mill, where the Secretary of Labor can also have this information in detail. These two Cabinet officials have repeatedly boasted they would investigate any industry that closed and let the country know the facts. cially call the attention of Secretary Wilson to the conditions in Pennsylvania.

In his own State there are 500,000 men idle that were at work a few weeks ago. Will he investigate and tell the Nation why? I asked Secretary Redfield some days ago to investigate the closing of shingle and lumber mills in Washington, but all that has come of it is a promise of "due consideration." I ask these distinguished gentlemen to either do something or admit that they were simply playing the very cheap game of political bluff. I want these two distinguished statesmen that have talked so much to investigate a little.

I want to know whether these mills are closed; and if they are, I want to know whether the men who closed them are to be helped or hanged, because if they are going to hang all the men who have been responsible for the recent closing of industries in this Nation upon a scaffold 50 cubits high, as the President said, while it may be hard on the guilty wretches, it is certainly going to help the lumber business in my country. [Laughter and applause on the Republican side.] Now, another thing: The distinguished leader of this House [Mr. Underwood] stood upon that side and declared that the Secretary of Labor had the power, that he had the means, and that if any of these mills closed, if any legitimate industry was injured, that an investigation would be had, and if an injustice had been done any legitimate industry that that side of the House would correct the law. I want to know whether you are going to make good that promise or not. Were you simply making it for political purposes or did you mean it? Here you have the list to

Names, number, and capacity of blast furnaces blown out since Mar. 1, 1913.

Look at the list. Read it. This is the story in the iron and steel business:

Eighty-seven days of the "new freedom" and free trade. More than one-third of all steel mills in the United States

closed.

More than 1,000,000 men idle.

More than \$2,000,000 a day in wages gone.

More than \$125,000,000 invested in closed mills.

An annual pay roll of more than \$746,000,000 wiped out.

Yet it is proposed to make still further assaults upon American industries, and any man that dare cry out against it is to be written down as a criminal. And still the Democratic Party and written down as a criminal. And still the Democratic Party and my distinguished friend who just took his seat [Mr. Reed] wants you to believe that this Nation can prosper under free trade.

Mr. REED. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman yield?

Mr. HUMPHREY of Washington. Yes; certainly.

Mr. REED. I do not think there was anything in my statement that had anything what the season to the season of the season o

ment that had anything whatever to do with prosperity under free trade. I am perfectly willing that the gentleman shall criticize my speech, but I want him to do it by confining himself absolutely to the truth and not by drawing conclusions that are not warranted by my speech.

Mr. HUMPHREY of Washington. If the gentleman had drawn that rule on himself, no reply from me would have been necessary. There would not have been any speech from him.

[Laughter on the Republican side.]

Mr. HARDWICK. Mr. Chairman, will the gentleman yield for a question?

The CHAIRMAN. Does the gentleman yield? Mr. HUMPHREY of Washington. Certainly.

Mr. HARDWICK. I want to ask the gentleman how he accounts for the depression of the steel industry by the tariff in view of the admitted fact that the domestic steel people are able to sell steel in Birmingham more cheaply than the English people can make it?

Mr. HUMPHREY of Washington. I suggest to the gentleman that he go out and see three or four hundred thousand of these idle men and they will be able to tell him.

Mr. HARDWICK. I think the gentleman from Washington ought to be able to do that. He certainly is one that has

nothing to do.

Mr. HUMPHREY of Washington. No; the gentleman from Washington will be busily employed if he undertakes merely to call attention to the mistakes the Democratic Party has made, and he will be able to do little else than to read the list of closed mills to this House. That alone will keep him busy. [Laughter on the Republican side.]

Mr. HARDWICK. Has the gentleman compared the business failures of the year just past with those in the last year

under Republican rule?

Mr. HUMPHREY of Washington. Yes. Mr. HARDWICK. I wish the gentleman would put those figures in.

Mr. HUMPHREY of Washington. The greatest failures have occurred within the last month.

Mr. HARDWICK. The gentleman is mistaken. Mr. HUMPHREY of Washington. Then let the gentleman from Georgia insert the figures.

Mr. HARDWICK. All right. I will put them in.

Mr. FOWLER. Mr. Chairman, will the gentleman yield to me for a question?

The CHAIRMAN. Does the gentleman yield?
Mr. HUMPHREY of Washington. Certainly.
Mr. FOWLER. I would be glad if the gentleman will give

the names of the Illinois steel plants that have closed down.

Mr. HUMPHREY of Washington. With pleasure. One is the Federal Furnace Co., of Chicago, with an annual output of 85,000 tons. Another is the Iroquois Iron Co., of Chicago, with an annual output of 120,000 tons. Still another is the Illinois Steel Co., Chicago, with an annual output of 590,000 tons.

Then dropping down to Indiana, near Chicago, I find that the Indiana Steel Co., Indiana Harbor, with an annual output of 120,000 tons, has closed down; also the Indiana Steel Co., at Gary, a suburb of Chicago, with an annual output of 170,000

tons.

Mr. FOWLER. The gentleman does not mean to say that the Gary steel plant has closed down, does he?

Mr. HUMPHREY of Washington. I say that those I have mentioned have closed down.

Mr. FOWLER. Is it not a fact that the Illinois Steel Plant and the Illinois Steel Corporation are both in operation

Mr. HUMPHREY of Washington. Well, the gentleman has my statement. I have put it in the RECORD, where the gentleman can find it.

Mr. FOWLER. I am asking the gentleman is not that a

Mr. HUMPHREY of Washington. I reply to the gentleman that these companies I have mentioned have closed.

Mr. FOWLER. And they are nothing else than adjuncts or subordinates, which are usually closed every season more or less.

Mr. HUMPHREY of Washington. Usually less. [Laughter on the Republican side.] None of them were closed a year ago.

Mr. LANGLEY. They are usually closed down under a Democratic administration.

Mr. HUMPHREY of Washington. The condition of the iron and steel trade in the United States on the 1st day of January, 1914, is reviewed in an article on the first page of the Daily Iron Trade of Friday, January 9, 1914. This is not a political paper; it does not attempt to fix responsibility or give the cause for present conditions; it simply, in a cold, business manner, states the facts. The article opens with this sentence:

The astounding depth to which the business depression of the United States, and especially the iron and steel business, has sunk in the past six months makes one of the stupendous business stories of the past 50

The article then proceeds to set out in detail the present conditions of this great industry, which is universally regarded as the best business barometer in the United States. The facts,

when known, will stagger the American people.

On the 4th day of March last, when the Democratic Party came into power, the steel and iron business of the country was almost at the very height of its prosperity. On that day, as I have already pointed out, there were 306 blast furnaces running. On the 1st day of January, 1914, there were 123 of these furnaces closed. Thirty-eight per cent of all the fires in the blast furnaces in the United States are now out, with no prospect of again being relighted

Mr. COX. Mr. Chairman, will the gentleman yield? The CHAIRMAN. Does the gentleman from Washington yield to the gentleman from Indiana?

Mr. HUMPHREY of Washington. Yes.

Mr. COX. I want to ask the gentleman if those closures are

brought about by the importation of iron and steel?

Mr. HUMPHREY of Washington. They have been brought about by the tariff bill that the Democratic Party placed on the statute books.

Mr. COX. I would like to have the gentleman answer my nestion. I do not think he answered it yet to suit me.

Mr. HUMPHREY of Washington. I do not expect to be able to answer any questions in a way to suit the gentleman. I have no idea that I could possibly do it.

Mr. COX. I will put the question again. Have these mills

been closed down as the result of the importation of iron and steel since the Democratic tariff bill went into effect?

Mr. HUMPHREY of Washington. One of the reasons why they have closed down is because under the present tariff law business throughout the United States generally has been absolutely paralyzed and there is no demand for steel. That is the reason.

Then it has not been due to the importation of Mr. COX.

steel under the Democratic tariff law, as I understand?

Mr. HUMPHREY of Washington. As far as that is concerned, the people of the United States are not buying either at home or abroad at this time.

Mr. COX. I want the gentleman to answer this question, if he is prepared to do it: What amount of steel and iron has been imported into this country since this bill went into effect, as compared with what it was last year.

Mr. HUMPHREY of Washington. I do not know. I know that the home production has decreased over one-third.

Mr. HARDY. Will the gentleman also answer as to whether or not lumber mills have been closed at all by importations of lumber into this country, and whether there has been any increase in importations of lumber?

Mr. HUMPHREY of Washington. I do not know whether there has been any increase in the importation of lumber or not. I know that the lumber mills of my country are closed. I know that the largest mill in the State of Washington closed about 3 weeks ago for the first time in 55 years. For the last 20 years and probably longer it has run day and night. It even survived the awful days of '93-97. The president of that company is here, and he may be inside of this hall now for aught I know, and from him I received this information.

Mr. HAPDY. My understanding of the argument of Republicans has always been that the Democratic tariff law would permit importations in competition with our products, and thereby deprive our industries of their employment. Now, I want to know if the tariff has brought in any increased amount of lumber or an increased amount of machinery or of iron products, and has had any such result

Mr. HUMPHREY of Washington. The gentleman attributes to the Republican Party an argument that the Republican Party does not make.

The CHAIRMAN. The time of the gentleman from Washington has expired.

Mr. PAYNE. Does the gentleman want any more time? Mr. HUMPHREY of Washington. Yes; I wish the gentle-

man would yield to me 10 minutes. Mr. PAYNE. I yield to the gentleman from Washington 13 minutes' additional time.

The CHAIRMAN. The gentleman is recognized for 10

minutes. Will the gentleman yield?

Mr. HUMPHREY of Washington. I would like, first, to answer the question of the gentleman from Texas [Mr. HARDY]. The argument of the Republican Party is that under free trade You stop the demand. You throw men out you stop production. of employment and stop the payment of wages. You paralyze the entire industrial system of the country, and under a Democratic administration you can neither buy at home nor abroad. Cheap goods are of no value to the idle without money.

Mr. COPLEY. Will the gentleman yield for a question? Mr. HUMPHREY of Washington. Yes.

Mr. HUMPHREY of Washington.

Mr. COPLEY. This may be an answer to the questions that have been asked from the other side. Probably the gentleman knows that within the last two weeks one cargo of corn that started from Argentina to this country reduced the price of the farmers' corn in the United States more than 10 cents a bushel on the exchange in Chicago. It does not need the importation of one single bushel at the present time, but the threat of coming importation has decreased the price of corn.

Mr. FESS. That is what the Democratic Party promised—a reduction of the prices of farm products.

Mr. HUMPHREY of Washington. I have a clipping on my desk which states that 5,000,000 bushels of corn have been contracted for from Argentina.

Mr. FESS. I want to ask the gentleman if the Democrats did not say they would reduce the price of the products of the farm?

Mr. HUMPHREY of Washington. They did when they were in the cities, but when they were in the country they said they would increase the prices of farm products. [Laughter on the Republican side.]

Will the gentleman yield? Mr. HARDY.

Mr. HUMPHREY of Washington. No; I can not yield any more until I finish what I have to say.

It must not be forgotten that connected with the iron, steel, and metals trade are 28,800 separate and distinct establishments. These allied establishments employ more than 2,000,000 men. These are all directly affected.

It must not be forgotten that there are 958,000 miners that are directly affected by this depression in the steel industry. The output of bituminous coal has decreased between 40 and 50 per cent.

There are 270,000 miners in the United States now out of work, and this does not include about 50,000 in the iron mines of the Lake Superior region who are annually out of employment at this season of the year.

The wage earners are losing \$63,000,000 per month.

Two million dollars a day that the American workmen were receiving a few months ago has been taken from them and paid to the foreigner, or not paid at all.

Is it any wonder, with this vast sum of more than \$2,000,000 er day taken from labor within the last few months, that

there is general business paralysis?

At least 90 per cent of this great sum is taken out of the

channels of trade. Business feels it everywhere; it shows in the condition of every trade; it affects every community.

Mr. McCOY. Mr. Chairman, will the gentleman yield?

Mr. HUMPHREY of Washington. Not until I get through. The tremendous and startlingly sudden increase in the number of idle railway cars in the country within the last few months tells in a graphic story the business conditions of the

On the 1st day of November, 1913, there was in the country a shortage of railway cars totaling 1,842. Fifteen days later,

November the 15th, there were 22,265 idle cars.
Fifteen days later—December 1—there were 51,454 idle cars.

January 1, 1914, there were 188,850 idle cars.

Or, in 60 days, there was a decrease in the demand for cars to conduct the business of the country of the astounding number of 190,692.

Mr. SIMS. Mr. Chairman, will the gentleman yield?

Mr. HUMPHREY of Washington. After I have finished this

The tariff law fell upon the lumber and shingle industries upon the Pacific coast like an earthquake in the night, but its effect seems to have been equally disastrous and equally sud-den upon the great iron and steel industry and the railroads of

On the 1st day of January, 1913, only a year ago, the United States Steel Co. had orders amounting to 7,852,000 tons.

On the 1st day of January, 1914, it had orders amounting to 4.250,000 tons.

These decreases tell in graphic story the general condition of the steel industry to-day. The most radical protectionist would not have dared to prophesy such wide and universal disaster by less than three months of free trade.

Here are some specific instances of the number of men that

have been discharged and are now idle:

Pennsylvania Steel Co., 4,000. Lackawanna Steel Co., 4,000. Bethlehem Steel Co., 4,000. Illinois and Indiana Steel Cos., 7,000. Carnegie Steel Co., 10,000. Jones. & McLaughlin, 6,000. Baldwin Locomotive Works, 4,000. United States Steel Co., over 40,000.

Alan Wood Iron & Steel Co., 1,000.

American Locomotive Works (at Richmond, Va.). 3,000.

American Locomotive Works (other places), 5,000.

In the automobile industry the following men have been discharged:

Cleveland, Ohio, over 3,000.

Cleveland, Ohio, over 5,000.

In the Detroit district and adjacent territory, 35,000.

Indianapolis and other centers in the Middle West, 12,000.

Mr. BATHRICK. Will the gentleman yield right there?

Mr. HUMPHREY of Washington. Not now.

I quote again from the article in the Daily Iron Trade:

Aided by conservative calculation made at leading industrial and trade centers by staff representatives of the Daily Iron Trade, the past

10 days show that over 1,000,000 workmen identified with or directly dependent upon the iron, steel, and metal trades of the United States are idle to-day.

All these men were busily employed six months ago.

If the reciting of these facts be preaching calamity, then make the most of it. I challenge anyone to deny the correctness of the figures that I have given. I challenge anyone to dispute the specific instances that I have pointed out

But why should the Democratic Party whine and complain because these facts are made public? Their slogan has been "pitiless publicity." Why is it that they were so anxious for publicity when the Republicans were in power and so solicitous for silence now?

Is it a patriotic part for public men to keep silent and sound no word of warning until the whole country is done to industrial death by academic doctors and efficiency experts, by gowned theorists and scholarly dreamers, by pedantic pundits and learned illusionists? [Applause on the Republican side.]

The article referred to from the Daily Iron Trade is as follows:

MILLION MILLMEN AND 123 FURNACES IDLE.

The astounding depth to which the business depression of the United States, and especially the iron and steel business, has sunk in the past six months makes one of the stupendous business, stories of the past 50 years. Here is a graphic statement pointing out the extent to which the very basis of the iron and steel production of the country, namely, its blast-furnace capacity, has been curtailed and still continues to shut down.

Since March 1 last 306 blast furnaces were in active operation, the largest number in several years. Then blast furnaces began shutting down until on January 1, 1914, a total of 123 of those stacks actually operating last March had closed down definitely.

These 123 blast furnaces thus thrown into idleness have a combined annual capacity for producing 12,058,000 tons of pig iron. This tremendous tonnage is equal to 38 per cent of a year's total output of the country at the high rate of production attained in February, just before the curtailment actually began. It is also equal to the total coke, anthracite, and charcoal pig-iron production of the United States in 1898.

the country at the high rate of production attained in February, just before the curtailment actually began. It is also equal to the total coke, anthracite, and charcoal pig-iron production of the United States in 1898.

These 12,958,000 tons of pig iron thus summarily wiped out, valued at an average of \$14 a ton, mean a loss in one year of \$181,412,000. Since over 80 per cent of the cost of a ton of pig iron is paid out in wages to labor in digging iron ore and transporting it by rail and ship, mining coal and making it into and transporting coke, quarrying limestone and carrying it to furnace, besides operating the furnace itself, this means the wiping out of an annual pay roll of \$145,129,600 to ore miner, coal miner, coke worker, railroad employee, sailor, and blastfurnace worker, besides scores of other trades directly involved.

The graphic chart [not printed] shows the names of owners, location, number of idle stacks, and annual producing capacity of the furnaces actually shut down since March 1, differentiating the stacks which supply steel works and rolling mills with pig iron, and hence called "nonmerchant" furnaces, from the "merchant" furnaces, or those which sell their product in the open market to foundries, mills, etc.

Curtailment has not ended at the point indicated in the tabulated figures, for since January 1, when these furnace statistics were collected, other furnaces have been prepared to blow out, one being Alicestack, of the Valley Mold & Iron Co., Sharpsville, Pa.; Harriet X, of the Wickwire Steel Co., Buffalo; one Corrigan, McKinney & Co. stack at Clevcland; and Grace stack, of the Brier Hill Steel Co., Youngstown, Ohio. In December the Carnegle Steel Co, closed down 15 blast furnaces and the National Tube Co. 8, the Steel Corporation as a whole putting out of activity 27 stacks in December alone. The Lackawanna Steel Co. now is operating only one blast furnace out of seven at Buffalo.

Many of the idle furnaces noted in the table are the most modern.

Steel Co. now is operating only one blast furnace out of seven at Buffalo.

Many of the idle furnaces noted in the table are the most modern, economical producers of pig iron to be found anywhere on earth, and they would not have been put out of blast, with all the attendant financial loss, except as the result of extreme necessity.

This all means, of course, irreparable loss to both the owners of the furnaces and their armies of employees, miners, railroad men, coke makers, etc., and their families, whose suffering in this season of the year is beyond calculation in mere dollars.

The closing down of nonmerchant blast furnaces is being caused by the steady dropping off in the demand for finished steel products, this resulting in some steel works now operating at 30 per cent of capacity, others at 40 per cent, and still others at 60 per cent, but the latter are few in number. This is graphically indicated in the steady decline of unfilled orders of the United States Steel Corporation, which fell from 7.852,883 tons on December 31, 1912, to 4,250,000 on December 31, 1913. The curtailment of steel-works activities has resulted in 5,000 workmen being laid off by the Lackawanna Steel Co., 4,000 workmen by the Pennsylvania Steel Co., 4,000 men by the Bethlehem Steel Co., 7,000 men by the Blimois and Indiana Steel companies, 10,000 men by the Baldwin Locomotive Works. The Maryland Steel Co. and 4,000 men by the Baldwin Locomotive Works. The Maryland Steel Co. and the Columbus, Ohio, works of the Carnegie Steel Co. has closed down its steel works at Sparrows Point, Md., and the Columbus, Ohio, works of the Carnegie Steel Co. has locked its gates. The Otis Steel Co. is operating its Cleveland works single turn, and the Empire, Union, and Lake Erie rolling mills, at Cleveland, are running alternate weeks or portions of weeks. The Inland Steel Co., Chicago, has closed down its Highland mill. There is excellent authority for the statement that 75,000 iron and steel workmen are idle in the Pittsburgh district alone.

CORPORATION LAYS OFF THOUSANDS.

The United States Steel corporation, through its various subsidiaries, has laid off between 40,000 and 50,000 workmen and its plants' activities are down to 50 per cent.

The Steelton, Pa., works of the Pennsylvania Steel Co. is running three days a week with full force, a reduction in activity of 50 per cent. The normal force employed by the Pennsylvania and Maryland companies is about 11,000 men. The Alan Wood Iron & Steel Co. has laid off 1,000 men and is operating about 40 per cent of capacity. The Republic Iron & Steel Co. has laid off 4,000 men and is operating around 55 per cent of capacity. The American Locomotive Co. has between 8,000 and 10,000 of its men on the idle list and is operating at around

25 to 30 per cent of capacity. Its Richmond, Va., works, which employs 3,000 men, is down entirely. The Pittsburgh Steel Co. is operating at 50 per cent of capacity.

MILLION MEN ARE IDLE.

MILLION MEN ARE IDLE.

In addition to the blast-furnace facts and typical steel-mill instances given above, careful investigation, aided by conservative calculation made at leading industrial and trade centers by staff representatives of the Daily Iron Trade the past 10 days, shows that over 1,000,000 workmen identified with or directly dependent upon the iron, steel, and metal trades of the United States are idle to-day.

All these men were busily employed six months ago.

The combined wages these idle workmen would have received, at the conservative average of about \$2 a day, would have amounted to \$2,000,000 a day, or \$50,000,000 a month of 25 working days, or \$600,000,000 a year.

This total of 1,000,000 idle workmen is being increased so steadily and rapidly that at the December rate of closing down of works, shops, factories, and foundries the total will reach 1,250,000 men before the end of January, 1914.

COUNTLESS TRADES AFFECTED.

COUNTLESS TRADES AFFECTED.

Directly connected with the iron, steel, and metal trades of the country are 28,800 separate establishments employing 2,000,000 workmen. These establishments turn out the following products: Agricultural implements, automobiles, brass and bronze products, car and general shop repairs by raliroads, cash registers, coke, copper, tin and sheet iron trades, machine tools, gray iron, steel and malleable iron foundries, steel-sheet mills, steel-rali mills, steel-plate mills, structural steel rolling mills, nut, bolt, and rivet factories, copper, lead, and zinc smelting, steel forgings, car building by others than railroads, locomotives, cut and wire nail factories, wire-fencing works, wrought pipe, cast-iron pipe, saws shipbuilding, steel springs, stoves and furnaces, tin and terne plate making, wire, wire work, cables, etc.

Of the total workmen employed in these industries fully 50 per cent, or 1,000,000 men, are idle. Many of these works are operating only 40 per cent of capacity, others as low as 30 per cent, so that 50 per cent is a fair average, as ascertained by the Daily Iron Trade staff.

Of the remainder of 1,000,000 men who are still employed in the metal industry, fully 100,000 men have been reduced in wages by a straight 10 per cent cat or a reduction in the hours of employment. In many foundries throughout the Middle West, as previously pointed out in the Daily Iron Trade, scores of malleable and gray iron foundry owners have reduced wages by a straight cut of 10 per cent, and, due to the lack of demand for their castings, have been compelled in addition to reduce the working time from 10 hours a day to 9 hours a day, this in effect being an additional wage reduction of 10 per cent. Railroad shop men, in numerous instances of large railroad lines, have been reduced as to working time from 6 days of a total of 55 hours a week to 5 days of 8 hours each, or a total of 40 hours a week, this being in effect a wage reduction of over 38.7 per cent.

THOUSANDS OF MINERS PINCHED,

The next largest body of workmen disastrously affected by the present industrial depression is composed of the coal, copper, lead, and zinc ore miners, who, together with the iron-ore miners and limestone quarrymen, include 950,000 workmen, to whom are paid \$490,000,000

quarrymen, include 950,000 workmen, to whom are paid \$490,000,000 a year in wages.

The falling off in the demand for bituminous coal used in the operation of blast furnaces, steel works, foundries, machine shops, and the scores of other metal-working industries now either closed down or working on exceedingly short time, has resulted in a reduction in the bituminous coal output of the country of between 40 and 50 per cent. Since the wages of the workmen employed in mines are based absolutely upon the amount of tonnage of coal actually produced by them, it follows logically that their earnings or wages are now reduced between 40 and 50 per cent. At Gary, W. Va., alone 15,000 coal miners are dependent upon the steel works' demand for coal, and about 25,000 miners in eastern Ohio, for instance.

Zinc-ore miners in the Missouri-Kansas-Oklahoma district in the first week of December, 1913, suffered the third consecutive wage reduction of 10 per cent was made in the week of November 16, and the first reduction several weeks previous to that. More than one-third of the spelter smelting capacity of the country is closed. In the last few days the price of spelter has weakened further, so that an extended advance in spelter ore prices is unlikely at this time.

DISASTROUS CUT TO MINERS.

DISASTROUS CUT TO MINERS.

Transposing the wage reductions and shorter working time of miners of coal, copper, lead, and zinc ore mines located in Michigan, the far West, Tennessee, Alabama, Pennsylvania, Ohio, Indiana, Illinois, Missouri-Kansas-Oklahoma and Wisconsin-Illinois-Iowa and other mining districts, and eleminating the 50,000 Lake Superior iron ore miners, who are affected by the seasonal shutdown of their mines at this time of the year, gives a total of 270,000 miners out of work at this time, meaning a loss to them in wages of about \$12,000,000 per month, based upon the low average of \$43 a month assigned by the Government to coal miners in the 1910 census. However, as applied to other than coal miners other than of coal is about \$2 a day. But at this low Government estimate the wage reduction amounts to \$12,000,000 per month, or \$144,000,000 per year.

COPPER DECLINE HEAVY.

COPPER DECLINE HEAVY.

The effect upon copper production of the December figures of the Copper Producers' Association will undoubtedly be to curtail further. The December figures made public yesterday show an increase in production of 4,902,713 pounds, as compared with November. But the startling decrease in domestic consumption in December, given as 26,718,288 pounds, is the smallest by almost 50 per cent ever reported by the Copper Producers' Association since its organization in January, 1909. This extraordinary decrease in copper consumption in the United States in December corroborates the figures of industrial unemployment given above and corroborate the reports of curtailment of all industries in which copper enters as raw material.

Iron ore mine owners in the Minnesota, Michigan, and Wisconsin ranges usually furnish work for thousands of miners during the winter in busily "stock piling" ore in preparation for the opening of navigation early in the spring. This custom is not being so generally followed this winter, as noted from time to time last month in the Daily Iron Trade. Ore shippers know from the extremely depressed condition of the pig-iron market and the steady curtailment of blast-furnace activity,

as shown in the table published above, that iron ore will not be in demand in the early spring.

ORE SEASON TO START LATE

ORE SEASON TO START LATE.

In fact, it is believed shipping of Lake Superior iron ore will not begin until May, possibly not until June, this year, whereas last spring the ice was not off the Lakes before lake vessels started out with a rush and dash in April. One year ago, fully 75 per cent of the ore shipped in the navigation season, which closed last December, was placed under contract with vessel owners. So far this winter not a mention has been made in lake shipping circles about ore contracts for the season of 1914.

Thousands of men are employed in lake and ocean shipping, directly involved in the transportation of ore, coal, and finished materials of metal, dock hands, etc. But, since these men end their usual season of activity with the advent of winter, their idleness at this time has not been figured into the computation here being made,

THOUSANDS OF COKE WORKERS IDLE.

THOUSANDS OF COKE WORKERS IDLE.

The coke industry in the Connellsville regions in western Pennsylvania, the Pocahontas, Wise County, and New River districts of West Virginia, as well as the southern coke-making district, has been deeply affected. In the Connellsville district alone a total of 8,000 workmen have been laid off in the past two months. Special passenger trains early in December took many hundreds of these idle coke workmen to eastern seaports for their return to Europe. When they begin to return, the industrial depression will have passed, for they are as unfailing harbingers of approaching prosperity as are the birds of spring. In the Connellsville coke regions, which are typical of the other coke districts of the country, the increase in idle work due to reduced oven production is shown by the following figures:

	Ovens active.	Produc- tion.
Mar. 1, 1913 Aug. 16, 1913 Dec. 20, 1913 Jan. 3, 1914	Tons. 33,078 31,540 26,428 26,039	Tons. 432, 645 396, 617 284, 964 252, 151

These figures show the reduction in the number of active ovens since March 1 last year of over 7,000 ovens. By far the largest number of these idle ovens was put out of blast since August 16, this number being 5,501. In the past week a net total of 234 ovens in the Connelisville regions were made idle, and the Producers Coke Co. announces that with the ending of this week an additional total of 1,700 ovens will be added to the idle list. This means, since the workmen are enumerated 1 to an oven, that over 1,700 coke workmen will be directly affected after this week by the industrial depression.

BAILROADS REDUCE WORKMEN.

affected after this week by the industrial depression.

RAILROADS REDUCE WORKMEN.

Railroad trainmen, locomotive engineers, construction gangs, engineering departments, and office men, even down to the yard clerks, are being affected to a degree that is difficult to translate into figures of unemployment. The railroads of the Middle West have reduced their totals of labor cost in the past six weeks between 15 and 20 per cent in the larger number of instances, but even as high as 25 per cent in a considerable number. The astonishing increase in the number of idle cars in the country in the last month shows that the hours of employment for trainmen and locomotive engineers, whose names are retained always upon the books of railroads, are being rapidly reduced. This reduction is brought about by the abandonment of freight trains and the reduction of switching crews' activities in blast furnace, steel works, and coal-mining districts.

The fortnightly report of the American Railway Association, issued yesterday, shows that the net surplus of idle cars on January 1, 1914, was 188,850, an increase of 87,305 idle cars on December 15, then the total of idle cars stood at 101,545 cars. On December 11, 1913, the number of idle cars was 51,454; on November 15 it was 22,652, there being this number of cars idle in the country, as compared with a shortage of 1,842 cars on November 1, 1913, or a decrease of 190,692 cars in two months.

These astonishing accretions of idle cars from November 1 to January 1 account for the sudden and unexpected cessation of carbuying by the railroads noted in the early autumn. The small number of new cars ordered by railroads in 1913 was 100,000, as noted in The Iron Trade Review in its issue of January 1. This compares with a total cars bought in 1912 of 226,195 and in 1911 of 133,117 cars. Of the total of 100,000 cars bought in 1913 fully 82,000 cars were placed with builders in the first half of the year, so that only 18,000 cars were bought in the last half of the year.

FEW RAILS BOUGHT I

FEW RAILS BOUGHT IN 1913.

In all of 1913 the railroads bought 2,975,000 tons of standard steel rails, compared with 3,327,915 tons in 1912. In this connection, in order to gain a proper perspective upon these figures, it need but be mentioned that the total standard steel-rail producing capacity of the rail mills in the United States is 6,980,000 tons per annum.

HUNDRED MILLIONS LOST ALREADY.

HUNDRED MILLIONS LOST ALREADY.

The wages of idle blast furnace, rolling mill, and all sorts of metaltrade workmen known to be idle in January aggregate \$50,000,000; the wage earnings of miners, etc., affected total \$12,000,000, making a total of wages lost to workmen \$62,000,000 per month. Taking into account the wage losses sustained by these workmen in September, October, November, and December of last year this would make an estimated aggregate of wages lost in this period of \$100,000,000. This is undoubtedly a conservative estimate in view of the known facts.

This total of wages lost means that much less money was spent by these workmen and their families with merchants for food, clothing shoes, etc. Since last August probably \$100,000,000 of wages earned by the now idle workmen would have been available for general trade had conditions in the iron, steel, and metal industries continued at the rate enjoyed by them last spring.

The first disastrous effect of this huge economic loss of workmen's wages is seen in the suddenly increased number of commercial failures in the fourth quarter of the year just closed. Furthermore, the loss of \$100,000,000 in buying power of only a portion of the industrial working people of the United States since last August furnishes the only intelligent explanation of the large increase in commercial failures in the succeeding three months, as set forth clearly by the figures of

R. G. Dun & Co. In the following table failure returns for the past two years are compared by quarters, figures for the last few days of December being estimated:

Failures by quarters for years 1913 and 1912.

	1913		1912	
	Number.	Liabilities.	Number.	Liabilities.
First quarter. Second quarter Third quarter. Fourth quarter	4, 458 3, 405 3, 549 4, 435	\$76, 832, 277 56, 076, 784 63, 837, 315 65, 892, 632	4, 828 3, 489 3, 499 3, 446	\$63, 012, 328 44, 999, 900 45, 532, 137 -45, 150, 731
Total	15, 847	262, 639, 008	15, 262	193, 095, 091

As is customary, according to the report of Dun & Co., the heaviest losses of the year occurred in the opening quarter. The second quarter made a much better showing. But in the third quarter the effects of the industrial depression began to appear, and the liabilities increased over \$18,000,000 over the corresponding quarter of 1912. The worst showing of all, however, was in the fourth quarter of the year just closed, when the number of failures increased in number 989 over the corresponding quarter of 1912, and the liabilities grew \$20,741,901, being within \$10,939,645 of the total liabilities involved in all the failures in the usually fatal first quarter of the year.

The absolute cutting off of probably \$100,000,000 of the purchasing power of the wageworkers of the country, as pointed out above, furnishes the only rational explanation of the startling growth in failures of commercial establishments of the United States in the fourth quarter of 1913, in the identical quarter of the year when failures are least numerous and least costly to creditors.

THOUSANDS OF AUTO BUILDERS IDLE.

THOUSANDS OF AUTO BUILDERS IDLE.

The automobile industry of the Middle West, centered in the large manufacturing citles of Cleveland and Detroit, has been compelled to reduce its shop forces of workmen between 50,000 and 75,000 men. In Detroit and the adjacent Michigan territory, where automobile building has become the leading machine-shop industry, conservative estimates place the number of idle automobile workmen at 35,000 men. In Cleveland, where 9,000 automobile workmen are employed normally in the builders' shops, between 3,000 and 4,000 men are idle. The extent of this unemployment in Detroit was most graphically shown Monday, Tuesday, and Wednesday of this week, when 12,000 men rioted in front of the Ford Automobile Co. in order to gain employment in these shops, following the public announcement of President Henry Ford relative to taking on more workmen. The police had great difficulty in restraining the hordes of hungry and anxious men who vainly sought to avail themselves of Ford's offer to obtain work. They flocked to Detroit from all over Michigan, Indiana, Ohlo, and neighboring States.

Mr. FRENCH. Mr. Chairman. I desire to invite the atten-

Mr. FRENCH. Mr. Chairman, I desire to invite the attention of the House to H. R. 9590, a bill that I have introduced providing for the survey of certain lands in the State of Idaho. Most survey work that is done in the several States is performed under the direction of the Interior Department under general appropriations and with the responsibility resting upon the department of making such surveys as may be most needed from time to time, limited, however, by certain provisions of law contained in the act of June 25, 1910, which provides that preference shall be given to the survey of lands occupied by actual settlers and to lands granted to the several States.

Ordinarily I would be very content to let the survey of all lands in Idaho proceed under the general law limited by the conditions imposed therein and trusting to the department to reach whatever lands in the State may need to be surveyed as soon as it may be practicable to do so. However, a situation exists in Idaho that in magnitude is different from that which exists in any other State touching certain lands that ought to be surveyed, and it is to this subject that I want to call the attention of the House. We all are more or less familiar with the fact that years ago the Government made land grants for the encouragement of railroad building throughout the United States.

To the Northern Pacific Railroad Co. a land grant was made that embraces a total area of approximately 45,000,000 acres of This land was granted upon condition that the railroad would be built. Without going into detail, the railroad was granted the right to select odd sections within certain definite limits on either side of the line of railroad, and in the event of lands granted to the railroad being acquired by other persons or in event the lands so designated were mineral in character, the railroad was granted the right to make lieu selections in place of such lands within a strip following along and immediately adjacent to the primary land grant that, of course, followed the line of the railroad.

In the State of Idaho this grant may be exercised within a territory extending east and west through the State and within a width of 80 miles in the primary grant area and a width of 100 miles including the primary and indemnity grant regions. Of the total amount granted to the railroad, aggre-gating something like 45,000,000 acres of land, on June 30 last little more than 34,540,000 acres had been patented to the alroad. Probably by this time 35,000,000 acres in round

numbers have been patented, and approximately 10,000,000 acres of the grant that was made in 1806 remain unpatented in the various States.

When I tell you that this land, although strictly the property of the railroad company since the railroad performed its part of the bargain in railroad building, remains untaxed notwithstanding the fact that it must be increasing in value constantly, you can readily appreciate how States that are included in the region embraced within the grants are impressed with the idea that the lands should be passed to patent at the earliest prac-ticable time that they may be available for their share of taxes looking to the support of the counties and States within which they were located.

I said a little while ago that Idaho probably more than any other State is vitally interested in this question, and this is true for this reason: The Government, under existing law, has the right to call upon the railroad for the advancement of money for the purpose of surveying the lands within the primary land grant of all of the States. Surveying work under this general law is going on in my State as it is going on in other States and if this were the only question involved we would have nothing to urge before the Congress looking to such consideration as is suggested in the bill that I have introduced.

A reservation, however, was made in the grant to the railroad that there was reserved from the grants lands that should be classified as mineral in character. You are readily familiar with the fact that Idaho is a State that is rich in mineral wealth, and it happens that the line of the Northern Pacific Railroad Co., now railway company, extends through the region in which is located the great Coeur d'Alene mines. A large part of the area of the grant that otherwise would be made to the railroad company, being classified as mineral, can not and ought not to be patented to the railroad company, but on the other hand the railroad company is required to make selections elsewhere in lieu of these lands. Under the law, while the Government may call upon the railroad to advance money for the survey of lands within the primary land grant, the Government may not call upon the company for the advancement of money for the survey of lands included within the indemnity land grant which lie on either side of the primary grants. This being the case, in those States where mineral lands exist in large degree, it necessarily follows that much land must be classified as mineral, and consequently that other large areas equivalent must be surveyed from which selections shall be made by the railroad companies in lieu of the mineral lands which they have lost. Ultimately the cost of survey of these lands must be paid by the railroads, but until the lands shall be surveyed and classified the Government is not in position to know what lands may be selected by the railroad company, and consequently is not in position to ask the railroad company to advance the money for the survey until the survey and classification shall be made.

My bill provides for the survey of these lands, but the appropriation that will be necessary to make these surveys is an appropriation that must be regarded as an advance to the department of moneys that will be refunded by the railroad company just as soon as the survey and classification shall be made and before patent shall be issued to the railroad company for the lands that may be surveyed.

Now let us see just what lands in Idaho may be included under this head. North of township 42 all the lands in Idaho have been examined with the view of determining their mineral or nonmineral character. The reports of the field examinations have not been accepted in all cases by the department, and the character of a good many thousand acres of land is still unsettled. However, it has already been decided by the department that approximately 200,000 acres of land in Idaho within the primary land grant of the Northern Pacific, north of township 42, are mineral in character and consequently a like amount of land must be selected by the railroad company within the indemnity land grant and consequently must be surveyed by the Government at its expense, which expense shall later be

met by the railroad company by a refund to the Government.

Now, this is not all. South of township 42 and along the Idaho-Montana line there is a region embracing 500,000 acres of land within the primary land grant. One-half of this, under the terms of the grant, will belong to the railroad providing it is nonmineral, the other half to the Government. That would be approximately 250,000 acres that would belong to the railroad if nonmineral in character. But it happens that these lands are very similar in character to lands near them that are known to be mineral, and it is altogether probable that one half of this amount, at least, will be found to be mineral in character and consequently, can not be granted to the railroad. If so, it will mean that the railroad will need to select 125,000 acres additional of indemnity land, and here again it is necessary that the Government advance the money to make the survey before it can call upon the railroad to reimburse it. The amount of lands under this head, in my judgment, is not less than about 325,000 acres. The total may reach 450,000 acres, and I venture that my estimates, based upon classifications already made and upon the best evidence obtainable in the department and through local agencies, will run somewhere near the correct acreage.

agencies, will run somewhere near the correct acreage.

If this were all, it would be bad enough. We could then claim that we have the right to have surveyed at the earliest practicable moment this large area of land in order that it may be patented and thereby made available for taxation, but there is still another consideration that is vastly important for our consideration.

SCRIP SELECTIONS.

The Members of Congress are familiar with the law that was passed on March 2, 1899, authorizing the railroad company to relinquish lands in the Mount Rainier Park and Pacific Forest Reserve and select an equal quantity of land elsewhere. Similarly it was provided that Santa Fe lands embraced in certain regions might be surrendered and the right of selection exercised elsewhere. Various kinds of rights of selection have been authorized by Congress, and probably no less than 20 different kinds of rights have been exercised in the selections of lands in the State of Idaho. Most of the lands selected, however, are on account of lands surrendered by the Northern Pacific Railroad Co. and are selected in lieu of the Mount Rainier base lands.

I want at this point to turn aside just long enough to express my condemnation of all these lieu-land selection laws that made an acre of land a unit of value, regardless of whether the acre was worth \$1 or \$1,000, and I regard the performance of our Government in the carrying through of the passage of such laws as that and the exchanges of lands under the same as marking one of the darkest circumstances of the history of the Government in connection with the handling of our public domain. It was a shame and a disgrace, and I can not conceive how such a law could have been adopted by which these selections were made and the rights of selection authorized. However, that is not the question to-day. The crime was committed years ago, and the problem for us to solve is the one that is immediately presented.

By exercising the right of selecting lieu lands, surveyed or unsurveyed, thousands of acres of unsurveyed lands were selected in the State of Idaho which are now unsurveyed. The reason why the so-called scrip from the State of Washington and from the States of Arizona, New Mexico, and other States was dumped into the State of Idaho is because at the particular time these laws were passed and the exchanges made under them Idaho possessed an area of timberland of almost incalculable value. Naturally, Idaho was the place to go to apply this so-called scrip. California, Oregon, Washington, all of them States of wonderful resources, were settled before Idaho was settled, and their best lands had been acquired. Consequently the lieu selection lands could not be chosen in these States as profitably as if chosen in the State of Idaho.

The result is that we not only have within my State a large area of lands originally granted to the Northern Pacific for railroad building, of which nearly a half million acres have not been surveyed, but we have in addition to this thousands of acres of land that have been selected in lieu of lands that were granted to railroads in New Mexico, in Arizona, in Washington, or elsewhere.

In other words, we have hundreds of throusands of acres of land that is held in ownership either by the original grantees or by persons to whom they have assigned the right of selection but to which title has not finally passed from the Government, though title ultimately will and must pass. These lands are growing in value day by day. The ones who purchased the "scrip" need not concern themselves over the time these lands may be surveyed. Some of the owners of the scrip and the ultimate owners of the land have been so loyal and patriotic that they will be more than glad to have the survey made. But the ones who are vitally interested in having the survey of these lands made are the people of the State, and especially the people of the northern counties of the State, where most of the lieu selections have been made.

These lands, that aggregate so vast an amount, are lands that fall on the outside of the primary land grants, and consequently, while ultimately the expense of surveying the lands will need to be paid by the grantees, the initial cost of survey must be met by the Government. Later, then, after the survey

shall have been accomplished and before patent shall issue, the Government will determine and receive the cost of the survey from the grantees.

Let me call attention to how the question of whether or not these lands shall be speedily surveyed affects the State of Idaho and the counties within the State. I shall not mention all of the counties where selections have been made, but shall mention a few that you may understand how important it is to our people. In Kootenai County, in taking into account selections to be made either in the primary or indemnity regions, the amount of scrip that has been placed is approximately 46,080 acres; in Bonner County it is about 207,360 acres; in Clearwater County it is about 241,020 acres; in Shoshone County, about 288,000 acres; in Idaho County, a vast area the definite amount of which I am not able to indicate; and in Latah County, Nez Perce, and other counties selections of rather uncertain amounts.

It is difficult to obtain an accurate estimate of the value of these lands. I have tried to obtain an estimate of the taxes that these lands would pay if patent already existed in the grantees. The estimate that has been made, and which I think can not be far wrong, is that these lands, by being unsurveyed, are holding from the State of Idaho and the counties of the State approximately \$75,000 every year. Can you not see what this means to the State and to our several counties, our farmers, our merchants, our property holders of all classes, who are called upon to pay their taxes and who respond? Yet here is a class of property that is exempt from taxes simply because the patent to the same has not been vested in the grantees.

WHAT DOES THE FRENCH BILL PROPOSE?

The question is now asked, What do I propose in my bill to meet the situation? I propose that the Congress authorize and appropriate such an amount of money as may be necessary to survey all the lands that I have referred to in the indemnity-land grant, aggregating from 325,000 to 450,000 acres, and all the lands included in the areas selected under the so-called scrip. How much will it cost to survey this land? The estimates of the Interior Department are that it will cost from 5 to 7 cents per acre, figuring the cost of survey upon the basis of cost per acre. This will mean that the cost of surveying these lands will be anywhere from \$100,000 to \$140,000. In other words, an amount less than the amount of taxes that the lands will pay during a period of two years.

WHO WILL PAY THESE COSTS?

I said a little while ago that it is provided in the law that the grantees are required to pay the cost of survey, but not-withstanding this, while the Government may call upon the grantees to advance the money for the survey of lands when the lands are within the primary land grants, the Government is not authorized to call upon the grantees to advance the money for the survey of any lands in the indemnity-land grants or in grants that have been selected under the lieu-selection lands. Ultimately, these grantees will be required to pay the money that will be used for the survey of these lands.

We must advance it first, however, and as soon as the survey shall have been made and classifications made and before patent shall issue, the grantees shall reimburse the Government for the moneys that we advance in making the surveys.

Surely this is a measure of highest importance, and from the standpoint alone of the duty that we owe to the citizens of the counties of Idaho and to the State at large, to make it possible for the counties and State to obtain the reasonable revenue that is due them from private property, I ask your support for this measure.

Mr. UNDERWOOD. Mr. Chairman, I yield 15 minutes to the gentleman from Georgia [Mr. HARDWICK].

Mr. HARDWICK. Mr. Chairman, I want to say that I have been somewhat amused and somewhat shocked at some of these wails that have come without cessation from gentlemen who sit on the opposite side of this Chamber, notably the gentleman from Illinois [Mr. Mann], whose absence from this floor at this moment I regret, the gentleman from Wyoming [Mr. Mondell], and the gentleman from Washington [Mr. Humphrey]. I think these gentlemen would be performing a more patriotic service if they could manage to hush the walls with which they so constantly afflict this House and the country. What patriotic service is to be gained by such conduct as this? What great legislation is to be influenced, what wrong is to be remedied, what right is to be preserved, what interest of the American people is to be promoted? It is simply the wail of a lot of discredited politicians, moaning the loss of their power, and the American people know it.

American people know it.

Mr. MONDELL. Mr. Chairman, will the gentleman yield?

Mr. HARDWICK. I do.
Mr. MONDELL. Does not the gentleman's party intend to
rectify these wrongs, as was promised during the debate and by the leader on that side, and by some of the Cabinet officers since?

Mr. HARDWICK. Oh, I thought the gentleman wanted to ask an intelligent question.

Mr. MONDELL. It may not be intelligent to the gentle-

Mr. HARDWICK. No; it certainly is not. Of course, before the Democratic Party corrects a wrong it must commit one, and it will take more than the bare, unsupported word of the gentleman from Wyoming or the gentleman from Washington, or the cooked-up newspaper reports from Republican newspapers that are not more reliable than either one of the gentlemen, to convince me that the Democratic Party has committed any wrong whatever.

Mr. HUMPHREY of Washington. Mr. Chairman, will the

gentleman yield?

Mr. HARDWICK. Not at present.

Mr. HUMPHREY of Washington. I only want to ask one question.

Mr. HARDWICK. I yield to the gentleman. Mr. HUMPHREY of Washington. I just want to ask one question.

Mr. HARDWICK. All right. Mr. HUMPHREY of Washington. Does the gentleman deny the correctness of the list of lumber and shingle mills that I put into the RECORD as having closed in my State, or the list

of the steel mills that I produced this morning?

Mr. HARDWICK. I will tell the gentleman frankly my answer. I doubt it. I do not know, and I do not think the gentleman knows, either. I want to be fair to the gentleman. I have the highest regard for him personally, and if the gentle-man were to state it of his own knowledge and say that he knew it himself and did not take it from some biased, partisan Republican newspaper that is misrepresenting the thing or that has exaggerated it, I might possibly put some credence in it, but as it is I do not think I can go very far along that line. [Applause on the Democratic side.]

Mr. HUMPHREY of Washington. Will the gentleman yield

further!

Mr. HARDWICK. Just for one question, and then I have some matter that I want to put in the RECORD myself.

Mr. HUMPHREY of Washington. Of course as far as the

iron and steel industry is concerned—
Mr. HARDWICK. That is all hearsay with the gentleman.

Mr. HUMPHREY of Washington. I do not know personally, but so far as the conditions existing on the Pacific coast in regard to the lumber and shingle mills in my own State are concerned, I am in a position to make some personal statements.

Mr. HARDWICK. I know what is the matter. That is

right near the Canadian border. For some time they have had a protective duty of \$2 a thousand on lumber. So that these people who were engaged in the manufacture of lumber in the State of Washington when the tariff was taken off had to reduce the price they charged, and they have been wailing and weeping and gnashing their teeth ever since, although the American consumer needs the relief and needs lower-priced lumber far more than these lumber magnates need the protec-

Mr. HUMPHREY of Washington. The trouble is they have

not been producing at all; they are not running.

Mr. HARDWICK. It would be better not to produce at all if Mr. HARDWICK. It would be better not to produce at all if you can not do it except under an artificial stimulus. [Applause on the Democratic side.] The mills in the country are running and selling. This country would be very unfortunate and most helpless indeed if it could not get along.

Mr. HUMPHREY of Washington. Will the gentleman tell the House how many mills are closed in the South?

Mr. HARDWICK. Not one that I have heard of.

Mr. HUMPHREY of Washington. Does the gentleman

Mr. HARDWICK. I know something about the lumber business in the South. I have kinsfolk and close friends who have been in it all their lives. I have been attorney for a good many of them at times, and if there is a single lumber mill in Georgia closed on account of this tariff bill or since its passage I have not heard of it.

Mr. HUMPHREY of Washington. Of course they are protected by several thousand miles of freight rate from the compe-

tition we have on the Pacific.

Mr. HARDWICK. Yes; but Georgia lumber mills sell their product all over this country and to many other countries.

Mr. HUMPHREY of Washington. The gentleman from Georgia is well posted, and I want to know what the conditions

Mr. HARDWICK. I will tell the gentleman. We can easily sell our lumber up to Ohio River points; some classes of it we can sell in Canada itself, against Canadian competition, after paying the Canadian duty. We are selling and exporting lumber to Australia, to South America, selling it all over the world, Georgia lumber, where it does not get the benefit of a single cent of protection, and yet the gentleman from Washington is here pleading the baby act, weeping and crying for an industry that wants to be subsidized at the expense of the American consumer, with an added tax that is levied upon every one of his own consumers. [Applause on the Democratic side] The trouble with the Republican point of view—

Mr. HUMPHREY of Washington. Has the price been re-

duced here in Washington city or in the South?

Mr. HARDWICK. In reply to that suggestion, let me ask how is it that you can contend on the one hand that the price has not been reduced and the consumer has not been benefited and on the other hand, with wonderful inconsistency, that the producer has been ruined. [Laughter and applause on the Democratic side.] Both contentions are not true. That sort of argument is not frank. It does not impress the American people, I am sure. Both things can not be true. If prices have not been lowered and the consumer has not been benefited, then the lower price has not hurt the producer. I suggest a caucus of these critics of the Democratic Party to decide which horn of this dilemma they will take before they inflict another flood of crocodile tears upon the House and the country.

Now, I want to read you several things, several newspaper extracts from papers that are not Democratic papers; that are not partisan to this administration. I read from a great paper, published in the city of New York, possibly the greatest independent paper published on this continent, and the article I read does not merely state the view of that paper, either. views that are expressed there are the views of the most eminent financiers in this country, most of them Republicans, although there are some Democrats. It is a statement of what they say about the present conditions in this country, about its business prosperity, about future prospects; and I leave it to the House and the American people to choose between them and the loud wails coming from the gentlemen from Wyoming, Illinois, and Washington. [Laughter and applause on the Democratic side.] I read now from the New York Herald of date December 28, 1913, a page of interviews in reference to this great question, interviews with men of such eminence in finance and business circles as J. Pierpont Morgan, Jacob Schiff, George W. Perkins, W. L. Saunders, Theodore Shonts, Louis Gimbel, Lewis Nixon, and J. B. Greenhut. Mr. Morgan

Mr. HUMPHREY of Washington. How can they recover when they have not been sick?

Mr. HARDWICK. Well, the gentleman wants to be candid to some extent at least-

SEVERAL MEMBERS (on the Democratic side). Oh, no.

Mr. HARDWICK. Does the gentleman from Washington deny it? Well, his desire to be candid to any extent seems to be doubted on this side.

Mr. PAYNE. Mr. Chairman, may I ask the gentleman a question?

The CHAIRMAN. Does the gentleman yield?
Mr. HARDWICK. Certainly.
Mr. PAYNE. In the case of this Mr. Greenhut or this Mr. Siegel, had his firm gone into bankruptcy before or after that

interview? [Applause on the Republican side.]

Mr. HARDWICK. I am informed on this side that the firm even escaped bankruptcy in the two last Republican administrations, to say nothing of this one. Now. Mr. Chairman, I know that the gentleman wants to be candid. I have too high a regard for him to believe otherwise. Yet I want to say to the gentleman that he knows, and every other Republican knows, and the country knows, and its business men know, that on account of the Balkan War troubles gold has been scarce in Europe, and times have been hard there, and European investments here have been largely curtailed and withdrawn. [Laughter on the Republican side.] I wish the gentleman would stand up who wants to laugh at that, so that the country may get his picture and name.

Mr. JOHNSON of Washington and Mr. HUMPHREY of

Washington rose.

Mr. HARDWICK. Do you two gentlemen from Washington desire to contradict that statement? Do you deny it?

Mr. JOHNSON of Washington. I desire to attract attention, o that the people of Washington can enjoy that statement. [Laughter on the Republican side.]

Mr. HUMPHREY of Washington. The point I make is that the gentleman now admits that the depressed condition exists.

Mr. HARDWICK. Let me tell you something. Conditions were bad long before your Republican President went out of office, and they have been getting better, as these men say, ever since we had a Democratic administration. [Applause on the Democratic side.]

Mr. HUMPHREY of Washington. Yet every one of these interviews says that conditions are getting better. The point I would like to know about is how they can get better if they have

Mr. HARDWICK. Well, we are recovering from years of Republican mistakes and Republican misrule, from the exploitation of the common people in the interest of tariff-protected beneficiaries. ciaries. Yet gentlemen stand here who know better and think the American people are a lot of fools and assert that the tariff bill has ruined the country in 80 days.

Mr. HUMPHREY of Washington. It has done enough, God

knows.

Mr. HARDWICK. Does the gentleman mean to say that?

Mr. HUMPHREY of Washington. Yes.

Mr. HARDWICK. The gentleman should possess his soul in patience. If he does that he will see the good day come, in the Providence of the Almighty, when the Underwood bill will justify the fondest expectation that even its friends have entertained for it. There is one good thing about it all. We have got the Almighty on this side. He surely was good to have got the Almighty on this side. He surely was good to this country once when He relieved the country from Repub-lican rule. [Applause on the Democratic side.]

I read further:

I read further:

One of these men said that all signs point to a quickening of the pulse of the business world. His railroad draws its biggest revenue from the farmer, and he declares that the prosperity of the granger was never at higher tide.

Here are the views of big men in various lines of endeavor, all sounding the note of satisfaction with the country's condition and of confidence in better times ahead:

Jacob H. Schiff, head of the great firm of Knhn, Loeb & Co., said: "With the passage of the currency bill, which bit of legislation was highly pleasing to me, I expect to see a speedy resumption of business, and I am sure business confidence will be materially strengthened and conditions improved all over the country."

Irving T. Bush, president of the Bush Terminal Co., had this to say: "I don't look for what might be called a boom, but rather a steady gain in business of all sorts. I am sure a resumption of normal conditions in the business world will soon be apparent, for President Wilson has given us what the country has been clamoring for, and that is a real revision of its tariff laws. The signing of the currency bill was very gratifying to me, too, and I at once joined the ranks of those optimists who see in President Wilson a genuine leader of men. He was the first President to appreciate the vital need of an adequate banking and currency system. What he has accomplished in the 10 months of his tenure of office stamps him as one who can be thoroughly trusted to inaugurate a sane and intelligent general legislative program which will not injure legitimate business."

George W. Perkins is another optimist who says that prosperity is in sight.

Louis Gimbel, of Gimbel Bros., says: "Prosperity is close at hand.

George W. Perkins is another optimist who says that prosperity is in sight.

Louis Gimbel, of Gimbel Bros., says: "Prosperity is close at hand. With such a sane and masterful leader as President Wilson at the head of our Government we are bound to prosper. The holiday season just ending has been a splendid one for us. We did a much larger volume of business than ever before, and now we are preparing for the new year, which we confidently expect to have much in store for all who strive to do business on business principles and who can intelligently analyze those factors which bear most directly on trade conditions throughout the country. We have had a good year and now we are eagerly looking forward to a far better one."

W. L. Saunders, president of the International Harvester Corporation, as well as president of the Ingersoll-Rand Co., is enthusiastic over the outlook for renewed business prosperity and is loud in his praise of President Wilson and the manner in which he has brought about legislative reforms in Washington. Mr. Saunders said:

"The present easing up of business is due primarily to the bad monetary conditions that now exist in Europe. It has been influenced also by the general advertising given to a bad currency situation and to an unreasonable tariff condition which was so indefensible that everybody has been expecting a change. Uncertainty always creates business depression, and when the atmosphere is cleared, as it has been by a fair tariff and a currency bill which at least is a definite platform to stand upon, we may look for better times. I am not afraid of President Wilson's treatment of the trusts. His 'Seven sisters' bills in New Jersey, now known as the 'Seven business commandments,' show where he stands. Through President Wilson confidence in the Democratic Party has been established throughout the country."

Theodore, Shonts, president of the Interborough, said that while he

country."

Theodore Shonts, president of the Interborough, said that while he is sure business conditions all over the country are looking up, he is far too busy with the affairs of his corporation at this the end of the year to enter into any discussion of outside affairs. He was sure, however, that "better times are in sight and that times will continue to improve."

however, that "better times are in sight and that times will continue to improve."

Lewis Nixon, president of the Steel Package Co., says:

"Seldom in the history of this country has the whole Nation hung on the word of the President as it did while waiting for his remarks to be made upon approving the currency bill. Enterprise is straining at the leash. The whole country wishes to stop marking time. Has the assurance been what is needed? Is the interpretation to be given

to the President's words 'Forward, march'? Evidently the platform adopted at Baltimore is to be the guide.

"The President says he has begun constructive legislation. The platform spoke for revision of the tartiff, and it has been revised. It spoke for an income tax, and we have it. It spoke for presidential primaries, and the President recommends them. It pledged a systematic revision of the banking laws, and we have currency reform. It spoke for an immediate declaration of the Nation's purpose to recognize the independence of the Philippine Islands as soon as a stable government can be established, and the President has taken the first steps in trying out their capacity for self government. What are the further steps in constructive legislation as indicated by the platform?

"The platform favors the efficient supervision and rate regulation of rallroads, express companies, telegraph and telephone lines engaged in interstate commerce. The valuation of the above utilities is recommended. They must not engage in business that brings them into competition with shippers or patrons. Legislation is to be had to prevent overissue of stocks or bonds by such utilities. Also, legislation which will assure reduction in rates of transportation unless such reduction will lower wages, prevent adequate service, or do injustice to legitimate investments.

"The platform holds that the control of the Mississippi is a national problem and favors the development and improvement of the inland waterways, so as to permit their navigation by vessels of standard draft. National aid in the construction and maintenance of post roads is favored. Students of history will remember Madison's views on these policies. So far as the Federal jurisdiction extends, the platform pledges a national employees' compensation law. The platform opposes any abridgment of the rights of wage carners and producers to organize for the protection of wages and the improvement of labor conditions, to the end that such labor organizations and their members shall

"Truly a formidable list yet remains, but action in connection with which not being clearly indicated, uncertainty and indecision naturally

"Truly a formidable list yet remains, but action in connection with which not being clearly indicated, uncertainty and indecision naturally result.

"No one believes that President Wilson is not anxious for the highest development of national prosperity. Have we any indication of change of policy which makes for confidence? Yes; and in the line that has most upset great enterprises.

"More than any one policy to strengthen confidence has been the common-sense procedure with respect to the Sherman Act. If a corporation applied to former Attorneys General to ascertain whether certain practices were forbidden, in order that its affairs might be conducted in compliance with the law, it was given the cold shoulder and practically told to find out for itself, and usually was arrested on suspicion a few days later and arraigned for trial.

"The present tendency is for the Department of Justice to take enterprise by the hand instead of by the throat.

"A great deal of distress will be felt in Louisiana when great production lands and plants will be made nonproductive, with but little, if any, gain to the consumer. So with tin plate and a few other industries. But few protests are heard. It is unlikely that radical tariff changes will follow for a number of years. Certainly not, if the Democrats are continued in power under President Wilson.

"So the country can now pay attention to the development of its commerce along lines of enduring stability. Every factor now makes for prosperity. But underproduction, the abandonment of plans looking forward to several years of operation requiring long and secure credits, and not running plants at full capacity must end. We must resist the foreign influences aiming to nullify the Panama Canal act, and the discriminating sections of the Underwood tariff. These were the first fostering measures to restore our merchant marine since the unwise suspension of 1828.

"Without a merchant marine we can not step the constant drain of our gold abroad. The merchant marine plank of the Baltimo

the first fostering measures to restore our merchant marine since the unwise suspension of 1828.

"Without a merchant marine we can not stop the constant drain of our gold abroad. The merchant marine plank of the Baltimore platform is, of course, contradictory. If the La Follette bill is passed freeing seamen from all contract obligations we turn over the carrying of our trade upon the seas to our commercial rivals.

"If we adopt constitutional regulation of commerce, as pledged, we shall, before the end of this administration, witness the greatest benefits to this country known in its history. We must reach the markets of the world with our products independently of the Government-fostered fleets of our commercial rivals. We have lately, through the operation of vessels under the American flag of the United States Steel Corporation, forced a parity of freight rates from our ports to South America, and with the ports of Europe, except on products uniquely American. This will be of great value to as in our commerce with enstern South America, which is of vastly more consequence than the trade of the west coast.

"The people are thred of indiscriminate and resultless investigations, if a rule were adopted of never putting the legislator who proposes an investigation upon the investigating committee, much useless and hurtful interference would be avoided.

"Of course, the unfortunate Mexican situation will cause a drain upon this country's resources, and no matter how wise the policy followed, stable conditions will be slow in forming. Wise statesmanship may, however, relieve some of the resentment against our citizens in Mexico and other parts of Latin America, and so hasten the time when the great resources of Mexico will minister to the world's weifare.

"For the present this drain, caused through rendering unpofitable vast investments, will continue. Under the fostering care of the Department of Commerce an enormous increase in foreign trade may be expected, but a brake on such increase is the necessity of fin

trade through foreign banks. When we establish branch banks in foreign countries we shall have made a great step forward.

"The country has been yawning. It is now rubbing its eyes. As soon as it sees clearly it will spring into redoubled activity."

Mr. J. B. Greenhut, president of the Greenhut-Siegel-Cooper Co.—

"The last year has been possibly one of the greatest from several points of view that we have had for some years. The change of administration at Washington possibly contributed more than anything else to what we might call change in conditions that have existed for the past several years. Naturally any change in administration causes uneasiness and uncertainties in many directions. The fact that it was known there would be a change in our tariff caused a certain amount of apprehension on the part of the manufacturing interests, and forced curtailment in certain directions, which apparently had a widespread effect.

effect.

"As far as the retail business is concerned, it was not affected by the new tariff law, as, naturally, every retailer had ample notice and opportunity of regulating his stock of merchandise and his advance orders accordingly.

"While we have heard and read much regarding business depressions the property way. I believe the retail stores have noticed little, if any.

"As far as the rotail business is concerned, it was not affected by the new tariff law, as, naturally, every retailer had ample notice and opportunity of regulating his stock of merchandise and his advance orders accordingly.

"While we have heard and read much regarding business depressions in a general way, I believe the retail stores have noticed little, if any.

"Business of the month of the store was a consideration and the property of t

Now, I want to read you next from a man who talks about this very steel industry about which my friend from Washington [Mr. Humphrey] has been wailing:

ton [Mr. Humphrey] has been wailing:

Mr. J. B. Hartwell, who travels for a big wholesale hardware concern of this city, has just returned from a trip that extended to the Pacific coast, returning by way of the Middle West and on down the Mississippi Valley to New Orleans, and thence home through the Southern Atlantic States.

"I have been traveling this territory for 15 years," Mr. Hartwell said. "In my entire experience I never had a better trip; I sold more goods this autumn than I ever did on a previous autumn trip, and furthermore the most encouraging of all signs was the readiness with which these merchants offered to discount their bills. In only one section did I experience discouragement, and that was in Pittsburgh. There I found the men engaged in the steel and iron business prone to cry poor business and hard times. I was instructed by my firm to make a careful investigation of the reasons bringing forth these wails, and before I was half through I ascertained to my entire satisfaction that many of those who cried the more lustily were actually turning down orders—holding back until things in the money world were a little more settled.

"Everywhere I went I heard unstinted and lavish praise of the methods of President Wilson, and there was that dominant note of entire and unrestrained confidence which must make for better business and better prices. I am about to round out my activities on the road and, perhaps, shall never take a trip over such an extensive territory, and I tell you it is mighty gratifying to me and to my employers that I could return with such glowing accounts and such a well-filled order book. And that is what counts most."

Mr. BURKE of Pennsylvania. I would like to ask the gen-

Mr. HARDWICK. No; I can not yield. I have got to finish in five minutes. I can not yield to my friend.

Mr. BURKE of Pennsylvania. Very well.
Mr. HARDWICK. I am not afraid to yield to my friend. I should be very glad to do so if I had the time. Now, if these babes that are manufacturing steel can not stand on their own legs, how is it they can sell their product in Birmingham and Sheffield markets at lower prices than the people who manufacture iron and steel in England can make it there, so that the English manufacturers say they can not compete with the American product. And yet, because they are not allowed to American product. And yet, because they are not allowed to overcharge the American consumer, because they are not allowed to pile up load upon load, they yell "hard times"; and for the sake of politics, in order to try to get the people to restore a tariff that gives them an undue and unjust advantage, they seem almost willing, if they could, to create a business panic.

Mr. HUMPHREY of Washington rose.

Mr. HARDWICK. I can not yield to the gentleman. I must conclude. I believe these men will have a heavy debt to pay

conclude. I believe these men will have a heavy debt to pay when they face the bar of American public opinion, when the people realize how unpatriotic and how selfish have been the actions and motives of these men in reference to this matter.

Now, I want to call your attention to one tariff convert in the great State of Connecticut. I will read now from the Hart-ford Daily Times of January 10, 1914, in which comment is made on the fact that Pratt, Read & Co. will begin running their factories on a 9-hour schedule, paying the same wages as heretofore on a 10-hour schedule. In other words, this factory under a Democratic tariff bill is able to pay just as much for 9 hours' work as it was able before to pay for 10 hours' work under a Republican tariff bill. I read from the Hartford Daily Times of January 10, 1914:

Early last year, when the rehabilitation of the tariff was under discussion and in the works, the officers of the company were fearful that the proposed increase in duty on ivory would prove harmful to the company's business, and President Cheney at that time came out in a newspaper interview expressing such sentiments. That portion of the tariff affecting ivory, of which the company uses many tons in the course of a year, has been in effect some months, but the company seems to be even more prosperous now than ever before, it being asserted that October furnished the largest business it has ever known. In view of all these circumstances and the reduction of hours of labor of employees without any reduction in wages, it would seem that President Cheney's fears for the prosperity of his concern because of the new tariff were, happily, groundless.

Pratt, Read & Co.'s business is the mainstay of the town, and any reverses or dullness which it might suffer would be immediately reflected in the financial affairs of the people.

Now, my friends, I want to say that the American people are not bankrupt; they are not broke; they are not even hard up. With cotton at the highest price it has sold for in many a year, with wheat, with corn, in spite of statements made here, unlowered in price, the country is abundantly and solidly prosperous. The gentleman from Wyoming [Mr. Mondell] suggested "wool." Why, he sees "wool" in every bush; "wool" is his fetish.

Mr. BARCHFELD. Will my friend yield there?
Mr. HARDWICK. Certainly. How much time?
Mr. BARCHFELD. I want to state that in my district the
United States Steel Corporation employs 22,000 men. They
are now working on a 50 per cent basis. By the last of this month they will be working on a 40 per cent basis. By the 1st of February notices will be posted in every plant of a horizontal reduction of 15 per cent.

Mr. HARDWICK. Now, I want to ask my friend from Pittsburgh a question. Is it not true-I saw it published, I think, in the Pittsburgh papers the other day-that one concern recently announced that it is going to employ 10,000 more men?

Mr. BARCHFELD. I want to inform the gentleman that his informant is very badly mistaken. They are not employing additional men.

Mr. HARDWICK. Well, are they taking back 10,000 menreemploying them?

Mr. BARCHFELD. No. I will tell you what they are doing. In place of working three shifts of eight hours each they are reducing their force and giving them three days a week, and after the 1st of February they will be getting two days a week. That is the best in store for them. They are trying to keep their force at work a part of the time.

Mr. HARDWICK. It is a fact that they are going to put on 10,000 men, is it not?

Mr. BARCHFELD. No, sir; that is not true.
Mr. HARDWICK. The papers stated it.
Mr. BARCHFELD. I deny the assertion.
The CHAIRMAN. The time of the gentleman has expired.

Mr. UNDERWOOD. I yield to the gentleman from Georgia

five minutes. Mr. HARDWICK. As I said just now, wool is the particular fetish of the gentleman from Wyoming [Mr. Mondell]. That has been the trouble with the Republican Party. Every single man in it has had some one particular thing to which he was devoted and on the altar of which he was willing to sacrifice every other interest, disregarding the old maxim that legislation must proceed on the theory of the greatest good to the greatest number. For that reason they have been weighed in the balance; for that reason they have been found wanting by the American people. [Applause on the Democratic side.] For that reason wails come from them to-day, not for the good of the country, not for patriotism, not for creative legislation, not to redress wrongs, not to secure rights, but walling like Rachel weeping for her slain and refusing to be comforted, because of the power they have lost and which they realize is to return to them no more.

[Laughter and applause on the Democratic side.]

My friends, the country knows the situation, the country knows how little there is in all these complaints, and I challenge the gentleman from Washington [Mr. HUMPHREY] when he puts his figures in the RECORD to put against them the business failures of 1913, the business failures of the year 1912, the business failures of 1911, the business failures of the year 1910, and so on back, including those of 1907, all good Republican years-both the number of such failures and the volume of capital affected thereby. Gentlemen, there is nothing in this but the weeping of discredited politicians, and I think in the interest of patriotism that we ought to turn our faces toward the sunrise of a fairer and a brighter day. Instead of preaching and howling and practicing all sorts of pessimism we ought to look with optimism to the good times coming under Democratic administraton in this year of grace 1914. [Applause on the Democratic side.

Mr. Chairman, I yield back the remainder of my time and ask leave to extend my remarks in the RECORD by printing all of the article in the New York Herald, as I have not had time to read it all.

The CHAIRMAN. The time of the gentleman from Georgia The gentleman asks unanimous consent that he has expired. may extend his remarks in the RECORD. Is there objection?

There was no objection. Mr. FRENCH. Mr. Chairman, I ask unanimous consent that I may extend my remarks in the RECORD.

The CHAIRMAN. The gentleman from Idaho asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. PAYNE. Mr. Chairman, how much time have I remain-

The CHAIRMAN. The gentleman has 16 minutes.

Mr. PAYNE. I yield five minutes to the gentleman from Iowa [Mr. GREEN].

Mr. GREEN of Iowa. Mr. Chairman, the gentleman from Georgia [Mr. Hardwick] is the most cheerful and optimistic man that I ever met. He could whistle in a combination of a cyclone, a fire, and an earthquake. [Laughter.] He says that these are prosperous times that we now have, and that the only figures we have against it are the figures from Republican newspapers. I propose to give the gentleman some figures from a Democratic source, if that is what he wants, and to give them to his entire satisfaction, so far as the Democratic authority is concerned.

He stated to you a moment ago that he was willing to compare the failures of 1912 with those of 1911 or any other Republican year, and that times were improving. These are the statistics of Democratic improvement. There were over 2,500 firms failed in the month of December last, with liabilities aggregating over \$31,000,000. The failures of 1913 exceeded those of any other year in the history of the Nation, except the calamitous year of 1893, also under Democratic administration.

Mr. HARDWICK. Will the gentleman give us his authority? Mr. GREEN of Iowa. The authority I am giving for these figures is the New York Times Annalist, a journal published by the New York Times, a purely statistical paper issued once a week and recognized as an authority in the business world.

Mr. HARDWICK. Why does not the gentleman give Dun's and Bradstreet's figures?

Mr. GREEN of Iowa. They are exactly alike.

Mr. HARDWICK. They do not agree at all.

Mr. GREEN of Iowa. They are the same. Here is another example of Democratic improvement. In the last two weeks of December last, preceding January 1, the number of idle freight cars increased 78,000, and the idle freight cars in this month of Democratic improvement were over 178,000 more than they were in the December of 1912.

Mr. HARDY. Do not the newspapers say that most of the railroads to-day are seeking to increase their capital in order to get new and needed equipment?

Mr. GREEN of Iowa. Yes.

Mr. HARDY. If they have so many idle freight cars, why

should they be seeking to increase equipment?

Mr. GREEN of Iowa. Not in that direction; but they are seeking to increase their track facilities and to pay increased wages to employees. That is what they are trying to get. Now, I will give another authority, which is neither Democratic nor Republican, but the Iron Age, a paper published at Cleveland, Ohio, which recently sent out a number of correspondents to ascertain the number of idle men in the iron trade and in the mining industry. They found there were over 1,000,000 men idle in the iron trades and 230,000 in the mining industries.

Mr. JOHNSON of Washington. Does the gentleman think these occasional statements that men are out of work and that factories are idle, and reports of other distressing matters of that kind, are due to the war trouble in the Balkans, as claimed by the brilliant gentleman from Georgia [Mr. HARDWICK], or to the drought in Oklahoma, as was stated a few days ago by our illustrious Speaker?

Mr. GREEN of Iowa. Not at all.

Mr. HARDY. Mr. Chairman, will the gentleman permit me to supplement my question?

Mr. GREEN of Iowa. Oh, my time is very short.

Mr. HARDY. Is it not a fact that the railroads all over the country are claiming that they have to pay higher wages; that they have not got equipment to do the work with the freight they have; and that they are asking an increase in their capital and permission to raise the rates on that account?

Mr. GREEN of Iowa. That does not answer anything that I

have said at all and does not relate to it. I find, however, from the statement of the gentleman from Georgia [Mr. HARDWICK] that the great Democratic Party has reached the same position it reached before, namely, a position in which it is unable to hear the testimony of cold facts with reference to what its legislation has brought upon the country. [Applause on the Republican side.]

I yield back the balance of my time.

Mr. UNDERWOOD. Mr. Chairman, how much time have I remaining?

The CHAIRMAN (Mr. Houston). Seventeen minutes.

Mr. UNDERWOOD. Mr. Chairman, I yield five minutes to the gentleman from Illinois [Mr. Fowler].

Mr. FOWLER. Mr. Chairman, I desire to say that I do not wish to yield during the five minutes allotted to me. I have been much interested in the statements of some of the gentleman. been much interested in the statements of some of the gentle-men on the other side, because of the strange reasons offered by them as an excuse for raising the calamity howl. I went back to my home district during the holidays. Down in Illi-nois we had a very severe drought last summer, and not more than half the crop was raised. Yet I never in my life found our people in Illinois more hopeful than they are now.

Mr. JOHNSON of Washington. Has the Balkan War hit into

the gentleman's country yet?

Mr. FOWLER. You fellows, you high protectionists, remind me of the story said to have been told by John Allen, of Mississippi. John Allen knew a colored girl down in his district before he went to Congress. After he had been in Congress one term he went back home, and met on the street the colored girl, Sarah by name. She was dressed in all kinds of ored girl, sarah by hame. She was dressed in an kinds of silks and feathers, and on meeting Mr. Allen she stopped in front of him and, with a bow, exclaimed, "Howdy do, Mr. Allen; I don't believe you knows me." He looked up and said. "What! Is this Sarah? You worked in the kitchen for Bill Jones, didn't you?" She replied, "Yes, sur, Mr. Allen; but I'se done been rulned now." That is the way with you fellows. You have been ruined by protection. [Applause and laughter on the Democratic side.] You can see no good in anything unless it is fostered by a high protective tariff, and you cry like whipped children when it is taken away from you. Ye gods! How long must we wait before our American industries are ready to shed their swaddling clothes?

Mr. JOHNSON of Washington. Will the gentleman yield for

question?

Mr. FOWLER. No; not any more, because the gentleman has been ruined. [Laughter.]

Mr. JOHNSON of Washington. Will not the gentleman say whether the fluorspar industry has improved in Illinois?

Mr. FOWLER. Yes. By the way, the fluorspar mines in my district are flourishing and working full time. [Applause on the Democratic side.] The gentleman will recollect that about two months ago one of the fluorspar mines in my district closed down. I made an investigation of the cause and dis-cussed it on the floor of the House, and the result was that a representative of the steel people told me that they had no idea of closing down their furnaces and their mills, and so the fluorspar mine started up within a week after it had closed down, and now all goes like a marriage bell in the twenty-fourth down, and now all goes like a marriage ben in the twenty lower district of Illinois. The same thing is true of the coal mines and lumber mills in my district. They are blossoming like roses and flourishing like trusts. Ah, not only that, but the common people have indorsed Mr. Wilson, because he is President of all the people and not a part of them. Indeed, the Republicans in my district are giving praise to Woodrow Wilson because of his plain, common-sense conduct of American affairs. The people of all parties are with him in his honest and determined efforts to correct the evils growing out of bad legisla-tion in the past. They can not be frightened away from him by such speeches as have just been delivered by the gentleman from Wyoming [Mr. Mondell] and the gentleman from Washington [Mr. HUMPHREY].

Mr. Chairman, these gentlemen remind me of old times, when I was a boy. Every time my father whipped me I cried, but he administered the punishment for the purpose of correcting the boy; and so our President and the Democratic Congress are administering the punishment to you fellows for the purpose of correcting the evils which you have brought about in this country by selfish legislation. [Applause on the Democratic side.

[By unanimous consent, Mr. Fowler was granted leave to

extend his remarks in the Record.]

Mr. UNDERWOOD. Mr. Chairman, I yield one minute to the gentleman from New Jersey [Mr. McCov].

Mr. McCOY. Mr. Chairman and gentlemen of the committee, I should like to call the attention of the committee to some up-to-date information from the great State of New Jersey. Schedule K, of course, was the schedule which we heard most about and the most wails about, and I know that my Republican friends will be glad to learn that two of the leading manufacturing concerns manufacturing woolen goods in the State of New Jersey have now entered the foreign markets and are now selling their goods in France in competition with woolen goods from all over the world, and as I have only one minute and that time will be too short to permit me to read this article, I am going to ask unanimous consent that I may extend my remarks in the RECORD by incorporating this short article as a part of

The CHAIRMAN. The gentleman from New Jersey asks unanimous consent to extend his remarks in the Record by inserting the article mentioned. Is there objection? pause.] The Chair hears none. [After a

The article is as follows:

[From the Journal of Commerce and Commercial Bulletin, Monday, Jan. 12, 1914.]

FORSTMANN-HUFFMANN SELL AMERICAN GOODS IN PARIS—EXPORTS DUE TO SUPERIOR DESIGNS AND CONSTRUCTIONS—CURIOUS CONTRAST OF TWO PASSAIC DRESS-GOODS COMPANIES—ONE ESTABLISHES AN IMPORTING BRANCH, THE OTHER TAKES SUBSTANTIAL ORDERS FROM PARIS JOBBERS.

For the first time in the history of the United States orders for domestic dress fabrics have been placed in a substantial way by French purchasers. The business booked is on novelties for the fall 1914 season, and the fact that the buyers have to pay a tariff duty, in addition to the costs of the cloths is pretty good evidence that the materials bespoken possess certain superior qualities of design and construction not found in any fabrics of similar grade shown by continental mills. This notable accomplishment has been achieved by the Forstmann & Huffmann Co., of Passalc, N. J., and the goods have been sold to leading, old-established Paris wholesale houses, so that it is reasonable to suppose they will be found in the hands of the best European trade long before the next autumn season arrives.

long before the next autumn season arrives.

Following closely on the announcement that the Botany Worsted Mills had entered the importing field, the export business developed by the Forstmann & Huffmann Co. is peculiarly interesting. These mills stand on adjoining properties. They have the same manufacturing facilities. Land, power, labor, wool, dyestuffs, etc., cost as much to one as to the other; yet while one of these great plants finds it expedient to broaden its foreign connections and start importing goods in a large way, the other demonstrates that under present tariff conditions it is possible for an organization of the highest efficiency with up-to-date equipment and ideas to go to Paris and beat the world in a field of manufacturing that has heretofore been considered securely in the hands of European producers.

This instance, however, is not the only one that can be cited to show the different attitudes domestic woolen manufacturers have assumed since the provisions of the Underwood-Simmons bill became known. Some are convinced that importations are not going to hurt their particular products, while the majority are positive their interests are

going to suffer severely. While the spring 1914 season is considered secure because of the lateness of the date on which the new tariff bill became operative, competition of a harmful character from abroad is expected to be felt during the next fall season.

Originality of ideas in styling, coupled with the finest workmanship, were the factors that won the authoritative foreign market for high novelty dress goods made in the United States. It was not prices, because the goods disposed of are the costliest ever made here. To sell goods in Paris where, according to common opinion, practically all that is attractive in textiles for women's wear originates, is an achievement which few familiar with conditions on this side of the water heretofore thought possible. Reports that efforts were being made to introduce domestic dress fabrics in France were noised about the primary market late last year, but those behind this business experiment did not consider it prudent to discuss the matter until their plans had fully matured.

Now that a foothold has been secured and business is coming forward in a way that is up to the most sanguine expectations of those who originated this selling campaign, it can be stated that very substantial initial orders of novelty dress fabrics have been given by leading jobbing concerns in Paris, and that the indications point to a satisfactory repeat order business during the coming year.

This invasion of the French market was conceived by Julius Forstmann, of the Forstmann & Huffmann Co. It was not undertaken for the purpose of finding an outlet for the surplus products of the company's mills, as is so often the case with manufacturers of other kinds of mill and factory products when the home demand slackens. The mills of this corporation are under engagement for the entire spring 1914 season. Every spindle is running overtime in both the Passaic and Garfield plants, and most of the looms have to be run overtime in order to take care of the dress-goods business that has been booked for sp

to take care of the dress-goods business that has been booked for spring delivery.

The motive that impelled the Furstmann & Huffmann Co. to seek foreign markets was to prove that dress goods could be made in the United States superior to any made in Europe, knowing that excellence of quality and originality of design would force the discriminating French buyers to recognize the superior merit of these fabrics and thus demonstrate the universality of the prestige already enjoyed by these manufacturers in the American market.

Ordinary staples can not be marketed abroad, as the high labor cost in this country precludes the possibility of competing with foreign makers of goods of this description. The goods sold for export are novelties of the finest quality and, aside from their originality of design, they are made of the very best raw materials.

All of these novelties differ materially from anything ever shown, and, while the styles are confined to the purchasers for distribution in Europe, American buyers will be able to obtain the same patterns and qualities when the fall 1914 lines are opened, which, as we understand, will be some time next month.

Mr. UNDERWOOD. Mr. Chairman, I will ask the gentle-

Mr. UNDERWOOD. Mr. Chairman, I will ask the gentleman from New York to conclude his time.

Mr. PAYNE. Mr. Chairman, I yield five minutes to the gen-

tleman from Kentucky [Mr. LANGLEY]. [Applause.]
Mr. LANGLEY. Mr. Chairman, I have always claimed to be tolerably liberal-minded Republican. I do not wish to be unfair to the Democratic Party

SEVERAL MEMBERS (on the Democratic side).

Mr. LANGLEY. Later on in this session I shall perhaps ask the indulgence of the House for the purpose of showing the effect, good or bad, which this new tariff law has had upon the people and the industries of my State and district. Some reference has been made here to-day to the Democratic promise to reduce the high cost of living. I am willing to give the Democrats a fair chance and a little further extension of time in which to redeem that promise to the people. That is one of the reasons why I do not wish to discuss the question fully now. I want to say in passing, however, that they have not done it yet, so far as prices to the consumers in my district are con-The gentleman from Illinois [Mr. Fowler] says that the coal operations in his district are running full time and are prospering, and that the people of his State are prosperous and happy. Mr. Chairman, there are many coal operations in my district. Before this Underwood tariff bill went into effect they were working all the men they could get and were even sending out agents to other parts of the country to get additional men. Now many have closed out and others have curtailed their output, and hundreds of the men are leaving. Whether that is the result of this tariff law I do not know. I shall investigate and try to inform the House later. I am even liberal enough to give the Democratic Party credit for having taken a step in the direction of redeeming its promise to reduce the high cost of living so far at least as one item is concerned, although it was apparently necessary for them to sacrifice the jobs of a good many people in order to bring that about. I have here an article published a few days ago in a leading journal of the country the Washington Device and the country the washington Dev here an article published a few days ago in a leading journal of the country, the Washington Post. You gentlemen on that side have said that we quote Republican newspapers only. This paper, I believe, is classed as independent, but it is owned and managed by a distinguished Democrat, the Hon. John R. McLean, of Ohio. This article, which I shall ask to be read at the Clerk's desk in my time, indicates that the Democratic Party has redeemed its promise to reduce the high cost of living, at least to the extent of reducing the price of soup in the city of Chicago from 10 to 2 cents a howl. [Laughter and the city of Chicago from 10 to 2 cents a bowl. [Laughter and applause on the Republican side.]

The CHAIRMAN. The Clerk will read the article desired. The Clerk read as follows:

BAID BY HUNGRY MEN—CHICAGO CAFÉS INVADED AND FOOD DEMANDED—BREAK IN UPON REVELERS—UNEMPLOYED ALSO PARADE STREETS, SMASH WINDOWS, AND PUNCTURE AUTOMOBILE TIRES—"WE WANT WORK, NOT CHARITY," MOTTO ON THEIR BANNER—HOTEL FOR HOMELESS OPENED AND FILLED IN TWO HOURS,

CHICAGO, January 1.

Entering restaurants and demanding food, breaking windows, and puncturing automobile tires, a crowd of nearly 500 unemployed men early this morning marched through Chicago's business district. They furnished a strange contrast to New Year revelers who were leaving the cafe's and restaurants.

The men marched in State Street four abreast, carrying a banner which read, "We demand work, not charity."

The army halted cars and cried to passengers that they wanted work. At Van Buren Street the police halted the marchers, but they soon re-formed their line farther down the street.

"Hey, you bums, what's up?" shouted a pedestrian from the curb.

"You are drunk and we are hungry," replied one of the leaders.

The band finally broke up into small groups.

OPEN HOTEL FOR UNEMPLOYED.

The Rufus F. Dawes Hotel, Chicago's first endowed home for unemployed men, was thrown open to-night, and two hours later its capacity of 305 guests was reached.

In midafternoon a small knot of men gathered in front of the new building. They formed two lines of ragged humanity, which grew until it extended for a block in either direction. There were more than a hundred in line-when the last bed was taken.

The doors were opened by Charles G. Dawes, former Comptroller of the Currency, who built the hotel as a memorial to his son, who was interested in sociological work. The junior Dawes was drowned more than a year ago.

FOOD AT SMALL PRICES.

Before retiring each guest was required to bathe and was given a nightdress and slippers. Clothing of the lodgers was placed in steel lockers, which were superheated to destroy all life. A bed and a bath are furnished for a nickel, and there are rooms for a dime for more particular guests. A bowl of soup may be obtained for 2 cents, pie for 3 cents, coffee for 2 cents, and rolls for 1 cent.

Mr. Dawes and his daughter sat before the fireplace in the lobby and listened for several hours to stories of fruitless job hunting. Over the fireplace was a large flag with the inscription, "Don't give up the ship." It was made by Miss Hattle Stewart, granddaughter of Margaret F. Stewart, who made the original historic flag, and donated by J. L. Pelton, of Erie, Pa. The hotel is three stories high and was erected at a cost of \$100,000.

Mr. LANGLEY. Mr. Chairman, I see my time is up, but I want to say, in concluding, that I commend this statement of

want to say, in concluding, that I commend this statement of facts, which stands uncontroverted, to the prayerful consideration of the distinguished gentleman from Illinois who spoke so fervidly and eloquently a few moments ago about the happiness and prosperity which he says exists in his State.

Mr. PAYNE. Mr. Chairman, I yield two minutes to the gen-

tleman from Nebraska [Mr. SLOAN].

Mr. SLOAN. Mr. Chairman, at a later date in this session I expect to discuss the farmers' condition under the new legisla-I hear it stated on the floor of this House that the farmers are in a better condition than they have been for a long time. There are two facts to which I desire to call attention. the multiplied number of idle freight cars which are accounted for to some extent by active foreign steamships which are bringing multiplied millions of meat products into the United States from Argentine, and another is the multiplied millions of wheat and multiplied millions of corn from abroad will account for the fact in part. And I want to answer the challenge to the authority of Republican papers and the apparent demand for Democratic authority. Out in my State under the droppings of our State capitol, out upon Fairview is one of the fairest, finest farms in our splendid State. Last summer, while the fields of that farm were golden with grain and emerald with alfalfa, the highest Democratic authority in the United States testified to the condition of farm prosperity, or the lack of it, in

our State. It was following the passage by the House of the tariff bill which is the basis for all of this discussion.

And he, who is the Secretary of State, grand old farmer that he is, of my State, deliberately declared to the American people in a discussion at that time that his farm in Nebraska, whose beauties and fertility my language can not paint, was a liability and not an asset. [Applause on the Republican side.]

Mr. PAYNE. Mr. Chairman, how much time have I re-

maining?

The CHAIRMAN. The gentleman has four minutes.

Mr. PAYNE. I yield to the gentleman from Pennsylvania

The CHAIRMAN. The gentleman from Pennsylvania [Mr.

BURKE] is recognized for four minutes.

Mr. BURKE of Pennsylvania. Mr. Chairman, I wish to refer for just a moment to the statement of my friend from Georgia [Judge Hardwick]—and it is the only one that I have heard on that side of the House that I believe is worthy of any serious notice or contradiction. There is a great deal of extravagance, I believe, on both sides in discussions of this kind; but when a gentleman of the standing of the gentleman from Georgia makes the statement that it has been found to be an

actual condition that business men in the city of Pittsburgh are turning down orders in the course of their business in order to justify them in keeping up a wail and a cry of "hard times" and a continued criticism of the present administration I think the gentleman and the man who gave him the in-

formation do themselves a very great injustice.

The fact of the matter, Mr. Chairman, is this: That at no time in the history of western Pennsylvania has there been a keener disposition on the part of men of all political parties to discard politics, to encourage business, and to aid the President of the United States in doing his full duty in the premises. I have heard uncounted remarks of that character from men of every type, from men of every political faith, regardless of whether they believe in the same principles as Woodrow Wilson or whether they entertain contrary views. Bankers, manufacturers, and men in every walk of commercial life and every branch of commercial industry have concluded that, good or bad, wise or unwise, they would rather see the name of OSCAR W. UNDERWOOD attached to a bill that would give prosperity to this country than see it attached to one that would bring adversity upon it. [Applause.] And there is not a disposition on the part of any man in any line of industry that I have found in any place that is willfully or unjusty placing overald it. in the way of the present administration. What good would it do us in Pittsburgh to close down our mills or turn men out of lucrative employment merely for the purpose of justifying criticism of the Democratic Party? The country has long since passed that stage. Men are broader minded on that subject to-day than they ever were before, and it is my belief that men of every type in the political world who are worthy of the confidence of their fellow men are to-day hoping and praying and working for the success rather than for the failure of the laws that have been placed on the statute books by this administration regardless of whether those laws in their minds are wise or unwise.

Mr. MONTAGUE. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman yield?

I will yield to the gentleman,

Mr. BURKE of Pennsylvania. I will yield to the gentleman,

I have time.

Mr. MONTAGUE. If that statement be true—and I have no doubt the gentleman believes it to be true—how can you reconcile it with the statements just made by a number of your colleagues to-day who preach adversity? If there was a movingpicture apparatus to catch their facial expressions and a device for registering their vocal intonations, it would appear that these gentlemen evidently desire disaster and demoralization.

Mr. BURKE of Pennsylvania. I can not reconcile myself to

the belief-

Mr. MONTAGUE. I am sure the gentleman can not—
Mr. BURKE of Pennsylvania. That they are willfully painting a picture that they believe did not exist in this country.
Mr. MONTAGUE. Will the gentleman permit me to ask him

Mr. MONTAGUE. Will the gentleman permit me to ask min further? There is no measure now pending—
Mr. BURKE of Pennsylvania. If the gentleman from Alabama [Mr. Underwood] will give me time, I shall be glad to answer the gentleman. I do not believe the gentlemen on this side of the House are making unfounded statements regarding a side of the House are making unfolding statements regarding a cessation of industry. I am neither repeating nor disputing their arguments, but I do dispute the statement of the gentleman from Georgia regarding Pittsburgh business men.

Mr. UNDERWOOD. Mr. Chairman, I ask unanimous consent that I may print in the Record a newspaper clipping consent that I may print in the Record and the statement of the statement of the statement of the gentleman of the statement of the gentleman of the statement of the gentleman of the gentleman of the statement of the gentleman of the gentleman

taining a speech by Mr. John Wanamaker, in connection with

The CHAIRMAN. The gentleman from Alabama [Mr. Un-DERWOOD] asks unanimous consent to print a newspaper clipping in connection with his remarks. Is there objection? .

There was no objection.

Mr. UNDERWOOD. Mr. Chairman, I have heard birds of ill omen croaking for many months, and I have not stopped to reply, because I knew that the reply was of itself coming from a

majority of the people.

The Democratic Party came into power last March with very disturbed business conditions growing out of mismanagement of political affairs at the hands of our opponents. Naturally, the great business interests of the country wanted to know what the new administration would do in reference to the handling of business questions before they entered upon new enterprises and the development of new business. The Democratic Party had been out of power for more than 16 years. New men were to take hold of the wheels of the Government, and it was perfectly natural that business enterprise would halt and wait to see the result of party action. But the Democratic Party to-day has achieved for the American people greater constructive legislation than any party has accomplished in the same time heretofore in the history of our Government. [Applause on the Dem-

We have accomplished results that our opponents on that side of the House struggled for years to accomplish. They gave their pledges to the American people that they would accomplish them, and yet term after term of Congress and administration after administration went by, only to have those promises redeemed in the political bankruptcy court. As far as I can tell, every indication points to-day not only to good times but to unusually prosperous times within the next year.

Gentlemen have quoted figures for the iron and steel districts. I happen to represent a great iron and steel district myself, and I want to say that practically everything that is made in that district has been placed upon the free list. We have not received very high prices in the last few months for our commodities, but the mills, furnaces, and factories have been running, and have been employing their labor; and only recently, since the Christmas holidays, I have seen in one of the papers—and I have no doubt it is true—that one of the great manufacturing concerns in that country has put its men to work on double shifts, so that they can duplicate the ordinary production of the mills.

Mr. HUMPHREY of Washington rose.
Mr. UNDERWOOD. I do not wish to be interrupted.
Now, about the mills in the Pittsburgh district. Of course, recognize the fact—and I do not say it facetiously—that the Pittsburgh district can not compete under the same conditions that the Birmingham district can; but the Pittsburgh district is one of the great iron and steel producing districts in this country, and to-day the business of that district is improving largely. I hold in my hand the Cleveland Plain Dealer of Monday, January 12, 1914, which contains a telegram from Pittsburgh that says:

[From the Cleveland Plain Dealer, Monday, Jan. 12, 1914.]

STEEL MILLS OPEN, 50,000 GET WORK—THIRTY FURNACES IN PITTSBURGH DISTRICT TO START TO FILL 125,000 TONS ORDERS—SITUATION BACK TO NORMAL AND BIDS FAIR TO BE EVEN BETTER.

PITTSBURGH, January 11.

More than 50,000 men who have been idle for from one to three months will be reemployed before the end of this week in the Pittsburgh district. Steel orders aggregating 125,000 tons have been landed. The Carnegie Steel Co, in the week just past placed orders for \$2,000 tons; the bulk of the remainder went to the Jones & Laughlin Co. Smaller companies received lesser orders.

Furnaces at practically all the works are undergoing repairs. Many workmen either laid off or placed on part time have been engaged in the preliminary work of repairing furnaces. Other skilled and unskilled workmen who have been employed at half and three-quarters time will be placed on full time, some by the end of this week and nearly all by the end of this month.

Industrial conditions in the Pittsburgh district are already approaching normal; and, according to officials, conditions before spring will be better than at any time since the business depression in 1907.

Rock bottom has been reached in sheet and tin plate prices. The American Sheet & Tin Plate Co. has withdrawn quotations and this week will announce an advance. This company has resumed operation in plants at Newcastle and Farrell, which were closed, and have resumed full-time operation in plants which were working part time.

The announcement that the Pittsburgh Sheet & Tin Plate Co. will construct four new hot mills at its works in Marietta, Ohio, and that the Follansbee company will add new mills to its works at Follansbee, W. Va., are further indications of improvement in conditions in this part of the country.

Expansion of open-hearth plant capacities is a marked feature of the week.

The furnaces placed in operation are: Allegheny Steel Co., 1:

week.

The furnaces placed in operation are: Allegheny Steel Co., 1;
American Sheet & Tin Plate Co., 2; Brier Hill Steel Co., 2; Carnegie
Steel Co., 16; La Belle Iron Works, 1; Republic Iron & Steel Co., 2;
and the Youngstown Sheet & Tube Co., 6. The total yearly capacity
of these mills is 2,003,000 tons. The open-hearth additions building
or under contract at the opening of 1914 are: Pittsburgh Crucble
Steel, two furnaces of 60 tons capacity each; Leetonia Steel Co., two
70 tons each; and Follansbee Bros. Co., two with 60 tons capacity

Now, that is a newspaper clipping, but I have no doubt that it correctly states the fact. There would be no reason for it to state an untruth or to misinterpret the situation.

Mr. HUMPHREY of Washington. Will the gentleman yield?

Mr. UNDERWOOD. I do not yield.

Mr. HUMPHREY of Washington. I just want to say that there is a dispatch this morning contradicting that.

Mr. UNDERWOOD. Mr. Chairman, I hope the Chair will see that the gentleman from Washington obeys the rules of the House

The CHAIRMAN. The gentleman from Alabama is entitled

to the floor.

Mr. UNDERWOOD. Now, Mr. Chairman, our friends on that side of the House may not accept Democratic authority, but there are certain great merchants in this country whose standing in the Republican Party as politicians and whose standing before the country as business men can not be questioned. hold in my hand a speech delivered by Mr. John Wanamaker before the president, directors, and members of the Union League

in Philadelphia on January 1, 1914. By leave of the House I will insert the entire speech in the RECORD, and I call particular attention to the concluding sentence for the benefit of the gentlemen on that side, and especially for the benefit of some gentlemen from Pennsylvania who are crying "Panic" and proclaiming that there will be hard times for the people of America. Here is what Mr. Wanamaker says:

America. Here is what Mr. Wanamaker says:

It affords me great pleasure to meet the president, directors, and members of the old historic Union League of Philadelphia on New Year's Day and to speak to you not only in terms of the compliments of the season, but to discuss for a few minutes, as requested by some of your members, the serious and practical conditions that face the Nation at the outset of this new year.

Mr. President, directors, and members of the Union League, nowhere else in the United States is there any organization of 2,000 men so thoroughly representative of the active, influential citizenship of our country. From a business point of view, a part of your large membership covers with a complete network manufacturing interests of this oldest leading manufacturing center of the United States.

I do not presume to speak to you as a manufacturer, but no other class of men is as closely allied to the user of raw materials who produces merchandise as the commercial men, of whom I am one.

I have long been of the opinion that the rock-bottom foundation of business presperity is the manufacturer, coupled with the distributer of the manufactured articles. Neither ships, railroads, nor banking can play much, if any, paying game in any country during the chill silences of mill wheels and forge hammers.

Naturally, a change of a long-established tariff has a disturbing influence.

Who is to blame for this?

Naturally, a change of a single influence.

Who is to blame for this?

The Republican Party, long in power, had full notice far back of the unrest of the people with a tariff unnecessarily high in spots. That party was deaf, dumb, and blind to the widespread evidences of a determination to enferce changes in the tariff corresponding to the improved machinery and greater skill of American workmen.

Personally I argued, while in the Cabinet of President Harrison, for a moderated tariff—I may say an equalizing tariff—along the line of the views of Samuel J. Randall, well-known Pennsylvania Democrat and Congressman.

I felt it my duty as a Pennsylvanian to present the same views at a

Personally I argued, while in the Cabinet of President Harrison, for a moderated tariff.—I may say an equalizing tariff.—along the line of the views of Samuel J. Randall, well-known Pennsylvania Democrat and Congressman.

I felt it my duty as a Pennsylvanian to present the same views at a conference upon the tariff plank of the platform in Chicago at the last Republican convention.

The day of judgment came to the Republican Party in November, 1912. Good Republicans, worn out by broken pledges, resolved to punish their party's deaf, dumb, and blind leadership. They united against radicalism and deliberately joined forces with the Democratic brethren in turning over the National Government to Woodrow Wilson, who took office pledged distinctly to two objects of profound interest to the business world:

1. A lowered tariff.

2. A revisal of the monetary law, to improve the old banking act of Civil War time.

In less than one year both these great undertakings have been accomplished. All honor to the persistent President and the Democratic statesmen who have made their word good!

It is quite too early to pass judgment with any certainty on either of these laws. Neither manufacturers nor bankers have as yet crystallized their views.

Speaking for myself alone, the Woodrow Wilson tariff bill of 1913 is a far better bill than either of the Grover Cleveland bills. It is a much better bill than I expected, and I believe it possible for the manufacturers to adjust themselves to the changed conditions in at least two-thirds of the items in the new schedules.

I do not think that the changes in the tariff schedules have thus far affected business seriously. The manufacturers have free wool, which will help them to some extent. Some of the manufacturers will drop certain classes of goods and turn their machinery in other directions.

There has been considerable sacrificing of stocks in first hands, largely because of financial needs not met by banking facilities. On the whole, trade and commerce are in a fairly healthy con

corporations operating inder the Sherman Act have done much toward restoring confidence. There is not much more room for shrinkages of values.

The recent failures are not an index of general trade conditions. That a period of greater economy has set in in many directions is clearly manifest, attributable, it is believed, to the income tax, which has reduced the spending money and worked some hardships to hundreds of thousands of people whose living is thereby affected, especially such as are under salaries.

The question arises, if industries and active labor are to be taxed, whether it would not be fair to tax the idle and nonproducing classes. The crux of existing business conditions is to be found in the monetary legislation.

Congress and the President have ordained a new system of finance. The measure is complex and almost beyond the comprehension of an ordinary layman or trader who has not studied finance.

I have never believed that it was a proper function or prerogative of any Government to conduct a banking business, directly or indirectly, except in time of war.

Banking is a science and requires men with years of special training and expert knowledge. Many of the banks that have not succeeded in this and other countries have been managed by speculators and inexperienced bankers. There are large central banks in foreign countries that are successful, but they are not managed by the Government. Their directing forces are the bankers and merchants.

The Bank of England, the Bank of Reichbank, and the Bank of Netherlands (which is probably the best organized central bank, though not as large as others in Europe to-day) are not in any way supervised by their respective Governments.

Credit and banking are the two most sensitive and delicate engines of commerce, and the placing of the management of the affairs of a hank or banks affecting credit (as is provided in the Glass-Owen bill) largely in the hands of Government officials, no matter how upright and conscientious they may be, is experimental, dange

Now that the bill is a law there is nothing to be gained by pulling it to pieces. The bill, as passed, is a vast improvement upon the original bill. I believe it workable, but not by amateurs. I do not believe that as much power is given to any other Government board as there in this new bill for the administration of the finances of the 96,000,000 of our people.

A stupendous responsibility rests upon the President in selecting men for the Federal reserve banks, in addition to the two ex officio members, the Secretary of the Treasury and the Comptroller of the Currency. They must be men of much more standing than retired millionaires—men of not only high character, broad knowledge of affairs, and specially of banking, commerce, and the ever-changing conditions of business.

men of not only nign character, broad knowledge of altairs, and specially of banking, commerce, and the ever-changing conditions of business.

They should be men commanding not only the confidence of our own countrymen but of the banking and business world abroad. The cables and fast ships have tied all the countries close together.

The tremendous power and responsibility resting in this board will enable it to hold in its hands the weal or woe of the American people, and therefore it must be kept absolutely free from the slightest taint of politics of any kind, good or bad.

The safety of business depends wholly upon the working out of this bill in guarding the reserves of the commercial banks of the country. Much patience and assistance must be afforded by the public.

The least that every good citizen and the publishers of newspapers can do is to abstain from criticism and partisanship in discussing a bill enacted in good faith after long study by many capable men.

To get it into successful operation is the paramount duty, and the President and his official staff should not be hindered by the chatter of ignorance or by the constitutional whiners or whimperers nor by political or polemic slanderers.

It takes time for everybody to get accustomed to write the new figures of the new year in dating their letters and their checks, and it will take considerable time to safely change over the monetary affairs of a great Nation.

The man who sees nothing but disaster ahead is not a true American. If he brings a fresh bushel of doubts every morning, he is a postilence maker. For myself, I am free to say that I will put such a man outside of my door to carry his infection to the winds. The breeders of panic ought to be deported.

I have no fear of any serious unsettlement of business or of any long disturbance of prosperity.

In a word, we have lots of room in this country for courage, energy, and enterprise, but there is no room or reason for a panic. What the President wants and the country wants are mem—strong me

and broad visioned, able men to help him the way.

The motto for the new year is "Don't be blue."

If you and I are not blue, we can not make another man blue. This country is too large and strong and so wondrously wealthy that its citizens may safely write in their new year's resolution this year that there shall be no business panic in 1914.

[Applause on the Democratic side.]

Now, that statement comes from a man who was Postmaster General of the United States under a Republican administration, a man whose Republican faith can not be doubted by anyone, a man whose great business interests bring him in intimate

contact with the great heartbeat of the American people.

Mr. PAYNE. Will the gentleman allow me to ask him if it brings him into intimate contact with the customs frauds of the

Mr. UNDERWOOD. I can not yield. I did not intend to reflect on a Republican administration in reference to those matters, but if the gentleman from New York [Mr. PAYNE] desires to do so I will allow it to stand in the RECORD.

Now, Mr. Chairman, I say to these birds of ill omen who want to preach disaster and ruin to the American people, hoping that it may bring their party back into power, there is no such condition existing in America to-day as the conditions that existed in 1907. This country, of necessity, will pass through eras of great prosperity and will pass through eras of industrial depression. The industrial depression from which we are emerging to-day is not a matter that was born within the administration of Woodrow Wilson. The industrial depression from which we have been suffering has existed for more than a year. It existed before the last presidential election; but the passage of a tariff bill on a safe and sound basis, a tariff bill that works justice to the American consumer and yet at the same time does not destroy any great industry in this country, will bring about an era of great industry and plenty in the country. Knowing that this question of tariff taxation shall not longer be a football of politics, that business interests will adjust themselves to the new conditions, and that the currency bill will supply the immediate money to carry on their business, I predict that before the coming elections next fall there will be an awakening of the great business interests of this country that will put the croakers who preach hard times and bad business to shame, and will be such a revival that the whole country will approve of the action of this administration. [Loud applause on the Democratic side.]

The CHAIRMAN. The time of the gentleman has expired,

and all time has expired.

Mr. LANGLEY. Mr. Chairman, the Clerk was cut off from finishing the reading of the article in my time, and I ask unanimous consent to extend my remarks in the Record.

The CHAIRMAN. The gentleman from Kentucky asks unanimous consents.

imous consent to extend his remarks in the RECORD. Is there objection?

There was no objection. Mr. JOHNSON of Washington. Mr. Chairman, I ask unani-

mous consent to extend my remarks in the Record.

The CHAIRMAN. The gentleman from Washington asks unanimous consent to extend his remarks in the Record. Is there objection?

There was no objection.

Mr. GREEN of Iowa. Mr. Chairman, I ask unanimous con-

sent to extend my remarks in the Record.

The CHAIRMAN. The gentleman from Iowa asks unanimous consent to extend his remarks in the RECORD. Is there objec-

Mr. REILLY of Connecticut. Mr. Chairman, I ask unanimous consent to extend my remarks in the Record.

The CHAIRMAN. The gentleman from Connecticut asks

unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. MADDEN. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD on the subject under discus-

The CHAIRMAN. The gentleman from Illinois asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. UNDERWOOD. . Mr. Chairman, I move that the committee do now rise and report the resolution to the House with the recommendation that it do pass.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. Houston, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration House resolution 340, and had instructed him to report the same back to the House with the recommendation that it do pass.

The SPEAKER. The question is on the passage of the reso-

lution.

The question was taken, and the resolution was agreed to.

VOCATIONAL EDUCATION.

Mr. HUGHES of Georgia. Mr. Speaker, I ask unanimous consent to call up the Senate joint resolution No. 5.

The SPEAKER. The gentleman from Georgia asks unani-

mous consent to call up Senate joint resolution No. 5.

Mr. PAYNE. Reserving the right to object, Mr. Speaker, I would like to ask the gentleman from Georgia if he wishes to do anything more than to debate the proposition this afternoon.

Mr. HUGHES of Georgia. I will say to the gentleman that general debate has been concluded and the resolution will be before the committee under the five-minute rule.

Mr. STAFFORD. Mr. Speaker, I understand that no agreement was made as to the conclusion of general debate.

Mr. HUGHES of Georgia. The gentleman from Wisconsin is mistaken. The RECORD of December 11 will show this:

The CHAIRMAN. No one else desiring to participate in general debate, the Clerk will read the bill for amendment.

The Clerk read the bill, as follows:

Mr. MONDELL. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. MONDELL. Is not the Senate joint resolution the unfinished business now before the House?

The SPEAKER. It is not.

Mr. PAYNE. I make no objection to calling it up if that is what the gentleman is after.

The SPEAKER. Of course, in one sense it is unfinished business, but not in the technical sense that it is privileged.

Mr. MONDELL. That is true, Mr. Speaker, but nothing else before the House has any privilege at this time.

The SPEAKER. If the previous question had been ordered on this or any other proposition it would have the right to be

taken up then and there, unless the House adjourns.

Mr. UNDERWOOD. Mr. Speaker, I understand this resolution went over in the usual course and can only be reached by a motion after one hour has been consumed in the call of committees or by unanimous consent, and the gentleman from Georgia has asked unanimous consent to take it up.

Mr. HUGHES of Georgia. Mr. Speaker, I hope there will be no objection raised. The resolution has been thoroughly dis-

The SPEAKER. In order to refresh the memory of Members, the Chair will state that there are two calls of committees, one on Wednesday, when you can take up bills from either calendar, and the other the ordinary call, when you have got through with the business on the Speaker's table, and on that call you can take up only bills on the House Calendar. This Senate joint resolution No. 5 is on the Union Calendar. The only way the gentleman from Georgia [Mr. Hughes] can get it up, except by unanimous consent, as the gentleman from Alabama [Mr. Underwood] stated, is to wait until this call has proceeded 60 minutes or is exhausted, and then move to go into Committee of the Whole.

Mr. MONDELL. Mr. Speaker, reserving the right to object, I have no opposition to the consideration of the resolution. I simply made my parliamentary inquiry because I was of the opinion, and I am still of the opinion, that under the rules this is the unfinished business which comes before the calling of the committees, and therefore it is the business before the House, because there is no other privileged business before the House. I have no objection to having it come up in this way, however. The SPEAKER. Is there objection? [After a pause.] The

Chair hears none.

Mr. HUGHES of Georgia. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the purpose of further considering Senate joint resolution 5, providing for the appointment of a commission to consider the needs and report a plan for national aid to vocational education.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the further consideration of Senate joint resolution 5, with Mr. Moon in the chair.

The CHAIRMAN. The first section of the resolution having

been read, it is open for amendment.

Mr. HUGHES of Georgia. Mr. Chairman, I send to the Clerk's desk an amendment which is unanimously offered by the committee.

Mr. STAFFORD. Mr. Chairman, should not he resolution be

The CHAIRMAN. The Chair has already strted that the first section of the resolution has already been read for amend-Amendments are in order to that section at this time. The Clerk will report the committee amendments.

The Clerk read as follows:

Page 1, line 4, after the word "nine," strike out the worl "men."

The CHAIRMAN. The question is on agreeing to the amend-

The amendment was agreed to.

The Clerk read 23 follows:

Page 1, lines 5 and 6, strike out the words "not later than."

The CHAIRMAN. The question is on agreeing to the amend-

The amendment was agreed to.

The Clerk read as follows:

Page 1, line 6, after the word "next," insert "or as soon thereafter as practicable."

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was agreed to.

The CHAIRMAN. The Clerk will now report the amendment just sent to the desk by the gentleman from Georgia.

The Clerk read as follows:

The Clerk read as follows:

Amend paragraph 1 by striking out the word "men," after the word "nine," in line 4, and beginning after the words "to consider the," in line 5, strike out the remainder of line 5 and the words "than December," in line 6, and substitute in lieu thereof the following: "Subject of national aid for vocational education and report their findings and recommendations April"; and in line 6, beginning after "first next," strike out the remainder of the line and all of line 7 and substitute in lieu thereof the following: "Or as soon thereafter as practicable," so that the first paragraph as amended will read:

"Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the President of the United States is hereby authorized to appoint a commission consisting of nine, whose duty it shall be to consider the subject of national aid for vocational education and report their findings and recommendations April 1 next, or as soon thereafter as practicable."

The CHAIRMAN. The question is on agreeing to the amend-

The CHAIRMAN. The question is on agreeing to the amend-

Mr. MADDEN. Mr. Chairman, I am opposed to the amendment as it now reads, or to that part of the amendment which makes indefinite the time when the commission shall report. The amendment sets forth the statement that they are required

tend the time by saying, "Or as soon thereafter as practicable." That means that nobody on earth can tell when the report will be submitted. If there is to be any advantage in any report made by the commission to be appointed by the President, that advantage ought to be obtainable at the earliest date possible. If it is believed by the committee recommending the adoption of this resolution that it is possible to report by the 1st of April, why not say so? There is plenty of opportunity to get all the information they need between now and the 1st of April. I believe we could get just as good results from the Committee on Education without the expenditure of any money whatever as we can get through a commission to be appointed by the President, and the expenditure of \$15,000, which this resolution provides for. But if it is believed by the House to be wise to pass such a resolution as this and to have the information placed in the possession of the House which it is believed such a commission can obtain, I think we ought to have it as soon as possible. I therefore move to amend the amendment by striking out the words "or as soon thereafter as practicable.

Mr. TOWNSEND. Will the gentleman from Illinois yield?

Mr. MADDEN. Surely.

Mr. TOWNSEND. I want to ask the gentleman from Illinois if he knows that several of the House committees have given hearings on this subject, either the Committee on Education or the Committee on Agriculture?

Mr. MADDEN. I understand the Committee on Education has had the matter under consideration and that they have taken a lot of testimony, which if properly compiled and re-ported would give all the information which this commission when appointed will be able to give.

Mr. TOWNSEND. And is it not a fact that the provision in the Lever bill of last year regarding vocational education was based upon information secured by those hearings to which the gentleman refers?

Mr. MADDEN. Certainly; of course. Mr. Chairman, I move to strike out the words "as soon thereafter as possible."

Mr. HUGHES of Georgia. Mr. Chairman, I wish to say to the gentleman it is the purpose of the Committee on Education to reach that and reach a report at the very earliest possible moment, but we believed the limit of time should be placed in April next or as soon thereafter as possible. My opinion and the opinion of that committee is that when that commission is appointed they will make the report at the very earliest possible moment, but I do not believe that we ought to confine it to very short time, because they may not be able to complete it.

Mr. MADDEN. Well, let us have some definite time. Mr. HUGHES of Georgia. We have the definite time fixed at the 1st of April next, and if it is absolutely impossible to complete it in that time they are to report as soon thereafter as pos-

Mr. MADDEN. But the gentleman admits that although he believes the report should be made by the 1st of April, that there is a bare possibility it will not be, and so the provision for an indefinite extension of time. "As soon thereafter as possi-ble" might be 2 years or it might be 10.

Mr. HUGHES of Georgia. What time would the gentleman

Mr. MADDEN. I would make it between the 1st and the 30th of April—say, not later than the 30th of April.
Mr. HUGHES of Georgia. The gentleman would make the

limit the 30th of April?

Mr. MADDEN. As soon thereafter as possible, but not later

than April 30.

Mr. HUGHES of Georgia. I will say this, without consulting the committee, we are anxious to conclude this at the earliest possible moment, and I apprehend it could be concluded June 1.

Mr. MADDEN. Well, make it not later than the 1st of next

July, but let us have it definite.

Mr. HUGHES of Georgia. That might carry it over.

Mr. MADDEN. Let us have the life of the commission fixed, so that they can not continue on forever.

Mr. HUGHES of Georgia. I think I can say, on behalf of the committee, we can accept June I.

Mr. MADDEN. If the gentleman will offer that amendment, I will be glad to support the resolution; otherwise I can not do it.

Mr. DAVIS. Mr. Chairman, I desire to be heard for a few moments, not to exceed five minutes, and that is particularly in regard to the several hearings that have been had and the information that is now before the country concerning vocational education. Seven or eight years ago I believe I was a pioneer on the subject of vocational industrial education, having introduced a bill along that line, I think, in the year to report by the 1st of next April, and then it goes on to ex- 1905. Hearings were not obtained before the committee for

several years, although the subject was pretty generally discussed in every State in the Upion. I myself perhaps have spoken in 12 or 15 States on the subject. Thereafter, year after year, the same bill, which is really the Page bill in the Senate, was introduced and laid before the Committee on Agriculture. Repeated attempts were made by me to have hearings, and I think during the year 1909 or 1910 a hearing of one day was granted, and now the hearings are contained in a pamphlet of perhaps 30 or 40 pages. Following that, the same bill in substance was introduced by Senator Dolliver in the Senate. It was then called the Dolliver-Davis or Davis-Dolliver bill, and extensive hearings were had in the Senate extending several weeks. I myself was present at some of those hearings. The bill was on the verge, so to speak, of passage when Senator Dolliver died. The matter then rested in abeyance for a year, or until Senator Page took the matter up in the Senate, and I am informed that quite extensive hearings were had along this general line.

Mr. Chairman, those bills cover the entire subject of vocational education, including the substance of the particular bill of

my friend from South Carolina [Mr. LEVER].

Now, Mr. Chairman, I believe that this is one of the most important subjects pending before the American people, and one in which they are more interested, or as much interested, as any subject that now engrosses the attention of this Congress. The press and the people of each State of the Union are alive to the necessity of having some system of vocational education, and they know the kind and character needed.

It is now only a question of putting a bill into proper form for adoption by the two branches of Congress. I believe that the Committee on Education, aided by those hearings, have the knowledge requisite to formulate a bill that should pass the Congress, and I believe would pass quickly if presented.

I agree with the gentleman from Illinois [Mr. MADDEN] that there ought to be a time limit set for report of the proposed commission, and that as soon as possible. I believe that the 1st of next April is time enough, and if that is not time enough then make it May. The gentleman from Illinois [Mr. MADDEN] now informs me that an agreement is had making it the 1st of June. I certainly will agree to that, but wish it was sooner. I would prefer if it were the 1st of May or the 1st of April, as the resolution now fixes it.

Mr. HUGHES of Georgia. We accept the amendment of the gentleman by striking out "April" and making it "June."

The CHAIRMAN. Does the gentleman from Illinois [Mr.

MADDEN] change his amendment?

Mr. MADDEN. Yes. Strike out the word "April" and substitute the word "June" and the words "or as soon thereafter as practicable."

Mr. HUGHES of Georgia. Strike that out?

Mr. MADDEN. Yes; strike that out.

The CHAIRMAN. The question is on agreeing to the amendment to the amendment.

The amendment to the amendment was agreed to.

Mr. STAFFORD. Mr. Chairman, let the paragraph be read. The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Strike out all of lines 3, 4, 5, 6, and 7, on page 1, and insert in lieu thereof the following: "That the President of the United States is hereby authorized to appoint a commission consisting of nine, whose duty it shall be to consider the subject of national aid to vocational education, and report their findings and recommendations June 1 next,"

It should be "not later than" June 1.

Mr. HUGHES of Georgia. Yes; "not later than." Mr. DAVIS. Would it not be advisable to say "not later than on or before"

Mr. MADDEN. Mr. Chairman, I move to amend by inserting the words "not later than."

The CHAIRMAN. The question is on agreeing to the amend-

ment to the amendment.

The amendment to the amendment was agreed to.

The CHAIRMAN. The question is on agreeing to the amendment as amended.

The amendment as amended was agreed to.
Mr. SMITH of Minnesota. Mr. Chairman, I have an amendment which I wish to offer.

The CHAIRMAN. The gentleman from Minnesota offers an amendment, which the Clerk will report.

The Clerk read as follows:

Strike out all after the resolving clause and insert in lieu thereof

Strike out an arter the teaching the following:

"That a joint committee shall be appointed, composed of three Members of the Senate, to be designated by the chairman of the Senate Committee on Education and Labor, and three Members of the House, to be designated by the chairman of the House Committee on Education, to make inquiry into the subject of Federal aid in vocational education, and report not later than June 1, 1914; and for this purpose

they are authorized, by subcommittee or otherwise, to sit during the sessions of or recess of Congress as such times and places as they may deem advisable, to send for persons and papers, to administer oaths, to summon and compel the attendance of witnesses, and to employ such clerical, expert, and stenographic assistance as shall be necessary; and to pay the necessary expenses of such inquiry there is hereby appropriated, out of any money in the Treasury not otherwise appropriated, the sum of \$15,000, or so much thereof as may be necessary, to be paid out upon the audit and order of the chairman or acting chairman of said committees."

Mr. SMITH of Minnesota. Mr. Chairman, I very much dis-like to take issue with the Committee on Education of this We all know that we have an excellent committee. believe it could not be surpassed. But, notwithstanding that, I do not think we should let the committee dictate to the House

the policy that the House should pursue.

If the amendment I have offered does not embody what the House thinks ought to be done, why, certainly, the Members will vote it down. But I believe it is in accord with the wishes of the Members of this body. I believe we have had enough com-missions appointed for one session of Congress, or at least for a time. I think it is time that the 435 Members of this House should divide into committees and get first-hand information on vital questions.

I am in favor of vocational education as much as any member of the committee, but I am of the opinion that it is the com-

mittee's work to make the necessary investigations.

Gentlemen, what will be the result of the report of this special commission, if it is appointed? Nothing more than this: If the report is generally approved by the Committee on Education, a bill will be drawn without giving that report any serious consideration; but if the report happens not to meet the wishes and the consensus of opinion of that committee, the report will be set aside and the Committee on Education will draw its own bill and bring it before this House. In either case the report will be disregarded and the bill will be drawn by the committee, and the committee will be better prepared to draw a bill when in possession of facts obtained by themselves. Why should not the investigation be made by the committee, composed of the men whose duty it is to inform themselves as to the necessity for and requisites of this kind of legislation? I feel that there is a principle involved and that the principle is greater than the report of the Committee on Education.

My contention, based on previous reports of commissions and the common experience of this House, is that the report of any commission that may be appointed will not be worth the paper on which it is written, be it either what the Committee on Education think is wise or what the committee think is unwise. The committee will give it no consideration in either case.

Mr. TOWNER. Mr. Chairman, I am very sure that the committee has no desire to dictate to this House what it shall do in regard to this matter. I desire to call the attention of the House to the fact that this resolution did not originate with the House. It comes to us from the Senate, and it comes to us with a unanimous report of the committee. It received the unanimous action of the United States Senate. It comes to us as the result of conference between those men who for years have had under consideration the subject of vocational educa-It comes to us with the belief on their part that only in this way can we make real progress in the direction in which we are all agreed we ought to go.

I am very grateful, indeed, for the compliment that has been paid the committee; but, gentlemen, we might just as well face these facts as they exist. It is utterly impossible for this committee to take the time during this busy session of Congress to hear the evidence that will be submitted. It is absolutely impossible for this committee to go into hearings that will last from now until the 1st of June, perhaps.

Mr. ANDERSON. If the committee has not the time to consider this evidence, I should like to know what it wants to get

it for.

Mr. TOWNER. For your benefit and for ours. man knows the great difference in the time required to hear evidence and to read it after it has been taken. It takes only one-fourth or one-tenth of the time to give consideration to the printed hearings that it does to hear the evidence.

Mr. BUCHANAN of Illinois. Does the gentleman think this committee could employ experts to secure this information as

well as the commission could? Mr. TOWNER. I do not think so.

Mr. BUCHANAN of Illinois. And will not the commission

use this \$15,000 for that purpose?

Mr. TOWNER. I do not think so. If the President of the United States selects, as he will, men who are experts in this line of educational work, and if they have these hearings and then make their recommendation to the House and to the Senate, I am quite sure that that will have very much more effect and be of very much greater value than it otherwise

Mr. SMITH of Minnesota. Is it not true that this committee could bring before it these gentlemen who are experts on this question and get the benefit of their knowledge without delegating that duty to somebody else?

Mr. TOWNER. I think so, if they could get the time to give to it, and if we could get the cooperation that we desire.

But let me call your attention again, gentlemen, to the fact that if we really want to get this legislation through we must consult not only our own desires, but the desires of gentlemen at the other end of the Capitol. They desire this commission. Now, is it such an unreasonable thing, is it such an extortionate amount to ask, that we give \$15,000 to defray the expense of a commission to consider this matter and to report? Gentlemen say we have had enough commissions, but I suggest that if there ever was a commission whose appointment could be justified this commission ought to be appointed, especially in view of the fact that this matter has made more progress during the last five years than in the hundred years that preceded it.

ought to have the benefit of this knowledge.

Mr. DAVIS. Does the gentleman know, or does he not know, that if the Committee on Education were simply to announce in one newspaper in every State in the Union that at a certain time and place they would hold hearings upon this subject nearly every leading educational man in the United States would willingly come before that committee without any expense whatever to the committee and be only too anxious and glad to do it voluntarily? If the Committee on Education is too busy, then perhaps a commission could take up the task; but what little experience I have had, extending over five or six years, has shown me that educational men of all branches are only too anxious to Twenty-five or thirty of them came from many States of the Union, some clear from the Pacific coast, upon a simple request from me to appear before the Agricultural Committee at a certain time and express their views. They came without one dollar of expense to us. All the expense that will be required will be for the services of a shorthand reporter. You will get information galore if you announce that your committee will have a hearing, and in less than a week you can get all the added information you need to formulate a bill that will be satisfactory to the people of the United States.

Mr. TOWNER. I agree with the gentleman that we could get

the information, and so can the commission.

Mr. TOWNSEND. I wanted to ask the gentleman if it has not been called to his attention that there is a very rich and informative library on this subject; if it is not a fact that since vocational education was introduced into Germany by Bismarck there has grown up each year a greater number of highly scientific and informing books, pamphlets, and magazine articles upon this subject which are available to every Member of Congress, and especially, of course, to the very learned and laborious committeemen whom we would like to have present to us their views upon this subject?

Mr. TOWNER. I agree with the gentleman and say "yes" to his inquiry. There has grown up, especially within the last few years, a large accumulation of knowledge on that subject, and I think it would be very much better for us if we were presented a digest of it, with recommendations in regard to it

through a commission, than through the committee.

Mr. BUCHANAN of Illinois. Will the gentleman yield?

Mr. TOWNER. Certainly.

Mr. BUCHANAN of Illinois. In regard to the expenditure of the money, as I understand, this committee is to be appointed, and will not receive any compensation?

Mr. TOWNER. They are not to receive anything except for

Mr. BUCHANAN of Illinois. Then the only money they would expend would be for the employment of experts, and so The thought that occurred to me was why is it that the committee of this House and the Senate committee could not

employ these experts as well as a commission?

Mr. TOWNER. They certainly could, but the same expense would be incurred in either event. The gentleman's amendment appropriates \$15,000 for that purpose, and it will make no difference whether it is expended by a commission or the committee. We think it will be better used if the commission uses it than if the committee uses it. Mr. Chairman, let me again say that we do not really have any pride, so far as the com-mittee is concerned, in this resolution. It is not our own; we only recommend you to pass it because we believe it will further the cause of vocational education. We ask you to pass the resolution because we honestly believe, after careful consideration of all the elements-and they are diverse and complicated—that this is the best method to secure speedy informa-

tion and action on this great subject. We think we can bring this about better and can more intelligently act upon the matter if this is done. If we did not think so we would not make the recommendation. It is, of course, possible that we are mis-We want to do what is best, and we think that this is Gentlemen can form their own conclusion as to whether we are right in our conclusions, but in conference with those who favor the resolution, in conference with those of another body who will have to consider it, in conference with those who have had this subject under consideration and given the most thought to it, we agree that this is the best thing to do. educators of the United States agree that this is the best thing to do. If Congress thinks otherwise, it will act on its judgment, and I believe it will be a wise conclusion; but at this the committee believes honestly and candidly that we ought to pass this resolution now and get this matter settled.

Mr. COX and Mr. POWERS rose.

Mr. Cox was recognized.

Mr. POWERS. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. POWERS. I am a member of the Committee on Education, and I wish to know whether or not I have not the preference in recognition?

The CHAIRMAN. The Chair thinks not under the five-

minute rule.

Mr. COX. Mr. Chairman, a great deal has been said on this resolution from the time it was reported. I do not know that can enlighten any member of the committee on the subject. I can only frankly speak my views on it; and whatever I say

upon the subject, I am conscientious in what I say.

As a rule, I am unalterably opposed to commissions. In my judgment, ninety times out of every hundred when you see Congress creating a commission, it is nothing in the world but a plea of confession and avoidance-a confession that something is wrong and a postponement of the day of reckoning, a plea on our part that we are unable to deal with the situation. A great deal has been said about members of this Committee on Education, and I sincerely believe that too much can not be said in their behalf. If I understand its make-up, it is composed of two as able, learned, intelligent, upright men as walk this earth, one from Alabama and the other from Ohio; and there sits as a Member of this Congress another professor from the State of Ohio. Has it come to pass that these men, presidents of colleges, are unable to come upon the floor of the House, come from the committee room, and tell us what kind of a bill Congress ought to pass? What power is there behind this bill? Why, the gentleman from Minnesota well expressed it, in my judgment. If there be a universal desire all over this country for this kind of legislation, throw the doors of your Committee on Education open and invite these men to come in and discuss the question. That is the way the tariff bills are made up-simply a notice served throughout the papers of the country giving men the right to come and discuss the question before the committee. It is the way legislation is framed in committee rooms. When men are interested, they will come before the committee and discuss it in the committee room. What power is behind this legislation? I want to call the attention of this committee to one or two words of this proposed amendment. What are they? In it occurs the word "recommendation." What significance does that word carry? Why do they want a recommendation from this select committee? I might be wrong in my surmises, but, in my judgment and belief, I can see in that word and in that phrase the real downright reason of why they are so insistent on passing this resolution.

The proposition now embraced in this resolution is to have the President appoint nine persons. The moment the President of the United States appoints them, when their recommendation comes before the Congress of the United States, it comes bearing in a measure the stamp of approval of the President of the United States. Is that the reason why you want a recommendation to get the authority and power of the President of the United States to force down the throats of the Members of this

House a measure whether we approve it or not?

Mr. FESS. Mr. Chairman, will the gentleman yield? Mr. COX. For a question only.

Mr. FESS. Is the gentleman afraid to receive the recommendation of President Wilson on a measure of this sort?

Mr. COX. I am not; and I would not propose to be bound by his recommendation on a question of this kind at all, because I believe it is a question that the membership of this House is capable of solving. It is not so much the question of the dollars and cents involved that I object to, but it is the principle involved in it. Since my membership of this House, now covering a period of seven years, I am able to lay my hand upon only one commission which, in my judgment,

has brought any facts or figures to light, and that was the commission which worked out the workmen's compensation bill. a totally new measure in this country. Every other commission that I know anything about has, in my judgment, never paid five cents on the dollar for the money invested in it. Throw open the doors of your Committee on Education, invite these educators here, and let them tell the committee what kind of legislation they think is needed in this country. Frame up your bill and bring it on the floor of the House.

The CHAIRMAN. The time of the gentleman from Indiana

has expired.

Mr. COX. Mr. Chairman, I ask unanimous consent for two minutes, in order that I may have read an editorial as a part of my remarks

The CHAIRMAN. Debate on this amendment has been ex-

hausted.

Mr. COX. Mr. Chairman, I ask unanimous consent that de-

bate may be continued for two minutes.

The CHAIRMAN. The gentleman from Indiana asks unanimous consent that debate on this amendment shall be continued for two minutes. Is there objection?

There was no objection.

Mr. COX. Mr. Chairman, I ask to have read as a part of my remarks the following editorial taken from the Marion (Ohio) Star of December 16, 1913, a Republican newspaper, owned by Gen. Warren E. Harding, which I send to the desk and ask to have read.

The Clerk read as follows:

CRITICIZING THE COMMISSIONS.

CRITICIZING THE COMMISSIONS.

We incline to appland Congressman Sherwood's assault on congressional commissions, and legislative commissions as well. The commission business has been overdone. Some are helpful, of course. Many of them are makeshifts, through which to postpone embarrassing questions. Still others are what may be termed legislative joy rides. Our Ohio commission to investigate agricultural conditions abroad was one of the last-named class. It was a fine thing for the fellows sent to Europe at the public expense, but gives nothing to the public in return. Gen. Sherwood made a good point when, commenting on the Immigration Commission's expense account for carriage hire to the catacombs near Rome, he inquired: "Did we expect any immigrants from these subterranean caverns that have been silent in death for 1,000 years?"

Gen. Sherwood pointed out several such ridiculous charges in the expense accounts of this commission, which seemed unusually frank in itemizing its bills, though this is not the rule. Usually the irregular and unnecessary expenses are cloaked under charges more satisfying to the public eye, in case the public ever sees. However, the chief objection is that they never accomplish anything of value. We have had commission after commission, here in Ohio, at enormous expense, and rarely has any of them proven worth while.

The assault of Gen. Sherwood was inspired by Congressman Fess's proposal of a commission to investigate vocational education. This is hardly a Federal matter. The public schools are home institutions. Vocational training is available wherever the people are willing to pay therefor. We can have it in Ohio. Its value is not to be disputed. The problem lies in its expense, which is something the Federal Congress can not well determine.

Mr. COX. The above editorial was written by the Hon. Warren Hersilver.

Mr. COX. The above editorial was written by the Hon. Warren Harding, Republican candidate for governor of Ohio in 1910. Every word contained in it is gospel truth. The real question of vocational education is not at issue in this resolution; not at all. The sole and only question at issue in it is to spend and squander \$15,000 of the people's money—and what for? To gain any new facts or new knowledge which can not be gained by a study of the question in books to be found in the Congressional Library? No. Is the Committee on Education willing to accept any measure which may be recommended by nine theoretical persons who may be appointed for the purpose of studying the question? I hope not. To abdicate their prov-ince and yield their opinions on this subject would be to abandon all principles of legislation,

The whole matter involved is to settle a controversy between two gentlemen at the other end of this Capitol and to settle it at the expense of the public; and when we get the report and the recommendation of these nine wise men, are we prepared to accept it? I hope not. The theory of it is wrong, and

it ought not to pass.

Mr. POWERS. Mr. Chairman, the gentleman from Indiana [Mr. Cox], in a very vehement speech, a few moments ago in-quired what is behind this effort on the part of the Educational Committee of this House to postpone legislation on this important question. I do not know what the gentleman means to imply by that question. I can tell him, however, what is behind the action of this committee. The thing behind the action of this committee in submitting this resolution is an effort, if possible, to get sufficient facts upon which to frame the best character legislation possible on the question of vocational education. That is the only thing that is behind the resolution—seeking more time in which to frame a bill to present to this House. Another distinguished gentleman, the gentleman from Minnesota [Mr. Smith], says that this committee is trying to cram this resolution down the throat of this House. In reply to that statement I desire to state that this committee is not trying to

cram this resolution down the throat of this House. The committee is doing what, in its judgment, ought to be done. We believe that this is the best way to secure legislation on this important question. We are submitting this resolution to the judgment of this House, and we are willing to abide by the We are submitting this resolution to the judgment of this House. If this House is of opinion that the resolution is unwise and ought not to pass and that the matter ought to be referred back to the Committee on Education for further reflection and further consideration, then the committee will bow to the wisdom of this body on that question. It is not our purpose to try to cram anything down the throat of this House.

Another distinguished gentleman from Minnesota [Mr. Davis] said a few moments ago that there was no necessity to postpone legislation on this question; that the matter has been up for years; that hearings have been had; that the people of the country were fully advised upon the character of legislation that it wanted. I desire to say in response to that that two distinguished Members of the body at the other end of the Capitol, after many years of consideration and after long hearings, presented to that body two educational bills which are essentially different. They were unable to come to any conclusion as to what was the proper kind of bill to pass, one being a Democratic Member of the Senate, Mr. SMTH, and the other a Republican Member, Mr. Page, the authors, respectively, of those Those two men came before the Committee on Education of this House and urged the passage of this resolution, making known the fact that they were unable to agree upon the character of legislation that ought to be adopted; that the Senate had not been able to solve the question; that it did not have facts sufficient on which to base wise legislation; and both of these men urged the passage of this resolution by this body.

I want to say that this Committee on Education stands unanimously together on this resolution. There is not a single dissenting voice

Mr. SMITH of Minnesota. Mr. Chairman, will the gentle-

man yield?

Mr. POWERS. I yield with pleasure.

Mr. SMITH of Minnesota. I wish to know if there are any facts that a committee appointed by this House can not get that a committee appointed by the President could get?

Mr. POWERS. If the Committee on Education had nothing else to do except to hold hearings and devote for months our entire time to this matter, we could possibly solve it, at least to our own satisfaction, but it is impossible to do it and at the same time perform the pressing obligations and duties imposed upon us and confided in us as Members of this House.

The CHAIRMAN. The time of the gentleman has expired. Under the rule all time for debate upon this amendment has

Mr. ROBERTS of Massachusetts. Mr. Chairman, I offer an amendment to the amendment.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amendment to the amendment. After the word "designated" strike out all down to the words "to make inquiry" and insert in lieu thereof the following: "By the President of the Senate, from the membership of the Senate Committee on Education and Labor, and by the Speaker of the House of Representatives, from the membership of the House Committee on Education," so that the amendment as it is proposed to be amended will read: "That a joint committee shall be appointed composed of three Members of the Senate, to be designated by the President of the Senate from the membership of the Senate Committee on Education and Labor, and three Members of the House, to be designated by the Speaker of the House of Representatives from the membership of the House Committee on Education," etc.

Mr. SMITH of Minnesota. Mr. Chairman, I accept the amend-

Mr. TOWNSEND. Mr. Chairman, I rise to oppose the amendment to the amendment formally, only for the purpose of getting the floor. I approve of the amendment offered by the gentleman from Minnesota on principle, as I am against the creation of special investigating committees by the Congress, but, if I were not, I would be opposed to this proposed commission because, as has been suggested by other Members, there is nothing which a commission could learn by investigation which a committee of this House could not equally and as It is not as if we were about to investigate the quickly learn. qualities and character of radium. We are about to investigate a system of education that has been in vogue in Germany, certainly, for 25 or 30 years, and in many cities of this country for a number of years. The city which I in part represent— Newark—has admirable vocational schools, the success of which is proved every day by the fact that they are used as recruiting stations by factories such as the Edison factory in my district, the Westinghouse factory, the Crocker-Wheeler Co., manufac-

turing fine electrical apparatus, the Tiffany shop, and various other industries of these kinds, which employ these young men taken from our vocational schools as rapidly as they can be turned out. And in New York, as I am reminded by my colleague from New York, Mr. Canton, there are excellent and the roughly equival schools. thoroughly equipped vocational schools. There is nothing about this on which experts have not already given their testimony.

The testimony of very many of the world's famous experts on vocational education can be obtained simply by the trouble of crossing the park here and calling for them in the Congressional Library. Every phase of this question has been discussed by competent experts. I was reading, only the other day, pamphlet upon this wherein it was stated that it is conceded by every competent student of industrial growth of nations in the last quarter of a century that the surprising and amazing growth of Germany's industry is very largely due to the success of the industrial-school system established by Bismarck. Therefore I do favor the amendment offered by the gentleman from Minnesota, that this matter be investigated by our own committee, for the further reason that every Member of this House has the utmost confidence in every member of the Committee on Education. It is a fact that that committee can, without devoting a great deal of time to the purpose, secure, as I have said, competent-yes, expert-testimony in great quantity and of high quality, and for that reason I am opposed to the resolution as it is reported by the committee and favor the amendment offered by the gentleman from Minnesota [Mr. SMITH].

The purpose of the committee resolution is to create an outside commission to determine how Congress can best aid vocational education in the States. That is a purely legislative func-tion and should be performed by a legislative committee. If the proposed commission were to examine how vocational schools work, they could not do better than visit and study the school in Newark. But our own committee could do that as well as could an outside commission; and, Mr. Chairman, if our own excellent Committee on Education will agree to visit Newark and study our schools and our factories, I will agree here that they will be welcomed by the city of Newark, they will learn much, they will be well entertained, and it will cost the Government nothing. I hope this work will be done by our own committee and not by an outside commission.

Mr. STAFFORD. Mr. Chairman, I move to strike out the last word. Mr. Chairman, the members of the Committee on Education ought not to be unduly sensitive because the membership of the House who have observed the delays in legislating occasioned by the appointment of commissions are opposing this proposition.

We all know that "delay" is spelled over this entire resolution, and if it goes through as at present proposed by the Committee on Education, calling for a report by June 1, it means no legislation whatsoever at this Congress.

We hear the distinguished gentleman from Iowa [Mr. Towner] and also the distinguished gentleman from Kentucky [Mr. Powers] advancing the argument that this will expedite the settlement of the question, and they propose a new way, if I understand the burden of their talk, of bringing the two Houses of Congress together by appointing a committee of nine outside experts to devise some plan. We have a new legislative program, as proposed by this resolution, of settling disputes between the two Houses. The gentlemen of the Committee on Education should not be unduly sensitive, because, as I understand from their admission, this is not their child, but it was born in another body, where they could not come to an agreement upon this subject.

It is admitted by all that vocational education is nothing It has been tried out in my home city, an industrial center of this country, for many years, until it is now a part of the public-school system of our city. A gentleman representing another large industrial center in New Jersey [Mr. Town-SEND] has testified that it is also a part of their educational system.

Now, why delay the consideration of this important proposition by passing a resolution creating a commission which spells "death" for this proposition at this and the next session of Congress? You say at this early beginning of a Congress that your committee has not time to take up this question and report. Do you think the committee will have time in the hold-over session, when this commission will have made its report? And what advantage will be gained when you do have its report? Are you going to accept the report of nine persons unacquainted with legislative propositions? I call upon these gentlemen who are advocating this innovation in legislative procedure to cite one instance where any legislation has been advanced by an investigation made by a committee of assumed legislative experts who are unacquainted with legislative ways.

Mr. POWERS. Mr. Chairman, will the gentleman yield?

Mr. STAFFORD. I will be glad to yield. Mr. POWERS. Is it not true that this resolution seeks mainly to get the findings of facts from this commission?

calling upon this commission to frame legislation. Mr. STAFFORD. We are calling upon this commission to report on the subject of national aid, to report their findings, to report a plan. And what will be their findings? Nothing more than what has already been presented; nothing more than cumulative evidence to that that has heretofore been presented to the respective committees. Let us be frank in this matter.

The CHAIRMAN. The time of the gentleman from Wiscon-

sin has expired.

Mr. STAFFORD. Mr. Chairman, I ask unanimous consent to proceed for two minutes.

The CHAIRMAN. The gentleman from Wisconsin asks unanimous consent that he may proceed for two minutes. Is there objection?

There was no objection.

Mr. STAFFORD. Now, Mr. Chairman, I shall decline to yield

further at the present moment.

Let us be frank. We know that there is a rivalry between two distinguished Members of another body, but that is not our trouble. That is no reason why the Committee on Education of this House should run away from this all-engrossing problem and delay it, by the appointment of a commission, to another Congress. It is a live question. What objection can you advance against the substitute offered by the gentleman from Minnesota [Mr. SMITH] that the committee should go ahead and give this question consideration? It is not so novel and technical that you are not equipped and qualified to pursue this investigation. You have not advanced that consideration in your argument. Why not go ahead with the work and bring in some definite program that the House can vote upon? Then we will not have shirked our duty under this subterfuge of a commission which would delay the consideration of the subject for this entire Congress.

Mr. AUSTIN. Mr. Chairman, I want to say a few words in

reference to this meritorious proposition, for I think it means more for the American people, the young people of America, than any proposition that we will perhaps be called upon to consider during this session of Congress. And I also wish to commend the Chairman of the Committee on Education, the gentleman from Georgia [Mr. Hughes], for his zeal, his energy, and his loyalty in attempting to secure favorable action upon the pending resolution. I hope that one of these days the Committee on Education will submit legislation along the lines of vocational education which will carry his name, for it would be a lasting monument to his congressional work in this House-fame that would endure for years to come. trust that his constituency will send him here until such a bill has been written upon the statute books of the United States,

and for many, many years after that event. [Applause.]

As a general proposition, I am opposed to the creation of outside commissions; but if we are in earnest and sincere in desiring this legislation, we will pass this resolution as reported from the committee by a unanimous vote. There has been and is in the Senate a conflict in reference to this legislation, and that difference of opinion has resulted in this delay, for the original bill introduced by the Senator from Vermont [Mr. Page] was thoroughly considered in the Senate; but under the operations of the Senate, under their rules and precedents, it was impossible to secure favorable consideration for that meritorious bill, and the only way in which favorable and final action could be secured was along the line of the compromise embodied in this resolution. If the gentleman from Georgia [Mr. Hughes] had received the support and encouragement that he earned and deserved in pushing this resolution, we would have passed it in this House six months ago. [Applause. 1 And not only would we have passed it six months ago, but we would to-day be considering the findings of a commission created under this resolution.

To attempt in this House to substitute a special or joint committee, in the face of the complicated situation in the Senate, means a further delay in the final consideration of vocationaleducation legislation. It is too important to take any chances. We have already delayed legislation in the interests of voca-

tional education too long in Congress.

Mr. SMITH of Minnesota. Has the gentleman any assurance that the two Senators will agree if a commission reports that

Mr. AUSTIN. The two Senators referred to came before the House Committee on Education, as shown in the hearings, and stated they had reached an agreement, that they had settled their differences along the line of this resolution, and that there

would be no further opposition in the Senate. And now that we have expressed our confidence in the men who constitute the membership of the House Committee on Education why should we attempt to repudiate their action or embarrass their course in doing here something that they do not want us to do, and which will hinder, delay, procrastinate, and perhaps defeat what the American people want and need, vocational education? [Applause.

Mr. TOWNSEND. Is it not a fact that the difference which arose between two committeemen in the other end of the Capitol related to the manner in which the Federal aid should be extended to the States and not at all on the question of voca-

tional education?

Mr. AUSTIN. I do not care how it arose or what the difference was. It existed, and it prevented favorable action on this legislation in the Senate. And now that they have adjusted their differences, if you want this legislation, in the name of the American boys and girls do not get in the way of carrying out in good faith that agreement and that understanding.

The CHAIRMAN. The time of the gentleman has expired. Mr. TOWNSEND. I ask unanimous consent that the gen I ask unanimous consent that the gentleman be given three minutes more.

The CHAIRMAN. All time for debate upon this amendment

Mr. FOSTER. I ask unanimous consent that the gentleman

have five minutes

The CHAIRMAN. Unanimous consent is asked that the time of the gentleman from Tennessee be extended five minutes. Is there objection?

There was no objection.

Mr. AUSTIN. Now, if a New Jersey Democratic President can be trusted to do one thing in the way of safe and sane appointments, it is in selecting the commission provided for in this resolution. [Applause.] He will make no mistake, and we could not name a better qualified man to select a commission that will bring to the American Congress a better measure than they will submit.

Now, in reference to the work of special committees or joint commissions in this House, there is not a hard-working Member who attends faithfully and earnestly to the duties of his office and the demands made upon him by his constituents who has the time to devote to a thorough, exhaustive, and impartial investigation without neglecting the business of those who have

sent him here.

This commission will visit various parts of the Union. Can we take 15 or 20 men from one of our committees and send them into the various sections of this country to investigate the vocational schools that are already established, and to have hearings, without neglecting their duties on the floor here, in the committees and in the departments, as those duties affect the people at home who sent them here as their representatives?

Mr. SMITH of Minnesota. This amendment does not provide that the whole committee shall be appointed. It provides three

from the Senate and three from the House.

The Senate will not give this matter atten-Mr. AUSTIN. tion in the way of a Senate and House joint committee. They have so stated, and you can not force them. They are more contrary than a lot of Missouri mules whenever they set their minds on a proposition. [Laughter.] Although the gentleman from Minnesota [Mr. SMITH] is a new Member, if he serves here, as I hope he will, for a long time, he will find out what kind of a proposition he is up against in the Senate when they make up their minds they will not do a thing in a particular

Mr. SMITH of Minnesota. If I have the misfortune to stay here, I will stay just as long as the Senate can stay on any proposition that I think is right. [Applause.] It is time that

the House awakened to its own dignity.

Mr. AUSTIN. When we face a condition, and not a theory, as we do in this case, we must meet it, and the only way to meet it is in a common-sense, practical way, and that is the way marked out by the Committee on Education in unanimously agreeing upon this resolution. I wish to express my appreciation and thanks for their interest, energy, and faithfulness in pushing this proposition, and I hope the membership of this House will stand by them to a man. [Applause.]

Mr. PLATT. Mr. Chairman, it seems to me that many Members have been discussing this subject as if the resolution was going to establish vocational education. Now, vocational education, as has been said, is nothing new, but that is not what we are discussing; it is not what the resolution refers to, but national aid. National aid is new, and it is not easy to tell how to apply it. It is likely to make trouble. I voted for this resolution in the committee, and I shall vote for it here. I am not

inclined to believe in all the national-aid fads coming before the people to-day, but it seems to me that this is something that deserves an expert investigation, which can not be given by a committee of the House or a joint committee of the House and

It has been said that there is nothing that a commission could find out that a committee of the House could not find out. I do not think that is true. I think a commission of experts, composed of such men as the Chief of the Bureau of Education, would find out things in regard to numerous complicated matters, such as the way that the States aid the vocational schools of the towns and cities within their borders, that a committee might not find out, and coordinate them in a way that it would be impossible for the committee to do. I think the report of such a commission would be more valuable than the report of a joint committee of the two Houses of Congress could be. therefore hope that the amendment of my friend from Minnesota will not prevail.

Mr. ANDERSON. Will the gentleman yield?

Mr. PLATT. Certainly.

Mr. ANDERSON. Did the committee consider at all the proposition of having the Bureau of Education investigate this subject?

Mr. PLATT. That was talked of in the committee.

Mr. DAVIS. Will the gentleman yield for an interruption?

Mr. PLATT. I will.

Mr. DAVIS. I agree to all the gentleman has said except one thing, and that is where he said that cooperation by the Government in our school system was a new thing. Does not the gentleman know that since the beginning of the Government almost the National Government has subsidized the universities, has subsidized agricultural colleges, and has subsidized the common schools? It is not a new thing. The only new thing about it is how most expeditiously to extend it along this line, so as to close the gap between the subsidized common school and the subsidized agricultural college.

Mr. PLATT. The National Government did give some of its

land in aid of education.

Mr. DAVIS. Yes; and in some instances it gave money directly, as you will see by looking over more recent legislation on the subject.

Mr. PLATT. It never gave money, however, by any sys-

tematic plan.

Mr. DAVIS. Some people have disputed the right of the Government to do that even in later years. My object, contrary to some others, in supporting the resolution is that it will, in fact, expedite this matter. There has been a collision in this branch of the Congress, unknown perhaps to some of the membership, the same as in the other branch, between those in favor of the extension of vocational education, and I shall vote for the resolution of the committee, because it will expedite the matter and more speedily obtain results.

Mr. PLATT. I think it will. The question is more or less a complicated one. The State of New York gives State money to local schools everywhere, but that involves State control. The local boards of education are required to report even the absences of pupils to the State, and the State passes on all those It refuses to give State money in cases where things are not done just as the State department of education thinks they should be done. Now, the question of Federal control is going to be involved in this matter of Federal aid ultimately, and it is a matter of expert determination, one that experts ought to report upon, and a committee of Congress could not possibly do it so well.

Mr. HAYES. Will the gentleman yield?

Mr. PLATT. I will. Mr. HAYES. Could not a commission appointed by the two Houses of Congress get all the expert testimony it needed?

Mr. PLATT. Yes; but they could not put it in an expert way.
Mr. HAYES. They could put it together in a better way to
be considered by Congress. Look at the commission that we had on immigration and the report that we got from them. Has any Member of Congress ever looked it through?

Mr. PLATT. I will say to the gentleman that I am personally more or less opposed to commissions, and as a member of the committee I appreciate the compliment paid to the members of the Committee on Education, but I do not think that they can do this work as well as a commission, such as President Wilson would appoint for an educational investigation.

Mr. CAMPBELL. Mr. Chairman, this discussion has taken a wide range. There has been a departure from the language of the resolution. The resolution calls for a commission of inquiry into the wisdom or way in which national aid may be applied to vocational education. But much of the discussion has related to vocational education as though the question that this

committee was to investigate was the question of vocational education. That has excited my surprise. Vocational educa-tion is an old subject in the new State of Kansas. It may be absolutely new in the old State of Georgia and in some other of the older States. We have a State institution in Kansas established without national aid that is educating the teachers to-day as vocational teachers, but these teachers come from almost every State in the Union and go back to their several States fully prepared as vocational teachers in the schools of the country. That school started some 15 years ago with an attendance in the vocational room of about 15 or 20. It was my privilege a week ago to-morrow morning to look down upon body of 840 students gathered from almost every State in the Union in the State institution, which is teaching young men and wemen vocational education in Kansas.

Mr. BARTLETT. Mr. Chairman, will the gentleman yield?

Mr. CAMPBELL. Certainly.

Mr. BARTLETT. Mr. Chairman, I desire to say to the gentleman that it is not a new subject in the State of Georgia, because we have in my State a number of institutions which do nothing else but teach vocational education.

Mr. CAMPBELL. I am glad to know that. Mr. DAVIS. Mr. Chairman, they virtually started the first nine agricultural high schools in Georgia under Gov. Terrell.

Mr. CAMPBELL. I am also glad to know that, but the question of vecational education is not a new question. The question of national aid may be, but national aid to our schools, as has already been suggested here, is not a new question at all. Within the memory of men who have served in this House less than eight years, in one lump sum we gave \$5,000,000 to a new State for educational purposes, the State of Oklahoma, and I think we made a loan in a recent appropriation bill or did something as a further aid to that same State for educational

Mr. AUSTIN. I will ask the gentleman if it is not also a

fact that we also give to the State agricultural colleges?

Mr. CAMPBELL. We do. I do not know that there are

any direct appropriations.

Mr. KELLEY of Michigan. Oh, yes; we get \$100,000 in

Michigan.

Mr. CAMPBELL. There is an amount being appropriated annually which is distributed among the agricultural colleges of the various States. Whether or not we can get more information from a commission appointed as is proposed in this resolution than we could from the Committee on Education, the committee that reported the resolution, is a very serious question in my mind. I think I quite agree with the gentleman from California that we do not get much valuable information from commissions appointed by resolution of this House or of the corresponding body in the other end of the Capitol. The committees of this House are appointed to do the work of the House. There are over 400 Members here, and the other 375 ought to be doing something right now. Four or five of them might well be giving their time to an investigation of this sub-ject, and to a report to the House of Representatives as to the manner in which national aid could be extended to institutions of this kind.

The CHAIRMAN. The time of the gentleman from Kansas

Mr. HUGHES of Georgia. Mr. Chairman, I move that all discussion on this amendment be now closed.

The motion was agreed to.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Massachusetts [Mr. Roberts] to the amendment offered by the gentleman from Minnesota [Mr. Smith] to the original section of the bill.

The question was taken.

Mr. STAFFORD. Mr. Chairman, I demand a division.

Mr. HAYES. Mr. Chairman, I ask unanimous consent that the amendment may be again reported.

The CHAIRMAN. The gentleman from California asks

unanimous consent that the amendment may be again reported. Is there objection?

There was no objection, and the Clerk again reported the amendment.

Mr. ROBERTS of Massachusetts. Mr. Chairman, the gentleman from Minnesota accepted my amendment at the time it was offered and incorporated it in his own amendment.

The CHAIRMAN. The gentleman could not accept the amendment without the consent of the House. The question

The letter is as follows:

The CHAIRMAN. The gentleman could not accept the mendment without the consent of the House. The question at the gentleman from Wisconsin [Mr. Stafford] demands a livision.

The committee divided; and there were—ayes 20, noes 22. is on agreeing to the amendment to the amendment, and on that the gentleman from Wisconsin [Mr. Stafford] demands a division.

So the amendment to the amendment was rejected.

The CHAIRMAN. The question now is on the amendment offered by the gentleman from Minnesota.

The question was taken; and on a division (demanded by Mr. SMITH of Minnesota) there were—ayes 17, noes 41.

Mr. COX. Mr. Chairman, I make the point of order that

there is no quorum present.
Mr. HUGHES of Georgia. Mr. HUGHES of Georgia. Mr. Chairman, I hope the gentle-man will withdraw that point. We have been discussing this matter here for six months, and it is claimed by a great many that they are anxious that some bill on vocational education should be adopted. There are over 30,000,000 children in this country that this will affect, and it is the duty of this House, in my humble opinion, to pass this resolution now. [Applause.] I sincerely hope the gentleman from Indiana will withdraw his point of no quorum, because I believe the House will in the end adopt the resolution in the interest of this great

Country, its present and future.

Mr. COX. Mr. Chairman, I insist upon the point of order.

The CHAIRMAN. The gentleman from Indiana makes the point of order that there is no quorum present, and the Chair will count. [After counting.] One hundred Members present,

a quorum.

So the amendment was rejected. The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

SEC. 4. That the sum of \$15,000, or so much thereof as may be necessary, be, and the same is hereby, appropriated to meet the expenses of the said commission.

Mr. STAFFORD. Mr. Chairman, I move to strike out the last word. I would like to inquire of the chairman of the committee whether he should not amend this last paragraph by inserting the customary words, "out of any money in the Treasury not otherwise appropriated"?

Mr. HUGHES of Georgia. Well, we are willing to agree to

that.

Mr. STAFFORD. I am simply making the suggestion. think the provision might be faulty unless that is included, because that is the customary phraseology.

Mr. HUGHES of Georgia. If the gentleman will make that amendment, I will accept it.

Mr. STAFFORD. Mr. Chairman, I offer that amendment to perfect the paragraph. After the word "appropriated" insert the words "out of any money in the Treasury not otherwise appropriated."

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 2, line 8, after the word "appropriated" insert the words out of any money in the Treasury not otherwise appropriated."

The question was taken, and the amendment was agreed to. Mr. HUGHES of Georgia. Mr. Chairman, I move that the committee rise and report the joint resolution to the House with the recommendation that the resolution as amended do pass.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. Moon, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration Senate joint resolution No. 5 and had directed him to report the same with sundry amendments, with the recommendation that the amendments be agreed to and that the joint resolution as amended do pass.

The SPEAKER. Is a separate vote demanded on any amendment? If not, the Chair will put them in gross.

The question was taken, and the amendments were agreed to. The joint resolution as amended was read the third time and passed.

On motion of Mr. Hughes of Georgia, a motion to reconsider the vote by which the joint resolution was passed was laid on

Mr. HUGHES of Georgia. Mr. Speaker, I ask unanimous consent to extend my remarks for the purpose of placing in the RECORD a magnificent letter from Secretary Redfield upon the subject of vocational education.

The SPEAKER. The gentleman from Georgia [Mr. Hughes] asks unanimous consent to extend his remarks in the RECORD by incorporating a letter from Secretary Redfield. Is there objection? [After a pause.] The Chair hears none. The letter is as follows:

matters, and especially that it should be thought to be antagonistic to the important, indeed necessary, cause of the extension of agricultural

matters, and especially that it should be thought to be aniagonistic to the important, indeed necessary, cause of the extension of agricultural efforts the spirit and purpose of the Smith-Lever bill as for its distinguished sponsors in both Houses I have high admiration. I wish for it and them the fullest measure of success. I am sure every friend of vocational education will bid them Godspeed.

The surface of the surface of the surface of aniagonism between those who are engaged in a common cause. Nor should the deeply vital subject of vocational education be confused with manual training or with what its sometimes understood to be the work of the institutions known as technical high schools. There is no opposition on my find the surface of the

WILLIAM C. REDFIELD, Secretary.

Hon. Dudley M. Hughes, M. C., Chairman Committee on Education, House of Representatives, Washington, D. C.

ADJOURNMENT.

Mr. HUGHES of Georgia. Mr. Speaker, I move that the

House do now adjourn— Mr. COX. Mr. Speaker, pending the motion to adjourn, I ask unanimous consent to extend my remarks in the RECORD on this subject.

The SPEAKER. Is there objection to the request of the gentleman from Indiana? [After a pause.] The Chair hears none.

The gentleman from Georgia moves that the House do now adjourn.

The motion was agreed to; accordingly (at 4 o'clock and 51 minutes p. m.) the House adjourned to meet to-morrow, Wednesday, January 14, 1914, at 12 o'clock noon.

A bill (H. R. 996) granting a pension to Albert F. Alexander; Committee on Invalid Pensions discharged, and referred to the Committee on Pensions.

EXECUTIVE COMMUNICATIONS.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1. A letter from the Attorney General, transmitting a statement of expenditures for the Commerce Court from July 1 to December 31, 1913 (H. Doc. No. 579); to the Committee on Expenditures in the Department of Justice and ordered to be printed.

2. A letter from the Acting Secretary of Commerce, transmitting a statement of the expenditures in the Coast and Geodetic Survey for the fiscal year ended June 30, 1913 (H. Doc. No. 580); to the Committee on Expenditures in the De-

partment of Commerce and ordered to be printed.

3. A letter from the Secretary of War, transmitting a letter from the Acting Chief of Engineers United States Army, and other papers relating to the preliminary examination, plan, and estimate of cost of improvement of Generals Cut near Darien, Ga. (H. Doc. No. 581); to the Committee on Rivers and Har-

bors and ordered to be printed, with Illustrations.
4. A letter from the Secretary of the Treasury, transmitting estimates of appropriations for defraying the expenses of collecting the revenue from customs for the fiscal year ending June 30, 1915 (H. Doc. No. 582); to the Committee on Appropriations and ordered to be printed.

5. A letter from the assistant clerk of the Court of Claims, transmitting a certified copy of the findings of fact and conclusion in the matter of Levi W. Revelle v. The United States (H. Doc. No. 583); to the Committee on War Claims and ordered to be printed.

6. A letter from the Secretary of War, transmitting a letter from the Acting Chief of Engineers United States Army, to-gether with other papers relating to a preliminary examination and survey of the Kansas River from the mouth to the western limits of Kansas City (H. Doc. No. 584); to the Committee on Rivers and Harbors and ordered to be printed, with illustrations.

By Mr. VARE: Memorial of Philadelphia (Pa.) Board of Trade, protesting against the passage of a bill (H. R. 9322) to provide a supertax on incomes to meet the cost of naval construction and other purposes; to the Committee on Ways and Means.

By Mr. WALLIN: Petitions of the editors of journals printed in a foreign language, at Schenectady, N. Y., favoring the striking out of the literacy test in the immigration bill; to the Committee on Immigration and Naturalization.

SENATE.

Wednesday, January 14, 1914.

Prayer by the Chaplain, Rev. Forrest J. Prettyman, D. D. The Secretary proceeded to read the Journal of yesterday's proceedings, when, on request of Mr. Brandegee and by unanimous consent, the further reading was dispensed with, and the Journal was approved.

THE COMMERCE COURT (H. DOC. NO. 579).

The VICE PRESIDENT laid before the Senate a communication from the Attorney General, transmitting, pursuant to law, a statement of the expenditures for the maintenance of the Commerce Court from July 1 to December 31, 1913, which, with the accompanying paper, was referred to the Committee on Appropriations and ordered to be printed.

RAILWAY LAND GRANT IN IOWA.

The VICE PRESIDENT laid before the Senate a communication from the Attorney General, transmitting, in response to a resolution of August 19, 1913, copies of certain letters and other documents relating to the land grant made by the act of Congress of May 12, 1864, and not included in Senate Execu-Document No. 124, Forty-ninth Congress, second session, which, with the accompanying papers, was referred to the Committee on Printing.

He also laid before the Senate a communication from the Secretary of the Interior, transmitting, in response to a resolution of August 19, 1913, a copy of a letter from the Commissioner of the General Land Office, together with copies of papers, maps, and records from the files of the department; also copies of papers from the files and records of the office of the Secretary relative to the land grant under the act of Congress of May 12, 1864, etc., which, with the accompanying papers, was referred to the Committee on Printing.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by J. C. South, its Chief Clerk, announced that the House had passed the joint resolution (S. J. Res. 5) providing for the appointment of a commission to consider the need and report a plan for national

aid to vocational education, with amendments, in which it requested the concurrence of the Senate.

ENROLLED BILL SIGNED.

The message also announced that the Speaker of the House had signed the enrolled bill (8. 3484) to amend an act entitled "An act to codify, revise, and amend the laws relating to the judiciary," approved March 3, 1911, being chapter 231 of Thirty-sixth Statutes at Large, and it was thereupon signed by the Vice President.

PETITIONS AND MEMORIALS.

The VICE PRESIDENT presented a memorial of the Thomas Davis Club, of Philadelphia, Pa., remonstrating against any appropriation by Congress for the celebration of the so-called 100 years of peace among English-speaking people, which was referred to the Committee on Foreign Relations.

Mr. LODGE presented a memorial of John Hancock Branch, Continental League of America, of Lynn, Mass., remonstrating against any appropriation by Congress for the celebration of 100 years of peace with England, which was referred to the

Committee on Foreign Relations.

Mr. WEEKS presented a memorial of John Hancock Branch, Continental League of America, of Lynn, Mass., remonstrating against any appropriation for the celebration of peace among English-speaking people, which was referred to the Committee on Foreign Relations.

BOUNDARY LINE BETWEEN CONNECTICUT AND MASSACHUSETTS.

Mr. BRANDEGEE. From the Committee on the Judiciary I report back favorably without amendment the bill (S. 3550) ratifying the establishment of the boundary line between the States of Connecticut and Massachusetts, and I ask unanimous consent for the present consideration of the same. I will explain it after it is read, if any explanation is required.

The VICE PRESIDENT. The Secretary will read the bill.

The Secretary read the bill, as follows:

Whereas the States of Massachusetts and Connecticut have agreed upon a boundary line between said States, subject to its ratification by Congress, which boundary line is shown on duplicate maps, one copy of which has been deposited with the secretary of state of Massachusetts and another copy in the library of the State of Connecticut;

and
Whereas an act has been passed by each of said States to express and confirm said agreement, and a copy of the act passed by the State of Massachusetts cntitled "An act to establish the boundary line between the Commonwealth of Massachusetts and the State of Connecticut," and approved March 19, 1908, has been sent to and received by the State of Connecticut, and a copy of said act passed by the State of Connecticut entitled "An act establishing the boundary line between Connecticut and Massachusetts," and approved June 6, 1913, has been sent to and received by the State of Massachusetts, each of which said acts contains a full description of said boundary line: Therefore

Be it enacted, etc., That the consent of Congress is hereby given to said agreement establishing said boundary, entered into as aforesaid, between said States of Massachusetts and Connecticut.

The VICE PRESIDENT. The Senator from Connecticut asks unanimous consent for the present consideration of the bill. Is there any objection?

There being no objection, the bill was considered as in Committee of the Whole.

Mr. BRANDEGEE. Mr. President, I do not assume that this measure is of any particular interest to any Senator except the Senators from Massachusetts and Connecticut. I have explained the matter to both the Massachusetts Senators, and the junior Senator from Massachusetts [Mr. Weeks] advised the present governor of the State of Massachusetts of the measure pending and informs me that the governor has no objection to the bill.

There will be found in the RECORD, on page 145, under date of December 4, 1913, a memorial signed by Eugene N. Foss, governor of Massachusetts, and Simeon E. Baldwin, governor of Connecticut, addressed to the Senate and House of Representatives of the United States, which I will ask to have printed in the Record in connection with the bill, in order that if occasion should arise to look back upon the proceedings by which the boundary was confirmed the record may be complete. I will not read it now. I put it in the RECORD at the time I introduced

The VICE PRESIDENT. Is there objection to the request of the Senator from Connecticut? The Chair hears none, and permission is granted.

The memorial referred to is as follows:

To the Senate and House of Representatives of the United States in Congress assembled:

The memorial of the States of Massachusetts and Connecticut represents that they have agreed upon a boundary line between said States, subject to its ratification by the Congress, which boundary line is shown on duplicate maps, one copy of which has been deposited with the secretary of the State of Massachusetts, and another copy thereof in the library of the State of Connecticut, and that an act has been passed by each State to express and confirm said agreement, and that a copy of the act passed by the State of Massachusetts has been sent to and received by the State of Connecticut, and a copy of the said act of the

State of Connecticut has been sent to and received by the State of Massachusetts.

Said act of Massachusetts is entitled "An act to establish the boundary line between the Commonwealth of Massachusetts and the State of Connecticut," and was approved March 19, 1908; and said act of Connecticut is entitled "An act establishing the boundary line between Connecticut and Massachusetts," and was approved June 6, 1913, and is printed in the special laws and resolutions of the General Assembly of the State of Connecticut at its January session, 1913, on page 1003. Each of said acts contains a full description of said boundary line.

Your memorialists therefore hereby request the approval by the Congress of the United States of the boundaries established as heretofore stated.

In witness whereof, on this 22d day of November, 1913, the under-

stated.

In witness whereof, on this 22d day of November, 1913, the undersigned subscribe hereto as governors of said States, respectively.

EUGENE N. FOSS,
Governor of Mussachusetts.
SIMEON E. BALDWIN,
Governor of Connecticut.

Transmitted to the Vice President of the United States, President of the Senate of the United States.

Mr. BRANDEGEE. Congressional action consenting to this agreement between the States, I assume, is necessitated by clause 3 of section 10 of Article I of the Constitution of the United States. It provides that:

No State shall, without the consent of Congress, lay any duty of tonnage, keep troops or ships of war in time of peace, enter into any agreement or compact with another State or with a foreign power, or engage in war unless actually invaded or in such imminent danger as will not admit of delay.

I know of no opposition to this matter. I polled the Judiciary Committee, and 10 of the 17 members have signed a favorable report. The other 7 I was unable to reach. Some were not in town. So far as the committee is concerned, a majority of the members signed it.

I think that is explanation enough, unless some Senator de-

sires to ask a question.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

The preamble was agreed to.

REIMBURSEMENT FOR LOSSES OF POSTAL FUNDS.

Mr. BANKHEAD, from the Committee on Post Offices and Post Roads, to which was referred the bill (H. R. 9321) to amend the act approved May 9, 1888, as amended by the act of June 11, 1896, reported it without amendment and submitted a report (No. 149) thereon.

BILLS AND JOINT RESOLUTION INTRODUCED.

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. JONES:

A bill (S. 3987) to provide water for the irrigable lands of the Yakima Indian Reservation, State of Washington, and for other purposes; to the Committee on Indian Affairs.

By Mr. PERKINS:

A bill (S. 3988) to authorize the Secretary of the Treasury to cause to be erected a suitable building or buildings for marine-hospital purposes on the present marine-hospital site at San Francisco, Cal., and to remove all or any of the present structures on said site; to the Committee on Commerce. By Mr. WEEKS:

A bill (S. 3989) for the relief of Alfred E. Smith (with accompanying papers); to the Committee on Military Affairs.

By Mr. BANKHEAD:

A bill (S. 3990) to correct the lineal and relative rank of First Lieut. Albert G. Goodwyn, United States Army; to the Committee on Military Affairs.

By Mr. SAULSBURY

A bill (S. 3991) granting a pension to Mary Jane Stewart; A bill (S. 3992) granting a pension to John Lynn; and A bill (S. 3993) granting a pension to Mary Ann Davis; to the Committee on Pensions.

By Mr. ROOT:

A bill (S. 3994) to amend an act entitled "An act to codify, revise, and amend the laws relating to the judiciary," approved March 3, 1911; to the Committee on the Judiciary.

By Mr. BURLEIGH:

A bill (S. 3995) granting a pension to John F. Scribner; to the Committee on Pensions.

By Mr. TILLMAN:

A bill (S. 3996) to provide for the naturalization of aliens who have served or shall hereafter serve for one enlistment of four years in the United States Navy or Marine Corps, or for four years in the naval auxiliary service; to the Committee on the Judiciary.

A bill (S. 3997) to waive for one year the age limit for the appointment as assistant paymaster in the United States Navy in the case of Landsman for Electrician Richard C. Reed, United

States Navy; to the Committee on Naval Affairs.

By Mr. NEWLANDS:

A joint resolution (S. J. Res. 97) authorizing the President to extend invitations to foreign Governments to participate in the International Congress of Americanists; to the Committee on Foreign Relations.

NAVAL VESSELS FOR ALASKA.

Mr. NORRIS. Mr. President, I have an amendment which I wish to offer and have printed to the pending Alaskan railroad bill (S. 48). For the information of the Senate I ask unanimous consent that it be read.

There being no objection, the amendment was read and ordered to lie on the table and to be printed, as follows:

On page 8, after line 20, add the following:

"The President of the United States is hereby further empowered, authorized, and directed to construct or cause to be constructed, not less than 10 nor more than 20 vessels suitable and appropriate for the freight and passenger service between the ports of Alaska and other ports on the eastern and western shores of North America. Said vessels shall be constructed, as near as may be, so that they will be suitable for use in aid of the Navy of the United States as a merchant marine. After the same are constructed the President is hereby authorized, upon such terms as he may deem best, to lease the same to the Panama Railroad Co. For the purpose of building said vessels the President is hereby authorized to raise money and to expend the same in accordance with the terms provided in this act, not exceeding the amount of \$15,000,000."

RAILROADS IN ALASKA.

Mr. JONES submitted an amendment intended to be proposed to the bill (S. 48) to authorize the President of the United States to locate, construct, and operate railroads in the Territory of Alaska, and for other purposes, which was ordered to lie on the table and be printed.

AMENDMENTS TO NAVAL APPROPRIATION BILL.

Mr. TILLMAN submitted an amendment authorizing the Secretary of the Navy to issue a clothing outfit to all enlisted men serving in their second enlistment, etc., intended to be proposed by him to the naval appropriation bill, which was referred to the Committee on Naval Affairs and ordered to be printed.

He also submitted an amendment providing that chief carpenters and carpenters shall be eligible for appointment to the grade of ensign under the restrictions imposed by law, etc., intended to be proposed by him to the naval appropriation bill, which was referred to the Committee on Naval Affairs and ordered to be printed.

IMPROVEMENT OF COLUMBIA RIVER, WASH.

Mr. JONES submitted the following concurrent resolution (S. Con. Res. 13), which was referred to the Committee on Commerce:

Resolved by the Senate (the House of Representatives concurring), That the Secretary of War be, and he is hereby, directed to have a survey made and estimate submitted as early as practicable of the cost of the improvement of the Columbia River at Kennewick, Wash., with the view of securing ample harbor facilities.

IMPROVEMENT OF OLYMPIA HARBOR, WASH.

Mr. JONES submitted the following concurrent resolution (S. Con. Res. 14), which was referred to the Committee on

Resolved by the Senate (the House of Representatives concurring), That the Secretary of War be, and he is hereby, directed to have a survey made and estimate submitted as early as practicable of the cost of the improvement of the harbor at Olympia, Wash.

PUGET SOUND CANAL, WASH.

Mr. JONES submitted the following resolution (S. Con. Res. 15), which was referred to the Committee on Commerce:

Resolved by the Senate (the House of Representatives concurring), That the Secretary of War be, and he is hereby, authorized and directed to cause preliminary examination and survey to be made and a report to be made thereon to Congress of the intervening territory between Puget Sound and the Columbia River, with a view to determining the advisability of constructing a canal connecting Puget Sound with Grays Harbor, Willapa Harbor, and the Columbia River.

THANKS OF CONGRESS (S. DOC. NO. 361).

Mr. LODGE. Mr. President, some time ago I made an effort to obtain the names of some persons who had received the thanks of Congress, and I found that we had no complete list. I have had an alphabetical list made of all those persons who have received the thanks of Congress. It will be very valuable for reference and will not make a large document. I ask that it may be printed as a Senate document.

The VICE PRESIDENT. Is there any objection? The Chair

hears none, and it is so ordered.

CONDITIONS IN MINING DISTRICTS IN MICHIGAN.

Mr. ASHURST. Mr. President, I rose to make a request, but I see that the Senator from Michigan [Mr. Townsend] is not in the Chamber.

Mr. TOWNSEND entered the Chamber.

Mr. ASHURST. I simply ask unanimous consent that Senate resolution 243 be referred to the Committee on Education

The VICE PRESIDENT. The Senator from Arizona asks that Senate resolution 243 be taken from the calendar and referred to the Committee on Education and Labor. Is there any objection?

Mr. TOWNSEND. I did not hear the request of the Senator

from Arizona

Mr. ASHURST. I started out in the first instance to make the request, but I did not see the Senator from Michigan pres-Then, observing that he was in the Chamber, I asked unanimous consent, when I saw that he was in the Chamber, that resolution 243 be taken from the calendar and referred to the Committee on Education and Labor.

Mr. TOWNSEND. So far as I am concerned, Mr. President,

I have no objection.

The VICE PRESIDENT. That action will then be taken.

Mr. BRISTOW. Of course, it is understood that the resolution could not be effective until after it has been referred to the Committee to Audit and Control the Contingent Expenses of the Senate as well.

Mr. TOWNSEND. I understand the request was that the matter be first referred to the Committee on Education and Labor for perfection and report, and after that it would go to the Committee to Audit and Control the Contingent Expenses of the Senate.

Mr. BRISTOW. That course is satisfactory.
Mr. TOWNSEND. That is my understanding in consenting to the request.

Mr. ASHURST. The Senator's understanding is correct, except I ought to say it appeared to me the resolution ought to go to the Committee on Education and Labor, and for myself I do not admit that the resolution requires any perfection. I feel that resolution expresses what I wish to say. I admit, of course, that the Committee on Education and Labor has full power to change it to suit itself. Then the resolution will go to the Committee to Audit and Control the Contingent Expenses of the Senate, and I admit that it has full power to change and amend the resolution to suit itself. Just as long as it goes to the committee, that is all I wish.

Mr. TOWNSEND. I do not wish to accept the proposition of the Senator that he thinks the resolution is perfect. I simply wanted to express my understanding of the parliamentary situa-

tion in reference to the resolution.

Mr. ASHURST. Then, Mr. President, the resolution is com-

mitted.

The VICE PRESIDENT. The Chair thinks that the Chair was not properly advised as to the statute of the United States the other day in referring the resolution to the Committee to Audit and Control the Contingent Expenses of the Senate. The Chair believes now that the statute simply provides that money shall not be paid out of the contingent fund of the Senate until the payment has met with the approval of the Committee to Audit and Control the Contingent Expenses of the Senate. So, if any committee proceeds to make expenditures without the consent of that committee, it is taking a chance that the money will never be paid.

The Chair is very glad to reverse his ruling and to refer the resolution to the Committee on Education and Labor, with the view that if reported from the Committee on Education and Labor it shall subsequently be referred to the Committee to Audit and Control the Contingent Expenses of the Senate, in

order that there may be no complication with reference thereto.

Mr. GALLINGER. Mr. President, on this point I will venture merely to suggest that in the past that procedure has frequently been followed; the resolution has been referred to the committee having control of the subject matter, and subsequently it would necessarily, under the law, be sent to the Committee to Audit and Control the Contingent Expenses of the Senate.

The VICE PRESIDENT. The Chair was trying to explain the ruling he made the other day under a misapprehension as to the terms of the statute.

Mr. GALLINGER. Precisely.

PANAMA RAILROAD CO. (S. DOC. NO. 362).

The VICE PRESIDENT laid before the Senate the following message from the President of the United States, which was

read and, with the accompanying paper, referred to the Committee on Interoceanic Canals and ordered to be printed; To the Scnate and House of Representatives:

I transmit herewith, for the information of the Congress, the Sixty-fourth Annual Report of the Board of Directors of the Panama Railroad Co., for the fiscal year ended June 30, 1913. WOODROW WILSON.

THE WHITE HOUSE, January 14, 1914.

VOCATIONAL EDUCATION.

The VICE PRESIDENT laid before the Senate the amendments of the House of Representatives to the joint resolution (S. J. Res. 5) providing for the appointment of a commission to consider the need and report a plan for national aid to vocational education, which were, on page 1, line 4, to strike out "men"; on page 1, line 5, after the word "the," to strike out the remainder of the line and lines 6 and 7 and insert "subject of national aid for vocational education and report their findings and recommendations not later than June 1 next"; and on page 2, line 6, after the word "appropriated," to insert "out of any money in the Treasury not otherwise appropriated."

Mr. SMITH of Georgia. I move that the Senate concur in

the amendments of the House.

The motion was agreed to.

RESOURCES OF ALASKA.

Mr. WILLIAMS. Mr. President, on yesterday I made some reference to an article in a late magazine and said that I would try to find it and bring it up to-day. In making my statement about it I said I thought the test or the report had been made by a captain of one of the naval vessels of the United States. I find, however, that in that I was mistaken; it was made by the captain of one of the United States merchant-marine vessels.

While about it, I thought this morning I would call the atten-tion of the Senate to the two articles in the Review of Reviews, in the January number. One of them is by Mr. Ed. H. Thomas and is entitled "Alaska—A future empire." It contains a great deal of very useful information. Among other things, the writer says:

There are above 21,000,000 acres of known coal lands in Alaska, with a probability that the area is much greater. Of these claimants have entered upon 32,000 acres and made bona fide efforts to obtain the title by paying in the statutory \$10 per acre. Much of this money was paid in more than five years ago, but only two claims, aggregating less than a quarter section of land, have passed to patent.

Coal production in 1912 in the United States aggregated 534,466,580 tons. Of this total Alaska, with its wonderful deposits, produced just 355 tons. These figures will tell any student of economics precisely what is wrong with Alaska.

Coal is a fundamental domestic and industrial necessity. Alaska has the coal but can't use it. Instead of producing its own fuel, the Territory imports all that it consumes.

Then the writter gives an account of the fisheries, the gold

Then the writer gives an account of the fisheries, the gold mines, the copper mines, the salmon canneries, and all that, and

Every salmon cannery and fish-curing plant uses coal. Every mine, concentrator, dredge, and steam-thawing plant must have fuel to operate. The coal for all these purposes, and for every domestic purpose as well, is imported, with coal in inexhaustible quantities lying all about.

Then he draws a comparison between the area of Alaska and of the Scandinavian Peninsula-Norway and Sweden-and shows that Alaska is about equal to the two combined plus Finland, and that the climate of Alaska is as temperate as that of Norway and Sweden and has, in his opinion, as many potentialities, agriculturally and otherwise, as those countries. Then he adds this, which is what I referred to yesterday:

In July last a Norwegian ship unloaded a cargo of ceal from Australia at Unalaska for the United States vessels doing patrol and revenue-cutter service in the north. Yet Capt. Pond, then of the Buffalo, after testing Matanuska coal, said it was better than the best Welsh product and far superior to Pocahontas.

That was the matter that I had in mind yesterday.

Last year Alaska produced 29,230,491 pounds of copper, and all of the ore, some 50 shiploads, was smelted at Tacoma instead of in Alaska, some of it with coke from Australia. Yet the Bering River coal makes superior coke, and this coal and all of this copper ore lies within a very short radius of which Cordova is the center.

Then he adds this, which I think is significant:

Land classification must precede every other move if we are to work out a public-land policy which will encourage development. Coal lands, oil lands, agricultural lands, mineral lands, and forest lands must go through the process of segregation, but these seem to be unimportant details to some of the gentlemen now engaged in evolving measures designed to cure Alaska's ills.

Then there follows an article by Capt. James Gordon Steese, a civil engineer, who has had much experience both as an engineer elsewhere and as a road engineer in Alaska. That article is devoted chiefly to the question of dirt roads in Alaska, and brings out, I think, very clearly the point—and this is what I want to impress upon the Senate at this momentthat what is the trouble with Alaska now is not the want of

here that some 466 miles of railroad have been built and only 351 miles are in operation. The others have gone out of commission. He says the reason of it is that when a man wants to ship freight somewhere and get off of the railroad, the end of the railroad is practically the railroad station, that there are no roads over which the freight can be carried after the railroad has landed the freight. This is a most intelligent article, to which I call your attention; you will find it on page 58 of the January number of the Review of Reviews. He begins with the general statement-

That lack of transportation, more than any other agency, is retarding the development of Alaska is conceded by anyone at all familiar with the development northern affairs.

He gives, then, a list of the various steamship companies. There are 31 vessels in all that are sailing from various Pacific ports to Alaskan ports-I need not go into that-and those vessels range from 500 to 2,400 tons net burden. Then he says:

Several railroads have been projected and operated for short distances. The total mileage constructed is 466 miles. The only lines operated in 1913 were the White Pass & Yukon, 110 miles; the Copper River & Northwestern, 195 miles; and the Tanana Valley Railroad, 46

Making a total of 351 miles, leaving ninety-odd miles of railroad already built in Alaska that are not used at all.

Now, I want to say in that connection that while I was chairman of one of the subcommittees in the framing of the tariff bill which had under consideration the income tax some people were here from Alaska, and amongst others a gentleman whose name I do not now remember, but he was an officer of one of the railroad companies up there. He was a very intelligent man, and evidently au fait about everything of any importance for our consideration in connection with Alaska problems. He wanted us to impose a quadruple income-tax rate on all the railroads there, rather than the present \$100 a mile tax, which, by the way, in my opinion, ought to be repealed, as that country is not in a condition to stand \$100 a mile railway tax. The subcommittee reported, however, in favor of allowing them to pay this quadruple income rate instead of \$100 a mile. The committee indorsed that plan, but afterwards, in the Democratic conference, it was stricken out. This gentleman told me what the trouble up there was. He said the country was so little developed off the line of the railways that there was not enough freight, and there was not enough passenger traffic even when the railroads charged all that the traffic would bear to pay for the actual operation, much less to pay a dividend upon the money invested. I was very much impressed with his statement, and this article bears out to a certain extent that

Mr. CHAMBERLAIN. May I interrupt the Senator? The VICE PRESIDENT. Does the Senator from Mississippi yield to the Senator from Oregon?

Mr. WILLIAMS. Yes.

Mr. CHAMBERLAIN. I wonder if the gentleman told the Senator that the principal lines of rallway-practically the only ones that were operated there-did not develop anything at all, but went from the seacoast to a special interest, as in the case of the Kennicott-Bonanza copper mines, of the Guggenheim Alaska syndicate.

Mr. WILLIAMS. He did not tell me that; and if it were true that he was connected with a special interest, about which I know nothing, naturally ne would not have told me, nothing about that; but his statement as to the reason why the nothing about that; but his statement as to the reason why the railroads have not succeeded impressed me very much. seemed to me, by the way, to be a perfectly honest, straightforward man.

Mr. NELSON. Mr. President—
The VICE PRESIDENT. Does the Senator from Mississippi yield to the Senator from Minnesota?

Mr. WILLIAMS. Yes.

Mr. NELSON. I think I can help the Senator from Mississippl in reference to the name of the gentleman to whom he referred as having called on him. I think his name was Joslin. Mr. WILLIAMS. I think that was it.

Mr. NELSON. And he represented a small railroad at Point

Fairbanks, running to some placer mines.

Mr. WILLIAMS. That is not the man. He was interested in the longest railroad in Alaska, whatever it is. I do not re-

Mr. CHAMBERLAIN. The White Pass is the longest railroad there,

Mr. NELSON. Mr. Joslin is the man, I think, to whom the Senator refers

Mr. WILLIAMS. I do not remember his name, nor does it make any difference, in so far as what I am now addressing myself to is concerned, as to what his interests were nor what more railroads, but the want of more dirt roads. It is shown his motives were nor who he was particularly. I am merely going upon what he said and the manner in which it affected my

The Senator from Oregon [Mr. CHAMBERLAIN] yesterday dwelt a good deal upon the freight rates. In this article by Mr. James Gordon Steese—and I mention it merely because is a matter of interest more than a matter of argument at this moment-he states what strikes me as one of the most curious things that has taken place in this country. He says:

During the opening up of the new diggings in the Chisana region last summer practically everything—beans, coffee, sugar, hay, candles, bacon, grain, etc.—was sold for \$1.50 per pound.

And then he explains it:

The freight charges were almost \$1 a pound, so that the original cost of the article was of relatively little importance. And even at that price the supply could not keep pace with the demand.

The major part of this freight rate is not the freight rate upon the steamships, nor upon the railroads; it is the manhandling of freight after it reaches the railway station, and it is so enormous under the climatic conditions of Alaska, the supply of labor, the paucity of work which constitutes the demand for labor, and all the balance of it, that we find beans and candles and bacon selling at the same price per pound, because the major part of the cost of production at that point-and transportation to a point is a part of the cost of production at the point-was the cost of transportation itself.

Capt. Steese goes then into the question of wagon roads; and I want to impress this upon the Senate, because I believe your problem in Alaska now is more a question of interior transportation than it is of either steamship or railway transporta-

The above brief outline indicates the present situation in Alaska. The board has at the present time

That is the board of road commissioners-

The board has at the present time undertaken work on 94 different routes. The maintenance of these 94 roads requires an annual expenditure of \$125,000. To complete the projects already undertaken will require \$1,420,000.

Say, a million and a half dollars, in round numbers.

Projects already approved, but not yet undertaken, will require \$2,780,000.

Or two and three-quarter million dollars, in round numbers. Projects that will arise with the development during the next 10 years will require about \$1,800,000. A total of \$7,250,000—

Now, mark that-a total of seven and a quarter million dol-

distributed over the next 10 years would provide Alaska with a complete road system such as immediate needs justify, and probably sufficient to meet all reasonable demands until the Territory is sufficiently developed to take over internal public works as a part of its own government.

ernment.

Alaska has been slowly developing for 16 years. Eight years ago the first steps in road construction, were made. The first steps in railroad building were made even carlier—

Now, mark this-

but so far all have been unsuccessful, chiefly because the railroads could land freight only at their freight platforms and had no road feeders to distribute their tonnage. No railroad can be successful without roads as branches or feeders any more than a tree can grow by its trunk alone without branches and leaves.

A railroad must have large tonnage, and trunk-line roads, such as proposed for Alaska, can not hope to succeed except as they become arteries of trade supplying large areas.

I especially want the attention of the Senator from Idaho [Mr. Borah] to this, not for any particular reason, except for the reason of preventing his social debate from interfering with the reading.

A railroad must have large tonnage, and trunk-line roads, such as proposed for Alaska, can not hope to succeed except as they become arteries of trade supplying large areas. Such areas must extend some distance from the railroad line and terminals, and they can be made tributary thereto only by means of branches. In a highly developed country the larger of these branches may be small railroads or even small systems, but the last connecting line between the railroad and its customers, the mine, the farm, and the factory, is a wagon or a truck.

Mr. BORAH. Mr. President—

The VICE PRESIDENT Does the Senator from Mississippi

The VICE PRESIDENT. Does the Senator from Mississippi yield to the Senator from Idaho?

Mr. WILLIAMS. With pleasure. Mr. BORAH. I have become very much interested in this

matter. From what is the Senator reading?

Mr. WILLIAMS. I am reading from an article in the January number of the Review of Reviews, by Capt. James Gordon Steese, a civil engineer of much reputation, who has been employed in Alaska in connection with a great deal of civil engineering work there.

Mr. CHAMBERLAIN. I will ask the Senator if he knows by whom he was employed?

Mr. WILLIAMS. I do not; nor do I care.
Mr. CHAMBERLAIN. Because that is vrey much the argument that has been made by the very interests that have been opposing any sort of development in Alaska.

Mr. WILLIAMS. I do not know about that. Whenever an argument strikes my mind as being sound. I do not bother myself much about the source of it.

Mr. CHAMBERLAIN. I will ask the Senator if his mind is not influenced a little bit if he knows the character of the wit-

ness producing the evidence?

Mr. WILLIAMS. Yes; if I know that the witness is trying to lie, or something of that sort. I have heard many a man boosting a high tariff upon products when I paid no attention to him, because I thought he was speaking for his pocketbook; but I know of no reason to believe that this gentleman is doing anything of that kind. He is a professional civil engineer, and I would no more identify a civil engineer in the employ of a mining company with the selfish purposes of a mining company than I would, as a lawyer, when prepared to defend a man charged with murder, identify myself with the crime of murder.

Mr. CHAMBERLAIN. May I interrupt the Senator just a moment? I did not want to suggest or intimate for a moment that the witness to whom the Senator is now referring is an interested witness. I simply asked if the Senator knew in whose

employment he was as a civil engineer in Alaska?

Mr. WILLIAMS. No; I do not.

Mr. CHAMBERLAIN. Because, as a matter of fact, most of the men who have been up there as civil engineers have been in Alaska looking over the resources for the very men who have been largely instrumental in retarding development there.

Mr. WILLIAMS. I should not be at all surprised if that were true. I take it there are very few other reasons why most civil engineers should be sent there, except the men who are sent by the Government itself.

Now, the writer of this article goes on:

Great natural riches can make a country productive even without the assistance of roads, as Alaska proved before 1906. Since that time the evidence of the value of the few existing roads has been demonstrated, and the necessity of completing the road systems has been made manifest.

To this I wish to call the attention of the Senate, because it seems to me a bit significant, and this man's reasoning seems to me to be cool, impartial, honest, and attractive to the sympathy of others interested:

If left to itself, Alaska will continue its slow rate of development, and by building its own roads and creating industries sufficient to warrant private enterprise it will in half a century become an empire, in spite of all hindrance. By the construction of highways as the development of the country demands them this period will be shortened to one-half. If, in conjunction with the highway system, railroads are built, the period may be shortened to one-quarter.

Then, this follows:

Certainly, however, the experience of Alaskan railroads already constructed is a strong indication that without road systems no Alaskan railroad need be expected either greatly to stimulate the development so much to be desired or to be anything but a financial failure itself.

Mr. GALLINGER. Mr. President-

Mr. WILLIAMS. One moment. I understand this man is not arguing against the construction of railroads. He is simply arguing that, unless you give sufficient highway feeders to the railways, future railroad construction in Alaska must be a failure so far as hope of profit is concerned, as past railway construction has been.

In further reply to my friend, the Senator from Oregon, I will say that, as I understand, this gentleman's chief engineering business in Alaska has been in the employ of the road commission of the Territory of Alaska, to which Congress has made certain appropriations for road construction. So a part of his employment up there has been a public employment. As to the man personally, I know nothing about him.

Mr. GALLINGER. Mr. President, recognizing the soundness of the suggestion that roads are imperatively necessary whether we have railroads or not, I will ask the Senator from Mississippi whether it is not true that there is not a railroad in the continental United States that would be valuable unless it had the feeders furnished by roads?

Mr. WILLIAMS. Not one.

Mr. GALLINGER. That matter has impressed itself upon my mind as this discussion has proceeded-I have not been familiar with this article-that unless we provide some means to get the products of Alaska to the railroad centers, and likewise to carry them from the railroad terminals and the railroad stations, we may be wasting our money in simply building railroads.

Mr. WILLIAMS. In furtherance of what the Senator has said, or in reply to it, whichever it may be considered, of course the relationship between highway feeders and railways is the same in Alaska as it is here, as it is in Asia and Africa and everywhere else, but there is this difference: In this country you can just cut down some trees, and bring the stumps down low enough, and you have a road that you can travel over in good weather, at any rate, and you can hire labor at a comparatively small price and you can give yourself a gravel road or a macadamized road. When, however, you go up to a country like Alaska, with great savage glaciers and flords and narrow valleys and canyons, and still in the formative period of geological upbuilding, as Alaska is to-day, the problem presented climatically, even if you could get labor at the same price, is immensely greater; and the problem presented from an industrial standpoint, even if the climate were the same, is an immensely greater problem.

So it strikes me that if you take the entire amount of road under construction, of road projected, and of road that it is thought ought to be projected, amounting to \$7,250,000, an appropriation by Congress of \$7,250,000 for road construction to feed the railroads that are now in Alaska would do more good than \$35,000,000 devoted to the construction of a new railroad whose line is to be fixed in the future by expert consideration

and testimony.

Another thing that strikes me is this: I understood yester-day from a remark made by the Senator from Washington [Mr. JONES] that it is proposed to confine this to 1,000 miles of road, or that that was the idea in the minds of the committee, at any rate, and that \$35,000.000 was to be appropriated. Senators, I submit that no 1,000 miles of railroad can be built in Alaska, with the climatic conditions and the labor conditions, for any \$35,000,000. Thirty-five million dollars is thirty-five thousand thousand dollars. That is \$35,000 a mile. That is no exorbitant price for the construction of railroads through the mountain sections of the United States, where men work at reasonable rates and can work nearly every day in the year. To expect a railroad to be built in Alaska at that price seems to me unwarranted.

Mr. CLARK of Wyoming. I think the \$35,000,000 includes the equipment also.

Mr. WILLIAMS. Yes; but I say even the road can not be

constructed for that.

I am a child of a warm climate. I do not know much about glaciers and all these things. I have never seen them except in the Alps in Switzerland; and, like Mark Twain, when they wanted me to go up on the top of some of the mountains and interview the glaciers at short range, I thought would be much more comfortable down at the foot, and preferred to have somebody else go up and give me a report, thinking I could report his report just as well as my own. From what I have read, however, about conditions in countries of that sort, even ordinary road construction—and in a great deal of Alaska they do not construct anything except what they call a bobsled roadis of the most difficult character. The chief trouble is the formative condition of the earth there as yet, and the cold country.

Not long ago a glacier made a great stride, and as it came down it ripped open the side of a mourtain, and, by the way, ripped open a gold mine while it was about it. The people discovered it, and now they are going to get gold out of that gold

mine.

Mr. JONES. Mr. President, will the Senator permit an interruption there?

Mr. WILLIAMS. Yes.

Mr. JONES. I simply want to suggest to the Senator that the conditions in Alaska are not at all such as he seems to have

in mind. It is not a great glacier.

Mr. WILLIAMS. Oh, I did not say it was all a great glacier. Mr. JONES. Furthermore, I wish to suggest, with reference to this estimate, that a board of engineers of the United States Army, together with civilians, have submitted an estimate, after an examination in Alaska, that 733 m as of road will cost only \$35,000,000. There is \$20,000,000 provided in the bill, the idea of the committee being that that would permit the construction of not to exceed 1,000 miles.

These estimates are not the estimates of the members of the committee, but they are based upon estimates submitted by prominent, reliable, experienced engineers who have been on the ground and made a personal investigation, so far as time would permit, and also upon their opinion formed from data which they have gathered from all sources.

Mr. CLARK of Wyoming. Mr. President, will the Senator from Washington yield just for a question? Mr. JONES. The Senator from Mississippi [Mr. WILLIAMS]

has the floor.

Mr. CLARK of Wyoming. Will the Senator from Mississippi yield to permit me to ask a question of the Senator from Washington?

Mr. WILLIAMS. Certainly.

Mr. CLARK of Wyoming. I wish to ask the Senator if there is anything in this bill limiting the power of the President to enter into contracts beyond the \$40,000,000?

Mr. JONES. If there is not anything in the bill that prevents that

Mr. CLARK of Wyoming. The Senator's committee reported the bill, and I should be glad if he could tell me whether or

not the bill contains any such limitation. Mr. JONES. I was going to answer the Senator's question.

I am satisfied that the committee was under the impression that the bill did limit the President to the \$40,000,000; but if there is any doubt about it, I am satisfied that the members of the committee would be very glad to have all doubt removed. I wish to state to the Senator that I have prepared an amendment which I intend to propose, limiting the mileage in the aggregate to 1,000 miles.

Mr. CLARK of Wyoming. Will the Senator, in the same amendment, as coming from the committee, limit the contract-

ing power of the President in this regard?

Mr. JONES. Of course the amendment that I am proposing I would not offer as coming from the committee, but simply as a member of the committee. I would be perfectly willing to put a limitation of that kind in it, because it is not the intention of the bill to give the President unlimited power, so far as the expenditure of money is concerned, nor as to the making of contract obligations on the part of the Government.

Mr. BORAH. Mr. President-

Mr. WILLIAMS. One word more, and then I will yield to the Senator from Idaho. It was far from my intention to leave the impression that I thought Alaska was one great glacier

Mr. JONES. I must say I gathered that that was the idea

of the Senator, from his language.

Mr. WILLIAMS. Oh, no. I am aware of the fact that a man can go around very comfortably in Alaska during several months of the year with a khaki suit on and without an over-I am aware of the fact that there are in Alaska areas of agricultural lands fully equal to the areas that cover and dot here and there the valleys of Norway and of Sweden. referring to the fact that Alaska is still in a geologically formative period, and that there are glaciers everywhere, not interfering with these particular pockets which are good agricultural land, but at certain times of the year-

Mr. LANE. Mr. President-

Mr. WILLIAMS. I will ask the Senator to wait until I get through with this sentence.

Mr. LANE. I wish to stop the Senator right there, if I may.

That is just the place where I want to catch him.

Mr. WILLIAMS. All right. The Senator will feel sorry for
me after he has caught me. [Laughter.]

Mr. LANE. One valley in Alaska, the Tanana Valley, is 500 miles long and 150 miles wide, thousands and thousands of acres of which will raise 400 bushels of Irish potatoes to the acre. It is as level as a floor; and the divide between the Tanana Valley and the coast-I say this for the Senator's information, so that he may have it correctly-is so slight that you do not know when you pass over it. There are no glaciers in the Tanana Valley or the Yukon Valley.

Mr. WILLIAMS. Oh, there are lots of valleys in Alaska where there are no glaciers. I know that. I also know that in countries like that, as in Norway and as in Scandinavia, there are subterranean ice fields. As the summer time comes on they furnish a subterranean water supply, and the rapidity with which vegetation grows during the warm months is perfectly miraculous, even to a man accustomed to tropical conditions.

I simply want to reenforce what I said a moment ago, however, by quoting something, now, from the geological stand-

The question now naturally arises, What of the huge glaciers still active over great areas of Alaska's surface?

They, too, may be cutting rich lodes and concentrating the precious metal in gravel deposits to be exposed thousands of years hence. With hundreds of thousands of square miles of flowing ice streams still in existence, who can say that Alaska's placer deposits will ever be exhausted?

This is the more worthy of your attention, because it was not written at all with a view of proving my assertion a moment ago, but it was incidental to another matter:

Volcanic eruptions are raising new lands above the sea and covering the older islands with an enriching blanket of ash. Mighty rivers are building mighty deltas. Glaciers are eroding mountain ranges and exposing their stores of metalliferous wealth. The face of nature is changing, and man, with his intelligence, is on the stage, not alone noting the changes, but an actor in the stirring scenes.

Mr. BORAH. Mr. President-

The VICE PRESIDENT. Does the Senator from Mississippi yield to the Senator from Idaho?

Mr. WILLIAMS. I do.

Mr. BORAH. This bill, as it is reported to the Senate, as I understand, provides for no limitation as to the expenditure. It appropriates \$40,000,000, but there is no limitation upon the power of the President to expend more if it is necessary.

I do not object to the bill for that reason, and I do not mislead myself as to the fact that much more than \$40,000,000 will be expended. I think if we do not trust to the President the discretion of expending this money we will not have a railroad. It will cost more than \$40,000,000. If we put a limit upon it, at a certain time building will cease, and it will cease for a long time before Congres makes another appropriation, and you will have it there suspended, as it were, in mid-air.

Mr. TILLMAN. Or mid-ice. Mr. BORAH. In my judgment, we must necessarily rest the discretion with some one. I do not know of anyone with whom we can more appropriately rest it than the President, and then let him be controlled on the question of economy in expenditure by the Baltimore platform. [Laughter.] the only limitation I can see that we can place upon this propo-Would not that be satisfactory to the Senator from Mississippi?

Mr. WILLIAMS. Why, not quite-not quite approximately

[Laughter.]

Mr. SAHLSBURY Mr. President-

The VICE PRESIDENT. Does the Senator from Mississippi yield to the Senator from Delaware?

Mr. WILLIAMS. I do. Mr. SAULSBURY. I can give the Senator a fact which may enlighten him somewhat on the cost of building some railroads in Alaska. I may say to him that personally I had a proposal for a contract from one of the largest construction companies in the United States offering to build 40 miles of railroad in Alaska some years ago-this was a narrow-gauge road, of course, but the relative cost of a standard-gauge road would not be very much greater-at a cost of not exceeding \$18,000 per mile. That railroad was to be built in one season, and its construction was to be started within half a mile of an active glacier, where a wharf had to be constructed on which every article used in the construction of the railroad was to be landed.

Mr. WILLIAMS. All I have to say about the man who made that proposition is that he was either a man who took great chances or he must have been quite a constructive genius.

Mr. SAULSBURY. He was both.

Mr. WILLIAMS. When you go to a country where bacon costs \$1.50 a pound, and where Irish potatoes cost a dollar or a dollar and a half a pound, labor has to be paid correspondingly. I have enough ordinary common sense to know that. When you hire men to build a railroad under those circumstances, I know you have to pay them a very high daily wage. If the Senator from Delaware could find a prospective purchaser for his railroad later on, after it was built, I believe he did not act with his usual financial sagacity when he failed to take advantage of the offer, provided the man who made the proposal could give the Senator a bond that would satisfy him that the road would have been built.

Mr. WALSH. Mr. President, with the permission of the Senator from Mississippi, I desire to add the further fact that evidence of the most indubitable character was submitted to the committee showing that the first 20 miles of the Alaska Northern Railroad were built at a cost of \$18,000 a mile,

Mr. REED. Was that narrow gauge or standard gauge?

Mr. WALSH. Standard gauge.

Mr. SMITH of Arizona. Over level ground or mountains? Mr. SAULSBURY. I can enlighten the Senator from Mississippi also as to why that contract was not carried out. was because of the repeal or avoidance of a land grant in con-

nection with the railroad which was about to be built. that reason the contract was not entered into in a binding way

and was not carried out.

Mr. WILLIAMS. That opens up a new question. Personally I think what is chiefly the matter with Alaska is locking up its resources. There are a great many people in this country who think conservation means reservation. I am not one of them. I think, of course, that we ought to avoid the monopolistic control of basic resources as far as we can and that we ought not to make the mistakes we have already made. I am not enough of a mining engineer nor have I enough knowledge of mining affairs, even as a layman, to know what the proper limitation ought to be, but I do know that those who are experts upon the question can work out a limitation. I believe if the United States Government were to retain its feesimple ownership of the coal mines and other mines in Alaska and then were to lease the lands containing the deposits of coal and copper and other minerals at as low a price as pos-

sible, keeping the rent at a pepper-corn rent chiefly in order to maintain Government ownership and Government control of them to prevent their monopolization, they could allow private enterprises to enter and exploit all those boundless resources.

As to how many linear or square feet it might be proper to permit one person to hold, I confess I do not know. I know, however, that those who do know can furnish the proper information. I believe if the Government should conclude to lease these lands for long terms, sufficient to justify capital in erecting works and going in there, and were to limit the area of the holdings, and were furthermore to provide that the man who received a holding should receive it as a personal privilege and could neither sublet his lease nor sell it, they could prevent monopolization and at the same time unlock the resources of Alaska. I believe that that ought to be done. Just how it is to be done I have not information enough to tell,

Now, I want to say just one more word. I did not rise for the purpose of discussing this question. In fact, I had made up my mind that I did not want to discuss it. I rose merely to put in the knowledge of the Senate these things which had come to my knowledge and seemingly had benefited my thought upon the subject, and I thought they would benefit the Senate.

To give \$14,000,000 to one Territory of the United States for the exploitation of its resources, even if the entire scheme is to be a brilliant success, and even if 750 or 1,000 miles of railway can be built for the purpose, it strikes me as something unusual and unprecedented, and something not altogether justified by our duties toward that Territory. If I were going to spend \$40,000,000 upon a railroad which the Government was to own and use as a regulator of freight rates, I think I would rather run it from the Great Lakes to the Gulf of Mexico than run it in an outlying Territory like Alaska. But I do not want to do either. I am an old-fashioned Jeffersonian Democrat in many respects yet. When people ask me if I am a progressive or a conservative I answer either and neither and both; it depends upon what you are talking about as to whether I am a radical or a progressive or a conservative upon that particular point. But I am something of a conservative upon the question of the Government's taking up new avenues of public employment subtracted from the field of private employment. I do not know where the Government construction of railways is going to stop if it starts. The fact of its starting is the thing. locality of its starting cuts no figure in the matter at all. I would rather go a long way in bearing present ills than jump into a sea of apprehended evils the depth of which I can not

Of course, as far as the constitutional question is concerned, as the Senator from Oregon [Mr. Chamberlain] said yesterday, there is no constitutional question. We have the power of a local county board of supervisors in connection with the Territory of Alaska as we have in connection with the District of Columbia. We can build dirt roads, we can build railroads, we can establish ferries, we can issue whisky licenses, we can do anything which a State or county can do in a State or a county. The old mooted question as to how far the Federal authority went in a Territory was settled as were the other things settled by the issue of the War between the States. I would not take that up again. I would not spend one moment upon the constitutional question. I think there is nothing in it; but I do think there is a great deal in this, that you want to add just as little to the functioning of government as you can. The less functioning you give government the more functioning you leave to men, and the less freedom you give the government to operate the more freedom there is left to

So far as I know, there has been no Government in this world that ever began, continued, and fell that did not fall by topheaviness, by gradually assuming to itself every interest and every industry of the people, until the number of those in the direct employ of the Government became a resistless power, naval, military, and civil. In France I am informed that to-day every fifth man is in the employ of the Government in some more or less lucrative position. We are beginning to feel it already here. There is not one of you who can resist or who dare attempt to resist the united voice of the civil-service employees of the United States to-day. You are already coming close up to the point where you have got to have a civil-service pension list, or where you will think you must have it, and within 12 years after you inaugurate it it will cost the people more than the entire pension list of the United States does to-day. Top-heaviness, overweighting, overfunctioning are the things that cause the destruction of Governments.

For my own part I do not want to go into the business of road construction by the Government of the United States until or

unless we are absolutely forced to it by military or naval necessity. I do not think that condition exists in Alaska. I have no idea of any foreign power ever being fool enough to invade Alaska. In the United States it would find more inviting fields to invade than in Alaska. It would not send its troops up there to hold nothing and freeze to death in the wintertime, and it would cost their Government, God knows how much, to feed them in the summer time.

I did not intend to say anything about the main issue, but I do feel that that much is due to my own traditional-perhaps in the minds of some of you superstitious-observance of old American policies. We have the right to construct it, yes; and if wise I could be willing to waive what you might call my prejudice, but I do not believe it is wise under these circumstances. I believe that seven or eight million dollars put in Alaska to-day in aid of that Territory as a loan to it in the construction of roads, highways, which shall feed the present 466 miles of railway, and the present landings upon the Yukon and the other streams where steamboats ply, will do more good for Alaska than \$35,000,000 or \$40,000,000 put into one trunk railway.

EMPLOYEES IN DIPLOMATIC AND CONSULAR SERVICE.

The VICE PRESIDENT. The morning business is closed, and the colendar under Rule VIII is in order.

Senate resolution 65, directing the Committee on Foreign Relations to report to the Senate certain information relative to employees in the Diplomatic and Consular Service of the United States, was announced as the first business on the calendar.

Mr. GALLINGER and Mr. SMOOT. Let that go over. Mr. ROOT. Mr. President, would it not be better to send the resolution to the calendar under Rule IX? I do not think

anyone proposes to press it since our friend has gone.

Mr. SMITH of Arizona. What is the resolution?

Mr. ROOT. It is a resolution that was introduced by the late Senator Johnston, and I think before his death he had abandoned the purpose to press it.

Mr. CHAMBERLAIN, I do not understand what the meas-

ure is.

Mr. ROOT. It is the first resolution on the calendar under Rule VIII. It is a resolution directing the Committee on Foreign Relations to make a report of certain information regarding the Diplomatic and Consular Service. I think Senator Johnston, before his death, had abandoned the intention to press it and that no one intends to press it now. I ask that it go to the calendar under Rule IX.

The VICE PRESIDENT. May the Chair suggest, why not indefinitely postpone the resolution?

Mr. ROOT. I have no objection.
Mr. THOMAS. What was the remark of the Chair?

The VICE PRESIDENT. Is there any reason why the resolution may not be indefinitely postponed?

Mr. THOMAS. I think the Senator from North Carolina [Mr. OVERMAN] has some interest in the resolution, and I will suggest that no step be taken concerning its indefinite postponement until he can be consulted. I have personally no objection to its going to the calendar under Rule IX.

The VICE PRESIDENT. Is there objection to sending the resolution to the calendar under Rule IX? The Chair hears

none, and it is so ordered.

WASHINGTON-OREGON CORPORATION.

The bill (S. 821) authorizing the Secretary of War to relieve the Washington-Oregon Corporation, as far as he may deem advisable in the public interests, from certain conditions in an act entitled "An act granting to the Washington-Oregon Corporation a right for an electric railroad, and for telephone, telegraph, and electric transmission lines across the Vancouver Military Reservation, in the State of Washington," approved August 9, 1912, was announced as the next business on the

calendar.
Mr. JONES. My colleague [Mr. Poindexter] is interested in this matter, and possibly a different arrangement will be made from that provided in the bill. I ask that the bill may go over.

The VICE PRESIDENT. It will go over.

WOMAN SUFFRAGE.

The joint resolution (S. J. Res. 1) proposing an amendment to the Constitution of the United States extending the right of suffrage to women was announced as next in order on the

Mr. LODGE. Let the joint resolution go over.
Mr. THOMAS. Mr. President, I ask unanimous consent for
the consideration of the joint resolution.
Mr. SMOOT. It has been objected to.
Mr. THOMAS. If objected to, it goes over.
Mr. LODGE. I objected and asked that it go over.
The VICE PRESIDENT. The joint resolution will go over.

BAILROADS IN ALASKA.

The bill (S. 48) to authorize the President of the United States to locate, construct, and operate railroads in the Territory of Alaska, and for other purpose, was announced as next in order.

Mr. GALLINGER. I ask that that may go over. The VICE PRESIDENT. It will go over.

LEGISLATIVE REFERENCE BUREAU.

The bill (S. 1240) to establish the legislative reference bureau of the Library of Congress was announced as next in order.
Mr. GALLINGER. I ask that that may go over.
The VICE PRESIDENT. The bill will go over.

OCHOCO NATIONAL FOREST.

The bill (S. 533) to consolidate certain forest lands in the

Ochoco National Forest, Oreg., was announced as next in order.

Mr. CHAMBERLAIN. If I may be permitted, I will state that the Agricultural Department and the Department of the Interior have practically agreed with the authorities of the State of Oregon; in other words, that there is no objection to the bill. I ask that it may be put on its passage.

The Senate, as in Committee of the Whole, proceeded to consider the bill, which had been reported from the Committee on Public Lands with an account of the committee on public lands with an account of the committee on public lands with an account of the committee on public lands with an account of the committee on public lands with an account of the committee on public lands with an account of the committee of the committee on the committee of the committee on the committee of the committ

Public Lands with an amendment to strike out section 2.

Mr. BACON. What is that section?

The Secretary. It reads as follows:

SEC. 2. That the sum of \$1,000 is hereby appropriated and made available until expended, out of any moneys in the Treasury not otherwise appropriated, to enable the Secretary of Agriculture to conduct such field examinations and appraisals as may be required for the purposes of this act,

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

ANNUITIES OF MEDAWAKANTON AND WAHPA OTA SIOUX NDIANS.

The bill (S. 1760) for the restoration of nutities to the Medawakanton and Wahpakoota (Santee) Sioux Indians, declared forfeited by "ne act of February 16, 1363, was announced as next in order.

Mr. THOMAS. I ask that the bill may go over. The VICE PRESIDENT. The bill will go over.

RECLAMATION OF DESERT LANDS IN PUBLIC-LAND STATES.

The bill (S. 539) to amend section 3 of an act entitled "An act making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1902, and for other purposes," approved March 3, 1901 (31 Stat. L., p. 1133), was considered as in Committee of the Whole. It proposes to amend section 3 of the act of Congress approved March 3, 1901 (31 Stat. L., p. 1133), to read as follows:

Stat. L., p. 1133), to read as follows:

That section 4 of the act of August 18, 1894, entitled "An act making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1895, and for other purposes," be, and the same is hereby, amended so that the 10-year period within which any State shall cause the lands applied for under said act to be irrigated and reclaimed, as provided in said section, as amended by the act of June 11, 1896, shall begin to run from the date of approval by the Secretary of the Interior of the State's application for the segregation of such lands; and if actual construction of reclamation works is not begun within three years after the segregation of the lands or within such further period, not exceeding two additional years, as shall be allowed by the Secretary of the Interior may restore such lands to the public domain; and if the whole or any portion of the lands so segregated shall not be so irrigated and reclaimed within 10 years after the date of such segregation, or within such further period as the Secretary of the Interior may, in his discretion, upon good cause shown, allow, not exceeding 5 additional years, the Secretary of the Interior may restore such lands or such part thereof to the public domain.

The bill was reported to the Senate without amendment, or-

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

AMENDMENT OF THE CONSTITUTION.

Mr. SUTHERLAND. Mr. President, I call attention to Calendar No. 119, being the joint resolution (S. J. Res. 26) proposing an amendment to the Constitution of the United States. It appears upon the Calendar as though it had been favorably reported. It was an adverse report, and the Calendar should

The VICE PRESIDENT. It is so marked on the bill itself.
Mr. SUTHERLAND. I ask that the Calendar be corrected
so as to indicate that it was reported adversely.
The VICE PRESIDENT. The Calendar will be corrected.

MAY STANLEY.

The Senate, as in Committee of the Whole, proceeded to consider the bill (S. 1644) for the relief of May Stanley. It proposes to pay \$5,000 to May Stanley, widow of Will H. Stanley, late superintendent of the Soboba Indian School, in California,

who lost his life in the discharge of his duty; also to pay \$1,000, or so much thereof as may be necessary, for medical and other necessary expenses, including funeral and administration expenses, incurred in connection with the death of Will H. Stanley and the shooting of Selso Serrano, Indian policeman.

Mr. SMOOT. I should like the Senator from Florida, who reported the bill, to make some explanation of it. I have not had time to fully read the report, and I do not wish to ask that it be read in full; therefore, I ask the Senator to make a brief statement as to why the bill was reported for the amount named therein, and also why the additional \$1,000 was allowed for

expenses incurred.

Mr. BRYAN. Mr. President, Mr. Stanley was superintendent of an Indian school. The report on the bill is No. 81. He was directed to ascertain the cause of an uprising among the Indians at that point, there being evidence to show that the superintendent of the school was in danger of his life. He, with an Indian named Serrano and several others, undertook to have a meeting with the Indians. They invited him to attend a dance, which he declined. Next morning, having met with the Indians at the schoolhouse for the purpose of discussing with them their differences, the Indians walked out. The one who was creating the trouble being invited to come back, refused to do so; Superintendent Stanley went to the door, stepped outside, and was shot down.

The evidence, as shown in the report, is that this leader in the trouble shot Mr. Stanley and called on others to shoot him and to shoot him again. These Indians were subsequently prosecuted and convicted of murder. It was difficult to get assistance. Mr. Stanley did not die immediately, and three physicians were sent for. They performed an operation. It seems they had to go over mountains and to travel all night. Perhaps the claim for the doctors' bill is rather large, but I call the attention of the Senator to the fact that the amount provided for is "\$1,000, or so much thereof as may be necessary." The sum intended to go to the widow of Mr. Stanley, I believe, amounts

to two years' salary.

Briefly stated, the case is simply this: The superintendent of an Indian school in the performance of his duty, and realizing the danger, went into that danger; and, failing to accomplish his purpose, was killed. It occurred to the committee that it was a meritorious case and that his widow should be paid this amount. I am unable to understand why, after the conviction of these Indians, they were not executed, but it appears they were not.

Mr. SMOOT. I will ask the Senator if the bill was referred to the Commissioner of Indian Affairs for his consideration?
Mr. BRYAN. The bill was referred to the Commissioner of

Indian Affairs, and is favored by him.

Mr. SMOOT. I do not notice that in the report.
Mr. BRYAN. Yes; that is the fact.
Mr. SMOOT. I wanted to ask the Senator whether that was the case.

Mr. BRYAN. That is the case.

Mr. GALLINGER. Mr. President, I observe that the physicians who rendered their account have asked for \$900.

Mr. BRYAN. The Senator from New Hampshire will see on page 9 of the report that it is stated there were three physi-

Mr. GALLINGER. It strikes me that, as the Senator suggests, possibly a thousand dollars is considerably more than they would have a right to demand. Of course, that would depend largely upon the nature of the operation performed. I do not know what it was, and I presume the Senator from Florida does not.

Mr. BRYAN.

Mr. GALLINGER. Was it the attempted extraction of a

bullet or something of that kind?

Mr. BRYAN. Superintendent Stanley was shot several times, and the physicians thought that possibly they might save his The report is quite full, but it has been some time since I read it.

Mr. GALLINGER. It would occur to me that very likely slight surgical attention was given to this man, as he seems to have been in a dying condition when he was reached. I think it might be well to somewhat reduce the amount proposed to be paid to the physicians.

Mr. BRYAN. What amount would the Senator from New

Hampshire suggest?

Mr. GALLINGER. I would suggest \$500, in place of \$1,000. These physicians, of course, rendered a bill larger than would ordinarily be paid.

Mr. BRYAN. In so far as I am concerned, I have no objection to the amendment. I move, on page 1, line 12, to strike out "\$1,000" and to insert in lieu thereof "\$500."

Mr. WORKS. Mr. President, I have had some occasion to look into this claim. It was first referred to the Committee on Indian Affairs; it was very carefully investigated by that committee and a favorable report was made upon it. It was not included in the appropriation bill, because it was thought not proper to do so, as there were pending other claims of the same kind. Then it was referred to the Committee on Claims. It has taken its regular course there. I think, so far as the claim of the widow is concerned, that it is a very meritorious one. She is in delicate health; she has small children who are dependent upon her, and the claim was one which very much appealed to my sympathies.

So far as the claim of the physicians is concerned, when the matter came under my observation I objected to the amount of the claim. I thought it was too much; and I am very glad that the chairman of the Committee on Claims, at the sugges-tion of the Senator from New Hampshire, has consented that that amount may be reduced. I did not want the claim of the widow to be imperiled by an exorbitant claim, or one that

might seem to be so, on the part of the physicians.

The VICE PRESIDENT. The question is on the amendment proposed by the Senator from Florida [Mr. BRYAN].

The amendment was agreed to,

Mr. SMOOT. Mr. President, I wish to ask the Senator from Florida another question. Under the present law when deaths occur among the employees of the Government on the Panama Canal such employees are allowed one year's salary. I understood the Senator to say that in this case they had allowed two years' salary. Of course, this is not a case arising in Panama; but why does the Senator differentiate this from the many meri-

torious cases that we have in Panama?

Mr. BRYAN. Well, Mr. President, I think there is a very just distinction. Those in Panama are not engaged in extra hazardous employment, while those in the Indian service are. There is a bill that will be reported from the committee covering the case of a surgeon here in Washington, who went to Montana to treat the Rocky Mountain spotted fever and rendered great assistance; a young man but 39 years of age, with a good practice and bright prospects. He went there and did great service, but lost his life, and in that case two years' salary has been allowed by the committee. There is no fixed rule by which to govern these cases. I think this case stands on a different plane from that of an employee in the public work of the United plane from that of an employee in the public work of the United States who by reason of that work happens to lose his life. That is not considered an extrahazardous employment, while this certainly is, and this man knew it.

Mr. SMOOT. Mr. President, I shall not object to the amount. My only object was, if possible, to have all widows treated alike, but I suppose that is impossible, and therefore I shall not

The bill was reported to the Senate as amended, and the

amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The VICE PRESIDENT. The Chair is of the opinion that the words "and for other purposes" should be added to the title.

Mr. BRYAN. I ask that that amendment be made.

The title was amended so as to read: "A bill for the relief of May Stanley, and for other purposes."

BILLS PASSED OVER.

The bill (S. 654) to accept the cession by the State of Montana of exclusive jurisdiction over the lands embraced within the Glacier National Park, and for other purposes, was announced as next in order.

Mr. WALSH. I ask that that bill go over.

The VICE PRESIDENT. The bill will be passed over.

The bill (S. 655) authorizing the Secretary of the Interior to survey the lands of the abandoned Fort Assinniboine Military Reservation and open the same to settlement was announced as next in order.

Mr. WALSH. I make the same request as to that bill. The VICE PRESIDENT. The bill will be passed over.

The bill (S. 657) to authorize the reservation of public lands for country parks and community centers within reclamation projects, and for other purposes, was announced as next in

Mr. WALSH. I make the same request as to that bill. The VICE PRESIDENT. The bill will go over.

STREET TRAFFIC IN WASHINGTON DURING PARADES.

The bill (S. 2415) relating to the exclusion of traffic from streets and avenues of the city of Washington during parades was considered as in Committee of the Whole.

The bill had been reported from the Committee on the District of Columbia with an amendment to strike out all after the enacting clause and insert:

That the Commissioners of the District of Columbia be, and they hereby are, empowered to grant permits to use the streets and avenues of the District of Columbia for parades, and to make, change, and alter, from time to time, regulations to govern parades in the said District, and to impose a penalty by fine not to exceed \$40 for violation of such regulations, and to prosecute every such violation by information filed in the police court of said District in the name of the District of Columbia by the corporation counsel or any of his assistants.

Sec. 2. That whenever a permit is granted to hold a parade on any of the streets or avenues of the District of Columbia, the Commissioners of the District of Columbia are hereby authorized, in their discretion, to suspend all street car, vehicle, and other traffic and to exclude pedestrians from such streets and avenues and their intersections and crossings, or any portion or portions thereof, during such parade and for such time prior thereto as said commissioners may deem necessary.

Mr. CALLINGER. Mr. President I will make an inquiry as

Mr. GALLINGER. Mr. President, I will make an inquiry as to one phrase in the bill. I read from section 2:

And to exclude pedestrians from such streets and avenues,

Would that include the sidewalks of the streets and avenues?

Mr. JONES. That certainly was not contemplated.
Mr. GALLINGER. I should think not.
Mr. SMITH of Arizona. That does not mean sidewalks.
Mr. GALLINGER. I think they would be included under that

language

Mr. JONES. Will the Senator suggest an amendment that will cover that point?

Mr. GALLINGER. I have just observed it in reading the bill. Mr. JONES. It could be remedied by inserting the words "not including sidewalks."

Mr. GALLINGER. I suggest that it be amended so as to

And to exclude pedestrians from such streets and avenues and their intersections and crossings, exclusive of sidewalks.

Mr. JONES. "Exclusive of sidewalks." Let those words be inserted at the proper place.

Mr. GALLINGER. I suggest that they be inserted after the word "thereof."

The VICE PRESIDENT. The amendment to the amendment

will be stated. The Secretary. On page 2, section 2, line 15, after the word

"thereof," it is proposed to insert "exclusive of sidewalks." The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read: "A bill relating to the exclusion of traffic from the streets and avenues of the District of Columbia during parades."

RIGHTS OF AMERICAN CITIZENS IN FOREIGN COUNTRIES.

The resolution (S. Res. 139) declaring the rights of American citizens to protection of lives and property by this Government was announced as next in order.
Mr. SMOOT. Let that go over.

The VICE PRESIDENT. The resolution will be passed over. STANDARD FRUIT AND VEGETABLE BARRELS.

The bill (S. 2269) to fix the standard barrel for fruits, vegetables, and other dry commodities, was considered as in Committee of the Whole.

The bill had been reported from the Committee on Standards, Weights, and Measures with an amendment, in section 2, page 2, line 18, after the words "known as the," to strike out "half barrel" and insert "quarter barrel, third barrel, half barrel, and three-quarter barrel," so as to make the section read:

and three-quarter barrel," so as to make the section read:

SEC. 2. That it shall be unlawful to sell, offer, or expose for sale in any State, Territory, or the District of Columbia, or to ship from any State, Territory, or the District of Columbia to any other State, Territory, or the District of Columbia or to a foreign country, a barrel containing fruits or vegetables or any other dry commodity of less capacity than the standard barrels defined in the first section of this act, or subdivision thereof known as the quarter barrel, third barrel, half barrel, and three-quarter barrel, and any person guilty of a violation of any of the provisions of this act shall be liable to a penalty of \$1 and costs for each barrel so unlawfully sold or offered for sale or shipped, as the case may be, to be recovered at the suit of the United States in any court of the United States having jurisdiction: Provided, however, That no barrel shall be deemed below standard within the meaning of this act when shipped to any foreign country and constructed according to the specifications or directions of the foreign purchaser if not constructed in conflict with the laws of the foreign country to which the same is intended to be shipped.

The amendment was agreed to.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

JOHN P. FITZGERALD.

The bill (S. 2715) to amend the military record of John P. Fitzgerald was announced as next in order.

The Secretary read the bill; and there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration. It authorizes and directs the Secretary of War to amend the military record of John P. Fitzgerald, who enlisted and served under the assumed name of Joshua Porter in Com-

pany K, Seventh Regiment, and Company C, First Regiment, Michigan Volunteer Cavalry, from March 9, 1865, to March 10, 1866, and to issue to him an honorable discharge in his true name of John P. Fitzgerald.

Mr. GALLINGER. I ask that the report in that case be printed in the RECORD in connection with the action of the

The VICE PRESIDENT. Without objection, that will be The report, submitted July 30, 1913, by Mr. Fletcher, is as

follows

Mr. Fletcher, from the Committee on Military Affairs, submitted the following report, to accompany S. 2715:

This bill merely provides for issuing a certificate of discharge from the Army to John P. Flitzgerald in his own true name, his service having been rendered under the assumed name of Joshua Porter.

A similar bill was favorably reported from the Committee on Military Affairs in the Sixty-second Congress and passed the Senate. Facts showing in detail the reasons for granting this relief to the former soldier are shown by the report which accompanied the previous bill, and that report is therefore attached hereto and made part of this report:

"ISonate Report No. 104 Sixty-second Congress."

"[Senate Report No. 104, Sixty-second Congress.]

that report is therefore attached hereto and made part of this report:

"[Senate Report No. 104, Sixty-second Congress.]

"The Committee on Military Affairs, to which was referred the bill (S. 2246) to amend the military record of John P. Fitzgerald, having had the same under consideration, reports it back to the Senate with the recommendation that it do pass.

"This soldier was between 16 and 17 years old when he enlisted in the Army, and, on account of his father's opposition to his enlisting in the service, he went from his home in Jay County, Ind., to Jackson, Mich., walking a greater part of the distance, where he enlisted in a Michigan regiment under the name of Joshua Porter, to prevent his father from finding him and taking him back to his home.

"He is now drawing a pension, and on February 3, 1910, the Treasury Department allowed his claim for travel pay from Salt Lake City, Utah, the place of discharge, to Jackson, Mich., amounting to \$211.17.

"The War Department requires that before a discharge is issued in a soldier's true name he must furnish personal identity, or, in other words, to get a discharge certificate in his true name through regular channels Mr. Fitzgerald would be compelled to again go back to Michigan from the State of Washington, where he now lives, at great inconvenience and an expense that he is unable to hear; hence, as his service was an honorable one and his enlistment under an assumed name was not for the purpose of hiding a crime, and since the evidence on file in the Pension Bureau proves beyond any question of doubt that John P. Fitzgerald

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

PUNISHMENT FOR CERTAIN CRIMES.

The bill (S. 2674) to define certain crimes and to provide punishment therefor, was announced as next in order.

The Secretary read the bill.

Mr. BACON. Mr. President, what committee has that bill been before?

The VICE PRESIDENT. The Committee on the Judiciary. Mr. BACON. I do not see present the chairman of the committee, and my colleague on the committee [Mr. Walsh] does not recollect anything in regard to it. I prefer that the bill be passed over until there are present some of the members of the committee who are familiar with its provisions.

The VICE PRESIDENT. The bill will be passed over.

RECLAMATION PROJECTS.

The bill (S. 1355) relating to easements in connection with reclamation projects was announced as next in order

The Secretary read the bill; and there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration. It authorizes the Secretary of the Interior to grant, on behalf of the United States, unto public and private corporations, associations, and persons easements reasonably necessary for the crossing of land, canals, and rights of way owned by the United States for the purpose of carrying out the provisions of the act of June 17, 1902, known as the reclamation act, under such terms and conditions as will reasonably protect the interests of the United States and its successors in interest.

Mr. BACON. Before what committee has that bill been? The VICE PRESIDENT. The Committee on Irrigation and Reclamation of Arid Lands.

1914.

Mr. JONES. I will say to the Senator that there is a unanimous report from the committee.

Mr. BACON. Very well.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

RELIEF OF AMERICAN CITIZENS IN MEXICO.

The resolution (S. Res. 152) authorizing the Committee on Foreign Relations to proceed with an investigation of the conditions of American citizens in the Republic of Mexico was announced as next in order.

Mr. BACON. That resolution has not been to any committee, as I understand. The author of the resolution is not present, so I do not like to make a motion in his absence. If he were here, however, I should move its reference to the Committee on Foreign Relations.

The VICE PRESIDENT. The resolution will be passed

over.

LANDS IN OKLAHOMA.

The bill (S. 2725) authorizing the sale of certain lands to the Dwight Mission School, on Sallisaw Creek, Okla., was announced as next in order.

Mr. SMOOT. I notice that the Senator from Wyoming [Mr. CLARK], who reported the bill, is not in the Chamber, and I desire to ask one or two questions in regard to it. I ask that the bill may go over until he returns.

The VICE PRESIDENT. The bill will be passed over.

THE REPUBLIC COAL CO.

The joint resolution (S. J. Res. 41) authorizing the Secretary of the Interior to sell or lease certain public lands to the Republic Coal Co., a corporation, was announced as next in order.

Mr. WALSH. I ask that the joint resolution may be passed over.

The VICE PRESIDENT. It will be passed over.

CAMPAIGN CONTRIBUTIONS.

The bill (S. 2242) making it unlawful for any Member of Congress to serve on or solicit funds for any political committee, club, or organization was announced as next in order.

Mr. SMOOT. I think there are a number of amendments to be offered to that bill, and I believe the Senator introducing it will accept one of them, or so I understand. Therefore I ask that it may go over.

The VICE PRESIDENT. The bill will be passed over.

DONATION OF CANNON.

The bill (S. 2560) authorizing the Secretary of War to donate to the Grand Army of the Republic Post No. 45, of Smith Center, Kans., two cannon or fieldpieces was announced as next

The Secretary read the bill; and there being no objection, the Senate, as in Committee of the Whole, proceeded to its

consideration.

The bill had been reported from the Committee on Military Affairs with amendments, in line 6, after the word "field-pieces," to strike out "with their carriages"; and, in line 9, after the word "fieldpiece," to strike out "with its carriage," so as to make the bill read:

Be it enacted, etc., That the Secretary of War be, and he is hereby, authorized and directed to donate to the Grand Army of the Republic Post No. 45, of Smith Center, Kans., two cannon or fieldpleces not needed for present service, to be mounted in the courthouse square of Smith Center, in the State of Kansas, and one cannon or fieldplece not needed for present service, to be mounted in the cemetery.

The amendments were agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read

the third time, and passed. The VICE PRESIDENT. The title of the bill should be

an ended so as to read "three cannon or fieldpieces."

The title was amended so as to read: "A bill authorizing the Secretary of War to donate to the Grand Army of the Republic Post No. 45, of Smith Center, Kans., three cannon or fieldpieces.'

The bill (S. 2561) authorizing the Secretary of War to donate to the city of Hays, Kans., one cannon or fieldpiece was announced as next in order.

The Secretary read the bill; and there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration.

The bill had been reported from the Committee on Military Affairs with amendments, in line 4, before the word "Kansas," to strike out "city of Hays" and insert "State of," and in line 5, after the word "fieldpiece," to strike out "with its carriage," so as to make the bill read:

Be it enacted, etc., That the Secretary of War be, and he is hereby, authorized and directed to donate to the State of Kansas one cannon or fieldpiece not needed for present service, to be mounted in the State park adjoining the city of Hays, in the State of Kansas.

The amendments were agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read: "A bill authorizing the Secretary of War to donate to the State of Kansas one

cannon or fieldpiece."

The bill (S. 2816) authorizing the Secretary of War to donate to the city of Abilene, Kans., two cannon was announced as next in order.

The Secretary read the bill; and there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration.

The bill had been reported from the Committee on Military Affairs with an amendment, in line 5, before the word "can-non," to strike out the word "mounted," so as to make the bill read:

Be it enacted, etc., That the Secretary of War be, and he is hereby, authorized and directed to donate to the city of Abilene, Kans., two cannon, not needed for present service, to be placed in the city park of that city.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

MONUMENT TO WOMEN OF CIVIL WAR.

The bill (S. 2659) providing for a monument to commemorate the women of the Civil War was announced as next in

The VICE PRESIDENT. May not the Chair suggest that this monument has been provided for in the deficiency appropriation bill?

I think it has. Mr. GALLINGER.

Mr. ROOT. I think it was reported in two forms, one as separate bill and the other as an amendment to an appropriation bill.

Mr. GALLINGER. And it passed.

Mr. ROOT. It passed in the appropriation bill. Mr. SMITH of Arizona. Did it pass both Houses? Mr. OVERMAN. Yes; it is a law, Mr. President.

Mr. ROOT. I think so.
Mr. OVERMAN. Yes; I am on the committee, and I know it was passed by both Houses.

Mr. ROOT. Undoubtedly it is a law.

The VICE PRESIDENT. The bill will be indefinitely post-

poned.

RIGHT OF WAY NEAR ENGLE, N. MEX.

The bill (S. 3112) to authorize the Secretary of the Interior to acquire certain right of way near Engle, N. Mex., was announced as next in order.

Mr. WALSH. I ask that that bill go over.

The VICE PRESIDENT. The bill will be passed over.

DISPOSAL OF MINERAL LANDS.

The bill (S. 2651) providing for the purchase and disposal of certain lands containing kaolin, kaolinite, fuller's earth, and other minerals within portions of Indian reservations heretofore opened to settlement and entry was announced as next in

The Secretary read the bill; and there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration.

The bill had been reported from the Committee on Public Lands with an amendment, to strike out all after the enacting clause and to insert:

clause and to insert:

That all lands containing minerals, except those hereinafter specifically reserved, within such parts of Indian reservations as have hereinfore been opened to settlement and entry under acts of Congress which did not authorize the disposal of such mineral lands, shall be open to exploration and purchase and be disposed of under the general provisions of the mining and coal-land laws of the United States, and the proceeds arising therefrom shall be deposited in the Treasury for the same purpose for which the proceeds arising from the disposal of other lands within the reservation in which such mineral-bearing lands are located were deposited: Provided, That all lands containing valuable deposits of oil, natural gas, phosphates, nitrates, potash, and asphaltic minerals are hereby expressly reserved from location and disposition pending future action by Congress, and lands containing fuller's earth, kaolin, china clay, and ball clay shall be disposed of under the provisions of law relating to placer mining claims, but the same person, association, or corporation shall not locate or enter more than one claim, not exceeding 160 acres in area, hereunder: Provided further. That none of the lands or mineral deposits, the disposal of which is herein provided for, shall be disposed of at less price than that fixed by the applicable mining or coal-land laws, and in no instance at less than their appraised value for agricultural purposes.

Mr. SMOOT. Mr. President, I desire to ask the Senator a question. I do not remember this bill being considered by the committee, but I suppose it was done at a time when I was out of the city.

Mr. STERLING. Yes: I recall that that was the case.

Mr. SMOOT. Does the bill refer to all Indian reservations, in any part of the United States?

Mr. STERLING. I think it does; yes. It is general in its

It refers to all reservations. terms.

Mr. SMITH of Arizona, Does it apply to Executive order reservations as well as to congressional reservations?

Mr. STERLING. I think it does.

Mr. SMITH of Arizona. Does it include the general minerals,

Mr. Sall Wilson, Such as gold, silver, lead, cinnabar, and so forth?

Mr. STERLING. No; I do not think it includes minerals of that kind. I think the concluding paragraph of the letter of the Secretary of the Interior will explain the bill and the necessity for the safeguards provided for in the substitute bill. The substitute is the draft of the Secretary of the Interior. It takes the place of the original bill. Referring to the original bill the Secretary says:

S. 2651, therefore, if passed in its present form, would secure to the Indians substantial payments for the coal deposits.

The original bill would have secured such payments to the Indians, but the thought of the Secretary was that it would not secure to the Indians payments for the lands where there were other than coal denosits.

The report says:

With respect to other minerals, however, the prices fixed by the general mining laws are \$2.50 for placer-mining claims and \$5 per acre for lode claims, while under various acts passed by Congress in opening Indian reservations prices at which the agricultural lands therein are disposable have ranged from 25 cents to \$10 per acre. It would seem, therefore, in such cases where the proceeds of sale are reserved to the Indians that no minerals should be disposed of for less than the prices fixed by the mining laws, nor for less than their appraised or fixed values where those exceed the prices fixed by the mining laws.

Mr. SMITH of Arizona. Mr. President, I do not like the principle which recognizes, as this bill seems to recognize, without further consideration, the right of the Executive, by a mere order, to extend an Indian or any other reservation so as to include mining ground or mineral lands. I think every order made by any President that has extended an Indian reservation over mineral lands is to that extent absolutely void. There is no power in the President, under any act of Congress with which I am familiar, that permits him to repeal the mining laws of the United States by withholding, by mere Executive order, the right of the prospector or anyone else to take possession of mines and proceed to patent under the ordinary mining laws.

If this bill begins to recognize the right of the Executive to dispose of mineral lands within Executive-order reservations, I am opposed to any such recognition, for I have before the Senate now a resolution of inquiry to which I purpose to address myself in a day or two on this very question. It has arisen in my country. For instance, in the case of known mineral lands, occupied and mined, an Executive order extends an Indian reservation away beyond the agricultural land and into the mountains, including these mining claims on which men have been working since 1865, some of them. The question is before them, and I purpose to bring it before Congress, to test the validity of any such conveyance to the Indians under Executive-order reservations

The VICE PRESIDENT. The morning hour having expired, the Chair lays before the Senate the unfinished business, which

will be stated.

The SECRETARY. A bill (S. 48) to authorize the President of the United States to locate, construct, and operate railroads in the Territory of Alaska, and for other purposes.

Mr. CHAMBERLAIN rose,

Mr. BORAH. Did the Senator from Oregon desire to address the Senate upon this bill?

Mr. CHAMBERLAIN. No; my colleagues have requested that we might be permitted to finish the calendar; at least, to go through with the calendar.
Mr. SMOOT. Under Rule VIII.

Mr. CHAMBERLAIN. Under Rule VIII. Mr. GALLINGER. That is a very good suggestion.

Mr. CHAMBERLAIN. If the remaining business on the calendar does not lead to any very lengthy discussion, I would be glad to have the unfinished business laid aside informally.

The VICE PRESIDENT. The Senator from Arizona [Mr.

SMITH] ought to understand it.

Mr. SMOOT. One objection will take the pending bill over anyhow. If the Senator from Arizona desires to object to it, it will go over.

Mr. SMITH of Arizona. I would rather have it go over for the present, because I do not want to have the principle em-bodied in it established here if I can help it.

The VICE PRESIDENT. The bill goes over, then, and the unfinished business is temporarily laid aside pending the disposition of the calendar under Rule VIII.

EXPENDITURES FOR TELEGRAMS.

The next business on the calendar was Senate resolution 156. limiting expenditures for telegrams sent or received by Senators.

Let that go over.

The VICE PRESIDENT. The resolution will go over.

MISSISSIPPI RIVER BRIDGE.

The next business on the calendar was the bill (S. 2609) to amend an act entitled "An act permitting the building of a dam across the Mississippi River at or near the village of Sauk Rapids, Benton County, Minn.," approved February 26, 1904, and it was considered as in Committee of the Whole.

Mr. VARDAMAN. Mr. President, I suggest the absence of a

quorum. I do not think we ought to legislate when there are very few Senators in the Chamber.

The VICE PRESIDENT. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst Gore Bacon Hitchcock Bankhead Hollis Borah James Brady Jones Brandegee Kern Bristow Lane Bryan Lea Burton Lippitt Chamberlain Lodge Clark, Wyo. Dillingham McLean Gallinger Martin, Va.	Martine, N. J. Myers Nelson Norris Owen Perkins Pittman Reed Robinson Saulsbury Sheppard Simmons Smith, Ariz.	Smith, S. C. Smoot Sterling Swanson Thompson Townsend Verdaman Walsh Weeks Williams	
---	---	--	--

Mr. KERN. I desire to announce the unavoidable absence

of my colleague [Mr. Shively].

Mr. BRYAN. I desire to announce that my colleague [Mr. FLETCHER] is unavoidably absent. He is paired with the Senator from Wyoming [Mr. WARREN]. I will let this aunouncement stand for the day.

Mr. SMITH of Arizona. I have been requested to announce that the Senator from New Mexico [Mr. Fall] is absent from

the Chamber by reason of sickness.

Mr. SHEPPARD. My colleague [Mr. Culberson] is unavoidably absent. This announcement may stand for the day.

Mr. DILLINGHAM. I desire to announce that my colleague [Mr. Page] is not in attendance in the Senate this week, because of the great sorrow that has come to him in the death of his wife.

The VICE PRESIDENT. Forty-nine Senators have answered

to the roll call. There is a quorum present.

Mr. WALSH. I ask unanimous consent that the unfinished

business be taken up for consideration.

The VICE PRESIDENT. Does the Senator from Montana object to the further consideration of Senate bill 2609, which was before the Senate when the point of no quorum was raised?

Mr. WALSH. I do. I ask that it go over. The VICE PRESIDENT. The bill will go over.

Mr. GALLINGER. We would very soon complete the calendar, I will say to the Senator, if it would be agreeable to him.

Mr. WALSH. Very well; if the Senator desires, I will with-

draw the demand.

Mr. GALLINGER. I think it will take but a few minutes to get through with the remaining bills on the calendar.

Mr. WALSH. Very well.

The VICE PRESIDENT. Senate bill 2609 is before the ate as in Committee of the Whole, and open to amendment. Senate bill 2609 is before the Sen-

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

ELECTION OF SENATORS.

The bill (S. 2860) providing a temporary method of conducting the nomination and election of United States Senators was announced as next in order.

Mr. GALLINGER. Let that go over.

The VICE PRESIDENT. The bill will go over.

AMENDMENT OF THE BULES.

The next business on the calendar was Senate resolution 84. providing that any Senator, upon his own request, may be recorded and counted as present in order to constitute a quorum.

The VICE PRESIDENT. The resolution will be read.

The resolution was read and considered. It was reported from the Committee on Rules with an amendment, on page 1, line 4, after the word "and," to insert the word "state," so as to make the resolution read:

Resolved, That the rules of the Senate be amended as follows: In Rule XII, clause 1. after the words "by the Senate;" there shall be inserted the following: "and any Senator may arise and declare that he is paired and state how he would vote if not paired, and may add that being present he desires to be so recorded, in order to constitute a quorum; whereupon he shall be so recorded and his presence as a part of the quorum announced by the Chair."

The amendment was agreed to.

Mr. WALSH. I ask that the resolution may go over. I should like to hear the author of the resolution discuss the question as to whether we can, in view of the Constitution, count The VICE PRESIDENT. The resolution will go over.
The next business on the calendar was Senate resolution 221,

to amend Rule XIX of the standing rules of the Senate, which was read and agreed to, as follows:

Resolved, That the rules of the Senate be amended by adding the following paragraph to the nineteenth standing rule, to be numbered and known as paragraph 6 of said rule, to wit:

"Par. 6. Whenever confusion arises in the Chamber or the galleries or demonstrations of approval or disapproval are indulged in by the occupants of the galleries it shall be the duty of the Chair to enforce order on his own initiative and without any point of order being made by a Senator."

The next business on the calendar was Senate resolution 227, to amend Rule XIV of the standing rules of the Senate, which was read and agreed to, as follows:

Resolved, That Rule XIV of the standing rules of the Senate be amended as follows: At the conclusion of the second paragraph of said Rule XIV strike out the period and insert a semicolon in lieu thereof and add the following proviso to be thereafter a part of said second paragraph, to wit:

"Provided, That the first or second reading of each bill may be by title only unless the Senate in any case shall otherwise order."

The next business on the calendar was Senate resolution 202, to amend Rule XII of the standing rules of the Senate, and the Senate proceeded to its consideration,

The resolution had been reported from the Committee on Rules with an amendment, on page 2, line 2, after the word "Senate," to insert "but any unanimous consent may be revoked by another unanimous consent granted in the manner prescribed above," so as to make the resolution read:

prescribed above," so as to make the resolution read:

Resolved, That the rules of the Senate be amended by adding the following paragraph to the twelfth standing rule of the Senate, to be numbered and known as paragraph 3 of said Rule XII, to wit:

"Par. 3. No request by a Senator for unanimous consent for the taking of a final vote on a specified date upon the passage of a bill or joint resolution shall be submitted to the Senate for agreement thereto until, upon a roll call ordered for the purpose by the Presiding Officer, it shall be disclosed that a quorum of the Senate is present; and when a unanimous consent is thus given, the same shall operate as the order of the Senate, but any unanimous consent may be revoked by another unanimous consent granted in the manner prescribed above."

The VICE PRESIDENT. The question is on agreeing to the

amendment reported by the Committee on Rules.

Mr. ASHURST. I ask that the resolution may go over.

The VICE PRESIDENT. It will go over.

COMMITTEE ON PUBLIC DOCUMENTS.

The next business on the calendar was Senate resolution 218, proposing an amendment to the standing rules of the Senate, which was read, as follows:

which was read, as follows:

Resolved, That there shall be a standing committee of the Senate known as the Committee on Public Documents. It shall be composed of three Senators elected in the same manner as the members of other standing committees.

No book, pamphlet, article, paper, address, or other matter requiring the consent or order of the Senate in order to be printed as a public document shall be so printed or an order therefor entered until the request or motion for such order shall have been referred to the above committee, and its report thereon received: Provided. That nothing herein contained shall be construed to interfere with the right of the Senate to discharge the committee from the further consideration of any such request or motion.

In making its report the committee shall describe the general character of the matter sought to be printed as a public document, and shall specifically state whether it is of such value to the country that it ought to be printed and circulated at the expense of the Government,

Mr. SMOOT. I ask that that may go over.

Mr. SMOOT. I ask that that may go over.

The VICE PRESIDENT. The resolution will go over.

AGRICULTURAL EXTENSION WORK,

The bill (S. 3091) to provide for cooperative agricultural extension work between the agricultural colleges in the several States receiving the benefits of an act of Congress approved July 2, 1862, and of acts supplementary thereto, and the United States Department of Agriculture, was announced as next in

Mr. GALLINGER. Let the bill go over. The VICE PRESIDENT. It will go over.

RECEIVER OF PUBLIC MONEYS AT SPRINGFIELD, MO.

The bill (S. 3403) to abolish the office of receiver of public moneys at Springfield, Mo., and for other purposes, was announced as next in order.

Mr. SMOOT. I ask that that may go over. The VICE PRESIDENT. The bill will go over.

MOSES CHAUNCEY.

The bill (S. 3149) to remove the charge of desertion from the military record of Moses Chauncey was announced as next

Mr. GALLINGER. There seem to be strong equities in this case according to the report, but the Senator reporting the bill is not present, and I wanted to inquire before voting upon it whether this soldier received a bounty before his first enlistment. For that reason I ask that the bill may go over.

The VICE PRESIDENT. It will go over.

PHOEBE W. CHASE.

The bill (S. 1884) for the relief of Phoebe W. Chase was considered as in Committee of the Whole. It provides that Phoebe W. Chase, mother of Edward R. Chase, late chaplain Thirteenth Regiment United States Infantry, shall be regarded as the duly designated beneficiary of the late Chaplain Chase under the act approved May 11, 1908, as amended by the act approved March

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

AMENDMENT TO THE CONSTITUTION.

The joint resolution (S. J. Res. 26) proposing an amendment to the Constitution of the United States was announced as next

in order on the calendar.

Mr. GALLINGER. Let that go over.

The VICE PRESIDENT. The joint resolution will go over.

R. W. BRANSON.

The bill (S. 156) for the relief of R. W. Branson was announced as next in order.

Mr. SMOOT. I do not find the report here on my file and have not had a chance to read it. So I should like to have the bill go over for to-day.

The VICE PRESIDENT. The bill will go over. That completes the calendar. The Senator from Montana [Mr. Walsh] is entitled to the floor on the unfinished business.

Mr. ASHURST. Will the Senator from Montana yield to me for a moment?

Mr. WALSH. I yield to the Senator from Arizona.

CONDITIONS IN MINING DISTRICTS IN MICHIGAN.

Mr. ASHURST. I ask the attention of the Senator from Michigan [Mr. Townsend]. I have here the report of Mr. John A. Moffit, detailed from the Immigration Service to act as commissioner of conciliation; the report of Mr. John B. Densmore, Solicitor of the Department of Labor, later detailed to act as commissioner of conciliation and strike commissioner; and the report of Mr. Walter B. Palmer, of the Bureau of Labor Statistics, on the Michigan copper country. Inasmuch as my resolution has been sent to the Committee on Education and Labor, it appears proper and necessary that that committee should have the report of the investigation made by these officials. I was about to ask that the reports be printed as a public document, but I presume they should go to the appropriate committee to ascertain whether or not they should be printed.

Mr. TOWNSEND. May I ask the Senator, is that the complete report of the commissioners?

Mr. ASHURST. I understand it is the complete report of those officials, but it does not embrace any occurrences since about the 1st of last November.

Mr. SMOOT. I suggest to the Senator that he have the matter referred to the Committee on Education and Labor, which has the resolution under consideration, and if, when it is reported to the Senate, he desires to have it printed, then, of course, the question whether it should be printed will be decided.

Mr. GALLINGER. I will ask the Senator from Arizona if

it is the report of the investigation made by the Department of Labor?

Mr. ASHURST.

Mr. ASHURST. Yes, sir. Mr. GALLINGER. The complete report?

Mr. ASHURST. Its volume would indicate completion, but I do not know. There may be some other papers in relation to the matter. So far as I know, it contains the complete result of their work.

Mr. GALLINGER. I think it ought by all means to be printed in some form at some time so that we may examine it, because it is a very important report.

Mr. SMITH of Georgia. Do not the departments print these reports?

Mr. GALLINGER. I would think so.

Mr. SMITH of Georgia. We do not want to duplicate the printing

Mr. SMITH of Arizona. That is exactly what I rose to inquire. We do not want to order it printed if it is already in print, so that the committee can use it. If it has not been printed by the department, it strikes me that that is sufficient reason why we should order it printed.

Mr. ASHURST. I thank my colleague.

Mr. POINDEXTER. I have been informed by the Secretary of Labor that this report is not printed, because there were no

funds available in the department for printing it.

Mr. SMOOT. The fund for printing in every department is provided in a lump sum in the regular appropriation bill. am not saying this to antagonize the printing of this report, but I think the proper course to pursue would be to refer the report to the Committee on Education and Labor, where the resolution is now being considered, and then, if the resolution is reported to the Senate, the question as to whether it should be printed will be decided here.

The VICE PRESIDENT. That is the view of the Chair. If there is no objection, the matter will be referred to the Com-

mittee on Education and Labor.

Mr. TOWNSEND. I realize the justice of the Chair's ruling; do not wish to find any fault with it; but I sincerely hope that the report will be printed by some authority. I am interested also in knowing that it is a complete report. I have heard some suggestions to the effect that that whole report had not been submitted. Of course, in order to be of value it should be the whole report, and it may be that that is the case.

Mr. ASHURST. I will say to the Senator, in order to be perfectly frank and fair, I do not know that it is the complete report, but it ought to be. Certainly a fragmentary report ought not to be printed. It all ought to be printed.

Mr. SMOOT. The Senator can find out by asking the depart-

The VICE PRESIDENT. The very reason for referring it to the Committee on Education and Labor is that they may ascertain whether it is the complete report or not.

Mr. TOWNSEND. That course is satisfactory to me, The VICE PRESIDENT. The committee will determine that

RAILROADS IN ALASKA.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (S. 48) to authorize the President of the United States to locate, construct, and operate railroads in the Territory of Alaska, and for other purposes.

Mr. WALSH. Mr. President, deputed by the Senate as a member of its Committee on Territories to inquire into the merits of the bill being considered, I take the liberty, supplementary to the very comprehensive and able presentation made by the distinguished Senator from Oregon [Mr. CHAMBERLAIN] on yesterday and the day before, to submit some of the more salient facts brought to the attention of the committee which, without any predilection at all on my part, have caused me to give my adherence to the project contemplated by the bill.

Its provisions have already been outlined to you. In brief, they are to the effect that the President of the United States shall cause to be constructed in the Territory of Alaska, and when constructed to either lease or operate, railroads. The report of the committee does not place any limit upon the mileage to be constructed. My recollection about the deliberations of the committee, however, is in accord with that of the Senator from Washington [Mr. Jones], that it had been agreed that the bill should provide that not more than 1.000 miles should be constructed. The cost of the construction of the roads, according to the provisions of the bill, is to be met by funds realized from the sale of Government bonds for the redemption of which all of the revenues derived from the sale or the lease of public lands in Alaska are pledged.

This subject coming before the Sixty-second Congress was by it deemed of sufficient importance to warrant a very careful investigation, in order that the Senate might have official information upon which it could wisely act. Accordingly, in the month of August, 1912, an act was passed providing for the appointment of a commission charged with the duty of investigating the subject of transportation in Alaska; of examining railroad routes from the seaboard to the coal lands, the interior, and the inland waterways; of securing railroad surveys, and other information in relation to railroads, including cost of

constuction and operation, and obtaining information concerning the coal deposits and particularly in relation to their proximity to the proposed railroad lines. The act required that this commission should consist of an engineer of the Army, a geologist in charge of surveys in the Territory of Alaska, an engineer of the Navy, and a civil engineer who was not associated with any railroad enterprise in the Territory.

Pursuant to this requirement, the President appointed Maj. Jay J. Morrow, of the Engineer Corps of the Army (chairman of the commission); Dr. Alfred H. Brooks, connected with the Geological Survey, and who had through a number of years and by personal observation made a careful study of the mineral resources of Alaska; Mr. Leonard M. Cox, an engineer of the Navy; and Mr. Colin M. Ingersoll, of New York, a civil engineer,

as members of the commission.

The commission proceeded to Alaska and, in addition to the information which they gathered as a result of their visit, they collated a large mass of information more or less pertinent to the subject of their inquiry, all of which they submitted in a report which was made in the month of February last.

President Taft, in transmitting the report, strongly urged upon Congress that the Nation should undertake the work of constructing trunk lines from the seaboard to the inland waterways of Alaska, and his successor, the present Chief Executive, in his late remarkable general message to Congress, warmly recommended speedy action that this great work might be inaugurated. The conclusions of the commission will be, I am very sure, of deep interest to you all. I read a brief paragraph from their report, expressive of them. They say, at page 135, as follows:

as follows:

The data presented shows that the United States possesses in Alaska a frontier Territory of great size and of wonderful industrial possibilities. The commission believes that its climate is favorable to permanent settlement and to agriculture; that its mineral resources are vast and as yet but little exploited; that its population is sparse, but only by reason of its inadequate transportation facilities; and that its people are of the same type of hardy pioneers that have carried the United States frontier to its present limits.

In conclusion, it should be stated that the commission is unanimously of opinion that this development should be undertaken at once and prosecuted with vigor; that it can not be accomplished without providing the rallroads herein recommended under some system which will insure low transportation charges and the consequent rapid settlement of this new land and the utilization of its great resources.

The development referred to is the construction of 732 miles

The development referred to is the construction of 733 miles of road. The lines thus recommended I shall refer to later.

Mr. President, before taking up in detail the facts which led the commission to the conclusion to which I have invited your attention, I desire to say a word in passing, namely, that we ought, as I think, in the consideration of this most important measure to dismiss as almost, if not altogether, irrelevant any views that we may chance to entertain of an adverse character upon the general subject of Government ownership of rail-Whether the Government ought to acquire or construct or operate railroads in the more thickly settled portions of the country, where railroad and other transportation facilities have already been provided by private capital or where private capital is perfectly willing to provide such facilities, is one question. Whether the Government ought to undertake to construct trunk lines in frontier territory for the primary purpose of the development and settlement of that territory to make available to the people the great wealth nature has placed there is quite a different question.

Furthermore, Mr. President, we ought not, as I think, to be at all alarmed in inaugurating this policy by the sorry, not to say scandalous, record that has been made in times past in some of the States that have entered upon the work of railroad construction. I am glad that the distinguished Senator from the State of North Carolina [Mr. OVERMAN] is here this afternoon. It is stated that in his State, quite a number of years ago, a railroad line was laid out and built in the shape of a horseshoe, that peculiar route having been selected in order that it might pass through the home towns, respectively, of the governor of the State, of the presiding officer of one of the houses of the legislature, of a United States Senator, and of another citizen of commanding influence in the political and business life of the State. How that may be, I do not know; but, of course, no such crass job as that could be repeated in our day in any State.

Mr. OVERMAN. Mr. President, I want to say as to the two men against whom that charge was made, that one was the governor of the State and the other was the president of the railroad. The railroad was built in the best section of the State and through some of the best towns; it was built in the shape of an "S." It was charged at the time that it was built through the town of the president of the road and through the town of the governor of the State. Of course it had two ter-minii, and I think it could have been built 90 miles shorter on a direct line. It went about 90 miles out of its way to go by

two or three towns, which gave rise to this talk. I do not think there was any job in it. The governor of the State and the president of the road were two of our best citizens. One of them has honored this country by service both in the Cabinet and in the Senate of the United States. There is no truth in the rumor to which the Senator from Montana has referred, although the charge was made at the time. The truth about it is that, as I have said, the railroad did go through some of the best towns of the State and has been one of the most prosperous roads in the State. The State to-day owns three-fourths of the stock of the road, getting 7 per cent interest on it.

Mr. LIPPITT. If the Senator will not object to my interrupting him, that brings up a rather interesting condition in reference to what is proposed in this very bill. The Senator from North Carolina says that the road was about 90 miles

longer than it ought to have been.

Mr. OVERMAN. I did not say "longer than it ought to have been"; I said that it was 90 miles longer than it would have

been if built in a direct line.

Mr. LIPPITT. Ninety miles longer than it might have been. Under the plan proposed by the commission for the building of this road in Alaska, which the Senator from Montana thinks is being built at a time when no such crass expedient as the Senator from North Carolina describes could possibly exist, the road to the Bering coal field is, as I remember, about 110 miles long, whereas a private individual is ready to construct a road to the same point, which he claims will only be 23 miles long; in other words, almost exactly the same situation that the Senator has referred to in North Carolina as being impossible to exist, under the conditions proposed in this bill, is apparently being duplicated almost to a mile of line.

Mr. WALSH. Oh, Mr. President, if the Senator will permit me, he has not the situation, I am sure, clearly in mind. It is my purpose a little later on to refer to particular routes. The fact of the matter is, that a line to the Bering River coal field can be built from Controller Bay, a distance in a direct line of about 25 miles. The Copper River & Northwestern Railroad is the only one that is near that coal, and a branch line from that road can be built in length 51 miles by one route and 38

miles by another.

Mr. LIPPITT. That is from the nearest point on the Copper River road to the coal fields, but, if I recollect the testimonyand I am not quite sure that I have the mileage exact because it is some little time since I referred to that particular feature of it-but if my recollection is correct, the distance from tidewater to the Bering coal fields over the present mileage of the Copper River Railroad and the connection that would have to be built from the nearest point on that railroad to the mines would make a route to tidewater of something like 110 miles, more or less, as the case may be, whereas the testimony of Mr. Ryan, who is interested in building a road from Controller Bay, is a very vigorous criticism of any such road being built, on the ground that it would put a tax on the coal of the Bering coal fields of somewhere in the neighborhood of a dollar a ton for transportation under the conditions that exist in Alaska, though he and the people interested with him are ready to construct the mileage which, as the Senator has said, is somewhere in the neighborhood of 25 miles, which would connect those same fields with tidewater, over which lines this coal would be brought to tidewater for in the neighborhood of a dollar per ton less than by this proposed Government road.

It is rather remarkable that the illustration which the Senator brings up to illustrate the impossibility of the mistakes of the past being repeated at the present day should have a mileage almost exactly the same as the alternative route pro-

posed by private capital in this case.

Mr. WALSH. Mr. President, this discussion would be very much more pertinent to a branch of the subject which I shall follow later on, the routes recommended by the commission; but now that the matter has thus been opened up by the distinguished Senator from Rhode Island [Mr. LIPPITT] I digress from what I had to say about the general subject of Government construction of railroads to address myself to it for a moment, although it breaks the thread of the argument,

Mr. LIPPITT. I did not intend really to interrupt the Senator at this point. Perhaps it would be much better if he would go on in the way in which he himself had laid out.

Mr. WALSH. So erroneous an idea might be gathered from the suggestion of the Senator with respect to the matter that

I feel impelled to pursue it briefly here.

Mr. OVERMAN. I want to say that I would not have interrupted the Senator from Montana except that the word "job" was used. The truth is that there was not any "job" in the case referred to, and the construction of the road has helped to build up the State of North Carolina.

Mr. WALSH. The Senator from North Carolina will understand fully that I did not undertake to vouch for the truth of the statement. I simply said that it had been so stated, and I used the illustration simply as an indication of things that had been done in those days and that we might reasonably expect might have been done in the state of the public mind at that

Mr. President, the commission recommended, as I shall show a little later on, a line into the interior, having its terminus at Prince William Sound, either at Cordova or at Valdez. You will understand that the objective point is the interior. Copper River Railroad is already constructed up the Copper River to its junction with the Chitina and then up the Chitina to the Kennicott mine. If that line should be acquired, or if a connection should be effected with it, that would be the route pursued to reach the interior; but Mr. President, it is of course desirable to get to the Bering River coal field. The Copper River & Northwestern Railroad, a private corporation, has already surveyed two branch lines from its own line into the Bering coal field. You will observe that it may take a route such as I indicate with the pointer, a longer but less difficult one, or a route directly across; in other words, if the private corporation, the Copper River & Northwestern Railroad Co., were going to carry out its purpose of building into the Bering coal field it would follow exactly one of the routes recommended by the commission. The commission simply recommends getting into the Bering coal field by a railroad constructed over one or the other of these two routes already selected and surveyed by the Copper River & Northwestern Railroad. Therefore, Mr. President, the idea that might be gathered from the suggestion made by the Senator from Rhode Island [Mr. LIPPITT] that a circuitous and lengthy route had been recommended, when one much shorter could be followed, would be a most unjust one.

Mr. President, you can construct a railroad from Controller Bay right to those coal fields, no more than 25 miles in length. It is argued by the commission that the facilities at Controller Bay are not adequate. Be that as it may, the Government could go in and construct a road 25 miles from the seaboard and reach the Bering coal field; but if it did so we could not get into the interior by that road, because we would be then square up against massive mountains, that frown upon us all along the Alaska coast. So you will understand, Mr. President, that if we did build from the seaboard along this line of 25 miles we would then be obliged to go back again and build another line in order to reach the interior by following the Copper River, and we should be obliged to provide terminals and shipping facilities

at both places.

Mr. LIPPITT. If I may be permitted to interrupt, and if it does not interfere with the line of the Senator's argument, of course the Senator from Montana realizes, and properly states, that in order to reach the interior a feasible line is along the Copper River Railroad as now built, but that to get to the coal fields from that railroad or from the nearest point on that railroad it is necessary to build a supplementary line.

Mr. WALSH. A branch line. Mr. LIPPITT. I do not recall the exact mileage for that line, but I think it is in the neighborhood of 40 or 50 miles. Every pound of coal that comes from those fields over that 40 or 50 miles, and then down over the mileage of the Copper River Railroad, must go nearly four times the distance that the coal can be brought out of those coal fields by a road constructed for the purpose of bringing out coal.

If the Government builds that 40 or 50 miles, or whatever it may be, unless it absolutely prohibits private capital from coming in and building railroads in Alaska, the ultimate result will be that the money expended on that 40 or 50 miles will be thrown away for every foot of the road that is constructed, because the coal will be brought out of the Bering field mines under a privately built road, over a shorter distance, in the nearest way, and at the cheapest price, for less money than the Government-owned railroad or any other railroad can bring coal out of those fields.

Therefore, it seems to me that for the Government to undertake such a method of construction simply because they want another railroad to go up into the interior is throwing away money. If they want to build a railroad to the interior, that is one matter; but if they want to bring coal out of the Bering coal fields to the seacoast for transportation in both directions along the coast by water, it seems to me that the proper way to develop the field is in the most economical way; and from the little I have read and from the testimony that I find on record about that-and it seems to me it is almost admitted by Senators- the way to do it is to build the shortest route, one of from 23 to 25 miles in length.

Mr. WALSH. Mr. President, I regret that the argument has been broken in this way, but I am obliged again to pursue this line. The fact about the matter is, that this is a mere recommendation of the commission. As to whether or not the commission thus constituted has reached a wiser conclusion than that which would be drawn from the argument of the Senator is not before us for consideration at all. We are not going to undertake at this time to determine which road is going to be built. I simply pause to remark, Mr. President, that the terminus of that road up the Copper River might as well be at Controller Bay as at Cordova, where it is now, if the harbors were exactly the same. Indeed, the people who built that road spent a million dollars in endeavoring to make a harbor at Katalla, on Controller Bay, from which the coal fields could be reached, as is now suggested by the Senator, by a short line; then they abandoned the effort, because, in their judgment, it was impossible to make a desirable harbor there. The commission apparently agreed with the conclusion at which that private corporation arrived, that the conditions existing in the neighborhood of Controller Bay are not such as to make it a choice terminus for a railroad.

Now, it is a fact, Mr. President, that a Mr. Ryan, who is interested there, is wedded to the idea that Controller Bay enjoys every advantage for a port that any other bay along that coast possesses, and some additional ones. I do not think we ought to stop now to inquire whether his judgment is best or whether the judgment of the commission is best.

Mr. BORAH. Mr. President—
The PRESIDING OFFICER (Mr. Brady in the chair). Does the Senator from Montana yield to the Senator from Idaho?

Mr. WALSH. I do.

Mr. BORAH. Will not the question of the route be left open

Mr. BORAH. Will not the question of the route be left open to be determined finally by the best method that we can adopt for the solution of that problem?

Mr. WALSH. Undoubtedly so. Now, let me proceed. I was suggesting, Mr. President, that if the road to which I have referred in the State of North Carolina was laid out without any real reference to commercial requirements or to economic conditions, but was located as it was by considerations of political expediency or other similar influences—the project was no different in any essential respect from other similar efforts of other States in that time; and I had announced that we have proceeded so far along the line of improvement and advancement that a repetition of that kind of thing was not to be anticipated. I undertake to say, Mr. President, that even Tammany, were it as bold and as buccaneering as its enemies paint it, would not undertake to perpetrate anything of that kind. The State of New York is to-day expending millions of dollars in the improvement and enlargement of its canals. The expenditure of this money economically is assured practically to the people of the State of New York by that spirit of jealous watchfulness that now prevails and that exists by reason of an awakened and enlightened public conscience, which had no existence, even in embryo, so far as we can discern, in those days in which the iniquities of government construction were perpetrated.

It must be borne in mind, Mr. President, that scandals just exactly as revolting characterized the construction of railroads by private corporations in those times. Those were the days of Jay Gould and Jim Fisk and Tom Scott; they were the days of the Missouri Pacific and the Erie. Those were the days when it was the regular thing for the officers of a railroad to organize construction companies, and when stock given for public aid was regularly wiped out by proceedings for the foreclosure of mortgages securing the bonds of the road.

Furthermore, Mr. President, neither the Nation nor any State in those days was able to marshal any such splendid corps of engineers-splendid not only in intellectual but in moral fiber-as those under whose direction the Panama Canal is new nearing completion. Those were the days when a Secretary of War was impeached and declared guilty by a vote of nearly two-thirds of the Senate for petty grafting, that prevailed more or less in practically every department of the Government.

In the report of the railroad commission, Mr. President, there is scheduled a large mass of material and machinery now on the Isthmus of Panama that will be available for this work in Alaska if Congress should authorize it to be undertaken, but the most valuable asset there is not listed at all. It consists of the splendid corps of trained men whom the digging of the canal brought out and developed and who are now eager to place their talents at the command of the Government if this new work should be assumed. I might further remark in that connection that those men have not only been digging and building a canal, but they have been building railroads as well-miles and miles of railroad-and they have been operating

them, too-operating them at a cost, Mr. President, that will bear favorable comparison with the cost that has been attained by some of the very highest class railroads in the United States. When I was on the Isthmus 10 days ago I was handed some comments by a gentleman there showing the marked success which has characterized the operations of the Panama Railroad by the Government. Without attempting to vouch for the figures which purport to come from official sources, I shall ask that the statement be made an appendix to my remarks.

The PRESIDING OFFICER. In the absence of objection.

permission is granted.

[The matter referred to will be found in the appendix to Mr. WALSH'S speech.]

EXTENT AND PHYSICAL FEATURES.

Mr. WALSH. Now, Mr. President, taking up the considerations upon which the commission arrived at the conclusion that has been read, Alaska is a territory having an area of about 570,000 square miles. It is about one-fifth the size of continental United States. It has an extent equal to the combined area of the States of California, Oregon, Washington, Idaho, and Nevada. It embraces a region about equal to that of Norway, Sweden, Finland, and the three northern Provinces of Russia. It lies, as I shall show you soon, in practically the same latitude as do those countries and provinces. It has exactly the same agricultural possibilities. Its waters teem with fish, as do theirs. It has as much fish; it has as many fur-bearing animals; it has as great an extent of agricultural lands; and, besides that, it has mineral resources compared with which theirs are of no consequence at all. It has coal in unlimited quantity, without any considerable quantity in the countries which I have named. It has gold, and they have none; it has copper, and they have none; it has a multitude of minerals which they can not claim.

I want to invite your attention to the mountains. The whole coast of Alaska is skirted by a high range of mountains that frown upon the navigator in those parts, all the way north from 54° 40'. They curve around the Gulf of Alaska, until you reach the Iliamna Lake and bay, to which I point here on the map. [Indicating.] The Endicott Mountains constitute another high range, which proceeds from east to west through the northern portion of the Territory. The Yukon River traverses the entire length of the Territory in the form of a bow. One of its largest tributaries is the Tanana. Another great river of Alaska is the Kuskokwim, running, in a general way, parallel with the Yukon in its lower courses, which I now point out. [Indicating on the map.] These rivers-and this is one of the most important facts in connection with this bill-afford inland waterways 5,000 miles in length and proceeding providentially enough, as you will perceive, through the very heart of this great Ter-

CLIMATE.

Whenever the subject of Alaska is mentioned the mind immediately passes to the contemplation of its climate. When we consider the climate of Alaska it is necessary to regard it as consisting of three distinct regions.

Mr. BACON. Mr. President, will the Senator, before he passes from that matter, allow me to ask him simply one

question?

Mr. WALSH. Yes. Mr. BACON. Do any of the rivers to which he has referred touch these coal fields?

Mr. WALSH. I shall tell you in detail about that later a. The Nenana coal fields are about 50 miles from the Tanana River.

Mr. BACON. That is a navigable river?

Mr. WALSH. It is a navigable river; and it is in fact navigated. Fairbanks is the principal town upon it, and boats ply from there to the ocean at St. Michaels here [indicating on the map], as well as to Lake Bennett, the terminus of the Yukon and White Pass Railroad.

Mr. THOMPSON. How far is that from the Yukon River? Mr. WALSH. This is Fairbanks here [indicating on the map], and there [indicating] is the mouth of the Tanana at

Fort Gibbon.

Mr. BACON. Now, if the Senator will pardon me-he is passing to another branch of the discussion-another question is in my mind, and I ask for information if the coal fields should be made accessible to that river, how many months the year would navigation be open for transportation, so that the coal could be gotten out?

Mr. WALSH. An erroneous idea may possibly possess the mind of the Senator from what I have said. The Nenana coal fields contain lignite coal only, and such coal is not contain the containt for expert. sidered at all when we come to regard the output for export of the coal mines of Alaska. The coal for commercial purposes, so far as known, consists of the Bering fields, to which I point [indicating on the map] close to the coast here [indicating on the map], and the Matanuska fields to which I now point [indicating on the map]. Neither of those is in close proximity to any of these great inland rivers. I shall, however, later on give you more detailed information in relation to the location of those fields.

I was speaking about the climate of Alaska, and how we must consider it as consisting of three distinct regions: First, the coastal region, between the high mountains which closely skirt the coast here [indicating on the map], and the ocean; second, the region which lies north of the Endicott range; third, the great interior portion of Alaska traversed by these mag-

nificent navigable rivers.

It is the Arctic section alone which has the characteristics of climate which we usually assign to Alaska as a whole. That region is comparatively unknown. So far as we know anything about it, it is barren and inhospitable, and little if any mineral

wealth even has thus far been discovered therein.

As to the coastal region. The shores of that region are washed by the Japan Current, which, coming across the Pacific in exactly the same way that the Gulf Stream crosses the Atlantic and laves the shores of Scotland, Norway, and those countries, tempers the climate of the coastal region so that it is mild in summer and is not at all severe in winter. a matter of no consequence to us for the present, however, because, so far as the question before us is concerned, we may practically confine our attention to the climate of the interior region; for the purpose of the bill is not to provide transportation facilities for such industries as may be found to exist or which may be developed along the coast here [indicating on the map] because water transportation is available to them, and the railroads at best must be short and perhaps independent. The important question, so far as climate is concerned, is as to how it affects the resources of this great interior region.

However, I should say that in addition to having the very mild climate of which I spoke, this coastal region has an enormous rainfall. The annual rainfall runs from 50 to 140 inches. The moisture borne by the winds from the ocean being condensed by the high coastal range, falls; and having fallen for centuries in the shape of snow, the great glaciers which

characterize that region have been produced.

Because something was said about the matter this morning, I desire particularly to emphasize the fact that the great glaciers of Alaska of which you have heard lie between the summits of the high coastal range and the ocean-a circumstance, as I have indicated, of no consequence here except so far as the existence of those glaciers may be a barrier to entry

into the interior region.

Something was said, likewise, about this country undergoing geological changes. I trust it will not be urged that we ought to wait for the development of Alaska until some later geological age. The fact about the volcanoes is that the volcano of which you have heard is away down here on one of the Aleatian Islands. It got into a state of violent eruption some time ago, and the ashes were carried a long distance away, so that it became necessary to bring out the cattle that were in that locality.

There are no glaciers in the vast interior region of which I have spoken, though perhaps I should qualify my statement by saying that in the Tanana Valley the primal glacial frost still exists, and the ground there is frozen to unknown depths. I shall show you, a little later on, that that does not at all interfere with the cultivation of the ground there; indeed, it contributes to the growth of crops in that locality.

Now a word further in relation to climate.

We need not stop to consider what are the extremes of temperature in the region adjacent to the coast. What we are concerned in is to find out what they are in the interior region. That region has a comparatively slight rainfall. The winds are robbed of most of their moisture by the high mountains before they reach there, so that the Tanana Valley, for instance—and the records are exact with reference to this matter-has an annual rainfall of from 9 to 14 inches. about the same rainfall that we have in the State of Montana, or perhaps a little less, our rainfall there running from about 11 to 17 inches. The mean annual temperature of that region is from 50 to 58° F.; but we are concerned more particularly with the extremes. In the summer time the mercury goes as high as 96°, or in that neighborhood. Of course, the winter temperature is very low, averaging from zero to 15° below zero. The sunlight is distributed in such a way that about threefourths of all the sunlight which comes to the country is received in the summer season, the season of growth.

We shall better understand about this matter by comparison. Let me invite your attention, then, to the latitude of this region as compared with the northern regions of Europe. For the purpose of comparison, I have caused to be placed upon one side of this map of Alaska a map of Europe and upon the other

side a map of Asia.

Cordova, Valdez, and Seward are all practically in latitude 60. Those are the towns on the seacoast of Alaska which may be made the southern termini of any roads that may be built. The capital of Norway, Christiania; the capital of Sweden, Stockholm; and the capital of Russia, St. Petersburg, coincidently are all upon almost exactly the same parallel of 60. Let me indicate them to you. That is the parallel of 60 in Europe [indicating on map]. Of course, the lines are curved upon the map, and I am obliged to hold the ruler in a horizontal position. I am running the ruler practically in such a direction as that it crosses the three cities of which I spoke—Christiania, Stockholm, and St. Petersburg—as they appear on the map. You will observe, accordingly, that nine-tenths of the Kingdom of Norway, as I should estimate it roughly from the map, lies north of the parallel of the three cities in Alaska which I use for comparison, that perhaps three-fourths of Sweden lies north of it, and I should say one-third of the great Empire of Russia in Europe.

We can not doubt that those regions not only abound in great wealth in other lines, but afford great wealth of agricultural products. They support a population of over 10,000,000 people without the natural resources, as I have indicated to you, which are shown to exist in our own great Territory of Alaska.

I want to read what the commission says by way of comparisen in the matter of climate as between Alaska and these countries. I read from page 28 of the report, as follows:

The climate of the coastal province is comparable with that of Scotland and the Scandinavian Peninsula, in Europe, but is somewhat warmer. That of the inland region is not unlike the climate of Alberta, Saskatchewan, and Manitoba, in Canada. The northerly province bordering the Polar Sea is the only one in which arctic conditions prevail.

The experience of those long resident in Alaska has shown the climate to be very healthful.

Of the Yukon it may be said that the summers are cool and that bright, clear weather prevails most of the time. The aridity of the climate makes the extreme temperatures of winter easy to resist. All who have lived in this inland region are agreed that the winter climate is far more healthful than in many parts of the States where the temperature is higher, but where there is an excess of humidity. Residents of the interior have no fear of the extreme cold that often prevails during the winter months. The winter journey between Fairbanks and Valdez is made by men, women, and children and offers no serious hardships except when storms are encountered.

I spoke of the population of these northern countries of Eu-There are but 35,000 white people in Alaska to-day, with a total population of something like 64,000.

COMMERCE.

What has been done in the past? As told you by the distinguished Senator from Oregon [Mr. Chamberlain] yesterday, since the acquisition of Alaska from Russia it has contributed to the wealth of the world almost \$500,000,000. Its total output-that is, what it produces annually-runs now in the neighborhood of \$50,000,000. It purchases from our merchants and of our products an aggregate now of nearly \$25,000,000 annually, the total commerce of the Territory last year being, as reported from official sources, \$72,000,000.

Thus Alaska has a commerce with us which exceeds what we have with 37 of the countries of the world, including Scotland, Spain, and Russia, and now it surpasses even that of China. China last year contributed a commerce of something like \$50,000,000, and the Philippines only about \$20,000,000.

RESOURCES.

Now, as to the resources of Alaska.

Of the \$500,000,000 thus contributed by Alaska about one-half thereof, or \$250,000,000, consists of gold from its mines. Gold is very widely distributed throughout this region so blessed with mineral wealth. The producing areas may be grouped, however, so that we can understand more definitely about it.

The regions which have produced most bountifully are three. One of those, the Tanana-Yukon region, between the Tanana and the Yukon Rivers, is made prominent upon the map, as you will' see here, by little red dots. That region has already produced something like \$70,000,000 in gold. The annual output amounts to about \$9,000,000.

The Innoko-Iditarod region lies between the Kuskekwim River and the Yukon, the location being indicated likewise by the red dots.

The third region is the Seward Peninsula, a region that is tributary to the city of Nome.

Most of the gold is produced from placers, and the method of working is of particular interest to us here. I advised you a while ago that the original glacial frosts still prevail in this interior region, so that it is impossible to do the placer mining in the ordinary way, by sluicing, without first thawing the ground. In order to do the thawing, fuel is necessary. The digging is ordinarily done in the winter. The earth is taken to the surface, where it lies in a frozen condition, and then, when the spring brings the floods in the streams, and the earth thus taken out thaws again, the gold is washed out of it by the usual process. Immense quantities of fuel, however, are necessary in order to extract the gravel in the first place. In the Tanana region wood is used, with the result that the forests are being rapidly destroyed and consumed in order to provide the fuel. It costs about \$15 a cord in that locality at the present time, the equivalent of about \$40 a ton for lignite coal, which exists in unlimited quantities only 50 miles away.

Under these circumstances it can be very readily understood that it is possible to operate successfully only the extremely rich placers, the attendant expenses making it prohibitive to work

any ground except that of the very highest character.

The next advance in the industry of placer mining, after the ancient one of sluicing, is to operate by means of dredges. Dredges are being operated very successfully in certain parts of this country now. I shall refer to that matter directly. They are being operated very successfully in my State and in the State of California. However, unless electrical energy is available fuel is needed to produce power to operate dredges. From what was told you by the Senator from Oregon [Mr. Chamber-LAIN] in his discussion of this matter on yesterday you will understand that the transportation of great dredging machinery into this interior country is practically prohibited by the high freight rates that prevail. Accordingly, very little progress has been made in the way of working by dredging the leaner placer deposits in that locality, but dredges are being successfully operated down the Yukon at Dawson, and 31 dredges are now extracting gold from placers in the Seward Peninsula which could not be worked by the more primitive method.

Just reflect upon this matter for a moment. With all this coal in sight here, oil is carried from California to provide power with which to operate those dredges and, for that matter, to operate the railroads as well.

In any new country in which gold abounds the prospector ordinarily first discovers, and there are worked out, the placer beds. He knows, however, that the gold found in the placer beds of necessity comes from quartz veins in the adjacent hills. Accordingly, he goes to prospecting for the quartz veins. Quartz veins have been discovered all through the interior region of Alaska from which the placer veins have been fed, but ordinarily quartz veins can be operated in a profitable way only by means of machinery, and it has been found impossible to get the necessary machinery in at any cost which will permit their operation. So quartz mining has not progressed to any considerable extent in the interior region.

Next, I want to refer to the matter of coal. Coal, as well, is very widely distributed in Alaska. The three principal fields, however, are the Bering field, to which I now point [indicating on the map], a distance of only about 25 miles from the seaboard; the Matanuska field north of Seward, adjacent to the Susitna Valley, to which I now point; and the Tanana field, to which I have made reference, in the neighborhood of Fairbanks.

The coal in the Tanana field, as I have told you before, consists of lignite; but in the two other fields are found bituminous, semibituminous, and anthracite coal. In the Bering field anthracite coal has been discovered to the extent of 22 square miles, and bituminous and semibituminous coal to the extent of about 28 square miles more, the total surveyed area in that neighborhood being about 50 square miles.

The Matanuska field is about twice as large. It comprises about 100 square miles, the exact extent of the anthracite coal not yet having been determined.

The Tanana field, however, is the great field in matter of extent and quantity. It covers an area of 165 square miles; and we have the testimony of Dr. Brooks, who is perhaps better informed upon this subject than any other man living, to the effect that there are in sight in that field 9,000,000,000 tons of coal, and he says that he has himself measured seams that were more than 20 feet thick.

Mr. BACON. Right in that connection, can the Senator tell me, in furtherance of the inquiry made of him before, how far that coal field is from a navigable river?

Mr. WALSH. I have miles from the Tanana. I have answered the Senator. It is just 50

Mr. BACON. That is where this inexhaustible supply of coal, suitable for all purposes, is located?

Mr. WALSH. The testimony in respect to that subject is that that coal probably never will be exported. It is too far to carry it to the coast, considering the quality of the coal; but it is invaluable for local use, and it would serve all the purposes of fuel and for the development of power in all of the Yukon-Tanana region to which I have referred.

Mr. BACON. But the statement is that it would not be desirable to be carried to other localities?

Mr. WALSH. No; we must rely on the other two fields for coal for export.

Mr. BACON. How far are they from the water? Mr. WALSH. The Bering field is only 25 miles

The Bering field is only 25 miles from tidewater; but by the branch recommended by the committee, in view of their doubt as to the adequacy of the harbor at Controller Bay, it would be 38 miles by one line and 51 miles by another.

Mr. BACON. How great is that supply?
Mr. WALSH. It is 50 square miles in area, and the veins are remarkably thick.

Mr. LANE. I should like to have the Senator explain to the Senator from Georgia the Matanuska coal fields, how far they are from the ocean, and the type and character of the coal there.

Mr. WALSH. I have already indicated that the coals are bituminous, semibituminous, and anthracite. My recollection now is that those fields are about 185 miles from Seward, which is the southern terminus of the Alaska Northern Railway. They are about 80 miles from the present northern terminus of that road at Kern Creek, which flows into Cook Inlet; but Cook Inlet is frozen in the wintertime and affords a port for only six months in the year. I shall advert to that a little later on when I come to the route considered by the commis-

Mr. BACON. If the Senator will not consider it an undue interruption, I wish to explain the object of my inquiry. As I understand the purpose of this legislation, it is in a large measure, if not in much the larger measure, to secure the means of getting this inexhaustible supply of coal to market. The question I had in mind when I made the inquiry of the Senator was whether the purpose would not be accomplished by a railroad limited to the particular length necessary to get to this inexhaustible supply.

Mr. WALSH. I anticipate for a moment, and will say to the Senator that one might start in at Controller Bay and build a line there of 25 miles to the Bering coal fields and reach what might be considered to be practically an inexhaustible supply of coal.

Mr. BACON. That is what I wanted to know.

Mr. WALSH. But if that was all he did, the interior of Alaska would be left without any transportation facilities by railroad at all. As I view it myself, although I regard the supplying of the Pacific coast and the Navy with coal from this source as a consideration of the very greatest moment and would not attempt to minimize it at all, yet I do not regard it by any means as a consideration deserving of higher regard than the development of the great region of which I shall have the honor to speak more in detail later on.

Inasmuch as some considerable question has arisen in relation to the character of the coal in Alaska, I am going to content myself with a reference to what is found in the record upon which we proceed, the report of the commission, and the testimony of Dr. Brooks, who speaks of his own personal knowledge. I will remark, however, that chemical analyses of these coals have shown that they are quite equal, so far as that kind of a test goes, to the very best coal that is found in the Appalachian region, and that may be said speaking with reference both to the bituminous and the anthracite coal. It is a fact, however, that the coal is considerably broken up-at least in the Bering field, so far as it has thus far been exposed by

developments, which, it may be said, are inconsequential.

However, Mr. President, I ought also to say that some tests of the utility of this coal for naval purposes, not altogether satisfactory, have recently been made. A test has been made, as you were told, of the Bering River coal. About 900 tons have been mined from the Matanuska field for the purpose of making a test on one of the ships of the Navy, but it will be impossible to get it out in order to make a trial of it until some time next season. The test which has been made, however, of the merits of the Bering River coal has not met with the expectation of those most sanguine with relation to it. I do not myself regard that as a matter of any particular consequence at all. I have not the slightest doubt but that after this great deposit is developed and we shall get into the interior of it,

there will be found coal there that will meet every requirement of the Navy. Anyone who is familiar at all with coal mining will recognize that that coal which lies upon the exterior of the bed, that coal which is first reached by slight development, would ordinarily be subjected to the action of the elements and would not have the high qualities that the coal which lies deeply embedded in the earth would be likely to show.

I read you now for your information what is said in the

report concerning this coal.

Mr. OVERMAN. From what page?

Mr. WALSH. I read from page 33:

Mr. WALSH. I read from page 33:

The coal fields of central Alaska are extensive and include some of the best coal of the Territory. High-grade steaming and coking bituminous coals as well as some anthractic are found in the Bering River and Matanuska coal fields. Much of this coal is crushed and will furnish a large percentage of slack, and in many instances the coal beds have been so deformed as to prevent their profitable mining. While the percentage of the coal beds that can be profitably mined can only be determined by actual exploitation, yet the fact remains that these two fields contain much workable coal of a higher grade than any now known in that part of the North American Continent tributary to the Pacific Ocean. Though the high-grade coals, so far as known, are limited to these two fields, lignitic coal is widely distributed. The Nenana field, lying about 60 miles southwest of Fairbanks, is the largest of the lignitic coal fields, but a similar grade of fuel has also been found in the Susitna Basin and reported in the upper Kuskokwim Basin.

Now, Dr. Brooks says

Mr. SMOOT. Will the Senator yield to me for just a moment?

Mr. WALSH. Certainly. Mr. SMOOT. Is it not a fact that the testimony which has been taken shows that the crushed coal is more in the Matanuska field than in the Bering field?

Mr. WALSH. I think, on the contrary, the crushing is more in evidence in the Bering field than in the Matanuska field.

Mr. SMOOT. I will say to the Senator that I have read two or three reports. I may be mistaken, but the impression that was made upon me was that while the Bering field had been worked a little more than the Matanuska coal field, the lay of the country demonstrated the fact in the minds of those who made the examination that the coal would be crushed more in the Matanuska field than in the Bering field.

Mr. WALSH. I may be in error about it, but my recollection

is the other way.

I may pause further to say that according to my recollection the crushing of the coal referred to does not in any manner diminish its value for coking purposes. It does not affect its value greatly for steaming purposes. The beds simply do not provide the lump coal as is the case where the disturbance has not been so great. Dr. Brooks is extremely conservative in his testimony. He says:

To take up the question of coal first, we have here in the Matanuska Valley a coal field which aggregates 80 and possibly 100 square miles. Mr. SMITH of Arizona. From what is the Senator reading,

please:

Mr. WALSH, I am reading from the testimony of Dr. Brooks before the Senate Committee on Territories, at page 530. Mr. SMITH of Arizona. The Senator is reading, then, from

the hearings before the committee?

Mr. WALSH. Yes, before our committee. Dr. Brooks says: Mr. WALSH. Yes, before our committee. Dr. Brooks says:

The coal is of the same general character as that of the Bering
River field. So far as we know, there is little to choose between the
two. The analysis would indicate that the Bering River coal might be
better for steaming purposes and the Matanuska coal a little better for
coking. But I do not believe that the evidence on this is sufficient,
because there has not been enough mining to permit of a fair test of
the coal. So that from our present consideration we have got to regard the two coal fields as very much on a par as to quality. The
Bering River field seems to be somewhat smaller than the Matanuska
field is a bituminous—it varies from a low-grade to a high-grade
bituminous coal. Also there is some anthractie in the eastern end of
the field. Of that we do not know very much, but, in any event, I
think the Alaska anthracite is less valuable than the steaming and
coking coal. coking coal.
Senator Walsh, Is that the only place where the anthracite is

Senator Walsh. Is that the only place where the anthracite is known?

Mr. Brooks. We have anthracite in the Bering River field and in the Matanuska field.

Senator Walsh. Why is not that valuable?

Mr. Brooks. Because the use of anthracite on the west coast is very small. They, as a rule, do not use it for steaming and do not make coke out of it, and the climatic conditions outside of Alaska are such as not to encourage the use of it—domestic use. I suppose, possibly, if you could be assured that the anthracite could be produced at the same cost as the bituminous, it would be used for steaming. But, as a matter of fact, the anthracite of both those fields occur in rocks which are more disturbed than those associated with the bituminous coal. That is probably the reason the coal is anthracite, because the rocks are more folded. This condition will increase the cost of mining. If that is the case, and also because the anthracite seems to be more crushed than the bituminous coai, in the end the product will cost you more and would not be worth much more than this high-grade bituminous coal.

Senator Walsh. Those conditions obtain likewise in Pennsylvania, do they not?

Mr. Brooks. The Pennsylvania anthracite is not crushed. Outside of the railroads the domestic use forms a very large element in the anthracite consumption. The west coast has not been accustomed to use authracite, and it is rather questionable whether it would be extensively, because of difference in climatic conditions compared with the East.

tensively, because of difference in climatic conditions compared with the East.

Mr. Wickersham. How does the anthracite coal of Alaska compare with that in Pennsylvania?

Mr. Brooks. It is not quite as good as the best of the anthracite of Pennsylvania, as far as we know it. There have been only a few analyses made of it.

Mr. Wickersham. How does the bituminous coal compare?

Mr. Brooks. Some of the bituminous coal is as good as our best bituminous coal of the East. That is, the famous Pocahertas, New River, and Georges Creek coal of the Eastern States.

Mr. Wickersham. Those are the naval coals?

Mr. Brooks. Those are the naval coals.

Mr. Wickersham. Do you think the coal of Alaska is equal to that standard?

Mr. Brooks. So far as the chemical composition goes; yes, sir. In the physical composition it leaves much to be desired, so far as we know; that is, the percentage of lump coal would be very much smaller.

smailer.

In regard to Navy use, I will say that if there was a large coalmining industry producing a large quantity of coal, the lump coal could be used by the Navy and the finer other coal consumed by other industries. If you mined only enough for the Navy, you would have to take it as it came, and it might then be found to contain too large a percentage of slack for Navy use.

Mr. CLARK of Wyoming. Will the Senator yield for just a question there in regard to Dr. Brooks's testimony?

Mr. WALSH. Certainly.

Mr. CLARK of Wyoming. I notice he speaks there in regard to the coals used on the Pacific coast. Does he anywhere give an estimate of the amount of coal that is used on the Pacific coast for domestic and power purposes?

Mr. WALSH. He does

Mr. CLARK of Wyoming. Does the Senator recollect how much it is?

Mr. WALSH. I do not, but the commission makes a special report upon the opportunities for marketing the Alaska coal, if it could be produced.

Mr. CLARK of Wyoming. Does the Senator recollect what they estimate the market to be?

Mr. WALSH. No; I have not the figures now in mind. am going to pass now to some of the opportunities for the utilization of the coal if it could be mined, for it will be understood that entries having been made under the provisions of the coal-land laws prior to 1906, all the coal lands of Alaska were withdrawn from entry, and consequently there has been no opportunity since that time to utilize these deposits.

I referred some time ago to the importation of oil from California for the purpose of developing power in Alaska. Alaska, with all its great deposits of coal, imports annually from British Columbia about 30,000 tons of coal, and her total fuel bill for coals imported and oil brought from California amounts to the enormous sum of a million dollars a year. Coal costs in Alaska anywhere from \$9 to \$20 a ton. If this coal should be found available for the use of the Navy-and my own idea of the matter is that there is no doubt that an abundance of coal for that purpose will be found, and of the very highest character-the figures concerning the consumption of coal by the Navy will be of some interest.

The Pacific Fleet now requires about 150,000 tons annually. About 80,000 tons more are needed for the Philippines and about 20,000 tons in Hawaii. So the present consumption of coal in the Pacific waters amounts to about 250,000 tons. When the canal is completed it is estimated that it will require at least 300,000 tons of coal annually to meet the needs of the Navy in the Pacific, and it is contemplated that great depots of coal shall be established at various points along the coast. So for a number of years after the canal is opened the Government will be in the market for the purchase of coal for use in the Pacific to the amount of about 450,000 tons annually. transports such coal as it needs from Norfolk, Va. It costs there about \$3 a ton, and from \$7.25 to \$8.50 laid down at San Francisco or at Bremerton, the carriage being, generally speaking, about \$5 a ton for bringing it around the Horn.

So, Mr. President, if we assume that the Navy consumes 300,000 tons of coal annually in the Pacific and the cost of transportation around the Horn is \$5 per ton, and that Alaska coal could be obtained, as it could be obtained, at a cost of at least \$5 a ton less, the construction of a railroad would result in a saving to the Government upon the coal needed by the Navy alone of an aggregate of at least a million and a half annually.

What can it be produced for there? Mr. Ryan, who is interested in the Controller Bay Railroad, which is projected from Controller Bay to the Bering coal field, a distance of about 25 miles, declared before the committee that if he were permitted to go into the Bering field and simply mine coal-he did

not ask for any grant or title at all, but simply for permission to go there and take the coal from the Government lands and deliver it to the Government at the wharf at Controller Bay he could lay it down for \$2.50 a ton. He says he can mine it for \$2, and that is in conformity with all the testimony, and he would be very glad to get 50 cents a ton for hauling the coal down hill, a water grade we might say.

The construction of a railroad by the Government, such as was suggested by the distinguished Senator from Rhode Island [Mr. Lappitt], of 25 miles from Controller Bay to the Bering field, it is in evidence here, would not cost more than a million So the construction of a railroad from the coast to the Bering field would pay for itself in what the Government

could save on the coal consumed by the Navy in a single year.

Mr. President, the withdrawal of the coal lands of Alaska at the time the order was issued forbidding their further private entry merits universal and unqualified commendation. have kept that great wealth locked up now for a period of eight years, since 1906, under circumstances to which I have adverted here, approaches in gravity to a crime.

Let the issue be clearly understood. Certain interests powerful in Alaska—the evidence is overwhelming and we can not resist the conclusion-had set about to grab these great, rich coal deposits by the common device of dummy entrymen. ningham and his associates located a large number of claims in the Bering River country, and then bonded them to the Gug-genheims. The bond contract is in the record here. Frost and Osborne, who had acquired the Alaska & Northern Railroad, headed for the Matanuska field, went after that. The Cunning-ham claims have, after long delay, been adjudged by the Inte-rior Department to be void. My information is that the Frost and Osborne people have abandoned the effort to patent their alleged claims in the Matanuska field. The withdrawal order operated to prevent further misapprepriations.

Mr. President, it was stated here yesterday, and that declaration has been repeated over and over again, that Congress has been supine; that it has stood by here and done nothing to authorize the lawful appropriation of these lands, and that this body and the coordinate branch are responsible for this condition of affairs. Nothing is further from the truth. Congress acted with reasonable promptitude under the circumstances. The old law, which permitted a single association to appropriate no more than 320 acres, invited evasion, because such an area as that is insufficient to warrant the expenditures necessary in order to make the development, to secure the equipment, and to provide adequate transportation facilities, if the mining of coal is to be carried on upon a commercial basis.

In the year 1908, only two years after the withdrawal, Congress passed an act intended to meet the case. Of course, monopoly of these lands, as they were being monopolized, was to be prevented. So the act of 1908 provided that instead of 320 acres an association could enter four sections, 2,560 acres; and then the people's interests were apparently entirely safeguarded by a provision to the effect that if the lands thus appropriated should ever fall into the hands of a monopoly, or any combina-tion in restraint of trade, the title should be forfeited to the Government of the United States.

From that time until this that has been the law, the sovereign will of the people of the United States, who looked hopefully to the opening of this great source of power in Alaska. people of the Pacific Coast States, particularly, had become tired of paying to British ships \$5 a ton for hauling coal around Cape Horn from the Atlantic ports; the people of Alaska, who were paying a million dollars a year for coal from British Columbia and oil from California, looked longingly, under the safeguards of this law, to the mining of coal in Alaska.

Mr. President, it was not a few men who wanted to steal coal who desired to see this law enforced, but it was millions of people who wanted to buy coal and to burn it, and who were perfectly willing to pay for it, who hoped that when this act

was passed they would have an opportunity to get Alaska coal.

Not an entry has ever been made under the act of 1908. The withdrawal order of 1906 has not only continued in force to this day, but it was confirmed, ratified, and reissued by the order of the President in the year 1910 upon the passage of the act of that year permitting the withdrawal of lands. So it remains to this day.

You ask why. Simply because some men who are powerful in influencing public opinion, who are skilled in the art of using the press and periodicals for the purpose of exciting public sentiment, do not like that law. They do not want any law permitting the sale of coal lands in Alaska. They want a leasing law, and until the present time they have succeeded in paralyzing the hand of the President of the United States,

whose oath of office requires that he shall see that the laws be

faithfully executed.

Mr. CLARK of Wyoming, Mr. President—
The PRESIDING OFFICER (Mr. Brady in the chair). Does the Senator from Montana yield to the Senator from Wyoming?

Mr. WALSH, I do.

Mr. CLARK of Wyoming. If the Senator will permit me, I should like to ask him if he has any well founded belief that this influence will act otherwise than it has acted in case this bill should be passed?

Mr. WALSH. I have not, and that is just the point that I

am coming to.

Mr. BACON. Will the Senator permit me to ask him a question? I am not familiar with the subject. Do I understand the Senator to say that an Executive order has nullified an act of Congress?

Mr. CLARK of Wyoming. It has been done for 20 years. Mr. WALSH. Practically so.

Mr. BACON. The Senator says practically so. I want to know for information in what way. Is there a formal and explicit issuance of an Executive order which conflicts with the

provisions of a statute?

Mr. WALSH. I shall be glad to explain. The statute provides that anyone may go upon the public domain and survey and mark out a claim containing coal, and then he is permitted to go to the land office and enter that land. The statute provides that, if it is within 15 miles of a railroad the price must be not less than \$20, and if it is more than 15 miles it must be not less than \$10 an acre, but the exact price is not fixed. It becomes necessary, therefore, for the Executive authority to fix the price at which any particular tract of coal lands can be entered. Executive then withdraws all coal lands from entry for the purpose of classification. The order in this case specifies also that the withdrawal is in aid of legislation, a ground not contemplated by the statute. In other words, he withdraws the land until it can be classified and the price at which it is subject to purchase shall be fixed. Then he does not attempt to classify and does not attempt to fix the price. Accordingly, you go to the land office and the answer is there that the land is withdrawn. go to the General Land Office, here, and you ask why, and the answer is, "We have not yet classified the land, so that we do not know what price to ask for it."

Mr. BACON. Then, there is that defect in the law, if I understand it correctly, that gives to the Executive power to withhold the rights granted by the law until there is a classification. Is

that it?

Mr. WALSH. Yes, sir.

Mr. BACON. Possibly we had better correct that defect in the statute.

Mr. WALSH. Mr. President, I was speaking about this paralysis of the law. How is it effected? It is done by the very simple process of branding through the public press and other similar means any man as a plunderer of the public or a defender and an apologist for the plunderers of the public who happens to entertain any views upon this and other related questions differing from those entertained by the gentlemen thus influential. They want a leasing law. Thus far they have constituted a minority of this country. The majority of the people of this country, through their chosen representatives, have declared in favor of a law for the sale and disposition of these lands. The advocates of the leasing plan have not yet become a majority, but they are a minority exercising the power of veto over the execution of the law, and they exercise it in the way I have indicated. Dread of an onslaught of that character directed against any public official who should attempt to enforce it has operated to make this law a dead letter.

Now, Mr. President, we are not going to build any railroads in Alaska utilizing power generated from coal carried around Cape Horn or imported from British Columbia or by means of oil transported from the State of California. This bill must be accompanied by another measure which will permit the mining of the coal in Alaska. Why, Mr. President, after the road is built, if it is to be operated at all, the carriage of coal must constitute the chief item of revenue for it. For myself, I have rather despaired of ever seeing the present law executed. I have argued for years against the wisdom or the policy of a law permitting the leasing of coal lands, and I have insisted that the policy which has been justified by a century of our history of the absolute disposition of the public lands is the proper course to pursue. But I am ready to surrender my own convictions in the matter in the hope that these rich coal lands may be made available to the people of the United States. I am ready now to vote for a law providing for the leasing of coal lands in Alaska. I am willing that the experiment at least shall be tried. We tried it in connection with the lead lands of this country and it was a dismal failure; but I recognize, Mr. President, that conditions now are quite different from what they then were. Alaska affords the best field for experimentation in the matter, and I am willing to try it there and see how it will work.

I read with much interest this morning the bill offered by the distinguished Senator from Utah [Mr. Smoot] on yester-day providing for the leasing of coal lands in Alaska, and I trust that we may be able to get together and agree on some measure which we shall be assured beforehand will be actually

put into operation.

The distinguished Senator from Nevada, the chairman of the Committee on the Territories [Mr. PITTMAN], likewise on yesterday introduced a bill providing for the leasing of lands in Alaska, containing a most excellent provision. I have looked with some degree of haste over the bill introduced by the Senator from Utah, and its general features commend themselves very highly to my judgment. There is, however, a feature of the bill offered by the Senator from Nevada which deserves great consideration, in view of the suggestion made by the distinguished Senator from Idaho [Mr. Borah] on yesterday. It contemplates the survey of these coal lands and the leasing of each alternate tract, the Government retaining the intervening tract; so that if by any chance the tracts leased should fall into the hands of a monopoly, the Government would still own the alternate sectious, and it might then itself operate those lands or make some other provision which would prevent extortion or other evils of like character.

I desire to say, however, that I trust that the consideration of this question will not be embarrassed at all by the inquiry which was involved in the question of the Senator from Idaho as to whether, if we did have a leasing law, the lessees would not combine among themselves and thus keep up the price of

coal, so that no benefit would accrue to us after all.

In the first place, Mr. President, that seems to me a condition which we have no right to apprehend will exist. Everybody must admit that there exists to-day the most spirited competition in the production of bituminous coal. I pointed out to you awhile ago that the Navy pays \$3 per ton for coal at Norfolk, Va., which includes \$1.40 for transportation. So, to-day the West Virginia coal is sold at the mines for Navy purposes at somewhere in the neighborhood of from \$1.50 to \$1.60 per ton. You can all understand that such a price as that could not prevail were it not for the fact that a substantial competition does exist. The Senator from Iowa [Mr. tial competition does exist. The Senator from Iowa [Mr. Cummins] attests that competition is the rule in his State among the producers of bituminous coal. I can add my testimony with reference to conditions in my State; competition does exist there; and I see no reason at all why competition should not exist between lessees of the Government operating in these great fields of Bering and Matanuska if that system should be adopted. But if apprehension upon that score should be felt, the condition will be provided for most fully by such a provision as is contained in the bill of the distinguished Senator from Nevada.

So. Mr. President, I trust that we at least shall not be guilty of further delay; but that as soon as this bill is out of the way we may take up these various bills providing for the disposition of the coal lands of Alaska frame a generally acceptable measure and see if we can not put the two on their way together, with some assurance of the success of both.

I now pass to a feature of the subject which is of very great importance, and in which I feel the keenest interest; that is to say, the agricultural resources of this great Territory found in its interior. You will understand, of course, that the agricultural possibilities are confined entirely to the interior country, for those of the coast are for the present entirely negligible. I referred to the temperature of that region which runs, as I said, from 50° to 58° in the summer time with a maximum of 90°, or thereabouts, very like that of our section of the country and of Alberta, Saskatchewan, and the other Provinces of Canada to the north, in the summer season. Bear in mind, likewise, that they have sunlight until 10 o'clock at night, so that annual vegetation, owing to the abundance of sunshine during the growing season, sprouts, grows, and matures at a pace that is scarcely conceivable to those who reside in regions farther Every spot on the earth, Mr. President, has just exactly as much sunshine in a year as has every other spot. The North Pole has six months of sunshine and six months of darkness; the Equator has just exactly the same. Of course here the sunshine is concentrated at the very period when growth is possible. The growing season in the interior of Alaska is from. say, the first or the middle of May until about the middle of September. The growing months might be said to be May, June, July, and August-four months. I appreciate very readily

that by those who live in regions of longer growing seasons it will be thought that that is altogether too brief a period for the maturity of crops; but, as a matter of fact, ours is not so much longer than that; and, although it is not necessary for us to rely upon it except in the higher altitudes, we have a kind of oats in Montana called "90-day oats," because it will reach

its maturity in 90 days from the time it is seeded.

In reference to the agricultural products of Alaska, I am going to refer, as I did in reference to the mineral products of Alaska, to the official evidence before us. They raise annually through all that region, through the valley of the Tan-na and the valley of the Yukon annual crops of oats, barley, rye, and potatoes They have matured in many years wheat, and it is not at all unlikely that varieties of wheat will be developed there that will mature annually. We have official records in relation to the possibilities agriculturally in this region, because the Government has maintained for a number of years two agricultural experiment stations there-one at Fairbanks and the other at Rampart—and the reports from those agricultural sta-tions are available to you all. Last year at the Fairbanks station their oats yielded 115 bushels to the acre; their wheat yielded 67 bushels to the acre; and their potatoes yielded 260 bushels to the acre.

All of that region is covered with reindeer moss, as is most of the interior of Alaska. That moss prevents the sun from penetrating through the soil, so that it is kept in a frozen condition. But once you remove the moss, the soil thaws to a depth of several feet and permits cultivation, while the frozen ground below keeps continually giving up its burden of moisture for the support of the plant life above. Thus the frost below actually aids in the growth of vegetation in that neighborhood.

I am going now to refer to what the commission says con-

cerning the agricultural possibilities of this region. Before reading this I desire, however, to say that the Alsek and White River Valleys, with which the statement is introduced, are in Canadian territory. I now point to them. This [indicating] is the Alsek Valley, and the White River Valley is here [indicating]. They approach the upper portion of the Tanana Valley. With that explanation I read, as follows:

The valley floors and slopes of the Alsek Basin include much grassland. Agricultural development is undoubtedly possible in this field, though little has been done except some gardening at a few places. Grass grows especially luxuriantly in the flats at the eastern end of Lake Kluane—

This [indicating] is the eastern end of Lake Kluaneand around the other lakes. The upper White River Basin has long been known for its excellent pasturage. The gravel bottoms of the White River are covered with wild peas, which furnish excellent feed for stock. In this Province the snowfall is so light that it is possible to winter stock without feeding. This experiment has been repeatedly tried and has been fairly successful.

You will understand that the Tanana Basin is all in our territory. What has thus far been said is with reference to the territory just across the line in the Canadian country. I continue:

Similar conditions prevail in the upper Tanana Basin, which is also known for its extensive tracts of grazing land. These grasslands are found not only in the valley bottoms, but where the forest covering has been burned off extend up the slopes of the mountains to timber line. It may be said that these conditions prevail throughout much of the Yukon-Tanana region, where grasslands are found up to an altitude of some 3,000 feet.

It may be said that these conditions prevail throughout much of the Yukon-Tanana region, where grasslands are found up to an altitude of some 3,000 feet.

The lower Tanana Valley from the Delta to the Yukon is one of the most fertile tracts known in Alaska. Long before any farming was attempted in this region it was known for its fine grass and heavy stand of timber. Since the establishment of Fairbanks as a mining camp, thus giving a market for farm products, many ranches have been taken up, and several hundred acres are under cultivation in the vicinity. Experience has demonstrated that farming is not an experiment, but an industry which can be profitably carried on, provided the product can be marketed. The work of the Government experiment farms at Fairbanks and Rampart indicates the great variety of agricultural products which can be successfully raised. Farming has been carried on in the river bottoms and also on the hill slopes. Experience has shown that the slopes covered with birch forests are specially favorable for raising crops. This land can be easily cleared, and the soil is found to be much richer than that of the valley bottoms, and is apparently less susceptible to early frosts.

It is conservative to estimate the areas of agricultural land in the Tanana Valley at between 2,000,000 and 2,500,000 acres. In addition to this, there are extensive tracts of agricultural land in the adjacent portions of the Yukon Basin. The Government records show that the growing season in this general field varies from 90 to 120 days. It should be noted that plant growth is much more rapid in this latitude than it is farther south, because of the large amount of daylight. Oats, rye, and barley have been successfully ripened at the Government stations as well as on private ranches. The Government records show that certain varieties of wheat can be ripened. At the Government stations as well as on private ranches. The Government for the farm products which are in local demand. These include, above all, potatoes and o

beets, turnips, and cauliflower, though this by no means includes all the varieties which have been raised.

Of the agricultural importance of the Tanana Valley there can be no question. The district can not be expected to raise products which will be valuable for export, at least under conditions which can new be foreseen. It should, however, become in part self-supporting by raising a large amount of the food material now imported from outside. Though cattle raising has not been carried on to any extent; yet it is probable that this can be successfully done in competition with meat brought in from the States. The snowfall is, however, heavier than in the upper White River Valley and some winter feeding would be necessary. Whatever experience may be shown in regard to raising cattle, there should be no question that a local dairy industry could be developed.

Mr. President, of the disadvantages under which agriculture is carried on in this locality we may form some estimate from the fact adverted to a while ago, that wood costs \$15 a cord. Farmers who have already gone into that locality, the tes-timony is, are digging up the stumps on the land which they have cleared in order to burn them for fuel in their homes, while there are limitless quantities of coal from 50 to 100 miles away from them which they can not touch.

I want to add, Mr. President, to this testimony what is said by the commission in relation to another great valley, the Susitna. The Susitna Valley is on the line of one of the routes investigated by the commission in connection with the duties devolving upon it. I point to the Susitna Valley. [Indicating on the map.] It is suggested that a line might be run from Seward in a direction practically north to the Tanana at Fairbanks. That road would pass through the great Susitna

Valley. The commission says in reference to that region:

The agriculture areas of this province, including land suitable for tiliage and grazing, are large. While estimates of the extent of these lands can be little more than guesses, it is conservative to say that the Susifna and Matanuska Basins include 2,000 to 3,000, the Tanana 3,000 to 4,000, and the Kuskokwim 2,000 to 3,000 square miles of agricultural lands lying less than 1,500 or 2,000 feet above sea level. More complete data may show the agricultural lands of the province to exceed the above by many thousand square miles, but in any event the above figures will show that this is an important field for the pioneer farmer when railways have opened up the land, and thus transportation furnished to the local markets. It should be noted that there is also some agricultural land in the Kenai Peninsula—

That is in this neighborhood, between Prince William Sound and Cook Inlet [indicating on the map]-

where there are many gardens and several ranches.

The above-described lands, where not timbered, are in many places covered by the luxuriant growth of grass which gives evidence of their fertility. Their adaptability to growing of potatoes, as well as forage crops, has been proven in many places. It has been shown elsewhere in this report (see pp. 51-53) that in the Tanana and in parts of the Yukon Basin barley, oats, and rye can be matured, also that the experiments in growing of wheat at Fairbanks and at Rampart have been a success. Conditions for agriculture are certainly as good in the lower Susitna Basin as in the Fairbanks district, for, if anything, the growing season will be longer. Taking it all in all, the Susitna Valley offers an excellent field for agricultural development, and probably the best in Alaska. It is also fair to assume that the conditions in the upper Kuskokwim Basin are similar to those in the Tanana Valley.

I point to that basin now. It is the region here [indicating on the mapl.

In addition to the tillable lands there are extensive tracts of grass lands in the Susitna and other valleys tributary to this route. Large areas of reindeer pastures are found in this region above the limit of good grass. This is notably true along the inland front of the Alaska Range, where there is plateau region furnishing 4,000 to 5,000 square miles of reindeer pasture. In conclusion, it may be said that the Susitna, lower Tanana, and upper Kuskokwim Basins contain farming and grazing lands unrivaled in extent and fertility in Alaska, and which in time to come may furnish a food supply for export.

Reference has been made here to reindeer. There is back from the mouths of these two great rivers, the Yukon and the Kuskokwim, in fact all along the coast, west from Cook Inlet, a great area-a plains area-where the summers are particularly cool by reason of proximity to the ocean, in which it is impossible to grow crops. The tillable agricultural areas are further in the interior, but those great plains are covered with reindeer moss and they afford excellent pasture for reindeer. The Government herd introduced into Alaska some years ago has so increased that it now numbers about 40,000 head. It is estimated that it will not be to exceed 20 years before it will reach perhaps 2,000,000 head altogether; and there are pastures easily available for reindeer to the number of at least 10,000,000. So that, outside of cattle raising, the opportunity to provide an abundant meat supply is here.

I want to add the testimony of Dr. Brooks, as given before the committee, concerning the character of the Tanana Valley and its capacity for the production of agricultural crops. now read from page 517 of the hearings before the committee,

as follows:

Mr. Brooks. In regard to the agriculture I want to say that I am a geologist and not an agriculturist. I have, however, seen a good deal of this country and I have studied the problems somewhat. I make no pretense to having a technical knowledge of this subject. In a general

way, in my opinion, there is in the Tanana Valley, below the Deita, a great deal of agricultural land.

The Government maintained agricultural experiment stations at Fairbanks for a number of years, in the Tanana Valley, and also at Rampart for a considerably longer period. My recollection of the report is they have ripened wheat there at Rampart station five years in succession; that is, for five successive seasons. Of course I do not mean to say they are going to raise wheat up there at the present time on a commercial basis, but I think that will give you some idea of the possibilities of agriculture. The ordinary crops there are the hardier grains, such as barley, oats, and rye, also potatoes and vegetables, and, of course, hay. There is a tremendous amount of grass, land in this region. A great deal of this land has been burned off, and after a while the grass comes up very abundantly. I traversed a great deal of this region with pack train, and wherever I found old burned areas I always found good grass, especially on the hill slopes. That indicates to me that the land is suitable for agriculture, and that opinion is borne out by the work of the Government stations at Rampart and at Fairbanks. What perhaps will carry still greater weight with the average person is the fact that there have been a whole lot of very successful ranches in the vicinity of Fairbanks, where there is a local market. I think this committee has seen photographs of some of the agricultural operations in the vicinity of Fairbanks, and perhaps I need not dwell on that. I do not think there is any question that the Tanana Valley has an agricultural future I do not mean to imply that we are going to export wheat from Tanana or going to have any crop export for at least a long time to come; but I do believe that the country is capable of supporting the population and that, with the mining development, the farmer will come to furnish the food supply for the mine operators.

Senator Walsh. How do they get along with the raising of cattle? Mr. Brooks. In part of that region the snowfall is so light cattle can graze during the winter.

Senator Walsh. Is the grass suitable for winter grazing?

Mr. Brooks. Yes, sir.

Senator Walsh. You spoke of grass on the upper Tanana?

Mr. Brooks. Mr. Riggs here can give you something of his experience in wintering horses in the White River country. I believe that this was successful several seasons. In some seasons winter pastures may fall, but I know of a number of occasions in the upper Tanana and White River where horses have wintered simply by being turned loose in the fall. As you go down the river from Tanana you get more precipitation, and I do not know much about the cattle business, but my impression is you would not be able to winter stock in that lower Tanana Valley without feeding, though I believe it is possible to de in the headwaters of the river.

Senator Walsh. Are the conditions such that they could forage to some extent and be fed at other seasons?

Mr. Brooks. I think I had better leave that question to the men who have wintered there. I have not wintered at Fairbanks, so I do not know.

Mr. Wickersham. A good range horse, Senator, will go all winter and come out fat on the hills around Falrbanks.

Mr. Brooks. I know 10 or 15 years ago I was in the upper Tanana country and somebody told me that he was very much surprised—he turned out a horse in the fall there and he was found the next spring in a very fat condition.

Mr. President, my own view about the matter conforms to that of Dr. Brooks. I do not entertain the idea that this will ever be a country that will be distinguished for its export of grains of any character. What I do maintain is that it is fully capable of producing all the essential foodstuffs for the sustenance of the great population that could be attracted there by the mineral wealth, particularly the copper, coal, and gold mines, and that might be engaged in the fisheries and other industries prosecuted along the coast.

I want to conclude that branch of the subject by reading only a part, because the Senator from Oregon [Mr. CHAMBER-LAIN] went into that matter at some considerable length yesterday, of a letter from Mr. Evans, the chief of the Bureau of Insular Statistics of the Department of Agriculture, instituting a comparison between this section and the countries of northern Europe to which I adverted in opening. Under date of February 28 he addressed the chairman of the committee a communication, which is in part as follows:

munication, which is in part as follows:

In order to further establish the possibility of agriculture in Alaska, a comparison has been made of the countries of Norway, Sweden, Finland, and the Russian Provinces of Archangel, Vologda, and Olonetz. All these countries lie between latitudes 58° and 70° north, and for the most part they are north of 60°, the approximate latitude of the northern reach of the Gulf of Alaska. In Europe within the above limits are embraced over 985,000 square miles, or about 599,450,000 acres. Alaska, with its 570,390 square miles, or 365,049,000 acres, extends from latitude 54° 30′ in southeastern Alaska to more than 71° at Point Barrow. A study of the topography, climate, native plants, etc., shows that the conditions are not very dissimilar in the two regions, whatever advantage there is in climate being probably slightly in favor of the European countries. In these countries of European more than 11,000,000 people are living, while the census of 1910 reports 64,356 as the population of Alaska. Recent statistics show in the three countries and three Provinces in Europe which lie mostly north of 60° that 8,373,000 acres of land were producing cereals of all kinds, the total yield being: Wheat, 6,663,840 bushels; rye, 26,509,640 bushels; barley, 26,963,545 bushels; oats, 109,036,780 bushels. In addition potatoes to the amount of 100,321,100 bushels and 7,871,119 tons of hay were reported.

Then he institutes a comparison between the areas of land in these countries that are subject to tillage and the areas of land in Alaska that are subject to tillage, the advantage being altogether in favor of Alaska. It is estimated that there are 30,000 square miles of land in Alaska that can be cultivated to annual crops, and 100,000 square miles that can be devoted to general agricultural purposes.

EXISTING RAILROAD LINES.

I pass to the consideration of the facilities for transportation afforded by the railroads of Alaska. Some reference has been made to this matter by the Senator from Oregon, but I should like to ask your attention in detail to the existing lines.

The Copper River railroad I spoke of in the colloquy with the Senator from Rhode Island [Mr. LIPPITT]. It starts from Cordova and goes up the Copper River to the junction of that river with the Chitina, and then up the Chitina to the Kennicott mines. The road was built with two objects. It was constructed first to get to the copper mines in that neighborhood, and for the transportation of ores from the mines to the seaboard. It was likewise contemplated that a branch line should be constructed into the Bering coal fields. It would be possible to branch off from the Copper River & Northwestern Railroad by a line 38 miles in length and reach the coal fields, but a much easier grade could be pursued by going a distance of 55 miles, and my understanding is that the company never actually decided or determined which one of the two routes to the coal fields it would select.

That line, as you will observe, does not reach the interior of Alaska at all. The opportunity for the construction of railroads from the seacoast in Alaska into the interior are limited. As you go along the coast there are comparatively few rivers that break through the great, high mountain range, and there are comparatively few low passes which will permit you to get into the interior. The Copper River is one of the rivers which thus breaks through. It rises in the interior, breaks through the mountains, traversing a great gorge, and empties into the ocean in the neighborhood of Controller Bay. So, likewise, farther west an opportunity is given to get into the interior by pursuing the line of the Alaska Northern, the southern terminus of which is at Seward, to which I point here. [Indicating on the map.] The interior would be reached pursuing this route by going up the Susitna Valley, to which I have referred.

Those two gateways are the only ones which afford an oppor-

Those two gateways are the only ones which afford an opportunity to get into the inland country from American territory. It can be reached by another line from the Canadian territory originating at Pyramid Harbor, along what is known as the Haines route, which I here indicate. [Indicating on the map.] Those mentioned, however, are the only ones in American territory, and the opportunities they afford were seized in the con-

struction of the two lines shown on the map.

The Copper River & Northwestern line affords an outlet for whatever mining there is in the neighborhood of Mount Wrangell; but that country, you will observe, is upon the east-ern slope of the high coastal range.

The Alaska Northern proceeds in a line almost due north from Seward, on Resurrection Bay, a distance of about 71 miles, and there ends. That likewise, as you will see, up to the present

date does not reach the interior at all.

These are practically all the railroads there are in Alaska. My recollection is that the total mileage of the Copper River & Northwestern is 195 and that the total mileage of the Alaska Northern is 71. There is a little narrow-gauge road running out from Fairbanks to some placer mines, having a length of about 40 miles. There is another one over in the Seward Peninsula here [indicating on the map], which runs out into the interior a short distance and then along the coast in connection with the fisheries and with some mines that are being operated there, are short stretches of railroad, and those are all there are in Alaska.

As to projected lines, we have no evidence that the Copper River & Northwestern Railroad people ever intended to extend their line into the interior region at all. They did intend to build a branch to the Bering coal field. The projectors of the Alaska Northern, however, say that their original purpose was to extend their line clear through to the Tanana Valley; but we are justified, as I think, in the belief that they really never did have any well-defined purpose of going any farther than the Matanuska coal field. I told you that Frost & Osborne, who acquired that road after it had been built for 20 miles, had endeavored to secure claims in the Matanuska field, and undoubtedly they were building that road for the purpose of reaching those coal fields.

ROUTES CONSIDERED BY THE COMMISSION.

Now, let us consider for a moment the routes that have been examined by the commission.

As I indicated to you, the opportunities to get into the interior are limited. The commission considered three routes. One was the Haines route from Pyramid Harbor, which I indicate here, passing through Canadian territory for a long distance, and then reaching the upper Tanana Valley and going to Fair-

banks. The commission dismissed that route, and as it seems to me very properly dismissed it, because, whatever other merit it had, it passed through territory that was foreign to ours for too long a distance. So the commission was practically restricted in its choice of routes into the interior to a route having its southern terminus either at Orca Bay-that is, at Cor-

dova—or at Controller Bay, which is adjacent, or at Seward. Some recent explorations, however, have disclosed, it is said, that by the construction of a tunnel 2 miles long a harbor can be reached on Prince William Sound opposite to Turnagain Arm, which is shown here [indicating on the map], open all the year around. If this route can be utilized the present line of the Alaska Northern need form no part of the route to the interior. Still, as I say, the commission were practically restricted in their choice to either one or the other of the two routes named. They gave their preference to the route from Cordova up the Copper River, and across to the Tanana and Fairbanks in that way, and advised also that a line be built to connect with the Alaska Northern going up what is called Knik Arm to the point I indicate here [indicating on the map]; from which point they recommended the construc-tion of two branch lines, one going to the east into the Matanuska field, and the other to the west into the Kuskokwim Valley.

Those two lines from Cordova to Fairbanks and from the terminus of the Alaska Northern into the Matanuska field and into the Kuskokwim would make up the aggregate of 733 miles recommended by the commission. They reported that these railroads will cost \$48,000 per mile, making an aggregate of \$35,000,000 or less. They also recommended the construction of a branch line from the Copper River & Northwestern to the Bering fields, so that both the coal fields would be

available by the routes recommended by them.

I do not intend to express any view whatever as to which of these routes is preferable. If the Alaska Northern route is selected, you will observe that it will pass through what is known as the Kenai Peninsula, which has some agricultural possibilities, and gold has been discovered all along the route. Then, passing Knik Arm, it will strike the valley of the Susitna, and, following up the valley of the Susitna, will pass over a divide there [indicating on the map], and then reach the Nenana coal fields, and go right through those coal fields to the Tanana and to Fairbanks.

The other line, pursuing the Copper River to its headwaters, passes over another divide there [indicating on the map] and into the Tanana Valley in the manner I have indicated.

The question arose as to whether it would not be necessary, if that route is to be pursued, to acquire the Copper River & Northwestern Railroad; in other words, whether it would not be necessary to buy that railroad from the Guggenheims. course it would be necessary to build only from this point [indicating on the map] where the road leaves the Copper River, so far as the main line is concerned. It might or might not be possible to make a traffic arrangement with the Copper River & Northwestern Railroad; and if it were not, it might be advisable either to purchase or to condemn that railroad, so that the Government itself would control the entire line down to tidewater. I wish, however, to invite your attention particularly to the fact that the Government is not obliged to do either the one thing or the other, because the commission report that one can start from Valdez, to which I point now, and, going over the Marshall Pass, which is a comparatively low pass, strike the Copper River above the mouth of the Chitina [indicating on the map] and thus get into the Tanana Valley without even paralleling, except for a very short distance, the Copper River & Northwestern Railroad.

Mr. MARTINE of New Jersey. What would be the character of the bay at the terminus here? [Indicating on the map.] Mr. WALSH.

There is an ideal bay at Valdez.

Mr. MARTINE of New Jersey. With good water? Mr. WALSH. There is practically no difference, so far as I am myself able to judge, in any of the harbors mentioned. I do not believe there is much difference in value for port purposes between Controller Bay, Cordova, and Resurrection Bay. With respect to that I may be mistaken, but there are excellent facilities for loading and unloading vessels at Valdez, and the best kind of wharves and docks. So we are under no constraint at all either to enter into a traffic arrangement with the Copper River & Northwestern Railroad, nor to purchase that road, nor to condemn it.

Likewise I point to the fact that if the new route from Prince William Sound over to Turnagain Arm is found to be feasibleand it seems altogether likely that it will be—we shall be under no obligation either to make a traffic arrangement nor to acquire by purchase or condemnation the Alaska Northern,

because we will have a seaport there which will be the terminus of the road into the Matanuska field, into the Nenana field, and into the Tanana Valley by that route. So we are in a situation where we can bargain with the Copper River & Northwestern, and if the terms are not satisfactory we can ourselves

construct a road on a line not already preempted.

Mr. CUMMINS. Mr. President—

The VICE PRESIDENT. Does the Senator from Montana yield to the Senator from Iowa?

Mr. WALSH. Certainly.

Mr. CUMMINS. The Senator made a suggestion a moment ago that I did not clearly understand. Is it true that the commission recommended the building of a line, being an ex-tension of the Alaska Northern or Alaska Central, to Fairbanks?

Mr. WALSH. No.
Mr. CUMMINS. The rather slender black line that is on
the map is not a line recommended by the commission?

Mr. WALSH. It is not.

Mr. CUMMINS. So far as the Alaska Central is concerned, as I remember the report of the commission, it recommended the extension toward the west to the Kuskokwim River, and an extension toward the east to the Matanuska field only.

Mr. WALSH. Yes.

Mr. CUMMINS. In that connection, the Senator said a moment ago that the commission had estimated that these new lines would cost \$48,000 a mile. Does it not appear in the hearings that the line of the Alaska Northern or the Alaska Central—I think they changed names at one time was built for about \$17,000 a mile?

Mr. WALSH. Eighteen thousand dollars.

Mr. CUMMINS. Eighteen thousand dollars a mile?

Mr. WALSH. It does so appear.

Mr. CUMMINS. And is it not true that the territory through which the extension is projected is quite as easy for railroad building as the line already built?

Mr. WALSH. I should say not.

I gathered from the report of the com-Mr. CUMMINS. mission, or from the hearings somewhere—I can not put my finger upon it now—that it would not cost very much more, if any more, to build the line north or west than it has cost to build the line now in existence. It might cost more, I think, to construct a branch to the coal fields. If I am wrong about that appearing in the testimony, or evidence from which that might be inferred, I should be glad if the Senator would report it out. point it out.

Mr. WALSH. I will say that in my judgment the average cost of the construction of the entire line will be very much higher than the cost of the construction of the first 20 miles of the Alaska Northern, because that proceeds, except for one place, upon a very easy grade. The conditions, as I understand, are very similar to the conditions existing in the neighborhood of Controller Bay, for instance, and the Bering fields. There are no obstacles there at all. It is practically

a flat surface.

Mr. CUMMINS. That part of the road is built up a ravine or pass, and a large part of it is built on a side of a mountain,

Mr. WALSH. Yes; that is the case. Mr. CUMMINS. With all the incidental cutting and bridging

Mr. CUMMINS. With all the inchestral cutting and bridging which that sort of topography requires?

Mr. WALSH. Yes. I will say that that testimony was given to us by the man who actually built the road—Mr. Ballaine. He built the first 20 miles of the road and then sold it. He came forward and testified that that was what it actually cost, and that his books would verify the statements he made.

Mr. CUMMINS. One more question, to see if I am getting my facts right. The thirty-five million and some hundred thousand dollars named in the bill as originally introduced is the aggregate of the estimate of the engineers for the extensions suggested, both for the Alaska Northern and for the Copper River & Northwestern. This amount does not include the cost of building from the inland termini of these two roads, or from a point proximate to the inland termini, to the sea, as I read

Mr. WALSH. No; that is my recollection.

Mr. CUMMINS. So what is really in contemplation, so far as the provision here made is concerned, is the extension of these two lines of road into the interior?

Mr. WALSH. Exactly.
Mr. CUMMINS. Let me ask the Senator one more question.
If the President were to find it advisable to purchase or condemn these two railroads, or either of them, there would have to be a further appropriation of the money required to make that purchase or pay for that condemnation?

Mr. WALSH. That is my recollection about it. I may be in error about the matter, but that is my understanding.

Mr. CUMMINS. However, under the terms of the bill, the President could obligate the United States to pay the additional sums of money that would be required for the purchase or the condemnation of the two existing lines of railway?

Mr. WALSH. If it should be necessary to acquire them, as I have indicated, he could do so by the further authority of

Congress.

PRESENT TRANSPORTATION PROBLEMS.

I want now to say something in relation to the transportation situation in Alaska as it is to-day. In order to understand that, we shall have to bear in mind the activities of the Alaska Syndicate, which exercises so potent an influence in every department of life in the Territory.

The Alaska Syndicate is a partnership, as nearly as the testimony will enable us to judge, between J. P. Morgan & Co. and the Guggenheim interests, the firm of Close Bros. having stock in the syndicate to the extent of \$500,000. Nothing need be said concerning the power in the financial world of the firm of J. P. Morgan & Co., nor, perhaps, for that matter, of the Guggenheims, except that it might be mentioned that the vast Gugenneims, except that it might be mentioned that the vast and varied activities in which they engage will be found recited in Moody's and Poor's Manuals. It is enough here to say that their business is chiefly mining. They dominate the smelting industry to a very large extent, and are understood to be large owners, if not the controlling owners, of the American Smelting & Refining Co., popularly known as the Smelting Trust. They own and operate all of the smelters on the Pacific coast. The Alaska Syndicate own the Alaska Steamship Co., which is the principal company plying from Seattle to Alaska. which is the principal company plying from Seattle to Alaskan ports. While it is not demonstrated that they own the Northern Navigation Co., which is the principal company engaged in transportation on the lower Yukon River, they sustain the most intimate relations with that company. They do own, however, the Northern Commercial Co., which is the principal mercantile company engaged in business along the Yukon River, with stores at practically all of the important points. They own, as I told you some time ago, the Copper River & North-western Railroad. They own the Kennicott mines, and have recently acquired the Beatson and the Ellamar copper mines in the neighborhood of Prince William Sound. The fact is that they own all of the actually producing copper mines in Alaska. They own the Northwest Fisheries Co.

Mr. OVERMAN. Mr. President, the Senator from Montana has been speaking for several hours. I suggest that he might continue his speech to-morrow and that the Senator from Georgia [Mr. Bacon] move an executive session.

Mr. BACON. If that course is agreeable to the Senator from

Montana, I will do so. Mr. WALSH. It is.

EXECUTIVE SESSION.

Mr. BACON. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After 10 minutes spent in executive session the doors were reopened, and (at 5 o'clock and 10 minutes p. m.) the Senate adjourned until to-morrow, Thursday, January 15, 1914, at 12 o'clock meridian.

NOMINATIONS.

Executive nominations received by the Senate January 14, 1914.

MEMBER OF THE CALIFORNIA DÉBRIS COMMISSION.

Maj. Robert R. Raymond, Corps of Engineers, United States Army, for appointment as a member of the California Débris Commission, provided for by the act of Congress approved March 1, 1893, entitled "An act to create the California Débris Commission and regulate hydraulic mining in the State of California," vice Lieut. Col. Charles H. McKinstry, Corps of Engineers, United States Army, to be relieved.

RECEIVERS OF THE PUBLIC MONEYS.

Joseph Allen, of Tulare, Cal., to be receiver of public moneys at Visalia, Cal., vice Arthur H. Swain, term expired.

James P. Folger, of Kemmerer, Wyo., to be receiver of public moneys at Evanston, Wyo., vice Frank M. Foote, resigned.

Charles R. Yeoman, of Newcastle, Wyo., to be receiver of public moneys at Sundance, Wyo., vice Cyrus E. Carpenter, whose term will expire February 21, 1914.

REGISTERS OF THE LAND OFFICE.

Miles Waliace, of Fresno, Cal., to be register of the land office at Visalia, Cal., vice George W. Stewart, whose term will expire March 14, 1914.

Alex Nisbet, of Evanston, Wyo., to be register of the land office at Evanston, Wyo., vice Thomas V. Davis, whose term will expire January 24, 1914.

UNITED STATES MARSHAL.

Joseph P. Dillon, of Arizona, to be United States marshal, District of Arizona, vice Charles A. Overlock, removed.

PROMOTIONS AND APPOINTMENTS IN THE NAVY.

Second Lieut. Francis T. Evans to be a first lieutenant in the Marine Corps from the 17th day of September, 1913.

The following-named citizens to be assistant dental surgeons in the Dental Reserve Corps of the Navy from the 29th day of December, 1913: Meyer L. Rhein, a citizen of New York;

Clarence J. Grieves, a citizen of Maryland; Charles W. Rodgers, a citizen of Massachusetts; Clyde M. Gearhart, a citizen of Ohio; John R. Barber, a citizen of Minnesota; and David J. Alexander, a citizen of Virginia.

CONFIRMATIONS.

Executive nominations confirmed by the Senate January 14, 1914.

POTMASTERS.

NEW MEXICO.

M. McCreary, Magdalena.

онго.

Stephen D. Carroll, Painesville. L. H. Chapin, Hudson. David B. Dick, Harrison. A. Ross Rend, Akron. George M. Sizelove, Camden. A. N. Warren, Sylvania. Royal M. Wheeler, Mantua. George G. Wilkinson, East Palestine.

HOUSE OF REPRESENTATIVES.

Wednesday, January 14, 1914.

The House met at 12 o'clock noon.

The Chaplain, Rev. Henry N. Couden, D. D., offered the fol-

Eternal God, our heavenly Father, inspire us by the stars that shine above us, by the hopes that fill our breast, by the voice that speaks within us, to larger faith and confidence in Thine infinite wisdom, power, and goodness; that doubts may disappear, fear vanish, and overwhelming love bring us to our knees and lift us again to our feet by the light of heaven, in the strength of infinite power; that we may be Thine to struggle, Thine to conquer. And blessing and honor and praise be Thine through Him who taught us the way and the truth and the life.

The Journal of the proceedings of yesterday was read and approved.

ENROLLED BILLS SIGNED.

The SPEAKER announced his signature to enrolled bill of the following title:

S. 3484. An act to amend an act entitled "An act to codify, revise, and amend the laws relating to the judiciary," approved March 3, 1911, being chapter 231 of Thirty-sixth Statutes at

ENROLLED BILL PRESENTED TO THE PRESIDENT FOR HIS APPROVAL. Mr. ASHBROOK, from the Committee on Enrolled Bills,

reported that this day they had presented to the President of the United States for his approval the following bill:

H. R. S142. An act to authorize the construction, maintenance, and operation of a bridge across the Bayou Bartholomew at or near Wilmot, Ark.

RAILROADS IN ALASKA.

The SPEAKER. This is Calendar Wednesday, and the House resolves itself automatically into Committee of the Whole House on the state of the Union to consider the bill H. R. 1739, the Alaskan railroad bill, and the gentleman from Mississippi [Mr. HARRISON] will take the chair.

The House resolved itself into Committee of the Whole House on the state of the Union with Mr. HARRISON in the chair.

The CHAIRMAN. The House is in Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 1739, which the Clerk will report by title.

The Clerk read as follows:

A bill (H. R. 1739) to authorize the President of the United States to locate, construct, and operate railroads in the Territory of Alaska, and for other purposes.

The CHAIRMAN. The gentleman from Tennessee [Mr. Houston] is recognized.

Mr. STAFFORD. Will the gentleman from Tennessee yield for a question before he yields time?

Mr. HOUSTON. Yes. Mr. STAFFORD. I I would like to ask the gentleman from Tennessee whether the entire day is going to be consumed in general debate?

Mr. HOUSTON.

Mr. HOUSTON. Yes. Mr. STAFFORD. Can the gentleman inform the committee whether or not members of the committee are going to speak, or who is going to speak on the bill, in advance, so that Members can be advised as to who will talk on the bill to-day?

Mr. HOUSTON. I can state to the gentleman that several members of the committee have expressed a desire to speak today, and perhaps the entire day may be taken up by members of the committee. It is quite probable.

Mr. STAFFORD. Is the gentleman certain that the entire

day will be consumed in general debate?

Mr. HOUSTON. Oh, yes; it is the understanding that we will give the entire day to general debate. No limitation of time will be placed upon the debate to-day.

The CHAIRMAN. The gentleman from Tennessee [Mr.

Houston) is recognized.

Mr. HOUSTON. Mr. Chairman, it was understood that the gentleman from Ohio [Mr. BRUMBAUGH] would speak first this morning, but I do not believe he is in the Chamber. The Dele-

gate from Alaska [Mr. Wickersham] will be next on the list.

The CHAIRMAN. The gentleman from Alaska is recognized

Mr. HOUSTON. Mr. Chairman, will the gentleman yield to me for a moment before he begins?

The CHAIRMAN. Does the gentleman from Alaska yield? Mr. WICKERSHAM, Yes.

Mr. HOUSTON. I desire to ask unanimous consent that the gentleman from Alaska be allowed time sufficient to conclude his remarks. I feel that one hour will not be sufficient for him to go through the details as he may perhaps want to do, and therefore I ask that he may have time to conclude his remarks.

Mr. DAVENPORT. Is it not understood that those who have prepared speeches may be given sufficient time to conclude their remarks as a general proposition, without limitation of time? I suggest that we have heretofore been operating under that rule.

The CHAIRMAN. Is there objection to the request of the

gentleman from Tennessee?

Mr. STAFFORD. Mr. Chairman, reserving the right to object, I think there should be some limitation as to time. While I do not see fit to object to a liberal amount of time being given to members of the committee, still I think there should be some limitation.

Mr. GARRETT of Tennessee. Mr. Chairman, each request for unanimous consent has to stand by itself in Committee of

Mr. HOUSTON. That was my idea and my understanding, that it would be necessary that the consent be given to each Member. I make that request now, Mr. Chairman, in behalf of the Delegate from Alaska.

The CHAIRMAN. The gentleman from Tennessee Houston] asks unanimous consent that the gentleman from Alaska [Mr. Wickersham] be allowed time to conclude his

speech.

Mr. HUMPHREY of Washington. There is no time fixed for closing debate, is there?

Mr. HOUSTON. No; no time has yet been fixed for closing debate.

The CHAIRMAN. The gentleman from Tennessee HOUSTON] asks unanimous consent that the gentleman from Alaska [Mr. Wickersham] be permitted to continue his remarks until he concludes. Is there objection?

Mr. STAFFORD. Reserving the right to object, would it not be better for the chairman of the committee to ask that the Delegate from Alaska have two or three hours? To grant unlimited time might incline a Member to occupy not only to-day but next Wednesday and the entire session, so far as Calendar Wednesday is concerned.

Mr. GARRETT of Tennessee. I will say to the gentleman from Wisconsin that the request is not unusual in cases like this. Mr. FITZGERALD. Let the gentleman speak for an hour,

Mr. FITZGERALD. Let the gentleman speak for an hour, and then we may agree on it.

Mr. HOUSTON. I think we might as well have the consent now, Mr. Chairman, if we can get it.

The CHAIRMAN. Is there objection?

Mr. STAFFORD. I object, for the present. I will say to the gentleman from Alaska that there will not be any objection

The CHAIRMAN. The gentleman from Wisconsin objects.

Mr. WICKERSHAM. Mr. Chairman, the bill before the House—H. R. 1739—was originally prepared by the Delegate from Alaska. Two opposing schools of thought have given much attention to the question of the development of Alaska. One insists upon the open door, upon allowing the widest lati-tude to individual effort in the Territory, and its most advanced members are those who think the way to develop Alaska is to turn its resources over to those who have the wealth to develop them. They insist that the Government shall do nothing more than to give ready assistance to every effort of individuals to secure title to all the bonanza resources of Alaska, with the privilege of immediately transferring them to monopoly. They insist that all that is necessary to do in Alaska is to raise the embargo and to permit the people of the United States to acquire title to the resources, leaving the laws of trade and commerce to deal with the question of transportation and the operation of production. That is radical reaction. But there is a more progressive view held by many, and it is

clearly stated in the following language:

clearly stated in the following language:

Alaska, as a storehouse, should be unlocked. One key to it is a system of railways. These the Government should itself build and administer, and the ports and terminals it should itself control in the interest of all who wish to use them for the service and development of the country and its people. But the construction of railways is only the first step; it is only thrusting in the key to the storehouse and throwing back the lock and opening the door. * * * It is a part of our general problem of conservation. * * * We must use the resources of the country, not lock them up. * * * The resources in question must be used, but not destroyed or wasted; used, but not monopolize upon any narrow idea of individual rights as against the abiding interests of communities.

That is progressive democracy, and I shall give it my ap-

proval and support.

Pioneers go into a new country hoping to find some of its natural resources in such quantity and under such circumstances that they can be readily acquired and easily turned into wealth. The great West was developed upon that plan. The people were allowed to go upon the public domain, to locate mines and homesteads, and to acquire all of the resources of the public domain in small and individual lots for their own use. Certainly times have changed since those early days when the pioneers thus acquired their individual holdings in the Western States. The disturbing element is monopoly. Big business has learned that bigger business may be acquired by combinations. The great master of financial combinations taught the lesser masters how to acquire property through combination and monopoly. Even the great master himself, in conjunction with the Guggenheims, under the title of the Alaska Syndicate, became the master of monopoly in Alaska. When people inquire what is the matter with Alaska it may be answered: The Alaska Syndicate,

Mr. MADDEN. What does the Alaska Syndicate do, or what

does it not do?

Mr. WICKERSHAM. If the gentleman will possess his soul in patience, I will tell him a great many things they do and a great many things they do not do.

Mr. MADDEN. I am asking for information. Mr. WICKERSHAM. The gentleman will get it if he will be

Mr. MADDEN. I am patient. I supposed the gentleman wanted to tell the House.

Mr. WICKERSHAM. I certainly do, and I shall be glad to have the opportunity.

The Alaska problem is easily presented for discussion, for it is a question of Government or Guggenheim—which? Shall the Is a question of Government or Guggenneim—which? Shall the Territory be controlled by its constitutional trustee or the trusts? Shall it be owned by the people or by monopoly? Shall its resources be opened to acquisition and use by the pioneer prospector and homeseeker or unfairly monopolized by one great syndicate? Shall the Government or the Guggenheims control the destiny of Alaska and its people—which?

The bill under discussion is in the interest of the people and puts the issue of Government or Guggenheim control in Alaska squarely to the vote of this House. Which shall it be—Government or Guggenheim?

DRAFTING THE ALASKA BAILWAY BILL.

Everything we attempt in the way of development in the Territory is hindered by this overshadowing evil. If we begin the building of a railroad, the financial power of the Alaska Syndicate destroys its credit, prevents it from securing money, and renders the whole scheme abortive. If we apply to Congress for aid in building a national railroad in Alaska, it is at once whispered that our efforts will be of some advantage to the Alaska Syndicate—and none whisper this so incessantly as lobbyists for the Alaska Syndicate. They have walked the public corridors, visited the offices of Members, flooded the mails with letters and printed matter, and in every way sought to prejudice Members against the bill now before the House. This insidious warfare was expected, and in the preparation of the bill effort was made to put it upon so high a plane that their efforts would be minimized. For that reason the bill before the House was so drafted as to place the power of locating and constructing the railroad with the President. The bill was largely copied after the present law for the construction of the Panama Canal, which puts the whole power and responsibility upon the President. The bill provides generally that the President shall locate and designate the route or routes for the line of railroad in the Territory of Alaska to be so located as to connect one or more of the Pacific coast harbors with the navigable waterways of the interior and with a coal field or fields yielding coal sufficient in quality and quantity for naval use. If any attempt had been made by the bill to fix a specific route, then a clamor from every other locality would have been raised. Those supporting the bill would have been accused of having some interest in or along the line of location. If the bill had designated a commission to make the location and to build the road, equally vigorous accusations of attempting to secure unfair advantages would have been made. If the bill, like the Pacific Railway bills, had organized a specific corporation, designated its incorporators, and given them a land grant, the clamor would have been greater. If the bill had specifically prevented the President from making any location of the road in connection with any other road that would have brought criticism and increased lobbying. If the bill had limited the President to any particular route, it would have been open to grave criticism, upon the ground that Congress has no such information as would justify it in choosing any particular route or any particular region. The committee having charge of this bill had entire confidence in the President and believed the sauest method of securing the best results was to put the whole burden and responsibility upon his shoulders.

Mr. SCOTT. Mr. Chairman, will the gentleman yield for a question?

Mr. WICKERSHAM. I yield.

Mr. SCOTT. I am asking for information. Is it the proper interpretation of this bill that it shall connect the harbor with the interior waters or merely connect with some existing line which rests upon a harbor of the seaboard?

Mr. WICKERSHAM. That matter, of course, is left entirely with the President, who is given power in the bill to locate the

route of the railroad.

Mr. SCOTT. But there is an appropriation of a specific sum here, which is probably based upon estimates. Do those esti-mates contemplate the construction from some inland point on interior waters or does this contemplate construction from the seaboard?

Mr. WICKERSHAM. There is nothing in the bill which limits the President in any way to any thought which any member of the committee may have had in his mind at the time the bill was prepared, and it is not known what the President will do if the bill passes. The bill provides that the line shall connect the southern coast harbors with the inland waterways of Alaska.

Mr. SCOTT. There is an appropriation of \$35,000,000 and a mileage of 733 miles.

Mr. WICKERSHAM. Yes.

Mr. SCOTT. Is it not impossible with that sum of money to construct a line from the seaboard to the interior waters?

Mr. WICKERSHAM. It is not impossible; it is quite pos-

It is quite possible?

Mr. WICKERSHAM. Yes; according to all the estimates.
Mr. SCOTT. And build the terminals?
Mr. WICKERSHAM. And build the terminals.
Mr. CALLAWAY. Mr. Chairman, will the gentleman yield?
The CHAIRMAN. Does the gentleman from Alaska yield to the gentleman from Texas?

Mr. WICKERSHAM. Yes.

Mr. CALLAWAY. The President is not limited by this bill to any specific route or mileage or anything of that kind. He is just given the power to have \$35,000,000 worth of bonds to go into the railroad business within the Territory of Alaska, is he not?

Mr. WICKERSHAM. That is the gentleman's interpretation

of the bill. 'The bill speaks for itself,

Mr. CALLAWAY. There is no place fixed for him to start and no place fixed for him to stop.

Mr. WICKERSHAM. Oh, yes; there is.

Mr. CALLAWAY. No specific mileage laid out that he is to

Mr. WICKERSHAM. The gentleman is mistaken about that, said that the bill provided for a limitation upon the President to this extent only, that he connect the southern harbors in Alaska with the inland waterways and reach a coal field he may obtain naval coal. Otherwise there is no

Mr. CALLAWAY. There is no particular harbor and no particular coal field designated, is there?

Mr. WICKERSHAM. No.

Mr. CALLAWAY. Any southern harbor and any coal field? Mr. WICKERSHAM. Yes; entirely in the discretion of the President.

Mr. CALLAWAY. And, further, is he not given the power either to build roads for the purpose of being operated by the Government or to buy roads?

Mr. WICKERSHAM. That is all covered by the bill, and the gentleman can read it and understand it just as well as I can, and I think it is better to continue my speech.

Mr. SIMS. Would not the gentleman prefer to make his regular address and answer questions afterwards?

Mr. WICKERSHAM. I would.

Mr. SIMS. Inasmuch as the gentleman in his speech may answer many questions which otherwise would be asked.

Mr. WICKERSHAM. I think I will answer all the questions

before I conclude my speech.

Mr. SIMS. And the gentleman would like to proceed? Mr. WICKERSHAM. Yes.

There have been no surveys made over any of the routes to which Congress has access. If such surveys have been made with sufficient definiteness to justify the choice of a particular route, the Committee on Territories did not have such information. was therefore determined by the committee, in view of all the circumstances, to report a bill to the House which should leave the entire responsibility for the choice of the route and the expenditure of the appropriation with the President. The bill before the House gives him ample authority to organize a force of railroad builders under some competent engineer, to be chosen by him, and to expend the money in the building of the road along the line determined by him, exclusive of any individual interest or influence. But, the opponents of the bill suggest, the President may build this road in such a way as to connect with the Guggenheim road, thereby giving them some advantage in transportation in Alaska which they do not now have. Certainly the bill is open to that objection. It was left open to that objection in the effort to give all authority to the President of the United States, in whom all have confidence. Under the bill the President has the widest latitude of power to locate the proposed railroad over the best route in Alaska, with the general limitation that it must connect one of the southern harbors with naval coal and the interior waterways. The President can build such a road over such a route without giving the Alaska syndicate railway any advantages in doing so. The committee believed that he would so locate and construct the road without seeking to betray the people of Alaska and of the United States in the expenditure of this appropriation.

If there are gentlemen in this House who think the President of the United States can not be trusted to do that, let them vote against the bill. The people of the United States had confidence enough in the President to elect him as their Chief Magistrate. The Committee on the Territories had confidence enough in him to believe that he will locate the railroad designated in this bill and expend the money appropriated in good faith and without misapplication. The committee believed there would be no scandal and no misapplication of the appropriation from the legitimate purpose of the act if the responsibility was left with the President, and so believing the bill was reported in its present form.

AN ADMINISTRATION MEASURE.

The plan proposed in the bill for the location and construction of a railroad in Alaska is a Democratic administration plan; it is strictly within the pledges of the Progressive platform and has the support of that party and of Republican majorities.

In his message to this Congress the President declared that the long-locked resources of Alaska should be opened to use and development without monopolization, and he declared that one key to its storehouse of riches is a system of railroads. he said, "the Government itself should build and administer, and the ports and terminals it should itself control in the interest of all who wish to use them for the service and

development of the country and its people."

The announcement of this definite plan for development in Alaska removes the consideration of Alaska affairs from the domain of muckraking and scandal to that of fair discussion of ways and means. It is a proposition to do in Alaska what was done by the United States in every State and Territory in the South and West, for each State and Territory, except the original thirteen States and Alaska, was permitted to use part of its land resources in the building of turnpikes, canals, or The bill now before the House only proposes to do the usual thing in Alaska, but would do it more wisely, more economically, and with more particular regard to the rights of the people who own the public lands. Instead of conveying large areas of the public land to private corporations as a bonus to procure them to build the railroads, as was the earlier plan, it is now proposed that the United States instead of the corporation shall sell the lands to the people for homes and use the money received for the lands in building the railroad, whereby the people will have both the lands and the railroad. Such is the transaction on its face.

THE STATUS OF ALASKA.

Before entering upon a consideration of the particular merits of the bill before the House, it seems necessary to consider the political status of Alaska and its relationship to other members of the United States of America. If it is truly a member of that national family, though in Territorial infancy, it is justly entitled to the same treatment as its elder brothers and sisters received in their youthful struggles for a start in life, If it shall appear that it has been incorporated into and is a part of the body of the Nation, in the same sense that other Territories were within the present limits of the United States, then it follows that it will be entitled to the same advantages in development as those Territories had. What is the political status of Alaska?

Alaska was purchased from Russia in 1867, and the purchase price of \$7,200,000 paid out of the Public Treasury. The Louisiana territory was likewise purchased from France in 1803, and the burchase price of \$12,000,000 was paid out of the Public Treasury. In exactly the same businesslike way the United States, in 1848, purchased California. New Mexico, and Arizona, and paid the purchase price of \$15,000,000 out of the Public Treasury. The Louisiana, Mexican, and Alaskan treaties each contained substantially the same obligation on the part of the United States to admit the inhabitants of the acquired territory "to the enjoyment of all the rights, advantages, and immunities of citizens of the United States." Alaska thus stands exactly equal with the Louisiana Purchase and all the States carved therefrom, exactly equal with California, Arizona, and New Mexico, in respect to its entrance by purchase into the body of the Nation, and the United States is bound by exactly the same promise of incorporation and statehood to Alaska that it made in the Louisiana and Mexican treaties.

The American statesmen who conducted and concluded the negotiations for the purchase of Alaska from Russia purposely employed the form used in the acquisition of the Louisiana territory, of California, Arizona, and New Mexico. They fully appreciated its effect and officially declared their purpose in so doing. In his fourth annual message to Congress President Johnson expressed his purpose in procuring the cession of Alaska in this significant language:

The acquisition of Alaska was made with a view of extending national jurisdiction and republican principles in the American hemisphere.

And in his great speech in support of the ratification of the treaty of purchase Senator Sumner was even more specific in dedicating Alaska to future statehood in the Union. He said in part:

But your best work and most important endowment will be the republican government which, looking to a long future, you will organize, with schools free to all and with equal laws, before which every citizen will stand erect in the consciousness of manhood. Here will be a motive power without which coal itself will be insufficient. Here will be a source of wealth more inexhaustible than any fisheries. Bestow such a government, and you will bestow what is better than all you can receive, whether quintals of fish, sands of gold, choicest fur, or most beautiful ivory.

The political structure of the present Territory and future State of Alaska is based upon the solid foundation of the national pledge contained in article 3 of the treaty of cession, which reads as follows:

ART. 3. The inhabitants of the ceded territory, according to their choice, reserving their natural allegiance, may return to Russia within three years; but if they should prefer to remain in the ceded territory, they, with the exception of uncivilized native tribes, shall be admitted to the enjoyment of all the rights, advantages, and immunities of citizens of the United States, and shall be maintained and protected in the free enjoyment of their liberty, property, and religion.

We are not left in doubt as to the effectiveness of this effort. to make Alaska part of the body of the Nation, for while its material development has long been neglected by Congress, the Supreme Court of the United States, in a series of well-considered cases coming from Alaska, has declared and firmly established its right to membership in the national family.

In 1896 that court, in the Coquitlam case (163 U. S., 346-352)

declared that "Alaska is one of the Territories of the United declared that "Alaska is one of the Territories of the Chrical States," in the political sense. That decision was affirmed in Binns v. United States (194 U. S., 486-491), where the court added: "Nor can it be doubted that it is an organized Territory." In the case of Rasmussen v. United States (197 U. S. 516), the question whether Alaska was incorporated into the body of the Nation was squarely presented, fully argued, and finally determined. The court said (p. 522):

This brings us to consider the treaty by which Alaska was acquired and the action of Congress concerning that acquisition, for the purpose of ascertaining whether within the criteria referred to in Downes against Bidwell, and adopted and applied in Dorr against United States. Alaska was incorporated into the United States. The treaty concerning Alaska, instead of exhibiting, as did the treaty respecting the Philippine Islands, the determination to reserve the question of the status of the acquired territory for ulterior action by Congress, manifested a contrary intention, since it is therein expressly declared in article 3 that:

"The inhabitants of the ceded territory shall be admitted to the enjoyment of all the rights, advantages, and immunities of citizens of the United States, and shall be maintained and protected in the free enjoyment of their liberty, property, and religion."

"This declaration, although somewhat changed in phraseology, is the equivalent, as pointed out in Downes against Bidwell, of the formula employed from the beginning to express the purpose to incorporate acquired territory into the United States, especially in the absence of other provisions showing an intention to the contrary. And it was doubtless this fact conjoined with the subsequent legislation of Congress which led to the following statement concerning Alaska made in the opinion of three, if not four, of the judges who concurred in the judgment of affirmance in Downes v. Bidwell (p. 335):

"Without referring in detail to the acquisition from Russia of Alaska, it suffices to say that that treaty also contained provisions for incorporation and was acted upon exactly in accord with the practical construction applied in the case of the acquisition from Mexico, as just stated. * * Indeed, both before and since the decision in Downes against Bidwell, the status of Alaska as an incorporated Territory was and has been recognized by the actions and decisions of this court."

Alaska was a territory in 1878, when the following section of the United States Revised Statutes extended the Constitution over it:

The Constitution and all laws of the United States which are not locally inapplicable shall have the same force and effect within all the organized Territories, and in every Territory hereafter organized as elsewhere within the United States.

And in the Rasmussen case the Supreme Court declared:

Under the treaty with Russia ceding Alaska and the subsequent legislation of Congress, Alaska has been incorporated into the United States and the Constitution is applicable to that Territory.

It is not necessary to cite other authorities or argument to demonstrate that Alaska is one of the Territories of the United States; it is an organized Territory; the Constitution of the United States extends over it; it is incorporated into the United States; it occupies the identical plane of relationship to the United States and to the several States that other Territories did in their day; the treaty of cession pledged the United States that the inhabitants thereof "shall be admitted to the enjoyment of all the rights, advantages, and immunities of citizens of the United States," and therefore, in the natural course of events, when its territory shall be settled and organized and when its growth and permanent development shall make it desirable, one or more sovereign States will be organized out of the Territory of Alaska and admitted into the

Assuming, then, that Alaska Territory—the embryo State of Alaska—is equal in right before the Constitution and the law of the land with every other Territory or State, we may also assume that it is entitled to an equal share of internal improvement with every other Territory or State-especially out of its own public lands.

POWER OF THE UNITED STATES TO CONSTRUCT AND OPERATE RAILROADS.

Another preliminary question arises touching the power of the United States to locate, build, and operate a railroad in Alaska, even though it be done out of the income from the sale of its public lands.

Careful attention has been given to a consideration of the power of Congress to enact the legislation offered in the bill as reported. Section 8 of Article I of the Constitution provides

The Congress shall have power * * * to provide for the common defense and general welfare * * *; to borrow money on the credit of the United States * * ; to regulate commerce among the several States * * *; to establish post offices and post roads * * * ; to raise and support armies * * * ; to provide and maintain a Navy * * ; to exercise authority over all places purchased * * * ; for the erection of forts, magazines, arsenals, dockyards, and other needful buildings * * * ; to make all laws which shall be necessary and proper for carrying into execution the foregoing powers, etc.

Section 3, Article IV, also provides that-

The Congress shall have power to dispose of and make all needful rules and regulations respecting the territory or other property belonging to the United States.

Each of the foregoing clauses of the Constitution gives warrant to some feature of the bill and affords authority for the legislation proposed.

The objects of this bill are the development of the agricultural and mineral resources of Alaska, the settlement of the public lands in Alaska, to provide transportation for coal for the use of the Army and Navy, to establish post roads, and transport the mails in Alaska.

Certainly it is late to raise the constitutional question, for more than a century ago the United States built the Cumber-land Read, from the Potomac to the Ohio, and paid the cost. \$8,000,000, out of the Public Treasury. Every Congress passes a river and harbors bill appropriating millions of dollars out of the General Treasury for the improvement of rivers for the transportation of freight—there is no difference in principle between these river and harbor appropriations and the one now suggested for building a railroad in Alaska, except that it is proposed to pay for the road in Alaska out of its public lands—just as was done in the building of the land-grant roads in the Southern and Western States and Territories. The Su-preme Court of the United States had before it the question arising out of the objection to the constitutional power of the United States to build the Panama Canal, in the case of Wilson v. Shaw (204 U. S., 24-33), where the court said:

United States to build the Panama Canal, in the case of Wilson v. Shaw (204 U. S., 24-33), where the court said:

Again, plaintiff contends that the Government has no power to engage anywhere in the work of constructing a railroad or canal. The decisions of this court are adverse to this contention. In California v. Pacific Railroad Co. (127 U. S., I, 39) it was said:

"It can not at the present day be doubted that Congress, under the power to regulate commerce among the several States, as well as to provide for postal accommodations and military exigencies, had authority to pass these laws. The power to construct, or to authorize individuals or corporations to construct, national highways and bridges from State to State is essential to the complete control and regulation of interstate commerce. Without authority in Congress to establish and maintain such highways and bridges it would be without authority to regulate one of the most important adjuncts of commerce. This power in former times was exerted to a very limited extent, the Cumberland or National Road being the most notable instance. Its exertion was but little called for, as commerce was then mostly conducted by water, and many of our statesmen entertained doubts as to the existence of the power to establish ways of communication by land. But since, in consequence of the expansion of the country, the multiplication of its products, and the invention of railroads and locomotion by steam, land transportation has so vastly increased, a sounder consideration of the subject has prevailed and led to the conclusion that Congress has plenary power over the whole subject. Of course, the authority of Congress over the Territories of the United States and its power to grant franchises exercisable therein are, and ever have been, undoubted; but the wider power was very freely exercised, and much to the general satisfaction, in the creation of the vast system of railroads connecting the East with the Pacific, traversing States as well as Territories, and employing

These authorities recognize the power of Congress to construct interstate highways. A fortiori, Congress would have like power within the Territories and outside of State lines, for there the legislative power of Congress is limited only by the provisions of the Constitution and can not conflict with the reserved power of the States. Plaintiff, recognizing the force of these decisions, seeks to obviate it by saying that the expressions were obliter dicta, but plainly they were not. They announce distinctly the opinion of this court on the questions

presented and would have to be overruled if a different doctrine were now announced. Congress has acted in reliance upon these decisions in many ways, and any change would disturb a vast volume of rights supposed to be fixed; but we see no reason to doubt the conclusions expressed in those opinions, and adhere to them. The court of appeals was right, and its decision is affirmed.

There is, then, no doubt about the equal right of Alaska before the Constitution and the law to the railway aid asked for in this bill, and no doubt about the power of Congress to grant it. AREA OF ALASKA, 590,884 SQUARE MILES.

Alaska is national in area, in the magnitude and variety of its resources, and in its capacity to support population. It is almost 200,000 square miles greater in area than the original 13 States when they adopted the Constitution and became one of the nations of the world. The following table will give a comparative view of the area of the 13 States and other specified States carved out of their public lands having a smaller combined area than Alaska:

pyu	are mines.
DelawarePennsylvania	2, 050 45, 215
New Jersey	7, 215
Georgia Connecticut Massachusetts	59, 475
Connecticut	4,990
Massachusetts	8, 315
Maryland	12, 210
South Carolina	
New Hampshire	9, 305
Virginia (including West Virginia)New York	67, 230
New York	49, 170
North Carolina	
Rhode Island	1, 250
Area 13 original States	349, 845
Vermont	9, 565

tucky	40, 400
nessee	42,050
0iana	41, 060 36, 350
nois	56, 650
Total area of 20 States	575, 920

as Oklahoma; it is equal in area to 10 average States of the American Union.

Compare it with the following European countries:

Squa	re miles.
Norway Sweden Finland Denmark England and Wales Scotland Ireland	124, 445 172, 867 144, 255 15, 388 58, 575 30, 443 32, 373
Total	578, 346
Alaska	590, 884

France and Germany, in Europe, have only 415,884 square miles, while Spain and Portugal together are not one-half as large as Alaska. Norway, Sweden, and Finland, on the same northern latitude as Alaska, with a combined area of only 441,567 square miles, support a population of 10,884,839 almost exclusively from their agricultural products, for they have no gold, nor coal, nor copper, and their fisheries do not compare in magnitude of value with those of Alaska.

COAST LINE-ISLANDS.

Alaska's coast line is more than 35,000 miles in length, while that of the United States on its Atlantic, Gulf, and Pacific coasts does not exceed 22,000 miles. More than 20,000 miles of the Alaska coast line are washed by the surging tides and the warm waters of the Kuro-shiwo, the Japanese "black stream," ever carrying eastward its tropic waters along the south shores of the Aleutians into the innumerable straits and passages between the thousand islands, great and small, along the continental shores of southern Alaska. The Aleutians, like a rope of pearls, stretch from Unimak to Atka, a distance of more than 500 miles east and west. The islands in the Aleutian group are in a temperate climate and are fit for the habitation of man. Those in southern Alaska, from Kodiak to the Prince of Wales, are well forested, highly mineralized, and offer tempting inducements to hardy settlers. Their waters teem with salmon, halibut, and cod; their shores are covered with shellfish and other sea foods; when the tide is out the table is set. Gold, copper, marble, gypsum, and other minerals are found in quantity and richness in their hills, while the valleys and level areas are fit for agriculture. The climate from Kodiak to Ketchikan is mild and humid; it corresponds, winter and summer, to that of Wash-

ington, D. C., or Richmond, Va. These innumerable Alaskan islands offer homes, happiness, plenty, and prosperity to people who care to accept these blessings. It will not, however, be a "prairie schooner" move nor a "cowboy" existence, but one braver, hardier, and with a more certain future. Here will gather that hardy population of "fisher folk" so familiar in the history of Maine and Massachusetts, supplemented by the marble quarrymen of Vermont and the miners of gold and copper.

MOUNTAIN RANGES, GLACIERS, AND VOLCANOES.

The Cordilleran Mountain Range rises out of the Antarctic seas at Cape Horn, stretches northward along the western coast line of South and North America to Alaska, and thence out upon There it dips into the sea again, only the Alaska Peninsula. the peaks of the Aleutian Islands, stretching away toward the volcanoes of Japan and the Malay Peninsula, to mark the course of the old equatorial earth crack which produced them From Ketchikan to Seward, from Cook Inlet to the end of the Alaska Peninsula, it forms a barrier to the inland progress of the rain clouds which rise off the warm waters of the Japan current and float landward to drop their moisture on its seaward slopes. As the clouds ascend the mountain heights the decreasing temperature wrings them dry. The cloud disappears, the snowfall is added to the glaciers' bulk, and the air current, freed of its burden, drops to the interior region minus its moisture, and dry. And thus are glaciers formed and maintained on the seaward side of the slope, and thus the interior is supplied with dry air and little moisture.

There are no glaciers in Alaska behind the Coast Range except on Mount McKinley, Mount Hayes, and the Mount Wrangell group. No glaciers are found north of the Kuskokwim or the Tanana. None are to be found in the great interior valleys, nor from there northward to the Arctic Ocean. Some people imagine Alaska to be widely glaciated, but less than 1 per cent of its area is covered. Then, too, glaciers have a high economic value. They are generally located in high mountain canyons, unfit for agriculture or other use. When the long, hot days of summer come the streams of the lowlands are parched. The Tanana, the Ohio River of the North, would then disappear but for the glacial waters which pour down from the southern summits. The horde of salmon, the food supply of our Indians, ascending to spawn and renew the race, come on this rise. A Nile-like flood of turbid glacial waters brings richness of silt and top soil, the spawning fish, and the steamboats to a land that would suffer without it. On the coast, from California to Alaska, the high mountain glaciers afford a never-failing source of water power during the season of drought. Alaskan glaciers have a greater potential and economic value for the production of heat, light, and power-for the generation of electricity-than Alaskan forests, and Alaska has forestry reservations larger than the State of Ohio.

Thousands of Americans annually visit the Old World to enjoy its scenery, to view the flords of Norway, the mountains and glaciers of Switzerland, and the fires of Vesuvius, not knowing that these are dwarfed by the greater flords, mountains, glaciers, and volcanoes of Alaska. The highest mountain in the United States is Mount Whitney, in California, whose summit rises 14,500 feet above the sea. Alaska has a dozen peaks which overtop this California giant, the highest, Mount McKinley, rising more than a mile in height above it.

Height in feet of mountains in California and Alaska.

Mount	Wrangell Alaska	14 000

Europe is proud of her single volcano, Vesuvius, on the shores of the Bay of Naples, but the Italy of America, the peninsula of Alaska, has 10 great volcanoes. The Bogoslovs, near Unalaska, are submarine; to-day with loud noises and ascending volumes of smoke and steam, they throw up a red-hot island; to-morrow it sinks into the depths. Makushin, Pogromni, and Shishaldin light the mariner through Aleutian passes, while Weniaminoff, Popof, and Katmai, at long intervals, explode with detonations louder than the heaviest cannonading and cast their volcanic ash a thousand miles away. Iliamna and Redoubt, on the western shore of Cook Inlet, and Wrangell overtopping the interior range, seem to be old and decadent, though the smoke from their internal fires yet floats lazily away to sea. St. Augustine, rising out of the waters of Cook Inlet, and Edgecumbe, guarding the entrance to the beautiful Bay of Sitka,

are extinct, but justly famed for their symmetry and grace-ful lines. A hundred extinct cones, as far north as St. Michael, prove that in ages gone by the forces of internal heat were, as now, enguged in fashioning the shores of Alaska, and extending her islands and continental land mass toward Asia.

RAIN AND SNOW FALL.

The coastal mountain range divides Alaska into two distinct climatic regions. The coast side of the range is rainy and has a high and equable temperature. The snowfall is excessive. Behind the mountain range, in the interior of the country, it is dry and cold in the winter and hot in the summer.

BAINFALL.

Locality.	Years' ob- servation.		Febru- ary.	March.	April.	May.	June.	July.	August.	Septem- ber.	October.	Novem- ber.	Decem- ber.	Inches.

Valdez, Alaska	11	83. 4	53.5	67. 1	33.3	0.7	0.0	0.0	0.0	1.6	11. 4	41.6	72.1	364. 7
Junean, Alaska	15	36. 3	23.1	12. 0	7.1	0.0	0.0	0.0	0.0	0.0	1. 1	6.0	20.9	106. 4
Fairbanks, Alaska	5	11. 0	3.0	5. 0	2.6	T.	0.0	0.0	0.0	0.7	5. 4	5.2	9.9	42. 8

The Weather Bureau reports show a remarkable difference between the fall of rain and snow on the coast and in the interior. While Valdez had an annual average rainfall of 73.94 inches, or more than 6 feet; Sitka, an annual average of \$3.88 inches, or more than 7 feet; and Loring an annual average of 152.16 inches, or more than 12\(^3\) feet, Fairbanks, in the Tanana interior, has an annual average of but 11.73 inches, or less than 1 foot. The proportions may be stated graphically by these figures: Fairbanks, 1; Valdez, 6; Sitka, 7; and Loring, 12. The Tanana Valley has about the same average rainfall as Arizona.

The snowfall in the Tanana Valley, in the interior of Alaska, is proportionally light. While Valdez had 364.7 inches per annum, for a period of observation of 11 years; Juneau, 106.4 inches per annum for 15 years, Fairbanks had but 42.8 inches per annum for a period of observation of 5 years. The proportions may be stated graphically by these figures: Fairbanks, 3.6 feet; Juneau, 8.9 feet; and Valdez, 30.8 feet. The snow in the Tanana Valley and the whole interior of Alaska is light and dry, because of the dry, cold winter climate. There can be no glaciers without an excessive fall of rain and snow, and there being but a light fall of both behind the coast range barrier there are no glaciers there. A road or trail once used for travel over these light interior snows becomes a boulevard for the winter; the snow falls in October and does not melt until April.

Since this bill was introduced I am often asked how many months in the year a railroad can be operated in Alaska. The answer is: Every month in the year and every day in the month as certainly as the Canadian Pacific or the Grand Trunk Pacific, building far north of the Canadian Pacific, can be operated. The light fall of snow in the interior does not even prevent the automobiles from running every day in the winter from Fairbanks to the mines. There will be less annoyance and expense in keeping the Alaska railway open on either of the routes recommended by the Alaska Railway Commission than there is in operating the Northern Pacific, Great Northern, the Chicago, Milwaukee & Puget Sound, or the Canadian Pacific across the Cascade Mountains in Washington and British Columbit. The light, dry snow in the interior is no obstacle at all, the wet and heavier snow through the coast range is largely avoided on the Seward line, and is much less of a burden on the Valdez Line than it now is on the railroads across the coast range in Washington, Oregon, and California.

The triangular Gulf of Alaska thrusts its northern apex far into the southern coast of Alaska. Prince William Sound, Alaska's greatest harbor, is as large as Chesapeake Bay, and as easily protected from assault by an enemy as San Francisco Bay. Its front is protected by Montague and other large islands, while wide entrances between the islands and the mainland afford easy access from the ocean without rock or sand bar to threaten wreck. Fortifications on the headlands commanding these entrances will render it well-nigh impregnable—as safe and easily defended as Seattle or San Francisco.

Numerous interior harbors, unrivaled in position, safety, and comfort, for shipping and naval use branch inland from this greater outer harbor like fingers from the human hand. Cordova, Valdez, Portage Bay, Seward, and many others, are deep, well sheltered, and easily fortified from outer attack, even from Prince William Sound itself. These splendid harbors, nestling behind bristling mountain walls, are each at least 10 miles long, 3 miles wide, have unobstructed approach and deep water, and are sufficiently commodious to hold the

Pacific Fleet at maneuvers. They are ever flooded with the warm tides of the Japanese current and ice never forms in either of them. More ice forms in Boston, New York, or Washington Harbors than in either of these south Alaskan bays. From a strategic and climatic point of view, because they are free from rock, sand bar, or ice, and because they are so naturally defended by the great outer harbor of Prince William Sound and natural mountain sites for fortifications these harbors offer the best natural naval base in the Pacific. With proper fortifications and railroads back to the naval coal fields immediately behind them, they can be turned into impregnable harbors of refuge for our Navy, one-half the distance toward the Orient from our States.

Railroads from the interior must come to these harbors, and the winter trade to the interior now passes through them. Large, safe, commodious, deep, free from ice, ever open and waiting for the coming of commerce, southern Alaska has the finest natural harbors in the world.

Mr. STAFFORD. Will it inconvenience the gentleman from Alaska, while he is describing the advantages and beauties of this country, to stop and point out the different localities on the map?

Mr. WICKERSHAM. Not at all.

Mr. MURDOCK. I wish the gentleman would take his statements seriatim and show us the course of the Japanese gulf stream.

Mr. WICKERSHAM. This is known as the North Pacific current. It rises in tropical waters north of the Equator, in the latitude of the Hawalian Islands, then flows from the coast of California westward across the entire width of the Pacific Ocean, gathering heat as it goes until it strikes the Philippine Islands. There it is deflected to the shore of Japan and is deflected again eastward along the shores of the Aleutian Islands until it strikes southeastern Alaska, and then it flows south along the coast of British Columbia, Oregon, Washington, and California, and strikes on across the Pacific again.

Mr. MURDOCK. That answers my question and I am obliged to the gentleman. At no point does it penetrate the Aleutian chain.

Mr. WICKERSHAM. It does; one branch goes into the Bering Sea, goes through Bering Straits on the American side, and moderates all the climate along the coast.

Mr. MURDOCK. Then it is not a matter that affects the settlement in southern Alaska alone?

Mr. WICKERSHAM. Not at all. I will come to that before I complete my remarks.

So many people going along the Alaska coast see glaciers and mountains above them that they imagine that that condition exists in an increasingly greater degree in the interior, when as a matter of fact the opposite is true. There are no glaciers in the interior of Alaska. They are all on the southern coast and are produced from the excessive moisture coming from the Pacific and falling on the seaward slopes of the mountain side.

We have 20 automobiles at Fairbanks running every day in the winter in opposition to the railroad out to the mines, and they never stop on account of the snow. For nine years in succession the winter stages between Valdez and Fairbanks never missed a scheduled trip.

Mr. GRAHAM of Illinois. How far is it to the mines out of Fairbanks?

Mr. WICKERSHAM. The mines are within 40 miles of Fairbanks.

The CHAIRMAN. The time of the gentleman from Alaska

Mr. STAFFORD. Mr. Chairman, I ask unanimous consent

that the gentleman's time be extended one hour.

Mr. HOUSTON. Mr. Chairman, I ask to amend that by asking unanimous consent that he have time in which to conclude his remarks. [Applause.] The CHAIRMAN. The gentl

The gentleman from Tennessee asks to amend the request of the gentleman from Wisconsin by giving the gentleman from Alaska time to conclude his remarks.

Mr. STAFFORD. I have no objection to that if the time is

limited to to-day

The CHAIRMAN. Providing it does not extend beyond to-day. Is there objection? [After a pause.] The Chair hears

Mr. FERRIS. Mr. Chairman, reserving the right to object, I want to ask the gentleman from Tennessee if it is the purpose through this debate to give each Member all the time he wishes? I make the inquiry because there are many of us who want to be heard at some time during the debate, and of course I take it that the pressure of business behind the bill might crowd out some who want to be heard.

Mr. HOUSTON. My request only refers to the speech made by the gentleman from Alaska because of the fact that he is the Delegate from the Territory, and I think it but just and proper that he should have a full amount of time. So far as the time is given to any other Member, it does not depend upon this. I am willing to give all the latitude that is desirable, but we will have to put some limitation on it.

Mr. MURDOCK. I would like to ask the gentleman if he intends to run until 6 o'clock to-night?

Mr. HOUSTON. Yes; we expect to run until 6 o'clock to-night, Mr. DAVENPORT. I desire to state to the chairman of the committee and to my colleague from Oklahoma [Mr. Ferris] that I do not think there will be any trouble about the time, because I think this is a question that all the Members are anxious to have fully discussed before casting a vote upon it. We are not going to conclude the general discussion of it today, and it is possible that we will run over without fixing any definite time as to when general debate will close.

Mr. FERRIS. Mr. Chairman, I further reserve the right to object for the purpose of saying to the gentleman from Alaska [Mr. Wickersham] that I have no idea of curtailing his speech, because I am enjoying it as well as those who favor the legislation; but at the same time the House will observe that no time has been fixed, and there has been no division of time made. The matter has simply gone along, but if there should come a time when there is to be a division of time I hope the

chairman will be liberal in dividing it.

Mr. HOUSTON. Mr. Chairman, I have no disposition in the world to cut off the time. In fact, I favor the freest discussion

that we can have.

Mr. FERRIS. I so understood the chairman, but I wanted to have that placed in the RECORD, so that there would be no mis-

The CHAIRMAN. The Chair hears no objection, and the gentleman from Alaska has permission to conclude his remarks,

Mr. WICKERSHAM. The navigable rivers in the interior discharge their waters westward into Bering Sea. The Yukon is one of the greatest rivers of the world and ranks with the is one of the greatest rivers of the world and ranks with the Mississippi. It discharges one-third more water per annum than the Mississippi and is constantly navigated in season from its mouth, at St. Michael, to Whitehorse, in the Yukon Territory, Canada, a distance of 2,164 miles. It is only 1,830 miles from St. Paul to New Orleans and 1,930 miles from Pittsburgh to New Orleans. Alaska has more than 6,000 miles of inland navigable rivers which may be connected with the south coast harbors by the railroad provided for in the bill before the House. the House.

	Miles.
Yukon River, navigable for	2, 164
Tanana River, navigable for	275
Kantishna River, navigable for	200
Innoko River, navigable for	370
Iditarod River, navigable for	320
Koyukuk River, navigable for	620
Kuskokwim River, navigable for-	530

This interior system of waterways is now and since 1900 has been navigated by a fleet of large, well-built, flat-bottomed Mississippi River packet steamers, many of which push from two to four barges loaded with machinery, merchandise, provisions, and passengers far up the interior rivers. The system, however, is meager and unsatisfactory. The first drawback to its efficiency is that the Yukon discharges its waters into Bering Sea at St. Michael, and the heavy drift ice in that sea

does not permit the ocean steamers from San Francisco and Seattle to reach the transfer point at St. Michael till June. The Yukon and Tanana are open for navigation by May 10, but it is a month later before the ocean freight can be put into St. Michael, and a fortnight later before it gets into the Yukon for distribution. Here, then, is more than a month at the beginning of a very short summer season lost to transportation. Then freight dare not enter the rivers unless it can get to the distributing point, a distance of 1,175 miles to Fairbanks, before the freeze-up in the fall, and two weeks or more are lost then. The open season for the distribution of freight on these rivers would be extended at least six weeks if the distribution could be made downstream from a central point, like Fairbanks, beginning immediately on the opening of the rivers about May 10. Such a method of distribution from such a central point would extend the efficient period of river transportation at least onefourth longer per annum than is enjoyed under the present method.

Alaska has spacious and ice-free harbors on the south coast and 400 miles in the interior a great river system now capable of distributing freight for four months only, but no transportation line connecting them. Let that link be supplied and at once it increases the efficiency of the river system one-fourth and adds to the railroad mileage quite 6,000 miles of river transportation.

FORESTS.

There are two forest reserves-the Tongass and Chugachin Alaska, which practically cover the coastal front from Ketchikan to Cook Inlet. These two reservations contain 41,815 square miles—a greater area than that of the State of Indiana, or Kentucky, or Ohio, or any of the lesser States. They are reported by the Forest Service to contain over \$5,000,000,000 feet of timber, valued at \$148,750,000. It is estimated that even a greater amount and of a greater value exists in the Susitna, the Tanana, the Yukon, and other interior valleys. The Territory thus has a timber covering of a greater value than \$300,000,000. Much of it is saw timber, more of it is pulpwood, and all of it is valuable for fuel, house building, and mining.

ANIMALS-WILD AND DOMESTICATED.

Alaska is the best big-game country left in the two Americas. The Alaska moose, of which thousands roam the higher vallevs, is the most kingly of the deer family, extinct or alive. Herds of caribou roam over the barren highlands like the herds of buffalo on the Western plains a century ago. White mountain sheep in large bands live on the interior mountains, where the snowfall is light, while mountain goats frequent the windswept peaks of the coast range. Polar bear, walrus, and innumerable seal and other animal life live along the Arctic coasts, while black, brown, grizzly, and Kodiak bear inhabit the southern mountains and fish along the salmon streams. The great Kodiak bear in the Washington Zoological Garden typifies the superior size and wealth of Alaskan land and sea

During the bright dry winter in the interior of Alaska our hunters find plenty of prairie chicken, one of the five varieties of grouse which are abundant there; flocks of ptarmigan are found everywhere from mountain peak to the lower valleys. The raven, owl, hawk, Canada jay, and other winter birds keep us company in the interior, while along the coast the list is greater. But when spring arrives and the snow melts-when the lakes and rivers are opened-then the migratory bird life arrives from the Southland in numbers not to be computed. Swan, geese, brant, ducks of every variety, robins, swallows, martins, and humming birds fill the forests with song and spring cheer. It is estimated that 200 species of birds then inhabit Alaska, and it is truly a birds' paradise.

In the caribou and reindeer herds which now roam over the highlands of Alaska there is an economic promise of the first magnitude. The wild Alaska caribou and the domesticated Lapland reindeer belong to the same species. In 1891 the United States Bureau of Education, under Dr. Sheldon Jack-son, imported a few reindeer from Siberia, and later a few more, and some skilled herders from Lapland. Altogether about 1,280 reindeer were landed on Alaskan ranges, where the herds now aggregate 38,000. The imported reindeer, like the native caribou, live exclusively on the mosses and lichens gathered on the high mountain sides above agricultural possibilities or the grazing lands of cattle. They do not require feeding at any period of the year, increase rapidly, and make fine meat for the market. Their skins are valuable, and the herds solve the problem of meat transportation in the winter season, for they can be driven over the highest and coldest mountain ranges to market without other food than what they readily pick up along the mountain trails. The first ex-

portation of reindeer meat from Alaska was made to Seattle in 1911, and consisted of 185 carcasses, weighing 18,750 pounds, which sold readily for a good price in the market. It is estimated that herds of 2,000,000 of these fine food animals can be permanently maintained in Alaska and that they will support a stock-herding population of 100,000 people and afford a meat supply for a million more.

CLIMATE.

The most serious objection made to the passage of the bill before the House has the least basis of fact to support it. That objection is that the climate of Alaska is so harsh and rigorous that people can not live there in comfort, can not raise gardens or agricultural products sufficient to subsist on, and that a railroad could not be operated in the winter even if constructed with Government aid. The data with respect to the climate of Alaska is so abundant, so exact, and so at variance with the general opinion, that it is offered to the House in the hope that this objection can be effectually and finally disposed of.

North of the Equator, and, of course, in the United States and in Alaska, the date of the winter solstice, December 21, is the shortest day of the year. The sun on that date has reached its farthest point south and begins its return journey toward the north. On the date of the vernal equinox, March 21, it has reached the mid-point of its northern journey, and on the date of the summer solstice, June 21, it reaches its most northern point, stops, and begins its retreat. On September 22 it crosses the Equator on the autumnal journey south, and continues its retreat to the winter solstice on December 22. Those movements of the sun's light and shade produce the four seasons-spring, summer, fall, and winter-and determine the periods in which vegetation may grow for beautifying the earth and providing food for men and animals. We are so familiar with these movements of the sun, with the resulting day and night and the seasons of the year, that few people give consideration to them beyond their effect in the production of their crops. Twice each year, when the sun crosses the Equator, the length of the day and night is everywhere equal, but when the sun is north or south of the Equator days and nights are never equal, though at the end of the solar year the total amount of day and night is everywhere the same. In short, every spot on the earth's surface, in the course of the solar year has the same amount of day and night. Your attention is now directed to a graphic chart representing the years division of sunshine and shadow at Fairbanks, in the Tanana Valley, the central distributing point in the interior of Alaska. Fairbanks is on latitude 65° and on December 22, the date of the winter solstice, the low southern sun skirts the horizon for only two hours and sinks out of sight. It is in the date of the northern midnight.

Immediately after December 22 the sun begins to rise, and from day to day its course across the southern heavens is higher, until on March 21 the day and night at Fairbanks are exactly equal in length. But we are now to have compensation for its long absence during the winter, and it continues to rise until on June 21 its highest culmination is reached and the Tanana Valley is ablaze with 22 hours of sunshine and heat. Not only does nature thus compensate us for the hours of sunshine lost in the winter, but she puts vigor and activity into plant life in an equal measure. Our crops have the same number of sunlit hours for growth that similar crops have in more southern climes, though in a less number of days. In 100 days, between May 20 and September 1, the growing season in the Tanana Valley, the sun shines 1,800 hours, while during the same 100-day period in Oklahoma it shines but 1,500 hours, or one-fifth less time than in the Tanana. For every five days sunshine and heat in Oklahoma during that 100 days the Tanana Valley has six. Our crops grow in equal proportionwhere Oklahoma crops grow five units ours grow six in the same period of time.

During May, June, July, and August, the summer season of the Tanana, the whole earth is ablaze with the glory of the solsticial sun. During that period the Tanana Valley has more hours of sunshine than sunny California, and more hours of summer than Ohio or any other State in the Union. The gardeners and farmers are at work early and late, crops grow vigorously in the long hours of sunshine and heat, and the valleys, the birch-clad hills, and the mountains of the northland respond to the magic touch of the life-giving sunlight.

The summer—no sweeter was ever;
The sunshiny woods all athrill;
The grayling aleap in the river;
The bighorn asleep on the hill;
The strong life that never knows harness;
The wilds where the caribou call;
The freshness, the freedom, the farness;
Tis I who do long for it all.

ture in the valley during the crop-growing season? How does it compare with the temperature in the State of Oklahoma?

Mr. WICKERSHAM. I will come to that in a few moments. But during that period, from the 21st day of March to the 22d day of September-six months-we have the summer, and during that period of time on the latitude of Fairbanks, Alaska, we have 70 per cent of total sunshine out of the total time. is only 30 per cent of night during those six months and 70 per cent of sunshine, and the sun shines just as hot there as it does anywhere, and when the mosquitoes get at you in the brush and the sun pours down upon you you often wish you were back in Oklahoma where it is cool.

Mr. SELDOMRIDGE. I understand that the same percentage of sunshine obtains in latitudes farther north from Fairbanks, but the question of temperature is just as vital to the crop-growing development as the duration of the sunshine.

Mr. WICKERSHAM. Fairbanks and the Tanana Valley are on the same northern latitude exactly as Norway, Sweden, and Finland, and the northern Provinces of Russia, where such vast quantities of wheat are produced. In Norway, Sweden. and Finland more than 10,000,000 people are supported, mostly by agriculture. The climate is similar, and I have the statistics here, and will produce them for the gentleman's edification in very short time.

Mr. ESCH. Mr. Chairman, will the gentleman yield?

Mr. WICKERSHAM. Certainly.
Mr. ESCH. The gentleman's argument about sunshine is very convincing, but does not the production of crops in the Tanana Valley depend upon its elevation above sea level?

Mr. WICKERSHAM. Somewhat, perhaps. The town of Fairbanks in the center of the Tanana Valley is 1,100 miles from the sea down that river, and the town is 512 feet above sea level. It is a very low, wide valley.

Between the 21st day of March and the 22d day of Septem-

ber—the summer six months—the sun shines exactly 70 per cent of the total time, including both day and night. 4.392 hours of time, day and night, the sun shines 3.074 hours. No valley in the United States has that many hours' sunshine in the growing season, and these long hours of sunlight, heat, and growing force give the Tanana its wonderful climate and great agricultural productivity.

THE NORTHERN PACIFIC OCEAN CURRENT.

The Gulf stream of the Atlantic carries the tropical waters flowing from the Carribean Sea into the Gulf across the Atlantic upon the coasts of the British Isles and thence to the western and northern shores of Norway and Sweden. Greenland lies on the same northern latitude as Norway and Sweden, and its continental ice cap graphically demonstrates the condition which would exist in Norway and Sweden if the warming in-fluence of the Gulf stream was withdrawn. The British Isles lie as far north as Labrador-the difference between the genial climate of England and the Arctic climate of Labrador is the result of the influence of the warm ocean current on the English climate.

The equatorial waters of the North Pacific Ocean current, the Kuro-siwo, or "Black Stream," of the Japanese, does for Alaska exactly what the Gulf Stream does for Norway and Sweden. The North Pacific current takes its rise in the tropical waters north of the Equator. It follows the course of the sun westward until the coasts of Japan deflect it north and eastward. One branch enters Bering Sea and passes thence into the Arctic, but the great body flows eastward, along the southern shores of the Aleutian Islands, until it strikes the continental shores of south-Thence it is deflected southward, past the firern Alaska. clad hills of British Columbia, Washington, and Oregon, to turn westward again off southern California, and gather new heat from the Tropics as it flows again westward on its great circuit. This wheel current of the North Pacific is greater in volume than the Gulf Stream of the Atlantic, and its powerful influence. added to that of the long summer days and the heat of the solstitial sun pouring into the valleys of Alaska, is responsible for the genial summer climate of that region. On the same latitude in Norway and Sweden, for exactly the same reasons, there is the same summer climate. The mean annual temperature of the old and the new capitals of Alaska compares favorably with that of the capitals of Norway, Sweden, and Russia.

Equi dinital temperature ar algereus capitalis.	egrees.
Sitka, Alaska	- 43. 4 - 42. 3
Juneau, Alaska Christiania, Norway	_ 41.5
Stockholm, SwedenSt. Petersburg, Russia	- 42.3 - 39.6

Mr. SELDOMRIDGE. Mr. Chairman, may I interrupt the gentleman right there to ask him a question about the temperature of Juneau and Stockholm is exactly the same, while Sitka's mean annual is nearly 1 degree

higher than Stockholm, 2 degrees higher than Christiania, and 4 degrees higher than St. Petersburg, all of them being on the

seacoast and on the same latitude.

Just as the influence of the Gulf Stream is felt throughout the interior of Norway and Sweden, so is the influence of the North Pacific Ocean current felt in the interior of Alaska. The Agorth Facine Ocean current feit in the interior of Alaska. The isothermal lines on the official Weather Bureau map of western Alaska have a strong upward curve from Bering Sea, due to the influence of the warm air currents from the "Kuro-shiwo," which push into the Kuskokwim and Tanana interior after rounding the western end of the Coast Range. Because of this influence from the North Pacific Ocean current it is much warmer at Fairbanks than at Dawson, which has the misfortune to be a thousand feet higher in altitude than Fairbanks and behind a second range of mountains from the sea.

WINTER CLIMATE OF THE TANANA VALLEY.

The minority report in its pessimistic minimization of the arid Arctic waste, which it described as Alaska, propounds this

startling inquiry in its eleventh "view": "Who ever heard of a country where the winter was six months long and the temperature falling as low as 79 and 80 below zero, figuring seriously in the markets of the world as producers and shippers of grain and meat?" That is a very unfair statement and incorrect in correct in strength of the statement and incorrect in every particular. I am in receipt of an official statement from the Department of Agriculture giving full data touching temperatures and precipitation observed for a series of years at the Weather Bureau stations in the interior of Alaska, and now make it a part of my remarks.

DEPARTMENT OF AGRICULTURE, OFFICE OF THE SECRETARY, Washington, March 21, 1912.

Hon. James Wickersham, House of Representatives.

DEAR SIE: Referring to your recent request for data regarding Alaska, I have the honor to transmit herewith certain climatological information prepared by the Weather Bureau.

Very truly, yours,

W. M. HAYS, Acting Secretary.

I now show the House an official Weather Bureau map of Alaska, and on it are shown the lines of the average temperature for the three winter months. Some gentleman wanted to know about the temperature of the winter months. January, February, and March are the cold months in Alaska, and here is a map showing the average temperatures of these three winter months. The average temperature of the region of which Fairbanks is the center during those three winter months is 10 degrees below zero, while above it you find a line of 15 degrees below, so that the average annual temperature of those three winter months ranges between 10 and 15 degrees below zero.

Mr. YOUNG of North Dakota. What are the extremes? Mr. WICKERSHAM. I will show you that in a few moments. I am showing you this map for a moment for the purpose of showing you the effect of the Japanese Current on temperatures in that country. I call attention to the fact that a branch of that current enters Bering Sea and warms that interior coast and flows toward the north, and it will be noticed that the isothermal lines are tilted upward. The highest line runs most northwest and southeast, and although Fairbanks is north of Dawson, the lower temperature of 15 degrees runs through Dawson. Dawson is about fifteen or sixteen hundred feet above sea level.

It is a thousand feet above the level of Fairbanks and the Tanana Valley and it is behind a second range of mountains. It is in the cold region.

Mr. FESS. Is that due to elevation or latitude?

Mr. WICKERSHAM. It is due to both.

Mr. STAFFORD. I notice some minor red lines. Are those higher temperatures to the southward?

Mr. WICKERSHAM. Yes.

Mr. STAFFORD. Will the gentleman mention what those temperatures are?

Mr. WICKERSHAM. The lower one is 30° above zero; the next is 20, the next 10, and the next is the zero line. comes 10 below, and 15 below. Now I call attention to the three summer months in Alaska on this upper map. The annual average temperature in the interior of Alaska is 55° above zero. That is the annual average temperature given by the Weather Bureau in the summer months.

Mr. FESS. What are those months? Mr. WICKERSHAM. June, July, and August. Now I want to call attention-

Mr. FERRIS. Will it interrupt the gentleman if I should ask a question there?

Mr. WICKERSHAM. No.

Mr. FERRIS. I want to ask the gentleman if it was or was not true that in each and every month in Alaska they have frost, and sometimes even a hard, killing frost?

Mr. WICKERSHAM. No; that is not true.

Mr. FERRIS. Do you know Prof. Chubbuck and Prof. Piper?

Mr. WICKERSHAM. I do.

Mr. FERRIS. They are in charge of the four Alaskan stations.

Mr. WICKERSHAM. No, sir; Prof. Georgeson is in charge.

Mr. FERRIS. Do you know him? Mr. WICKERSHAM. I do, very well, indeed. Mr. FERRIS. If Prof. Georgeson, Prof. Chubbuck, and Prof. Piper in a report stated that there was a killing frost on July 31, August 8, August 15, and August 25, and on September 8, would that be true?

Mr. WICKERSHAM. I think it would be true.

Mr. FERRIS. At Fairbanks? Mr. WICKERSHAM. No; not at Fairbanks; it would not be

Well, at Copper Center?

Mr. WICKERSHAM. Copper Center is, of course, very much higher than Fairbanks.

Mr. FERRIS. Is it true of Kodiak?

Mr. WICKERSHAM. No; it is not.

Mr. FERRIS. I will say to the gentleman frankly there is a report that states that.

Mr. WICKERSHAM. I would like to see it.

Mr. FERRIS. I will present it.
Mr. WICKERSHAM. I now show the lowest temperatures ever recorded in Alaska, and a map showing the lowest temperatures ever recorded in the United States, and I will call attention to that in a moment.

Mr. BROCKSON. In the summer months? Mr. WICKERSHAM. No; in the winter months.

Mr. FESS. The gentleman's remarks are luminous and we enjoy them very much, and the gentleman will understand that some questions are asked for information.

Mr. WICKERSHAM. I appreciate that. Mr. FESS. What are the growing months?

Mr. WICKERSHAM. The gentleman asks what the growing months are?

Mr. FESS. For agriculture?

Mr. WICKERSHAM. The farmers begin to put in their crops the latter part of May, and the growing months are the

latter part of May, June, July, August, and September.
Mr. SAMUEL W. SMITH. Will the gentleman tell us what

they raise?

Mr. WICKERSHAM. We raise the finest potatoes in the world. We raise barley and oats which can not be beaten in any climate

Mr. FERRIS. The gentleman has given investigation to this

A MEMBER. Let the gentleman get through with his state-

Mr. FERRIS. . If the gentleman declines to yield, all right.

Mr. WICKERSHAM. I do not decline to yield.

Mr. FERRIS. The gentleman said a moment ago that they raise the best potatoes in the world.

Mr. WICKERSHAM. Yes, sir.

Mr. FERRIS. I would like to ask the gentleman if it is not a fact that the agricultural report from the men in charge of the stations does not show that it is almost impossible to sell those kinds of potatoes at all on the market in Fairbanks because they are in such a watery condition, and that the price of potatoes from the States are not even double or treble the price?

Mr. WICKERSHAM. No; that is not true.

Mr. FERRIS. Does the gentleman deny the statements made in the reports from Alaska?

Mr. WICKERSHAM. I have not seen such reports.

Mr. FERRIS. I will show them to the gentleman. Mr. WICKERSHAM. When they are presented they will prob-

ably be found to be correct.

Mr. FERRIS. The gentleman knows the facts, no doubt.

Mr. WICKERSHAM. I am not raising potatoes.
Mr. FERRIS. Does not the gentleman say that the potatoes raised in Alaska are not watery and inferior in value to potatoes brought in from the outside?

Mr. WICKERSHAM. The gentleman says nothing of the kind. The gentleman says that when the land is first prepared for crops, and when the potatoes are first put in the potatoes are not so good as they are later, when the ground has been tamed, just as it was in the case of Illinois and Indiana and Ohio. where the potatoes were not good until the ground was first tamed.

Mr. FERRIS. Then the gentleman insists that the potatoes raised in Alaska are as good now as those brought in from the outside?

Mr. WICKERSHAM. No; but they are just as good as those that were raised in Indiana, Illinois, and Ohio, for the same identical reason. Those raised on ground which has been cultivated two or three years are just as good and even better than any shipped from the outside, and sell for better prices

Mr. FERRIS. Is not the price of potatoes from the States

higher than that of potatoes raised in Alaska?

Mr. WICKERSHAM. I will state that the price of potatoes from the States was higher for a few years.

Mr. FERRIS. How is it now?

Mr. WICKERSHAM. The prices of outside potatoes and potatoes raised in Alaska are about the same, as our land is becoming more tame and susceptible of better cultivation.

Mr. SAMUEL W. SMITH. Did the gentleman finish the statement as to what is raised there?

Mr. WICKERSHAM. No; not at all.

Mr. YOUNG of North Dakota. Do they raise flax there?

Mr. WICKERSHAM. I do not think anybody ever tried to raise flax, but we raise oats, and barley, and rye, and wheat, and potatoes, and the finest celery in the world. We can beat Kalamazoo for celery, and we also raise garden vegetables of

Now, the gentleman from Oklahoma [Mr. Ferris] will undoubtedly find in some report a statement that we can not raise I have seen that report, but when Mr. Chubbuck comes up there and stays around for a little while and goes out without full information he may say we could not raise toma-toes. But we do raise tomatoes and we raise them to perfec-tion, although it was thought at first we could not do so in that country, and the earliest reports from the experiment sta-tions will show that. 'Now, of course, some of those reports from the experiment stations state one thing and some state another, unless you coufine your research to recent dates. But if the gentleman from Oklahoma will take the last report of our experiment station at Fairbanks and those at other places I will stand by them.

Mr. LINDBERGH. How about fruits? Mr. WICKERSHAM. Good. Wild berries grow in great variety. Alaska is the natural home of the cranberry. great cranberry bogs all through that Tanana country. Of course they do not grow very high. They are low-bush cran-berries generally. We have a great many other berries and small fruits, including strawberries, currants, and berries of that kind. Then, of course, in our gardens a great many more varieties of berries are raised.

Mr. WILLIS. I just wanted to suggest, in answer to the inquiry of the gentleman from Minnesota [Mr. LINDBERGH] and the inquiry of the gentleman from Michigan [Mr. Samuel W. Smith], that if they will get the annual report of the Alaska Experiment Station for the year 1910-a document which is available-they will find very complete information on the question of growing potatoes and other products, and also on the growing of fruits, bearing out completely what Judge Wickersham has stated.

Mr. LINDBERGH. I did not ask the question to object at

all. but simply for information.

Mr. WICKERSHAM. Yes; I understand. And if those gentlemen auxious for the truth in this matter will go to room 115 in the Senate Office Building and see the fine exhibit there of grain and vegetables from the Tanana Valley and other parts of Alaska, they will be amazed at it. Also of fruits. It is very instructive and convincing, and you should all see it.

Mr. SLOAN and Mr. THACHER rose.

The CHAIRMAN. To whom does the gentleman yield? Mr. WICKERSHAM. I will yield to either one.

Mr. THACHER. The gentleman refers to the growth of Mr. VICKERSHAM. They are wild or cultivated?
Mr. WICKERSHAM. They are wild.
Mr. THACHER. Does not the frost interfere with them?

WICKERSHAM. No, sir. They spring up abundantly, and they grow wild everywhere.

Mr. THACHER. I come from a cranberry country, and I am interested in the subject.

Mr. WICKERSHAM. Our cranberries are excellent, and we

have a great field for them in the Tanana country.

Mr. SLOAN. On the same topic, as to the growth of cranberries being favored, is it also true as to the growth of wild

M.; WICKERSHAM. Well, we have ravens up there. Maybe

that would satisfy the gentleman. [Laughter.]
Mr. LOBECK. There seem to be some ravens here. [Renewed laughter.]

Mr. WICKERSHAM. Notice that not in all the years in which the Weather Bureau has maintained stations in the interior of Alaska has the thermometer been officially caught "falling as low as 79° or 80° below zero" for six months or any other period. The lowest it has ever gone in the Tanana Valley, at Fairbanks, in a period of seven years' observation was when it once went down to 65° below zero. Your attention is called to the official Weather Bureau chart, giving the "lowest temperatures ever recorded at points in Alaska." You will notice that 65° below is the coldest ever recorded in the Tanana Valley.

I do this for the purpose of showing that there is no spot in all Alaska where the temperature for six months, or one month, or one minute, ever reaches 79° or 80° below zero. It is amazing that the trustees of this great trust in Alaska should make such statements upon the floor of this House, or anywhere else, when they could get accurate information from the Weather Bureau to show what the truth is.

Mr. ROBERTS of Massachusetts. Will the gentleman yield

for a moment?

Mr. WICKERSHAM. Yes.

Mr. ROBERTS of Massachusetts. I think the gentleman was about to tell the House the extreme ranges of temperature, as shown by the Weather Bureau observations.

Mr. WICKERSHAM. I am going to do it right now.
Mr. BATHRICK. Even if the temperature was as low as 79° or 80° below zero, would it represent any more serious obstacle to agriculture than is produced by 40° to 50° below zero in the northern part of continental United States?
Mr. WICKERSHAM. I do not think so. There are no crops in the ground at that season of the year, and it makes no difference to the next year's crop what the temperature is then.

But that statement as to the temperature being 79° or 80° below zero does not happen to be true. I now call the attention of the House to this official Weather Bureau map, showing the lowest temperatures ever observed in the Territory of They are not average temperatures, they are not Alaska. temperatures which happen every day in the winter or every day in some months in the winter, or any day regularly in Alaska, but they are the exceptionally low temperatures which have been noted by the weather observers in the Territory of Alaska in all the years they have had weather observations there.

I call your attention to the fact that at Fairbanks, Alaska, in the Tanana Valley, the lowest temperature ever recorded was 65° below zero. In all the years that they have kept the Weather Bureau reports there 65° below zero is the lowest that

was ever recorded in the Tanana Valley.

Your attention is now called to the Weather Bureau chart showing "the lowest temperatures ever observed" in the United States, and especially to the fact that a large area in Montana is shown to have recorded 60° below zero, or within 5° of the coldest day ever observed in the Tanana Valley. Fifty degrees below zero was observed over the northern part of Montana, below zero was observed over the horthern part of Montana, North Dakota, Minnesota, and Wisconsin, while 40° below spreads over a greater territory, reaching as far south as Colo-rado and covering the northern parts of New York, New Hamp-shire, and Maine. Why the minority report added 14 or 15 degrees to the single lowest temperature ever recorded in the Tanana Valley, and then by innuendo extended the 79° or 80° below zero thus falsely compounded over a winter period of six months in every year, is for the minority report to expense of the six months in every year, is for the minority report to expense of the six months in every year, is for the minority report to expense of the six months in every year, is for the minority report to expense of the six months in every year, is for the minority report to expense of the six months in every year, is for the minority report to expense of the six months in every year. of six months in every year, is for the minority report to explain. The statement has no support in fact or in any official data reported by the Weather Bureau.

Mr. EVANS. Will the gentleman yield?

Mr. WICKERSHAM. Yes,

Mr. WICKERSHAM. Yes.

Mr. EVANS. I should like to ask, Is it not a fact that that territory which you have pointed out, where the thermometer sometimes reaches 50° to 60° below zero, is to-day the best wheat-growing country in America?

Mr. WICKERSHAM. It is; and the Government is spending immense sums of money in that very region in the Reclamation Service, extending the growth of wheat and oats and other coreals throughout those parts of Montana and other porthern

cereals throughout those parts of Montana and other northern parts of the United States.

Mr. YOUNG of North Dakota. Is it not a fact that the moisture is held in the ground by deep freezing?

Mr. WICKERSHAM, Undoubtedly.

Mr. YOUNG of North Dakota. And that the colder the weather the more certain the ground is to contain a sufficient amount of moisture to grow crops in the following summer?

Mr. WICKERSHAM. Undoubtedly.

Mr. BRYAN. Is it not a fact that the Government donated a larger price for the building of a railroad through that territory you are now discussing than you are now asking for a railroad in Alaska?

Mr. WICKERSHAM. Very many times more. Mr. BRYAN. And then did not own the railroad?

Mr. WICKERSHAM. And then did not own the railroad. Now, you will see from this Weather Bureau chart that it sometimes gets below zero even in the State where my friend [Mr. DAVENPORT] who signed the minority report has his home. I find that it gets 20° below zero in Oklahoma. [Laughter.] That does not prevent the people of the State of Oklahoma from raising good crops the next year, any more than 65° below zero, as an exceptionally low temperature, prevents the people of the Tanana Valley from raising crops.

Mr. SELDOMRIDGE. What is the record on the lack of

rainfall and drought as compared to Oklahoma?

Mr. WICKERSHAM. I guess the gentleman knows as much about that as I do, and maybe more. We never have a drought in our country, never; and we do not have any chinch bugs nor grasshoppers. [Laughter.] And we never have the fever nor the ague, nor a hundred other luxuries which my friend down in Oklahoma has.

Mr. DAVENPORT. Will the gentleman yield? Mr. WICKERSHAM. With pleasure. Mr. DAVENPORT. I should like to ask the gentleman if the reason why they never have any chinch bugs or grasshoppers is not because during the greater portion of the year they can not thrive there?

Mr. WICKERSHAM. I have no doubt the gentleman can say that.

Mr. DAVENPORT. Because they would have no grass to live on there, even if they wanted to.

Mr. WICKERSHAM. I have no doubt the gentleman can say that.

Mr. DAVENPORT. Is not that the fact, that that is true?

Mr. WICKERSHAM. Why, certainly not.
Mr. DAVENPORT. What is the fact, then? months in the year can a grasshopper or any other living being procure anything to live upon in the Territory of Alaska, take

Mr. WICKERSHAM. Just about as many months as he could

in the gentleman's district.

Mr. DAVENPORT. I should like to ask the gentleman if he expects to pass his bill upon the theory that my colleague and I have signed minority views against his bill? Does he expect

that argument will take him through?

Mr. WICKERSHAM. Not at all, Mr. Chairman, but I do feel that I am under some obligations to people in my Territory to answer the unkind and unfair statements in the minority views. Somebody might believe them if I did not. [Laughter.]

Mr. DAVENPORT. Mr. Chairman, I accept the criticism, but I would like to ask the gentleman if he thinks the criticism of my colleague and myself will pass his bill.

Mr. WICKERSHAM. Oh, the gentleman does not want infor-

Mr. DAVENPORT. I want information and am trying to get the gentleman to give it to the House, but he is indulging in criticism of those who signed the minerity report.

Mr. WICKERSHAM. What is the gentleman's question? Mr. DAVENPORT. I ask the gentleman if he expects to pass

his bill by a criticism of my colleague and myself?

Mr. WICKERSHAM. Perhaps it might be of some assist-[Laughter.]

Mr. GOOD. Will the gentleman yield?

Mr. WICKERSHAM. Certainly.

Mr. GOOD. The gentleman from Oklahoma [Mr. DAVEN-PORT] just made the observation that it was so cold in Alaska that grasshoppers could not live so as to produce anything for the people to live on. I would like to know what the grass-hoppers produce in Oklahoma that people live on. It might

have some bearing on the high cost of living. [Laughter.] Mr. DAVENPORT. Mr. Chairman, I did not say anything of the kind, and I do not think the reporter's notes will so show. But if that will have anything to do with taking \$35,000,000 out of the Treasury to construct a railroad in Alaska, I will

bear it with greatest cheerfulness.

Mr. WICKERSHAM. Minority views seemed to forget that no country in the world raises or attempts to raise crops when the temperature is "79° or 80° below zero," or 25° below, or below. But Saskatchewan, Alberta, Manitoba, Montana and other parts of the United States, and Norway, Sweden, Finland, and the northern Provinces of Russia raise crops during the sunlit solstitial summer, though in the winter it sometimes happens the temperature descends to 60° or 65° below zero. What difference does it make to the summer crops how cold it was last winter, or whether it was 65° or 80° below zero?

Railroads in Canada, in a climate substantially the same as that in the Tanana Valley, are operated every day in the year. The Tanana Mines Railway, 45 miles in length, from Fairbanks to the mines, has been operated every day in the year for 10 years, and Fairbanks automobiles run daily during both winter and summer from Fairbanks to the mines in opposition to it. The White Pass & Yukon Railway runs from Skagway across the Coast Range to Whitehorse; and the Dawson Railway, out to its mines, never misses a trip, under identically the same conditions that would confront the operation of a trunk railroad from the coast to the Tanana Valley. There is no climatic or any other reason why a railroad can not be operated from the seacoast to Fairbanks both in the winter and in the summer.

AGRICULTURE.

But "Minority views" declares that even if a railroad can be operated to the interior of Alaska, no agricultural products can be grown there with which to support population. ing that the interior terminal of any road built under this bill will be at Fairbanks, in the Tanana Valley, what is the fact

about the agricultural capacity and value of that valley? When farmers think of Alaska it is with a view capacity for agriculture; a banker only thinks of its ability to support his business; the manufacturer inquires what it will support his business; the manufacturer inquires what it will take in manufactured products; and the merchants judge it by its statistics of trade and commerce. There are those who now object to building a railroad into Alaska because it will not raise corn or watermelons. If their idea of the value of agriculture had been followed there would be no farmers in Norway. Sweden, or Finland, in Manitoba, Alberta, or Saskatchewan, and would never be any in Alaska. Primarily

Alaska is not an agricultural country. It has other more showy attractions, and farmers have been slow to realize the solid returns which agriculture affords in this fertile northern valley. The Tanana Valley is a good agricultural region, compared with the Provinces of Canada, and Norway, Sweden, and Finland, but, unlike them, it is also rich in minerals, which always offer a hope of a speedier return to labor than farming on the frontier.

Mr. HARDY. Will the gentleman yield? Mr. WICKERSHAM. Certainly.

Mr. HARDY. Will the gentleman allow me to put, in brief, what I apprehend to be the situation? As I understand it, the railroad difficulty in going to Fairbanks is simply to get through the ridge of mountains close to it. If that is tunneled through so that you can pass through it the railroad is without diffi-

culty.

Mr. WICKERSHAM. Without difficulty, because the snowfall is only about 3 feet and very light. When you put your foot down you go to the bottom of it; there is no substance to it.

Mr. HARDY. The mountain ridge next to the seacoast is

Mr. WICKERSHAM. It is 20 miles from Skagway to the top of the mountain, and in 110 miles you are at White Horse, on a navigable river, by that route. The distance from the coast to the mountain range varies along the coast.

Mr. HARDY. How far is it from the seacoast to the top of

the ridge?

Mr. WICKERSHAM. About 20 miles at Skagway.

How far is it from Cordova?

Mr. WICKERSHAM. The railroad follows the coast line around to the mouth of the Copper River and then up the Cop-

Mr. HARDY. How far is the mountain ridge back of the

seacoast?

Mr. WICKERSHAM. It is right at the seacoast; the big mountains are not 20 miles back.

Mr. HARDY. How far is it from Seward?
Mr. WICKERSHAM. There is substantially no mountain range back of Seward; the grade does not exceed 1,800 feet at the highest place, and the railway goes through that region at an elevation of about a thousand feet—1,000 or 1,100 feet.

Mr. HARDY. At Cordova there was talk of tunneling through

that mountain range, was there not? Mr. WICKERSHAM. At Valdez.

Mr. HARDY. How long a tunnel would that be? Mr. WICKERSHAM. I do not know the length, but probably a mile. There was another tunnel proposition suggested from Portage Bay to strike the present line running north from Seward, and that would be 2 miles long, I am told.

Mr. HARDY. There is a road owned by private owners from

Cordova and one from Seward, but none from Valdez. Mr. WICKERSHAM. None from Valdez.

Mr. HARDY. Which is the central point.

Mr. WICKERSHAM. Yes.

Mr. WHITE. Will the gentleman yield? Mr. WICKERSHAM. Yes.

Mr. WHITE. The gentleman compares the possibilities of agriculture in Alaska, in the Tanana Valley, with Norway and Sweden and Saskatchewan. Will he tell me whether the ground is frozen in other countries as deep as it is in Alaska?

Mr. WICKERSHAM. I do not think the ground is frozen as

deep in those other countries as in some parts of Alaska.

Mr. WHITE. Is it not a fact that the ground freezes in Alaska to the depth of 50 or 60 feet?

Mr. WICKERSHAM. In some parts of Alaska; yes.

Really the only solid argument against the passage of the bill before the House comes from those who base it upon the lack of agricultural value in Alaska. They forget that railroads are often built for other reasons than hauling corn. instance, Arizona may not raise as much oats, corn, and wheat as one county in Kansas, but her mineral production in 1909 was \$34,217,651. So it is with Montana, Idaho, Wyoming, Colorado, and Nevada. The mining States make little attempt to raise agricultural products, except for local market—they add to the wealth of the country by mining. Alaska is typically a mining country—the richest in the world—but it has agricultural capacity sufficient to feed a population equal to that

of Norway and Sweden. of Norway and Sweden.

Your attention is now directed to a large 6-foot photograph of the town of Fairbanks, situated on the banks of the Tanana River on the north side of the Tanana Valley. This picture gives a correct view of the Tanana Valley, and looking into the center of the picture you are looking due south. The valley here is 50 miles wide; it is well watered, well timbered, wide, flat, and fertile. The soil is a silt brought down in ages past from underneath the great glaciers which ground the mountains far to the south and which the ancient glacial floods deposited over this wide and now fertile valley. As the glaciers ground the mountains down both gradually disappeared, but the beautiful valley remained well fitted for the habitation of the tribes of men who are now settling there. The Mississippl and Ohio Valleys were filled by a great northeastern glacier, which leveled Illinois and filled these valleys with rich soil. In exactly the same way, by exactly the same force, the Tanana Valley was filled with exactly the same rich soil as the Mississippi. It is wide and fertile, with a soil of silt and loam, productive and capable of supporting a large farming and stockraising population.

In the presentation of his objections to Alaska as a land of homes and farms the gentleman from Oklahoma [Mr. Dav-ENPORT] quoted from the statement of Prof. Piper made before the Senate Committee on Territories to show that the agricultural capacity of the great interior valley was low. professor's statements were not enthusiastic, but on turning to his evidence, on page 551, we learn the reason for his conservatism, for on inquiry he testified:

Senator Walsii. What is the character of your information from the farmers in the Fairbanks neighborhood?

Prof. Piper. Only what has been published in the reports. Senator Walsii. Generally speaking, what is that?

Prof. Piper. Generally favorable; that is, vegetables do exceedingly well. Potatoes yield up to the neighborhood of 300 bushels per acre. The quality, where they are properly grown, is said to be very good.

And on page 549, Senate hearings, he is quoted as follows:

There can be no question from these results that there is a possibility of the production of grains in the agricultural lands of Alaska. Just here I may say that the amount of tiliable land in the interior of Alaska has been estimated by most of the men who have attempted to make an estimate at about 30,000 square miles. The total area of agricultural lands in Alaska has been estimated at 100,000 square miles, of which it is assumed that at least one-third is tillable, and that of the tillable lands probably more than two-thirds is in the interior. So there is a very large area of land which is capable of raising profitable crops of grain and would furnish a large amount of freight.

And on page 547 the professor admits:

I know nothing of the interior except from the agricultural reports which have been published and some miscellaneous information that has come to me from time to time.

He then pessimizes professorially, because it cost the experiment station \$200 an acre to clear a birch forest off a south sloping hill at the experiment station at Fairbanks. Well, that is some timber, anyway.

If we have timber enough of that kind in Alaska, we ought to be thankful. I called attention some time ago to the fact that the Forest Bureau figured that we have nearly \$150,000,000 worth of timber in Alaska forest reserves, and that we have \$150,000,000 more in the interior, but it does not cost \$200 an acre to clear if. Everybody knows that when the Government starts in to clear land it hires the highest-priced men at the time of year when they are receiving the highest wages for work in the mines, but an old farmer would clear that by burning it off and knocking the stumps over next year for about \$10 an acre.

Now let us hear the evidence of men who are competent to speak of the area and capacity of the agricultural land in Alaska from actual observation and experience. Prof. C. C. Georgeson is now, and for more than 10 years last past has been, the special agent of the Department of Agriculture in charge of Alaska experiment stations. He resides in Alaska, and has given this subject his constant attention. In a special address before the National Geographic Society in Washington, found in its July, 1909, magazine, at page 676, he makes these declarations about the area and capacity of agriculture in Alaska:

AREA OF AGRICULTURAL LANDS.

AREA OF AGRICULTURAL LANDS.

Alaska has not been surveyed. We have therefore no definite data as to the actual area which can be utilized for agricultural purposes, but I believe that the following estimated figures are approximately correct: The Yukon Valley and the valleys tributary thereto, except the Tanana, 30,000 square miles; the Tanana Valley and its tributaries, 15,000 square miles; the Copper River Valley and its tributaries, 15,000 square miles; the Susitna and the Matanuska Valleys, 15,000 square miles; the valleys of the Kuskokwim and the Nushagak Rivers, 15,000 square miles; and the coast region, 10,000 square miles; total, 100,000 square miles, or in round numbers about one-sixth of the area of the entire Territory. I do not mean to say all of this is good plow land, but I mean that there is at least 100,000 square miles in Alaska which can be utilized for culture and for pasture, and, as a matter of fact, the area is probably very much larger since a considerable of the mountain territory will afford pasture. Perhaps these data can be realized more fully if we compare them with similar data of better-known areas. The States of New York and Pennsylvania have together an aggregate area of 94,000 square miles, which is less than the agricultural area in Alaska. The combined areas of Maine, Vermont, New Hampshire, Massachusetts, Rhode Island, New Jersey, Delaware, Connecticut, and Maryland do not equal the agricultural area of Alaska.

WHAT POPULATION CAN THE TERRITORY SUPPORT?

In the face of these facts it is fair to infer that Alaska can support a permanent population. It would, of course, be too much to assume that Alaska can support a population equal to that of the States mentioned. In 1900, for instance, Massachusetts had a population of 348 persons to the square mile, New Jersey had 252 persons per square mile, New Jork had 152 per square mile, and Pennsylvania had 140 per square mile. It must not be forgotten, however, that these two large States have extensive mountain and lake areas which are not populated at all, but which are nevertheless counted in these density figures. But is it too much to say that the agricultural area of Alaska can support and will eventually support a population of 30 persons per square mile? This is but little more than the average density of the population of the United States, exclusive of Alaska and Hawaii, in 1900, but including our mountains, deserts, and forest areas, which are now uninhabited. The country which affords the best parallel to Alaska in point of latitude and climate is Finland. It is bounded on the south by latitude 60° and on the north by latitude 70°. The main body of Alaska lies within these latitudes, though the two long arms of southeastern and southwestern Alaska extend some 8° farther south. Now, Finland has a total area of 148,000 square miles, or, in round numbers, one-fourth the area of Alaska. But one-third of Finland consists of marsh land and inland lakes and another one-third is forest land. The agricultural area therefore, including the area covered by streams, towns, etc., does not exceed 50,000 square miles. But Finland supports a population of 3,000,000 people, or 60 persons per equare mile of area utilized for agricultural purposes. Would it be unreasonable to suppose that the agricultural area of Alaska can, and eventually will, support an equal population of 6,000,000 people, or 60 persons to the square mile? If it is not, then Alaska can support a population of agricultural crops, and the temperature which

DRAWBACKS TO SETTLEMENT.

As yet there are but few farmers in Alaska, and these are chiefly disappointed prospectors who have found that they can make more money raising products to supply the local market than they can mining. Nor is there any immediate prospect that the country will be settled with a farming population. Congress has generously enlarged the homestead in Alaska to 320 acres, but even this does not attract prospective farmers except to a very limited extent. The reason is that it is too expensive for a farmer in the States to move his family and equipment to the northland and there begin as a pioneer. Lack of transportation facilities is a barrier at once both to the influx of people and to the export of such produce as they might raise. Until the transportation problem is solved, Alaska will have but few immigrants aside from those who come for the purposes of trade and mining; but these conditions will be remedied as the resources of the country are developed. The rich deposits of gold, copper, and coal are bound to be developed, and with this development there will be a general advance, not only in transportation conditions, but there will be a corresponding growth in the number who take advantage of the agricultural possibilities of the country.

Mr. HARDWICK. Mr. Chairman, will the gentleman yield

Mr. HARDWICK. Mr. Chairman, will the gentleman yield for a question?

Mr. WICKERSHAM. Yes. Mr. HARDWICK. Before I ask a question I desire to state to the gentleman very frankly that the question bears upon an entirely different subject from that which he is now discussing, but it does relate to the bill. Will it bother the gentleman at

all if I ask him the question now?

Mr. WICKERSHAM. Not at all.

Mr. HARDWICK. Did this Alaska commission ever survey any of these projected routes?

Mr. WICKERSHAM. No.

Mr. HARDWICK. There has been no survey of any of them? Mr. WICKERSHAM. Not by the Government for Government railway purposes. Of course, there are the topographical surveys by the United States Geological Survey, and a lot of private surveys whose maps are usually on file in the General Land Office.

Mr. HARDWICK. No accurate detailed estimate of what it will cost to build them?

Mr. WICKERSHAM. Accurate and detailed in this: They went over those routes, and assuming that a railroad could be built substantially on the level country which they covered, they made very careful and full estimates, and in the worst parts of those routes other railroads had made estimates and surveys, and they secured the benefit of those exact estimates and surveys and based their estimates and report upon that.

Mr. HARDWICK. After all, that is more or less of a guess?

Mr. WICKERSHAM. Not at all.
Mr. HARDWICK. How much of those 752 miles of projected railroads carried in this bill have ever been surveyed either by this commission or anyone else?

Mr. WICKERSHAM. All of it.
Mr. HARDWICK. Will the gentleman tell me where I can
get the information that shows that?

Mr. WICKERSHAM. Yes; the gentleman can get the information if he will go to the Alaska Syndicate headquarters for the survey of the Alaska Syndicate route up to Chitna and their survey across to Fairbanks, and if the gentleman will go to the Alaska Northern Railroad headquarters they will give him a survey of that route, and he will find all of the facts with respect to that stated in the hearings. They testified they had made accurate surveys over those routes.

Mr. HARDWICK. Does that include them all? Mr. WICKERSHAM. That includes only those two

Mr. HARDWICK. But about the balance of it, which is the greater part; has that ever been surveyed?

Mr. WICKERSHAM. That has been surveyed by the Alaska Road Commission in the location of a road along that route.

Mr. HARDWICK. But not by a railroad? Mr. WICKERSHAM. No.

Mr. HARDWICK. It has not been surveyed at all for a railroad?

Mr. WICKERSHAM. Not by the Government.
Mr. HARDWICK. That is true of a large bulk of this?
Mr. WICKERSHAM. No; very largely the surveys have been made, as I have told the gentleman.
Mr. HARDWICK. These private corporations have done that?
Mr. WICKERSHAM. Yes.
Mr. HARDWICK. The commission itself did not survey it?

Mr. HARDWICK. The commission itself did not survey it?

Mr. WICKERSHAM. They did not.

Mr. HARDWICK. It had no civil engineer's report or anything else on which to base what they claim in their report?

Mr. WICKERSHAM. The commission was composed of the best civil engineers in the United States.

Mr. HARDWICK. They had one?

Mr. WICKERSHAM. They had more than one; they had three, at least.

Mr. HARDWICK. They did not do civil-engineering work?

Mr. HARDWICK. They did not do civil-engineering work?
Mr. WICKERSHAM. Oh, no.
Mr. HARDWICK. Such as a private corporation would require it to be done before it constructed railroads?
Mr. WICKERSHAM. Not at all.
Mr. HARDWICK. That claim is not made?
Mr. WICKERSHAM. No.
Mr. HARDWICK. I just wanted to be sure if I were right in my own mind. I thank the gentleman.
Mr. WINGO. Is there any difference between the effect the freezing has on the soil there, and the resultant thaw, from what it is in this country? what it is in this country?

Mr. WICKERSHAM. In what respect does the gentleman

-in the cultivation of crops?

Mr. WINGO. No; I am talking about the physical effect on the roads.

Mr. WICKERSHAM. I do not think so.

Mr. WINGO. The gentleman thinks they are practically the

Mr. WICKERSHAM. I do not know of any difference. Mr. WINGO. What kind of ballast have they used on the rallroads constructed there?

Mr. WICKERSHAM. The railroad that is constructed out

of Fairbanks, 45 miles, is a dirt ballast.

Mr. WINGO. What does the gentleman mean by dirt ballast? Mr. WICKERSHAM. Just the dirt thrown from the sides of the road. Of course, there are some places on the mountain top-one or two places, perhaps-where they may use gravel, but 90 per cent of it is dirt ballast.

Mr. WINGO. What effect does the freezing and the resultant thaw have on the dirt ballast?

Mr. WICKERSHAM. None. Mr. WINGO. None whatever?

Mr. WICKERSHAM. No. Mr. WINGO. There is a difference. Why is it that they can run a railroad in Alaska on dirt ballast with such a low temperature at certain times during the year and you can not run one in the States?

WICKERSHAM. When the temperature is low the ground is frozen as hard as a board and you could run the rail-

road on the ground.

Mr. WINGO. Now, when the thaw comes in the summer time, how deep does it thaw in this dirt ballast?

Mr. WICKERSHAM. That would depend upon the condition. There are many places where it is not frozen at all, other places where it is frozen for several feet, and other places it will thaw deeper, but it always thaws the depth of the grade.

Mr. WINGO. It always thaws the depth of the grade. What
effect does that have on the dirt ballast?

Mr. WICKERSHAM. Nothing serious. There is no more

trouble than on the Canadian Pacific or on the Grand Trunk Pacific, and all those roads at Manitoba and in Canada.

Mr. WINGO. I assume the gentleman understands they are not altogether dirt ballast?

Mr. WICKERSHAM. The new ones are.

Mr. WINGO. They have not used chert or other ballast? Mr. WICKERSHAM. Very little; they have used dirt ballast.

Mr. WINGO. How often do they have to reballast those roads already in Alaska?

Mr. WICKERSHAM. I have no definite information about that.

Mr. WINGO. The gentleman says all these proposed routes

have been surveyed? Mr. WICKERSHAM. I did not say so; I pointed out those

that had been surveyed.

Mr. WINGO. What kind of a survey did they make?

Mr. WICKERSHAM. I do not know.

Mr. WINGO. When the gentleman speaks of "surveyed,"
what does he understand the word "survey" to mean?

Mr. WICKERSHAM. I understand it to mean at least a temporary survey that gives the contour of the country over which the route passes

Mr. WINGO. That is the gentleman's understanding of a

railroad survey?

Mr. WICKERSHAM. It is not my understanding of a railroad survey at all, but it is my understanding of what these people generally did on these temporary surveys through that country.

Mr. GORDON. Will the gentleman yield? Mr. WICKERSHAM. Yes.

Mr. GORDON. What would be the gentleman's objection to assessing the cost of the construction of these roads upon the adjacent land, on the same principle of ditch and road assess-

ments that are assessed throughout the United States?

Mr. WICKERSHAM. The Government owns this land, and if you pay the assessment I will agree to it. [Applause.] I do

not object.

Mr. GORDON. I understand that, sir. Mr. WICKERSHAM. They are Government lands.

Mr. GORDON. Certainly they are. Mr. WICKERSHAM. Well, I have no objection.

Mr. GORDON. The gentleman has not proposed that in his bill, has he?

Mr. WICKERSHAM. No; but we propose to put a mortgage upon all the lands in Alaska.

Mr. GORDON. Half?

Mr. WICKERSHAM. No; 75 per cent of all the sales of

public land is proposed.

Mr. GORDON. The copy of the bill I have only provided 50 per cent.

Mr. WICKERSHAM. Maybe it is the Senate bill that has the 75 per cent.

Mr. GORDON. Does the gentleman see any injustice in that simple assessment upon those lands adjoining this railroad for the cost of construction upon the theory of the great benefit growing from the construction and operation of this railroad

growing from the construction and operation of this failroad accruing to the lands, as there are no people up there?

Mr. WICKERSHAM. Well, the gentleman is mistaken in all of his premises. The whole benefit does not accrue to the adjacent lands, and there are a lot of people up there.

Mr. GORDON. How many people are there up there?

Mr. WICKERSHAM. There are 35,000 of the best people in

the world.

Mr. GORDON. Undoubtedly they are the best people in the world, but 35,000 are not many people for a Territory of that That is just about as many as live in one ward in my size. city.

Mr. WICKERSHAM. Yes; and I am sorry for them. If they will come to Alaska, we will give them homes and something to live on. Mr. PAYNE.

Mr. Chairman, will the gentleman yield?

Mr. WICKERSHAM. Certainly.

Mr. PAYNE. How many of these 35,000 people earn their livelihood by tilling the soil?

Mr. WICKERSHAM, Very few of them. Mr. PAYNE. How large is Fairbanks?

Mr. WICKERSHAM. It has about 4,000 population.

Mr. PAYNE. What proportion of them depend upon the soil for their support?

Mr. WICKERSHAM. Last year about 90 per cent of the potatoes consumed was raised at home.

Mr. PAYNE. Can you give any information in regard to the raising of cereals?

Mr. WICKERSHAM. We raise all the garden vegetables that are used in the country.

Mr. PAYNE. You have no cereals and no flour mills? Mr. WICKERSHAM. No; we have no flour mills.

year we began to take in harvesters and reapers, and other machines for cutting grain, for the first time.

I will say that I went to Fairbanks in 1903, and at that time there were but three houses there. It was in the midst of a dense wilderness, at that time 500 miles from civilization. In 10 years those people have made the most wonderful prog-ress in that country. They have taken \$74,000,000 in gold out of the creeks at Fairbanks in those 10 years, and we have in those creeks now a great area of low-grade placer ground; and if we had the railroad there, so that we could get cheap freight rates, we could take out 10 times the amount we have taken out before our placers are exhausted, and then our quartz mines could be worked.

Mr. PAYNE. It would seem that those people who are taking this gold out might themselves build this railroad and own it Mr. OGLESBY. But the trouble is they have to have a railroad to take it out.

Mr. MADDEN. Mr. Chairman, will the gentleman yield? The CHAIRMAN. Does the gentleman yield? Mr. WICKERSHAM. Yes.

Mr. MADDEN. What proportion of the people of Alaska would be served by the construction of these 400 miles of railroad?

Mr. WICKERSHAM. If the railroad were built to Fair-banks it would serve all the interior of Alaska and all the waterways of the interior.

Mr. MADDEN. What percentage of the population would be served?

Mr. WICKERSHAM. One-half of the population, of course, does not live in the interior.

Mr. MADDEN. Would the construction of this system of railroads serve one-half of the present population?

Mr. WICKERSHAM. Oh, yes; it would, because this country right through here, in the south, has more than one-half of the population, and it would be served by the building of the rail-

Now, gentlemen want to know what is raised in this country. If you will let me. I will read from a letter of a farmer who resides in Fairbanks; and out here, hanging in one of these windows, where you can see it, is a picture of this particular farmer cutting his grain on his own farm in Fairbanks. I have visited him many times. I will be glad to show you this letter to demonstrate what he raises and what he gets for it. He says:

FAIRBANKS, ALASKA, November 8, 1909.

Hon. James Wickersham, Delegate to Congress, Fairbanks, Alaska.

Delegate to Congress, Fairbanks, Alaska.

My Dear Judge: In answer to your suggestion that I write you a letter about my farming operations, I take pleasure in doing so. When you and Mr. Joslin were at my place last fall I had not begun to take in my crops, but since then I have done so. I had 3 acres of potatoes and they yielded me 18 tons, and the market price was \$120 per ton, for which I sold most of them. I had 1 acre of beets upon which I had a crop of 8 tons; 2 acres of carrots which yielded me 7½ tons, with a market price of \$140 per ton. One acre of turnips from which I gathered 200 sacks of 80 pounds to the sack, or 8 tons, at \$80 per ton. I had 2½ tons of rutabagas upon one-fourth of an acre of ground, for which the market price was \$100 per ton; I had 1 ton of red beets on one-quarter of an acre of ground, at \$140 per ton; I had 15 acres of barley which I cut and sold for hay. I had 3½ tons which I sold for \$75 per ton, and still have enough left to fill my barn chuck full for my own use for the winter. I raised 2 tons of cabbage which I put away for the winter, besides which I sold between 3½ and 4 tons during the summer at an average selling price of \$140 per ton.

I raised 29 suckling pigs, also 13 pigs which weighed about 100 pounds each, and 23 big hogs. I sold 5 of my hogs to the butcher for \$60 each.

Whis fell I put in 6 acres of winter wheat—Bluestern—which I

\$60 each.

\$60 each.

This fall I put in 6 acres of winter wheat—Bluestem—which I sowed the second week in August, and before the snow came in October the wheat was up 2 or 3 inches high, and I never saw a better stand of wheat anywhere. I have raised good winter wheat, barley, and oats, and all kinds of garden vegetables, and in my judgment as a farmer of more than 30 years' experience the Tanana Valley is a first-class agricultural country.

My farm is near the river and is perfectly level. The soil is a sandy loam and is very rich, and is made up of sediment and siit and sand brought down by the river in ages gone by. The Tanana Valley opposite my farm is 60 miles wide, and there are probably 5,000,000 acres

of as good ground as mine in this vicinity. I know from six years' experience on this farm that farming can be made entirely successful and that this valley can be made to produce everything which can be raised in Minnesota and the Dakotas, and there is no valley in the North so wide and rich and variable for agricultural purposes as the Tanana Valley.

I have several neighbors immediately around the town of Fairbanks who are engaged in successful farming, and we have in the last year raised almost enough to supply the local market, and there is no question hereafter that the whole local market in the Tanana mines can be supplied from our farms and gardens.

Respectfully,

As you will observe, he goes on to tell what he is putting in for the fall. I call your attention to this letter, which I intend to put in the RECORD complete, for two purposes-first, to show what the writer actually raises there and what enterprise he has and what can be raised there, and, second, to show you

what he charged the poor fellows around there for it.

The charge is very high. It is so high that if men did not get \$5 a day working in the mines they could not afford to buy what this farmer raises; and he is enabled to charge these high prices because of the lack of transportation. We can not get food into that country without paying \$125 a ton freight.

Dr. Walter H. Evans, chief of the division of insular stations in the Office of Experiment Stations in the Department of Agriculture, prepared the following careful study of the conditions in Alaska in comparison with those countries in Europe lying under the same latitude and climatic conditions:

lying under the same latitude and climatic conditions:

As a result of the investigations at Sitka, Rampart, and Fairbanks, supplemented by hundreds of letters from settlers, it can be safely asserted that in almost any part of Alaska south of the Arctic Circle hardy vegetables of good quality can be produced, so far as the climate is concerned. A list of these vegetables would embrace radishes, turnips, kale, mustard, lettuce, carrots, parsnips, parsley, peas, cress, cabbage, cauliflower, Brussels sprouts, kohl-rabl, onions, spinach, cndive, leeks, beets, potatoes and rhubarb, and, among the herbs, caraway, catnip, mint, and thyme. In specially favored localities and in favorable seasons, asparagus, beans, celery, cucumbers, squash, and salsify have been grown by taking advantage of warm sheltered spots with exposures toward the sun. Under ordinary conditions, corn, melons, tomatoes, eggplant, and pumpkins have proved fallures.

In the interior valleys grain can be successfully grown, and there has not been a year since 1900 when the majority of the varieties of oats, barley, and rye have not ripened at the Rampart Station (lat. 65° 30° N.). Wheat, both fall and spring sown, has ripened some years. Similar results have been secured at Fairbanks in the Tanana Valley, but the work has not been in progress for as many years. In 1909, out of 60 varieties of grain of all kinds, 55° ripened their entire crop, as follows: Spring wheat 1, winter wheat 1, winter rye 7, spring rye 1, spring emmer 1, spring barley 29, and spring oats 15.

AGRICULTURE IN NORTHERN EUROPE,

In order to further establish the possibility of agriculture in Alaska a comparison has been made of the countries of Norway, Sweden, Finland, and the Russian Provinces of Archangel, Vologda, and Olonetz. All the countries lie between latitudes 58° and 70° north, and for the most part they are north of 60°, the approximate latitude of the northern reach of the Gulf of Alaska. In Europe, within the above limits, are embraced over 985,000 square miles, or about 599,450,000 acres. Alaska, with its 570,390 square miles, or about 599,450,000 acres. Alaska, with its 570,390 square miles or 365,049,000 acres, extends from latitude 54° 30' in southeastern Alaska to more than 71° at Point Barrow. A study of the topography, climate, native plants, etc., shows that the conditions are not very dissimilar in the two regions, whatever advantages there is in climate being probably slightly in favor of the European countries. In these countries of Europe more than 11,000,000 people are living, while the census of 1910 reports 64,356 as the population of Alaska. Recent statistics show in the three countries and three Provinces in Europe which lie mostly north of 60° that 8,373,000 acres of land were producing cereals of all kinds, the total yield being: Wheat, 6,683,840 bushels; rye, 36,500,640 bushels; barley, 26,963,545 bushels; oats, 109,036,780 bushels. In addition, potatoes to the amount of 100,321,100 bushels and 7,871,119 tons of hay were reported. Live stock are returned for these countries as follows: Horses, 1,516,251; cattle, 6,110,476; sheep, 4,033,578; hogs, 1,484,124; goats, 368,021; and reindeer, 564,732.

The area reported under cultivation varies from less than 0,01 per cent in Archangel and 0.5 per cent in Norway to 41 per cent in Second

cattle, 6,110,476; sheep, 4,033,578; hogs, 1,484,124; goats, 368,021; and reindeer, 564,732.

The area reported under cultivation varies from less than 0.01 per cent in Archangel and 0.5 per cent in Norway to 4.1 per cent in Sweden. In Finland, Vologda, and Olonetz only about 1 per cent of the total area is in cultivation, as the term is commonly used. In nearly every country there are natural meadows of large extent used as pasture and for haymaking, so that the total under agricultural use is probably about double the figures quoted above. On a basis of 1 per cent of the total area available for crops and 2 per cent for crops, pasture, and haying, there should be over 3,650,000 acres capable of cultivation, or 7,300,000 acres available for possible agricultural development in Alaska. In 1894 the Director of the United States Geological Survey, in a letter to the House Committee on Agriculture, estimated the area of tillable land in southeastern Alaska, in the Cook Inlet country, the Alaskan Peninsula, and adjacent islands at from 3,000 to 5,000 square miles, or 2,000,000 to 3,000,000 acres. In 1900, after traveling repeatedly throughout Alaska and comparing estimates from various sources, Frof. C. C. Georgeson estimated the tillable and pasture land of Alaska at 100,000 square miles, or 64,000,000 acres. In 1910 Mr. J. W. Neal, who is in charge of the agricultural experiment station near Fairbanks, made a reconnoissance survey of the Tanana Valley, and he estimated the agricultural and grazing lands of that valley and the small valleys leading from it at about 15,000 square miles, or 9,700,000 acres. or more than the total area reported under crops in the specified countries of Europe.

With the same development of agriculture in Alaska as in Europe, to

Europe.

With the same development of agriculture in Alaska as in Europe, to supplement its mining, fisheries, and other industries, Alaska should support a population almost equal to that of Europe north of 60° latitude and a commerce of equal or of greater importance.

And, finally, the attention of the House is directed to the annual report of Alaska agricultural experiment stations for 1912, and particularly to pages 46-57, relating to Fairbanks, and pages 57-67, relating to the work at Rampart, Alaska, a hundred miles farther north.

The attention of the House is also directed to the official report of the governor of the Territory of Alaska to the Secretary of the Interior, since it calls attention to the agricultural value of Alaska and to many other elements of value that are noticed in these remarks.

The call of Alaska to the immigrant spirit has been rendered into beautiful verse by the Alaska pioneer Presbyterian preacher, Dr. S. Hall Young:

Ho! Viking brood, ho! Norsemen, all;
The sturdy Swede, the hardy Gael;
Ye Finns, ye Celts, to you I call;
Ye Germans, Danes, I bid ye hail!
Who'er has breathed the Ice King's breath,
Has braved his wrath, nor feared his death;

My gold, deep locked with icy bands;
Come, rive it, mine it, fling it free!
Come, dig my coal and plow my lands;
Snatch finny hordes from streams an
My copper rend from mountain walls;
My marble blast for stately halls. and sea:

Here life is freedom, blessed health;
I break all chains, I fashion men;
Ye scale my hills of boundless wealth,
And win—ye win yourselves again.
I smite to bless, I bind to free;
Lag not in cities; haste to me.

Now, gentlemen, I want to call your attention to the rate side of this question and to the present railroad conditions in that country. I want to show you why this farmer could charge \$125 to \$140 per ton for the produce which he raised on his farm and get the money out of the miners. Of course at that time the miners were taking out enormous sums of money. Up to date we have taken out \$75,000,000 from the streams immediately around Fairbanks.

THE GUGGENHEIM COPPER TRUST.

The greatest obstacle to the development of Alaska by Alaskans for Alaskans and the people of the United States is the Alaska Syndicate. This syndicate is a New York trust, composed of the Morgans, the Guggenheims, and the Close Bros., of London, together with their immediate lieutenants and confidential employees.

Those members of this House who have examined the charts prepared by the committee which investigated the Money Trust must have been impressed with the demonstration that interlocking directorates in banking and industrial corporations virtually made one man the financial king of the world. A similar chart showing the widespread ramifications and powerful financial alliances of the Copper Trust, all centering in the Alaska Syndicate, would prove equally striking. Whoever wishes to know what is the matter in Alaska must understand what the Alaska Syndicate is, for it is what is the matter in Alaska.

The real power in the Alaska Syndicate, so far as Alaska and the western mining is concerned, is with the Guggenheims, whose head is Daniel. Here is a partial list of the activities of the Guggenheims, and one who wishes more details will find them in Poor's Manual of Industrials, 1913, at pages 1641–1644; in the Copper Handbook, 1910–11, at pages 311–316; in Poor's Manual of Railroads, 1913, at page 1212; and in the hearings before the Senate and House Committees on Territories on the Alaska railroad bill. Briefly these evidences show that on the Alaska railroad bill. Briefly, these evidences show that the Alaska Syndicate is financially connected as follows:

Alaska Syndicate is inflationly connected as follows:

Alaska Syndicate partners: J. P. Morgan & Co., New York; Guggenheim Bros., New York; Close Bros., London.

Some of the Alaska Syndicate's Alaska enterprises are: Copper River & Northwestern Railway Co., Alaska Northern Railway Co., Alaska Steamship Co., Kennecott Copper Mines Co., Beatson Copper Mines Co., Ellemar Copper Mines Co., Northwestern Development Co., Yukon Gold Co.

The Copper River & Northwestern Railroad is the road going up the Copper River to the Chitna, and thence branching out to other copper mines. The Alaska Northern Railroad is this 71 miles of road running north from Seward.

Mr. STAFFORD. I understood that that was the road that

broke the Sovereign Bank of Canada. Mr. WICKERSHAM. Yes.

Mr. STAFFORD. Have the Guggenheims got control of the bonds of that road since then?

Mr. WICKERSHAM. Not the Guggenheims, but the Morgans. They had them all the time.

Mr. STAFFORD. Have the Morgan interests got control of those bonds?

Mr. WICKERSHAM. I believe so.

Mr. STAFFORD. I am acquainted with one gentleman in Milwaukee who has some of those bonds which are not covered by the mortgage.

Mr. WICKERSHAM. Certainly not. He is in the minority. That is another bad feature of it. If you are in the minority, you do not count.

Mr. OGLESBY. The hearings showed that the syndicate had 26 to 28 per cent of the bonds.

Mr. WICKERSHAM. I call your attention to the fact that the Tacoma Smelting Co., at Tacoma, Wash.; the Everett smelter at Everett, and the Selby smelter at San Francisco are the only smelters on the Pacific coast of the United States, and all three of them belong to the Guggenheims. The richest copper deposits in the world are in Alaska. If you do not believe it, I have a specimen here for you to look at. There is a piece of Guggenheim copper from the Kennicott mines, near Cordova, Alaska. That is 75 per cent pure copper, and there is enough gold in it to pay for working it. They have \$25,000,000 worth of that rock at the top of the ground,

ready to ship out.

Mr. MADDEN. There is nothing to prevent anybody else

organizing smelters, is there?
Mr. WICKERSHAM. Yes. Mr. MADDEN. What is it? Mr. WICKERSHAM, Money.

Mr. MADDEN. If you had the money, you could go and organize one?

Mr. WICKERSHAM. No; I could not; and I could not build a railroad in Alaska.

Mr. MADDEN. Why not?

Mr. WICKERSHAM. Because the great overwhelming Alaska syndicate, the Morgans and Guggenheims, would not permit it.
Mr. MADDEN. Do you mean to say that if you had the
money to put into a railroad, they would not permit you to build it?

Mr. WICKERSHAM. Yes. Mr. MADDEN. How could they prevent it?

Mr. WICKERSHAM. They would break down my credit. Mr. MADDEN. You would not need any credit if you had the money

Mr. WICKERSHAM. The/ would hire away my men. They would kill you if necessary, as they have on these roads in Alaska. If the gentleman will be patient I will present the evidence to him.

Mr. MADDEN. I shall be glad to have it.
Mr. WICKERSHAM. I will do it with pleasure.
The following are among the great enterprises in the United States which, with interlocking alliances and the vast capital invested, give this Guggenheim Copper Trust such a commanding position in the financial world, and especially in the West. Their corporations and principal mines controlled are as fellows:

Balaklala Consolidated Copper Co., Coram, Cal.
Dairy Farm Miniag Co., Van Trent, Cal.
Selby Smelting & Lead Co., Leadville, Colo.
Selby Smelting & Lead Co., Leadville, Colo.
Selver Lake Mines, Silverton, Colo.
Federal Lake Mining & Smelting Co., Wallace, Idaho.
Federal Lead Co., Flat River, Mo.
More Cristo Mining Co., Tacoma, Wash.
Monte Cristo Mining Co., Monte Cristo, Wash.
Bonanza Mines and others in Mexico.
Baltimore Copper Smelting & Rolling Co., Baltimore, Md.

The following is a list of metallurgical plants owned by them:

neui:

Perth Amboy plant, Maurer, N. J.

National plant, South Chicago, Ill.
Omaha plant, Omaha, Nebr.
Globe plant, Denver, Colo.
Pneblo plant, Pueblo, Colo.
Ellers plant, Pueblo, Colo.
Ellers plant, Pueblo, Colo.
Ellers plant, Durango, Colo.
Arkansas Valley plant, Leadville, Colo.
Murray plant, Murray, Utah,
Everett plant, Everett, Wash.
Helena plant, East Helena, Mont.
El Paso plant, El Paso, Tex.
Entimore plant, Baltimore, Md.

Through their ownership of innumerable companies purchased, the monopolization of copper and lead properties, and the acquisition of numerous smelting and metallurgical plants throughout the United States and Mexico, and through their manipulation of the copper markets, the Guggenheims have acquired vast wealth and great financial and political power. All these have taught them the line of least resistance to follow in securing the complete monopolization of the copper, the gold, and the steamship and railroad transportation in Alaska. They long ago discovered they had a free hand in securing title to unlimited quantities of Alaska's undeveloped wealth at Government rates. If the policeman will only continue to sleep, they will continue to help themselves. Will the policeman wake?

RAILWAY CONDITIONS IN ALASKA.

Any effort to secure Government aid for the building of a trunk line of railway in Alaska meets with the prompt objection that there are private interests which will build this road if the Government will keep its hands off. This objection to Government aid and to Government control is of such serious moment that it must be fully and fairly answered before Members of the House will be satisfied to vote for the bill under consideration. If it is true that private interests will build railroads into the interior under such circumstances as to freely and fairly open the country for development and give such transportation facilities as will enable the citizens of the United States to go there and acquire property and enter into business, develop mines, settle the land, and generally open up the country, then there will be little need for Government aid.

I beg the attention of the House while I sketch for you a few

graphic pictures of railway conditions in Alaska, and show you how impossible it is for there to be any such development in the way of transportation by private interests as you would wish to see there. These few pictures will show you that Alaska is substantially in the hands of the Alaska Syndicate and that all of its transportation lines are under the control of that one powerful influence. My effort will be to show you that their monopoly of transportation is used by them, not for the purpose of settling the country or to open up its mines, but for the purpose of excluding every effort at independent development which will in anywise interfere with the monopoly which they are building there. They have been in control of the transportation lines in Alaska for a decade, and during that 10 years they have unfairly crushed every attempt to create independent transportation down to the date of this bill. If this bill is defeated the grip of the old Southern Pacific on California will be gentle to the hold which this national devilfish will have on

WHO COMPOSE THE ALASKA SYNDICATE

On February 18, 1910, before the Senate Committee on Territories appeared Mr. Stephen Birch and Mr. John N. Steele, representatives and members of the Alaska Syndicate, who, being examined, testified as follows, at page 73 of the hearings:

Mr. Steele. Who compose what is known as the Alaska Syndicate?
Mr. Biach. The Messrs. Guggenheim and J. P. Morgan & Co.
Mr. Steele. When you say "the Messrs. Guggenheim" do you mean
M. Guggenheim Sons?
Mr. Biach. M. Guggenheim Sons.
Mr. Steele. Who have charge of the affairs of that syndicate in New
York?

Mr. BIRCH. Mr. S. W. Eccles, Mr. John N. Steele, and myself.

Mr. Steele. About when was this Alaska Syndicate formed? In the spring of 1906, was it not?

Mr. Buchl. In the spring of 1906.

Mr. Steele. In what enterprises in Alaska is that syndicate interested?

ested?

Mr. Brach. They are interested in the Northwestern Commercial Co., the Alaska Steamship Co., the Northwest Fisheries, the Kennecott Mines Co., the Copper River & Northwestern Railway, and the Katalla Co.

Mr. Steele. We will take up first the Northwestern Commercial Co. On page 88 of those hearings these gentlemen were interrogated with respect to the community of interest of the White Pass owners in the Alaska Syndicate, and they testified as

follows:

Mr. Steele. Who at that time owned the Copper River Railway?
Mr. Birch. At that time—
Mr. Steele I mean at that time.
Mr. Birch. The Alaska Syndicate owned it.
Mr. Steele At the time the Copper River & Northwestern Railway was first acquired by the Alaska Syndicate who owned the Copper River

was first acquired by the Alaska Syndicate who owned the Copper Rialway?

Mr. Birch. M. J. Hency, Mr. Graves, and Close Bros., of London, Mr. Steele. Did the Alaska Syndicate acquire the entire interests of those gentlemen in the Copper River Railway?

Mr. Birch. Yes, sir; by permitting them to participate in the Alaska Syndicate up to the amount they had expended.

Mr. Steele. In other words, they gave them a participation in the syndicate up to the cash amount they had expended in the construction of the Copper River Railway to that time?

Mr. Birch. Yes, sir. Mr. Chairman, I have a map showing this railroad, if you desire it.

The immediate facts relating to the partnership between the Alaska Syndicate and the White Pass & Yukon is stated by Mr. O. L. Dickeson, the president of the White Pass & Yukon, in his testimony before the Senate Committee on Territories of May 8, 1913, and will be found in full on page 155 of those hearings, where he testified as follows:

Senstor McLEAN. Have you any interest in common with the Gug-

hearings, where he testified as follows:

Senstor McLean. Have you any interest in common with the Guggenheims?

Mr. Dickeson. Yes, sir; we have. Frankly, I might say here that, in this talk that I have made against the extension of that line, I am talking against a part of our interests. The interest comes about in this way: The firm of Close Bros. & Co. and a man by the name of M. J. Heney, who built the White Pass & Yukon Road, entered into the original scheme of building the Copper River & Northwestern Railroad. We went down in our pockets and each of us put up 50 per cent of the money to start that project. We got to the 20-mile point and we found that some one was building over the Valdez route—I think it is the Valdez route—and we found that this man was one John Rosene, who is now projecting the Haines route, and we also found that this man was bucked by the Morgan-Guggenheim syndicate, and that being true, and our making efforts to raise money in New York to complete the extension of this plan, we did not feel that we were likely to be very successful, and we therefore thought that the only other thing to do was to go to England to get the money.

Mr. Wickershiam. Why could you not raise the money in New York in opposition to them?

Mr. Dickeson. I was not with the road then, Mr. Wickersham. We thought the only thing to do—

Senator Jones. If you had been do you think you could?

Mr. Dickeson. No, sir; I do not believe I could. We thought the only other thing to do was to go to England, and, in going to England, the English people, who had or could have raised the money to put up for a railroad project, said the White Pass & Yukon route had not paid anything, and they said, "Why ask us for money to build another railroad?" So, we could not raise the money there. We had considerable difficulty, so we dropped the whole scheme and sold out to the Morgan-Guggenheim syndicate, which is known as the Alaska Syndicate, and accepted paper for our interests. We sold for the paper.

These admissions show how intimate the association is between those who own the Skagway gateway into Alaska and those who own the Copper River gateway; they also show that these two gateways are controlled by the Alaska Syndicate, and that the Close Bros. could not get financial aid to finish their Copper River Railroad, but were forced to sell to the Alaska Syndicate. It was another instance where the Alaska Syndicate. Syndicate choked an independent railroad to death and bought its trust estate for participation in its general scheme of monopoly.

HOW THEY GOT THE ALASKA NORTHERN.

The Alaska Northern Railway is constructed from Seward, on Resurrection Bay, 71 miles north to Kern Creek, at the head of Turnagain Arm. The first few miles were built before the firm of Frost & Osborne took them over and completed the construction to Kern Creek. The testimony with respect to the real ownership of this road is quite fully stated in the testimony of Mr. F. J. Jemmett, who is now the trustee in charge of the Sovereign Bank of Canada, and also the treasurer of the Alaska Northern Railroad, which connects these two defunct institu-tions directly. Beginning at page 386 in the Senate hearings before the Committee on Territories, Mr. Jemmett is interrogated quite fully in respect to advances of money made by the Sovereign Bank, of Toronto, Canada, for the building of the Alaska Northern Railway. It appears that the Sovereign Bank, through its officers, entered into some combination with contractors for building this road and furnished large sums of money, some portions of which went into the building of the road and some portions into other enterprises. How much money went into the Alaska Northern road does not appear from Mr. Jemmett's statement, but it does clearly appear that the Sovereign Bank, of Toronto, Canada, acquired the title to the Alaska Northern through advancing money to build the road. It became the owner of all the bonds, foreclosed its mortgage, bought it in, and is therefore the present owner.

THE SOVEREIGN BANK OF CANADA A MORGAN BANK.

Now, who is the Sovereign Bank, of Toronto, Canada? An examination of the bankers' directory of that date shows that its New York correspondent was J. P. Morgan & Co., and it is conceded to have been known as the Morgan bank in Canada. Some effort was made to show the exact amount which the Morgans owned in the Sovereign Bank, and on page 399 of the Senate hearings Mr. Jemmett testified:

Mr. Wickersham. I will pursue that further. Mr. Jemmett, the Sovereign Bank of Canada—was that the correct name of the bank? Mr. Jemmett. Yes. Mr. Wickersham. Was it not known as the Morgan bank? Mr. Jemmett. I did not know it, Judge, but I will take your word for it.

Mr. Jemmett. I did not know it, Judge, but I will take John for it.

Mr. Wickersham. You did not know of that before?

Mr. Jemmett. I never heard of it before.

Mr. Wickersham. Did you ever hear at this time that J. P. Morgan & Co. were New York representatives of the bank?

Mr. Jemmett. There is no question about the fact that J. P. Morgan & Co. were stockholders, and were the New York representatives. I never heard it called the Morgan bank.

Mr. Wickersham. Did they represent any other bank in Toronto, or Canada, in the same respect as they did this one?

Mr. Jemmett. I would say no. I do not know of my own knowledge.

Mr. Wickersham. To that extent, then, this was the Morgan bank in Canada?

Mr. Wickersham. To that extent, then, this was the Morgan bank in Canada?
Mr. Jemmett. To that extent; yes.
Mr. Wickersham. How much stock did J. P. Morgan & Co. own in the Sovereign Bank of Canada?
Mr. Jemmett. They owned about one-sixth.
Mr. Wickersham. Who owned that one-sixth—J. P. Morgan?
Mr. Jemmett. J. P. Morgan & Co.'s nominees held it for them.
Mr. Wickersham. J. P. Morgan & Co. owned it, and it was held by an agent for them?
Mr. Jemmett. It was recognized that it was their stock.
Mr. Wickersham. Were there other allied or interlocking interests in the United States with the Morgans who held an interest in the bank?
Mr. Jemmett. Not to my knowledge. I think that one-sixth repre-

Mr. JEMMETT. Not to my knowledge. I think that one-sixth represents the whole thing.

Mr. Wickerham. Did they advance moneys after they found these matters out to help tide the situation over? If so, how much?

Mr. Jemmett. After I took charge?
Mr. Wickersham. Yes.
Mr. Jemmett. Yes; they lent us some money. That was part of the conditions on which I arranged to go in, that the Morgan shareholders should give us some support. I do not know the exact amount.

Mr. Wickersham. Did they give you any support except in proportion to the interest they held in the bank?

Mr. Jemmett. Oh, yes. The scattered shareholders all over the country could not be got at as a practical matter.

Mr. Wickersham. To what extent did J. P. Morgan & Co. give you support in the way of cash loans?

Mr. Jemmett. I should think that it ran up a couple of million dollars, but I may be absolutely wrong on that. I think it was about a couple of million dollars.

There are some differences in the festimony as to whether

There are some differences in the testimony as to whether the Morgans owned a one-sixth or a one-third interest in the Sovereign Bank of Canada, the evidence being strongly, in my mind, that they owned a one-third interest. It was the Morgan bank in Canada, it was controlled by the Morgans, and its investment in the Alaska Northern Railway Co. was a Morgan investment. When the Alaska Northern Railway was taken over by the Sovereign Bank of Canada it became either a one-

third or a one-sixth Morgan railroad. It is that now, and is wholly a Morgan road in its control.

When George W. Perkins went to Seward in 1909 with the purpose of resuscitating this road and extending it to the interior of Alaska in connection with Ballaine's efforts, it was stated that it was for the purpose of saving their investment in the road and for the purpose of securing a further investment of money in their favorite work in the exploitation of railroads. However, in 1906, the Morgans had entered into the Alaska Syndicate with the Guggenheims, and according to that agreement they could not go into Alaskan enterprises without the consent of the Guggenheims. The Guggenheims refused to give their consent to Perkins resuscitating the Alaska Northern

Railway to save the Morgan investment in it, and it was not done. That refusal was based upon their claim that the road in which they were interested, the Copper River road, had the first right to the ownership of the Tanana Valley, a right which the Morgans conceded, and thereupon they gave up the rejuvenation of the Seward road.

I have gone into this matter thus carefully to show you that the Alaska Syndicate not only owns the Copper River & Northwestern Railroad gateway into the interior of Alaska, and that it is a partner with the owners of the White Pass & Yukon gateway, but that it is the owner of the Alaska Northern Railway and in control of that gateway. In short, we find the Alaska Syndicate in control of three of the principal gateways to the interior of Alaska.

Who are these Colossi who stand astride not one but three of the harbor gateways to the territory of Alaska? Alaska Syndicate a law-abiding, liberty-loving, and developing power, to whom we may look for justice and fairness if we shall abandon Alaska to its control? May Congress abdicate its power and duty over the trust estate in Alaska and leave the performance of that duty to this great syndicate with the certainty that the rights of the people in that trust estate will be well cared for? Permit me to offer some concrete facts in answer to these inquiries.

Mr. MADDEN. As I understand, they claim that this rail-

road cost \$80,000 a mile? Mr. WICKERSHAM. Yes; but we know that it did not cost one-third of that.

Mr. MADDEN. I was wondering if that road cost \$80,000 a mile, how we were going to build this road for \$40,000 a mile.

Mr. WICKERSHAM. The 71 miles are built over what is doubtless the most expensive portion, from the coast over a little range of mountains, but we are sure it did not cost that amount of money.

Mr. OGLESBY. Will the gentleman yield?

Mr. WICKERSHAM. Certainly.

Mr. OGLESBY. Is it not a fact that the first 20 miles of that road cost less than \$20,000 a mile?

Mr. WICKERSHAM. That is in the evidence given upon the committee hearings.

Mr. LA FOLLETTE. Will the gentleman yield?

Mr. WICKERSHAM. Certainly. Mr. LA FOLLETTE. I have a letter from a contractor who built the first 20 miles of the road, and that letter shows that the road was built and equipped, the first 20 miles of it, for less than \$20,000 a mile.

Mr. WICKERSHAM. Yes; everybody knows that.

Mr. MANAHAN. Will the gentleman state how many gate-

ways there are?

Mr. WICKERSHAM. There is a side gateway from Valdez, which cuts into the Copper gateway, and there is said to be a side gateway that opens into the Seward route. It would not be much of a trial to condemn the Seward road and take it over by paying its value. It is a bankrupt concern, closed down, and has not been in operation for three or four years. At any of these places we can get an independent route. But let me say that this is true. Take the Seward route, and it is wide and can be paralleled for 71 miles. It is a wide route, and we could build parallel to it if the Government had to do so.

Mr. TOWNER. Mr. Chairman, will the gentleman yield?

Mr. WICKERSHAM. I desire first to yield to the gentleman

from Illinois [Mr. Madden].
Mr. MADDEN. Mr. Chairman, I was just going to ask the gentleman to tell us how the Government was going to get in through either one of those three gateways. They are the only gateways. I would ask whether the Government is going to get in by condemning the properties already there or by paralleling them?

Mr. WICKERSHAM. That can be done either way.

Mr. MADDEN. Is it the intention of those who are promoting the passage of this bill to take over the railroads that are already there?

Mr. WICKERSHAM. I have no such intention. Mr. HUMPHREY of Washington. Mr. Chairman, will the gentleman yield?

Mr. WICKERSHAM. Yes. Mr. HUMPHREY of Washington. Is it not a fact that there is a way to get into Prince William Sound so as to avoid the grade of the present road? I will show first on the map. I want to know whether or not it is true that a road could be built from, say, this point across here to Prince William Sound?

Mr. WICKERSHAM. Yes. Mr. HUMPHREY of Washington. By avoiding the taking over of this road?

Mr. WICKERSHAM. Yes.

Mr. HUMPHREY of Washington. Not only that, but according to the reports I have seen you would avoid this grade of some 1,700 feet and 50 miles distant get isto Prince William Sound here at a very good harbor, perhaps better than the one

Mr. WICKERSHAM. Possibly, but that would require a

tunnel 2 miles long.

Mr. HUMPHREY of Washington. I do not know whether that is true or not, but I have heard that statement made.

Mr. WICKERSHAM. It is stated that those surveys have

been made:

Mr. HUMPHREY of Washington. That would give at least one way and avoid taking over that route?

Mr. WICKERSHAM. Oh, yes; and the Valdez is the sec-

ond, and both are fine routes.

Mr. TOWNER, Mr. Chairman, that it the matter that I was going to ask about. I will ask if it is not true that the Geological Survey have finished their survey and have reported that by a 12-mile route, at about the sixty-third mile north from Seward, you can go into Portage Bay and secure there a line that will be almost without a grade, and about as good a harbor as perhaps Resurrection Bay.

Mr. WICKERSHAM. That is stated.
Mr. TOWNER. So that the entire route shall be brought into the Susitna Valley, and will be shortened as much as 63 miles, and be made very much better than it would be if the Government took over or purchased or in any other way acquired the present line north from Seward.

Mr. WICKERSHAM. Substantially that is true, I think. do not know what the surveyors would say about it, but I have seen the survey recently made by one of the bureaus, which

substantially shows that to be correct.

Mr. STAFFORD. Will the gentleman inform the House what negotiations were carried on by the last administration and the recommendations made by Secretary Fisher concerning the taking over by the Government of this Alaska Northern Railroad?

Mr. WICKERSHAM, I can; and I will do so a little bit

Mr. HUMPHREY of Washington. Right there, if I may be permitted to interrupt the gentleman again, if that condition of which we were speaking is correct, might not that then furnish some clue as to why certain parties refused to negotiate for buying that road? I saw a lot in the hearings about where Mr. Perkins was asked to buy that road and there were a lot of negotiations carried on, and it occurred to me afterwards that perhaps Mr. Perkins would not want to buy a road that would be of no use.

Mr. WICKERSHAM. I do not think the testimony shows I think the testimony shows that Mr. Perkins already

owned the road himself.

Mr. HUMPHREY of Washington. No; there is some testimony that I recall which I read somewhere where one of the parties was negotiating with Mr. Perkins about the purchase

Mr. WICKERSHAM. Now, I have called attention to the fact there are but three gateways in Alaska and those are occupied by the Alaskan Syndicate. Now gentlemen asked me if it is possible, that being true, to build a railroad into the interior of Alaska. I say, yes, we can build through either one of those gateways if it is done by the Government of the United States, but there is no other power that has the financial ability and the willingness to do that but the Government of the United States, to go into one of those passes and build a railroad through into the interior of Alaska and invade the territory belonging to the Guggenheims. The Alaska Syndicate will not let you get any money on the market. They will trent you as I will show in a moment how they have treated every other attempt to build an independent railroad.

Mr. PAYNE. When the gentleman speaks of the character of this syndicate does be mean land accordance.

this syndicate does he mean land owned and occupied by them,

or territory from which they draw freight?

Mr. WICKERSHAM. I mean they claim the Tanana Valley is a part of their territory because they now furnish a good deal of transportation, and they do not want anybody else to build another railroad there.

Mr. MADDEN. Are these railroads being operated at a profit

Mr. WICKERSHAM. The Guggenheim railroad is being opcrated at a great profit.

Mr. MADDEN. How many miles is that? Mr. WICKERSHAM. It is 196 miles long. Mr. MADDEN. What does it haul? Mr. WICKERSHAM. It hauls copper.

Mr. MADDEN. From what?
Mr. WICKERSHAM. From the Guggenheim copper mines.
Mr. MADDEN. And that is the only freight it has?
Mr. WICKERSHAM. Yes. Of course, they have the winter stage route from Chitina to Fairbanks, and haul considerable freight during the winter, and handle the large passenger traffic

and winter mails to Fairbanks and the interior.

Mr. MADDEN. What about the other roads?

Mr. WICKERSHAM. Substantially doing nothing except the White Pass & Yukon, which is supplying the Yukon interior.

Mr. MADDEN. How long has it been in existence? Mr. WICKERSHAM. Fifteen years.

Mr. MADDEN. Is there any increase in population in the territory embraced around the railroad?

Mr. WICKERSHAM. Very little. Mr. MADDEN. Why?

Because it is a mining country. Mr. WICKERSHAM.

Mr. MADDEN. Is there anything in the laws of the United

States that prevents an increase in population?

Mr. WICKERSHAM. Not at all; but there is something in the law which enables the Alaska Syndicate to prevent it, and if the gentleman will possess his soul in patience I will get to that in a few moments.

Mr. SHERLEY. Will the gentleman yield? Mr. WICKERSHAM. I yield to the gentleman from Ken-

tucky.

Mr. SHERLEY. Is it the gentleman's contention that these railroads can not be controlled in the interest of the public, but we must ignore them and build? Do not we have sufficient power in the United States to control them?

Mr. WICKERSHAM. Railroads; yes.

Mr. SHERLEY. These railroads?
Mr. WICKERSHAM. Yes; these railroads.
Mr. SHERLEY. What is the gentleman's statement predicated upon of this syndicate bottling up the country and then saying the only way to unbottle it is by building another rail-

Mr. WICKERSHAM. Because there are only 100 miles of railroad in Alaska controlled by the Alaska Syndicate. All the rest of the transportation in Alaska is water transportation, and the Interstate Commerce Commission has no jurisdiction over

Mr. SHERLEY. That is a matter that can be easily remedied.

Mr. WICKERSHAM. But it has not been remedied.

Mr. SHERLEY. I know; but I am asking the gentleman why it is necessary to build a railroad in order to control the transportation facilities.
Mr. WICKERSHAM, I think so.

Mr. SHERLEY. Does not the gentleman think it possible to do it by regulation?

Mr. WICKERSHAM. Possibly on the railroad.

Mr. LENROOT. I would like to suggest to the gentleman

we can not compel them to build railroads by law.

Mr. SHERLEY. I understand; but I am not expressing the opinion. The gentleman has given the opinion that we have railroads sufficient; but being a monopoly, we must build another in order to control the situation.

Mr. WICKERSHAM. If I have given the gentleman any idea that there are sufficient railroads there, I have quite failed

to give the impression which I wished.

Mr. TOWNER. I would like to ask the gentleman a question. The CHAIRMAN. Does the gentleman yield?

Mr. WICKERSHAM. Yes.
Mr. TOWNER. Has there ever been any real attempt to build any railway in Alaska that did not deal either with a syndicate or by a syndicate or for a syndicate?

Mr. WICKERSHAM. None whatever, except those they

throttled and killed.

Mr. TOWNER. Has there ever been an attempt to build a railway in Alaska for the purpose of developing the interior of the country

Mr. WICKERSHAM. None whatever, Mr. TOWNER, Or for developing any agricultural interests? Mr. WICKERSHAM. No.

Mr. TOWNER. Or anything excepting mines or private interests?

Mr. WICKERSHAM. No.

Mr. SWITZER rose Mr. LENROOT. W Will the gentleman yield for a question?

Mr. Mr. WICKERSHAM. In a moment.
Mr. SWITZER. Can the gentleman state how many people are employed by the Guggenheim syndicate and operate the copper mines and the railroad running to them?

Mr. WICKERSHAM. In Alaska? Mr. SWITZER. Yes; in Alaska.

Mr. WICKERSHAM. Oh, I should judge two or three or four hundred

Mr. SWITZER. Are they developing the copper industry there?

Mr. WICKERSHAM. Yes. They took out \$3,000,000 last rear and something like \$4,000,000 the year before.

Mr. SWITZER. They are taking it out fast enough for the

people of Alaska, are they?

Mr. WICKERSHAM. They are taking it out too fast, under all the circumstances.

Mr. HAMILTON of Michigan. I would like to ask the gentleman a question.

The CHAIRMAN. Does the gentleman yield?

Mr. WICKERSHAM. Yes. Mr. HAMILTON of Michigan. I was called out and could not hear all that the gentleman said in reference to these various gateways into Alaska. I wanted to inquire whether the Alaska Northern has passed into the control of the so-called syndicate?

Mr. WICKERSHAM. Yes.

Mr. HAMILTON of Michigan. How did that happen?

Mr. WICKERSHAM. That happened in a technical and legal sense when their mortgage was foreclosed about 1909, and they bought it in at the sale.

Mr. HAMILTON of Michigan. They had reached mile 71 in

their construction?

Mr. WICKERSHAM. Yes; they have.

Mr. HAMILTON of Michigan. Is it proposed in this pian of railways that has been submitted by the commission to connect with the northern end of this Alaska Northern road?

Mr. WICKERSHAM. The commission recommended that, but the President is not bound by anything that the commission recommended.

Mr. HAMILTON of Michigan. However, if it could be bought at a reasonable price it would be advisable, I suppose?

Mr. WICKERSHAM. Yes.

Mr. HAMILTON of Michigan. I believe it has been stated in the testimony that that road has cost about eighteen thousand and some odd dollars a mile for construction?

Mr. WICKERSHAM. Yes; the first 20 miles or so, anyway. Mr. HAMILTON of Michigan. And that the actual cost is known?

Mr. WICKERSHAM. Yes.

Mr. LENROOT. Now, Mr. Chairman, will the gentleman

Mr. WICKERSHAM. Yes.

Mr. LENROOT. The gentleman from Iowa [Mr. Towner] asked the gentleman whether private capital had ever been secured to build a railroad into the interior of Alaska. I understood the gentleman to say that it had not been secured.

Mr. WICKERSHAM. I did not say that, and yet that is substantially true. The Alaska Northern was built substantially with the money of the Morgans. They loaned money to the builders, and they afterwards foreclosed the mortgage held for the security of the loan and now own the road.

Mr. HAMILTON of Michigan. And was started from Fair-

banks?

Mr. WICKERSHAM. Yes; from Seward for Fairbanks. Mr. HAMILTON of Michigan. And it was intended to tap the interior of Alaska?

Mr. WICKERSHAM. Yes.

Mr. LENROOT. I thought it was sold by Frost & Osborne to the Alaska Syndicate.

Mr. WICKERSHAM. I do not know as to that; but they

certainly owned it at the end.

Mr. TOWNER. Is it not now generally thought by the people of Alaska that there never was an intention of extending that road to Fairbanks, and that it was only intended to go as far as the Matanuska coal field?

Mr. WICKERSHAM. It was thought at first, when Mr. Ballaine and his people undertook to build that road, that it would go into the interior, but after his successors took over another situation began to develop. Then creditors or representatives of the Sovereign Bank of Canada came in and bought it, and it was announced that it would go only to the coal fields; and it certainly did not go farther than mile 71.

Mr. TOWNER. Was it the Sovereign Bank of Canada?

Mr. WICKERSHAM. Yes.

Mr. WICKERSHAM, Yes.

Mr. HAMILTON of Michigan. I thought they came in later,
Mr. WILLIS. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman yield?

Mr. WICKERSHAM. Yes.

Mr. WILLIS. Possibly the gentleman has already covered this in his statement, but I have not heard all of his interesting and instructive explanation. Is it not a fact that this bill con- across from Valdez would be a good route, I take it, is because

templates that all the Copper River Railroad could be taken over by the Government?

Mr. WICKERSHAM. No; not at all. Mr. WILLIS. What is the fact as to that? I am asking en-

tirely for information on that point.

Mr. WICKERSHAM. There is nothing in the bill that refers to that in any way, shape, or manner. It is left entirely to the President to build the road or roads on such route or routes as he shall deem best.

Mr. WILLIS. Then let me put the inquiry in another way: Does the recommendation of the commission contemplate the

taking over of that road?

Mr. WICKERSHAM. No. The commission did not recommend it. The commission recommended the building of an additional line from Chitina to Fairbanks, which would be a substantial extension of the Copper River road to Fairbanks, but did not recommend the purchase of the Copper River road.

Mr. WILLIS. The point I want to bring out is this: There is a portion of the Copper River Railroad that runs over to the Kennicott copper mines.

Mr. WICKERSHAM. Yes.
Mr. WILLIS. Is it contemplated by the commission that that shall be taken over, or simply this necessary part of the line up to Fairbanks?

Mr. WICKERSHAM. The commission did not recommend taking any of it over. They recommended the building of a railroad on the Copper River route to Fairbanks, but a road can be built from Valdez, which gives the Government an independent outlet. If you build from Fairbanks to Chitina, you have got to go over the Alaska Syndicate road.

Mr. GREEN of Iown. Does the gentleman consider that the bill authorizes either the purchase or condemnation of any of

these railroads that have already been built?

Mr. WICKERSHAM. I do not think it does. That is a question. The Senate bill certainly did not.

Mr. GREEN of Iowa. The Senate bill did?

Mr. WICKERSHAM. The Senate bill as reported does not.

Mr. HAMILTON of Michigan. Suppose the plan should contemplate the construction of a road from Chitina to Fairbanks, could not the Government control the traffic over the Copper River & Northwestern road through the Interstate Commerce Commission?

Mr. WICKERSHAM. It could.

Mr. HAMILTON of Michigan. And would not that be a good route from Chitina across to Fairbanks?

Mr. WICKERSHAM. It is one route, and one of the routes recommended by the commission, but the bill does not confine the President to this route or to any routes,

Mr. McGUIRE of Oklahoma. I have read the bill carefully. The impression I obtained was that the President has the discretionary power to determine as to whether any other road shall be taken over, or any part of any other road shall be taken over.

Mr. WICKERSHAM. That may be. I heard the argument on the Senate bill yesterday, and I may have got that mixed.

Now, I want to say to the House that not only has the Alaska Syndicate gone into these gateways and got possession of the roads through them substantially, but that it exercises every power which it possesses, and it has greater power than the Government of the United States in that regard, to prevent the building of any other road through these passes, because such a road would go into its territory. I want to call the attention of the House to that, and I want to show you the means by which this great Alaska Syndicate moves to accomplish its purposes.

Mr. HAMILTON of Michigan. One more question.

Mr. WICKERSHAM. Yes.
Mr. HAMILTON of Michigan. I know that no one knows

Mr. HAMILTON of Michigan. I know that no one knows
Alaska better than the gentleman who is addressing the House.
Mr. WICKERSHAM. Thank you.
Mr. HAMILTON of Michigan. I wish to ask whether it
would be possible to construct a railroad from Valdez across to Fairbanks over what is substantially now the wagon road?

Mr. WICKERSHAM. Yes. Mr. HAMILTON of Michigan. Would not that be a good route to open up Alaska?

Mr. WICKERSHAM. It would.

Mr. HAMILTON of Michigan. The gentleman likes that better than the proposal to construct a road from Chitna across to Fairbanks?

Mr. WICKERSHAM. Oh, certainly. I would oppose that kind of an extension.

Mr. HAMILTON of Michigan. One reason why the road

it would open up agricultural possibilities sooner than any other route, except the route from Seward northward.

Northward through the Susitna Valley. Mr. WICKERSHAM. Mr. SHERLEY. Will the gentleman allow a question?

Mr. WICKERSHAM. Yes.

Mr. SHERLEY. Why does the gentleman oppose the ex-

tension of what he calls the syndicate railroad?

Mr. WICKERSHAM. I oppose it for several reasons. The first reason is that that route goes up the Copper River can-yon, which is a very narrow canyon. It is in the region of greatest snowfall in Alaska. The snowfall there is something like 30 feet per annum. The glaciers on both sides of it come down almost to the railroad. It is a narrow gorge-

Mr. SHERLEY. Then the gentleman thinks the syndicate did not use very good judgment in locating their road. Is

that it?

Mr. WICKERSHAM. Oh, they were building to their rich

copper mine, a mine they own themselves.

Mr. SHERLEY. The thing that strikes a man who knows nothing about it is that the syndicate should be so all powerful and also should be so all ignorant.

Mr. WICKERSHAM. The gentleman is mistaken if he

thinks that they are ignorant.

Mr. SHERLEY. I am only drawing conclusions from the gentleman's statements that the road has been unwisely built. Mr. HAMILTON of Michigan. Oh, they constructed it so as to get into the copper field.

Mr. SHERLEY. Is not that a proper reason for building

the road?

Mr. HAMILTON of Michigan. Certainly.

Mr. HOUSTON. The object of building this road up the Copper River Valley was solely to exploit the copper mines owned by the syndicate.

Mr. SHERLEY. But there is plenty of copper there besides

what the syndicate owns, is there not?

Mr. HOUSTON. No; I take issue with the gentleman on

Mr. SHERLEY. I can conceive of no better reason for building a road than to get at the mineral wealth.

Mr. WICKERSHAM. That is right.

Mr. HOUSTON. The main reason was to get at the copper

Mr. WICKERSHAM. Now, you can build a railroad from Valdez across to the same copper region over a very much better route, I think, than their route. In 1908, when the Close Bros. were building, the Guggenheims came down on them one day and shut off their wind, except upon some sort of participation from which they have not been able to receive anything.

Mr. COOPER. Will the gentleman yield?
Mr. WICKERSHAM. Yes.

Mr. COOPER. The gentleman speaks of the syndicate being able to shut off their wind and close them out; was there not some occasion when there was actual killing of men there, or the commission of murder?

Mr. WICKERSHAM. Yes.

Mr. COOPER. To prevent the building of a road by other people?

Mr. WICKERSHAM. Yes.

Mr. WILLIS. Will the gentleman from Alaska yield?

Mr. WICKERSHAM. I will. Mr. WILLIS. I understood the gentleman to say a few coments ago that in his judgment this bill did not contemplate the condemnation or taking over of any other line of road.

Mr. WICKERSHAM. I may be mistaken about that. I have not read the bill since I heard the argument in the Senate, and may have got the two mixed up.

Mr. WILLIS. I want the gentleman's interpretation of this language. On page 9 of the bill this language occurs:

To purchase or otherwise acquire all real and personal property necessary to carry out the purposes of this act; to exercise the power of eminent domain in acquiring property for such use, which use is hereby declared to be a public use, by condemnation in the courts of Alaska in accordance with the laws now or hereafter in force there; to acquire rights of way, terminal grounds, and all other rights.

And then, in connection with that, I invite the gentleman's attention to the language on the following page:

To lease, purchase, condemn, or otherwise acquire any other line or lines of railroad in Alaska which may be necessary to complete the construction of the line or lines of railroad designated or located by him in the first instance, upon such terms as he may deem proper.

Mr. WICKERSHAM. That would cover it.

Mr. WILLIS. That gives the President full power.

Mr. SHERLEY. Does not the gentleman think that the President should have that power?

Mr. WICKERSHAM. I should be willing to give him all that power if I had the money.

Mr. SHERLEY. I think it would be foolish for us to undertake to restrict his power to buy, if it was wise to buy, instead of paralleling.

Mr. WICKERSHAM. I agree with the gentleman. I am willing to trust the President with the power. I think it is

right. I do not want any limitation placed on him.

Now, with respect to the railway conditions in Alaska-why they are as they are. The gentleman intimates that I think Guggenheims are not wise railroad builders and did not build to the right place to accomplish the right result. No man in this House has a higher regard for the eminent ability of the Guggenheim family than I have. I think they are the wisest monopolists that ever hit the turf in America. I think the situation in Alaska shows it, and their monopolistic efforts have gone largely to transportation in that region where it is possible to develop copper and gold. They have not hesitated at any sort of crime to accomplish their purpose. Wherever another railroad is started, wherever a steamship line has gone in opposition to them, which goes into their territory, they have gone after that with hammer and tongs and always destroyed it.

Mr. MANAHAN. Can the gentleman give us the details of

Mr. WICKERSHAM. I can.

THE ALASKA SYNDICATE A CRIMINAL ORGANIZATION.

The community of interest between the Alaska Syndicate and its partners, the Close Bros., the owners of the White Pass & Yukon Railway, extending through the first gateway to the headwaters of the great Yukon, which supplies the interior from that source, is shown in the case of the United States v. Pacific & Arctic Rallway & Navigation Co., the Alaska Steamship Co. et al., decided by the Supreme Court of the United States April 7, 1913 (228 U. S., p. 87). The facts in that case are that the Alaska Steamship Co., in connection with the Pacific Coast Steamship Co. and the White Pass Railway Co., entered into a combination in violation of the Sherman antitrust law to exclude all other transportation companies from any participation in the carrying trade over the White Pass Railway to the interior of Alaska. Their insolence became so notorious and their efforts so detrimental to the development of Alaska that they were indicted by the United States grand jury at Juneau, Alaska, and the case was on appeal from the district court of Alaska upon that indictment. The following statement is copied from the opinion of the Supreme Court of the United States (228 U. S., 87):

the United States (228 U. S., 87):

The indictment contains six counts. The first and second counts charge violations of the antitrust law. The first, by the defendants engaging in a combination and conspiracy in restraint of trade and commerce with one another to eliminate and destroy competition in the business of transportation in freight and passengers between various ports in the United States and British Columbia in the south and the various cities in the valley of the Yukon River and its tributaries, both in British and American territory, in the north upon a line of traffic described for the purpose and with the intention of monopolizing such trade and commerce. The second count charges the monopolization of trade and commerce in the same business and between the same ports. The manner of executing the alleged criminal purpose is charged to be the same in both counts.

The places of the incorporation of the corporate defendants are alleged, and the following facts: The Pacific Coast Steamship Co. and the Alaska Steamship Co. operate, respectively, lines of steamships as common carriers of freight and passengers running in regular route between Seattle, State of Washington, and Skagway, Alaska.

Without going into details of the case the facts are that the

Without going into details of the case the facts are that the Alaska Syndicate, through its Alaska Steamship Co., in combination with the White Pass Railway and the Pacific Coast Co., had monopolized the carrying trade through this gateway for many years and thereby maintained excessive rates to the great harm and injury of American citizens in the interior of Alaska.

Not only was this gateway thus monopolized by this unlawful monopoly, but the White Pass partner of the Alaska Syndicate for many years maintained a contract with the Northern Navigation Co. and its twin, the Northern Commercial Co., at Dawson, whereby the White Pass carried this monopoly freight down to Dawson, and there turned it over to the Northern Navigation Co. for transportation into the Yukon Alaska. The Northern Navigation Co. agreed not to carry freight above Dawson and the White Pass Co. agreed not to carry freight below, and in this way the community of interest between the Alaska Syndicate, the White Pass, and the Northern Navigation Co. extended down the full length of the Yukon River, in violation of the Sherman antitrust lew. For 15 years the people of the interior have been paying enormously excessive freight rates on account of this unlawful contract. Instead of "leaving the laws of trade and commerce to deal with questions of transportation and operation of production," as the minority report somewhat vaguely recommends, the Alaska Syndicate, with insolent disregard to those or any other laws, with a strong arm and the might of its financial influence, has forced all competitors into their combination or destroyed them. .

I now call the attention of the House to this map and the colors upon it. The orange color here represents the route of the Alaska Steamship Co. to the end of their railroad, and then it represents their railroad out to their mines. Here it represents the Alaska Steamship Co. in its approach to Skagway, and it is at this place that they held such a combination that they were indicted, and the indictments are now pending against them, for violation of the Sherman law. The facts are that the combination of the Alaska Syndicate Co. and the White Pass Co. shut out all other boats from that port by excessive rates, by every form of opposition, which excluded them from equal facilities for doing business over that road.

Mr. FORDNEY. Mr. Chairman, will the gentleman yield?

Mr. WICKERSHAM. Yes.

Mr. FORDNEY. I would judge from reading the records and the question put by the gentleman from Wisconsin [Mr. COOPER] about the commission of crime up there, and the statement of the gentleman from Alaska [Mr. Wickersham] so far, that the Guggenheims are guilty of murder there. What evidence has the gentleman to that effect?

Mr. WICKERSHAM. The evidence was in court, and the

evidence was that their high officials gave instructions to shoot, and a fellow did the shooting and killed a man, and he was sent to the penitentiary for it, and the other man who was shot alongside him brought suit against the Alaska Syndicate corporation for shooting him, and the court and the jury sustained

him and gave judgment against them.

Mr. FORDNEY. I think a copy of that evidence should go into the RECORD, because it will go out to the world that the Guggenheims are murderers, and there should be some evidence of that with such a statement in the Congressional Record. I am not defending the Guggenheims, but that is what the RECORD will show.

Mr. COOPER. Mr. Chairman, the gentleman from Michigan is unduly sensitive on behalf of the Guggenheims. I did not mention the Guggenheims, and nobody knows it better than the gentleman from Michigan.

Mr. FORDNEY. I know the gentleman did not. Mr. COOPER. Then the gentleman should not have assumed what he did.

Mr. FORDNEY. Oh, yes; I should; but I will not interrupt

the gentleman now.

Mr. COOPER. Mr. Chairman, I did not charge anybody by name as being a murderer, but I said this syndicate, the personnel of which I do not know, was instrumental, so it had been reported in the press, and the gentleman from Michigan knows-and that is all I said-in preventing the building up there, keeping these other people out of there, as the gentleman from Alaska said, and murder had been committed, crime had been committed. The gentleman said yes. I do not suppose that any one of the Guggenheims personally committed murder, The gentleman said yes. I do not suppose or that they authorized it. What I said was that the newspapers had reported it. It seems that in preventing other people from going in there murder was committed; that the murderer was convicted and sent to the penitentiary; and to that extent merely the rumor cited was correct.

Mr. FORDNEY. Mr. Chairman, I did not say that the gentleman from Wisconsin [Mr. Cooper] had said that the Guggenheims had committed murder. I say the question asked by the gentleman from Wisconsin of the gentleman from Alaska would carry the inference that the Guggenheims were responsible for the crime, and that it would go out to the country that the Guggenheims are murderers. I do not know the Guggenheims, and I do not care anything about them. I am not defending them here, but it is a pretty broad statement to go out to the world from the House of Representatives that the Guggenheims are murderers without some evidence along with that statement

to go into the RECORD to that effect.

Mr. HAMILTON of Michigan, Mr. Chairman, will the gentleman yield?

Mr. WICKERSHAM. Certainly, Mr. HAMILTON of Michigan. So that the gentleman may state the facts and so that the facts may go into his interesting address, let me put a question: Did not this controversy in which one man was killed and other men were injured arise over a conflict of surveys? I am not quite clear in my own mind in relation to it, but I have the impression that the syndicate had a survey and that another road had a survey also, and that those surveys intersected and that at the point of intersection they got into a row, and somebody on one side or the other constructed a sort of go-devil, and that go-devil was a dangerous thing. Somebody sought to get possession of the go-devil and they had a fight there. How near right am I?

Mr. WICKERSHAM. The gentleman is about 200 miles

from the fact. [Laughter.]

Mr. HAMILTON of Michigan. All right. This is merely from recollection-

Mr. WICKERSHAM. The incident the gentleman has reference to occurred at Katalla, and the incident referred to by the other gentleman occurred over at Valdez, about 200 miles away, Both of them were incidents where this great overwhelming monopoly in Alaska tried to take other men's property away from them by force.

Mr. HAMILTON of Michigan. Was it true there was a con-

flict between right of way in each instance?

Mr. WICKERSHAM. No; it was not a conflict over right of

Mr. HAMILTON of Michigan. Let us get at the facts-Mr. WICKERSHAM. One was a conflict over right of way at Katalla-

Mr. HAMILTON of Michigan. So I was not 200 miles away? Mr. WICKERSHAM. The case the gentleman was taking about occurred at Valdez

Mr. HAMILTON of Michigan. I was not talking about the same thing that they were talking about. I was talking about a conflict over right of way.

Mr. COOPER. If the gentleman will permit, the gentleman from Michigan referred to what I have been talking about and the gentleman does not know the facts at all,

Mr. HAMILTON of Michigan. He does not dispute the facts. Mr. COOPER. He does dispute the facts. The gentleman from Michigan when he rose referred specifically to what I have been talking about.

Mr. HAMILTON of Michigan. Precisely; I do now. Mr. COOPER. The gentleman said he wanted to get the facts and that he understood them to be so-and-so-

Mr. HAMILTON of Michigan. And the gentleman from Alaska confirmed it.

Mr. COOPER. No; the gentleman from Alaska said the gentieman from Michigan was referring to another incident en-

Mr. HAMILTON of Michigan. He was mistaken about that. Mr. DAVENPORT. Mr. Chairman, will the gentleman yield? Mr. WICKERSHAM. I yield to the gentleman from Okla-

Mr. DAVENPORT. I would like to ask the gentleman from Alaska who was the other syndicate that was responsible or was at least present when this fight came up where these parties were killed, where the Guggenheim interest was involved to which he referred awhile ago? What is the name of the syndicate, in order that we may have in the RECORD, where the Guggenheims were on one side at Cordova or Valdez and another syndicate on the other side when this shooting took place? I remember distinctly the first Cordova affair. The gentleman from Michigan was chairman of the Committee on Territories at the time and the gentleman from Alaska made reference awhile ago to another syndicate. Which was the other syndicate on the other side where the shooting took place?

Mr. WICKERSHAM. The other syndicate was the Home Railway of Valdez, composed of residents of that community who formed themselves together to get an independent outlet from that community to the interior.

Mr. DAVENPORT. Who financed it?

Mr. WICKERSHAM. The Home Railway Co. Mr. DAVENPORT. Who were the financiers?

Mr. WICKERSHAM. The residents of that community-to build a little narrow-gauge railroad. It was not a syndicate

Mr. DAVENPORT. Does the gentleman undertake to say now that the Home Railway Co. was financing that enterprise? Mr. WICKERSHAM. Yes, sir; and they were all residents of Alaska.

Mr. DAVENPORT. All residents of Alaska? Mr. WICKERSHAM. Yes, sir; all of them. Mr. FRANCIS. Will the gentleman permit a question—just

Mr. WICKERSHAM. Well, for the last one. Mr. FRANCIS. I want to know if it is possible to build a practical railroad in Alaska without first settling with these interests of which the gentleman has spoken? Is it a fact that we will have to settle with them before we can build a railroad? Mr. WICKERSHAM. Not at all.

THE ALASKA SYNDICATE OPPOSES EXTENSION OF INTERSTATE-COMMERCE LAWS TO ALASKA,

The closing of the port of Skagway to independent steamships brought on a contest with the Humboldt Steamship Co. It was an independent company and sought to do business through the port of Skagway over the wharves and railroad of the White Pass Co., which was controlled by the Alaska Syndicate agreement. It failed to get any facilities for business and

was met with excessive special rates and all forms of opposition. It appealed to the Interstate Commerce Commission in 1909 for an order establishing fair rates at this port and over the White Pass route. The Interstate Commerce Commission denied the application of the Humboldt Steamship Co. upon the ground that Alaska was not a Territory within the meaning of the interstatecommerce law. The Humboldt Co. appealed to the courts in the District of Columbia for a writ of mandamus to compel the Interstate Commerce Commission to take jurisdiction and to establish a rule of equal right and facility over this line of transportation. Both lower courts denied the application, but the Supreme Court of the United States, on April 29, 1912 (224 U. S., 474), reversed the action of the Interstate Commerce Commission and the lower courts and held that Alaska was a Territory within the meaning of the interstate-commerce law and ordered the issuing of the writ of mandamus. Two of these companies in combination fought this effort of the people of Alaska to extend the benefit of the interstate-commerce laws to Alaska and through this gateway-the White Pass & Yukon Railroad, by its general counsel, who is now in the city of Washington walking the corridors, writing letters, and interviewing Members of the House in opposition to this bill, and the Copper River & Northwestern Railread Co., the Alaska Syndicate's company. Both of these great companies fought every effort that was made by the people of the Territory of Alaska to get the interstateby the people of the Territory of Alaska to get the interstatecommerce laws extended there, and we were finally forced to
come to the District of Columbia and begin a suit against the
Interstate Commerce Commission to compel it to take jurisdiction, and we only got a decision of the Supreme Court of the
United States in April a year ago.

Mr. HUMPHREY of Washington. Mr. Chairman, will the

gentleman yield?

gentleman yield?

The CHAIRMAN. Does the gentleman yield?

Mr. WICKERSHAM. Yes.

Mr. HUMPHREY of Washington. I want to ask the gentleman this question: Are the British vessels running from Vancouver to Alaska in this combine?

Mr. WICKERSHAM. Yes; but of course they carry only British freight. They do not carry local freight. Going from Vancouver to Skagway, they send their freight into the interior of Yukon territory, and it is not covered, of course, by the interstate-commerce law.

Mr. HUMPHREY of Washington. That is two but at the

Mr. HUMPHREY of Washington. That is true, but at the same time the British vessels carry freight from Seattle to Van-

couver, and thence to points in Alaska.

Mr. WICKERSHAM. That is something that I do not know anything about; but I am not talking about that, and I wish

the gentleman would not interrupt me with it.

Mr. HUMPHREY of Washington, I did not intend to bring that out; but inasmuch as the gentleman has answered the question in that way, I will say that the reason I asked the question is that a year ago I introduced a bill to prevent these vessels from engaging in the coastwise trade, and I remember the gentleman opposed it on the ground that it would destroy

the competition between that syndicate and the combine.

Mr. WICKERSHAM. Yes; on the ground that it would de-

stroy another competitor.

Mr. TOWNER. Still, it would not be impossible for English vessels to take freight of any sort from Seattle to Alaska?

Mr. WICKERSHAM. Yes. They took it to Vancouver and there transferred it.

Mr. TOWNER. That would be an evasion of the law.

Mr. WICKERSHAM. Yes; but it was carried. Mr. HUMPHREY of Washington. They are still carrying it out, so far as freight is concerned, every day. I introduced a bill to correct that,

Mr. WICKERSHAM. What I was trying to call to the attention of the House was the fact that for years and years we undertook to get the interstate-commerce laws extended to Alaska, but had to get the case before the Supreme Court of the United States after years of waiting in order to do that.

THE ALASKA SYNDICATE RESORTS TO KILLING ITS OPPONENTS.

Now, I wish to call to the attention of the House a matter

that was mentioned a few minutes ago.

In 1906 the Alaska Syndicate began the building of a railroad out of Valdez toward its copper mines, 180 miles from that harbor on the headwaters of the Chitina River. 10 or 15 miles of grade, but about that time found the Close Bros., representing the White Pass Railway, building from Cordova up the Copper River to the same common point at Chitina. The Alaska Syndicate forced the Close Bros. to join their combination, giving them participation in the Alaska Syndicate as a partner for the 20 or 21 miles they had then completed toward Copper River. Thereupon the Alaska Syndicate abandoned the Valdez grade. Immediately thereafter

the people of Valdez organized the Home Railway Co. and began the building of a railroad from the harbor of Valdez through the mountain pass toward the common point at Chitina. The officials of the Alaska Syndicate corporation sought in every way possible to prevent the building of this Valdez road. Every effort was made to bankrupt it, but the people of Valdez with picks and shovels went to work on the road, regardless of money, and sought to overcome all obstacles. Thereupon the Guggenheim officials employed two or three gunmen and sent them into Keystone Canyon with instructions to build a barricade and not to permit the laborers of the Home Railway Co. to come along their abandoned roadway. The laborers came along one morning with their picks and shovels on their backs and one of the gunmen, from behind the rocky barricade, fired upon them, killing one instantly, and as the frightened laborers ran he shot others in the back. The gunman was arrested and indicted for manslaughter, tried, and found guilty and sentenced to the penitentiary. The Alaska Syndicate employed an array of attorneys to defend this gunman and spent \$70,000 in that effort.

Here is a copy of an account and an explanatory letter signed by the attorney for the Alaska Syndicate to its treasurer, which shows how the case was tried. I will read the letter first. It is in possession of the United States, and has been for some years. It is a letter written by John A. Carson, an attorney at Salem, Oreg., who went up there for the Guggenheims and defended these fellows who did the shooting in the Keystone Canyon, to a personal representative of the Morgans in Seattle

and another Alaska Syndicate corporation:

SEATTLE, WASH., May 6, 1908.

Capt. D. H. Jarvis,

Treasurer, Lowman Building, Seattle, Wash.

My Dear Captain: The inclosed account of Mr. M. B. Morrisey has been submitted to me by him. I do not claim to have personal knowledge of all of the items therein mentioned—necessarily I could not have such—but I do know that Mr. Morrisey was taking care of several of the Government's witnesses. I saw him take them into restaurants very many times (it was generally rumored around Juneau that the majority of the Government's witnesses were broken), and I have not the least doubt that Mr. Morrisey cared for them in the manner shown in his account.

In addition to this, I wish to express my appreciation of the services rendered by Mr. Morrisey, not only in Juneau but also at Valdez during the session of the grand jury there. I found him very efficient and competent, and his acquaintance with many of the Government's witnesses and control over them placed him in a position to be of the greatest possible service in defending this action.

I scarcely need tell you that Mr. Morrisey is an expert accountant employed by Mr. Heney at Cordova. He is anxious to return there promptly to resume his duties, and I trust that you will treat him in a very liberal manner.

Yours, very truly.

John A. Carson.

JOHN A. CARSON.

Entered, Voucher No. 3408.

It may be understood that the Katalla Co. was the construction company for the Alaskan syndicate, engaged in building the Alaska Syndicate road up the Copper River. This was an account against them by Morrisey-

Mr. MANAHAN. A representative of a subsidiary company? Mr. WICKERSHAM. Yes; of a subsidiary company. I want the lawyers to listen to these disbursements, or any other honest man that happens to be in the House. [Laughter.] Here is the

SEATTLE, WASH., May 6, 1908. Katalla Co., in account with M. B. Morrisey: Moneys received from John A. Carson \$650.00 Balance due me 483.40 \$1, 133, 40 DISEURSEMENTS.

Entered, voucher No. 3408. Approved: W. H. Bogle.

That is approved by the general counsel for the Guggenheims at Seattle.

Mr. MANAHAN. Who is it?
Mr. WICKERSHAM. W. H. Bogle. It is entered voucher
No. 3408 in the accounts of the company.

All of these matters have been brought out in other proceedings, and it is true that these people used the money charged for in this account for fixing jurors and witnesses, and so forth, in that case,

I call it to your attention, not as an attack upon the Guggenheims or upon the Alaska Syndicate, although there are many more things that we could attack them on if it is necessary, but to show the means to which they esort to kill other railroads in that country. And I want to say to you that nothing has been left undone by them, from manslaughter down to maintaining the worst lobby in this city at this moment that has ever been here, to kill this bill, and to kill every other independent railroad that has ever started in that country. [Applause.] And unless this House shall do its duty as trustees for that great Territory, it will be in their hands for the future. Talk about crime! The Alaska Syndicate is an organized crime, as far as Alaska is concerned.

Nor have its activities in a criminal way been confined to the

coast of Alaska.

In 1908 certain citizens of Alaska sought to establish a base of operations on Controller Bay, and applied to Congress for an act giving them terminal rights for a railroad from Controller Bay to Bering River coal fields, and from Controller Bay up

the Copper River toward the interior of Alaska.

Here is Controller Bay, opposite the Bering River coal field. These people applied for the organization of a corporation, through Congress, in order that they might build a railroad into that coal field and up the Copper River in 1908. It conflicted with the territory claimed by the Alaska Syndicate, and this is what happened. This application, of course, invaded what the Alaska Syndicate called its territory. In the Congressional Record, page 6226, under date of May 14, 1908, is this state-

Mr. Flint, from the Committee on Public Lands, to whom were referred the following bills, reported them each with an amendment and submitted reports thereon; * * A bill (S. 6925) for the relief of the Alaska Terminal & Navigation Co. (Rept. 657).

In the RECORD, page 6325, of May 15, 1908, is this statement in relation to the same bill:

ALASKA TERMINAL & NAVIGATION CO.

The bill (S. 6925) for the relief of the Alaska Terminal & Navigation Co. was announced as next in order.

Mr. Guggerifeim. I object to the consideration of the bill.

The Vice President, Objection is made by the junior Senator from Colorado to the consideration of the bill.

In the RECORD, page 6533, for May 19, following, we touch a new interlocking interest:

ALASKA TERMINAL & NAVIGATION CO.

Mr. Kean, I ask that the next bill on the calendar (S. 6925) for the relief of the Alaska Terminal & Navigation Co. be placed on the calendar under Rule IX.

The VICE PRESIDENT. The bill will go to the calendar under Rule IX at the request of the Senator from New Jersey.

When the junior Senator from Colorado objected to this bill, Hon, Simon Guggenheim was a member of the Alaska Syndicate and directly interested in the matter before the Senate. When the Senator from New Jersey performed the last act of slaugh-tering it, Hon. John Kean, of New Jersey, was the treasurer of the Pacific Coast Co., a steamboat company engaged in Alaska transportation, and then in criminal combination with the Alaska Steamship Co. in maintaining monopoly and excessive rates at the port of Skagway, Alaska. Both these companies were indicted by the United States grand jury at Juneau, Alaska, for violation of the Sherman antitrust laws for this long-continued violation of the law, all of which is fully stated in the case of the United States v. Pacific & Arctic Railway & Navigation Co., Pacific Coast Steamship Co., Alaska Steamship Co., et al., decided by the Supreme Court of the United States on April 8, 1913 (228 U. S. Rep., 87).

Nor was this the only instance. The Assistant Attorney Gen-

eral fold me that they had filched more than \$3,000,000 out of the Government in the sale of coals on the west coast.

I am trying to show you the connection between these peopletrying to show you that, notwithstanding what the gentleman said a while ago, they do not hestitate to go to any length, from shooting men in the back to killing bills on the floors of Congress, to accomplish their purposes, and the records are perfectly clear on that. Many other instances could be shown, if the House had the patience to listen.

Nor have the criminal activities and combinations of the Alaska Syndicate and the Pacific Coast Co. been entirely confined to the port of Skagway. An indictment was re-

turned by the United States grand jury at Tacoma on August 12, 1911, against the treasurer of the Alaska Syndicate corporations in Alaska, the coal manager of the Pacific Coast Co., and another, for conspiracy to rob the Government by agreed bids in the sale of coal to Alaskan military posts. The representative of the Alaska Syndicate died before the indictment was returned, but the coal manager of the Pacific Coast Co. and another were tried, found guilty, and sentenced to a year in jail and a fine of \$2,000.

At the time when the coal manager of the Pacific Coast Co. and the confidential manager of the Alaska Syndicate engaged in this long-continued robbery of the Treasury of the United States in the transportation of coal to Alaskan military posts, Hon. John Kean, of New Jersey, was treasurer of the Pacific Coast Co. and received their share of the plunder, while Hon. Simon Guggenheim was a member of the Alaska Syndicate, which received its share. The United States is now maintaining a civil suit in the United States courts at Seattle to recover \$100,000 thus stolen, but it was found that the statute of limitations barred the greater amount, for they had been engaged in this robbery of the Treasury for years. No wonder the United States itself is beginning to prefer Government ownership to this kind of Guggenheim ownership. And no wonder that Congress has been laggard in transportation matters in Alaska when these masters of finance sat in high places and controlled legislation.

Many other instances could be shown, if the House had the patience to listen, where the Alaska Syndicate, in ways that are criminal and with a strong arm, prevented independent efforts to construct railroads into the interior of Alaska, which it claims as its territory. Their efforts along these lines have been incessant for 10 years or more, and their activities have covered the field of crime from manslaughter, assault, bribery of witnesses, conspiracy, and robbery of the Government down to maintaining an insidious lobby in the city of Washington at this moment to prevent the passage of this bill. Alaska Syndicate do not intend to permit any other railroads to be built in Alaska unless the extension is grafted upon its road and it is given control to the sea.

COMBINATION WITH THE NORTHERN COMMERCIAL AND NORTHERN NAVIGATION COS.

During the four months' navigation possible in Bering Sea the Alaska Steamship Co., owned by the Alaska Syndicate, runs its vessels to St. Michael with freight from Seattle. The freight is transferred at St. Michael to another large interest in alliance with the Alaska Syndicate in Alaska transporta-The Northern Commercial Co. is the commercial side and the Northern Navigation Co. is the transportation side of this interest. The Northern Commercial Co. owns mercantile establishments at every steamboat landing along the 1,600 miles of the Yukon River to Dawson, and the 275 miles additional up the Tanana to Fairbanks. The Northern Navigation Co. is its Siamese twin and is the other half of the mercantile company. These twins are owned by the Sloss interests at San Francisco, which also owns the Alaska Packers' Association—the Alaska Fish Trust. The community of interest between the Northern Commercial and the Northern Navigation Co. is with the Alaska Steamship Co. in transportation matters. Through this combination these two companies jointly control the transportation of freight up the Yukon River to Dawson and up the Tanana River to Fairbanks.

EXCESSIVE FREIGHT RATES.

Now, I want to talk about freight rates in Alaska, and to show why these people are going so seriously into their opposition, not only to the building of this railroad in Alaska, but in their opposition to all other attempts to build independent transportation into that country.

It is in its control of the transportation business in Alaska, however, that the Alaska Syndicate is able to do the people of Alaska the greatest injury and themselves the greatest good. Its freight rates are the highest in the civilized world, and are so manipulated in connection with their mining business as to drive all mining competitors to bankruptcy, and to procure their assets at the minimum cost to the trust. It is in supreme control of transportation in Alaska, and it has abused that control to a greater extent than it has ever been abused elsewhere in American territory. Of course, the first result of unlimited power over transportation is excessive rates. The attention of the House is called to the United States Geological Survey Bulletin No. 442, Mineral Resources of Alaska, 1909. Upon page 25 of this official document it is stated:

The total transportation charge on the supplies of Seward Peninsula will, then, be about \$1,200,000, or nearly 30 per cent of the value of the entire gold output of the year.

This camp is supplied with transportation by the syndicate boats, the Alaska Steamship Co.

On the next page this official statement is made:

No exact figures are available in regard to the amount of freight annually shipped to the Alaska portion of the Yukon Basin, but it is probably safe to say that this amounts to 30,000 tons, and that it costs over \$2,500,000 to land it at the end of steamboat navigation.

It does not take much of a mathematician to determine that if it costs \$2,500,000 to land 30,000 tons at the end of steamboat navigation, it is at the rate of \$83.33 per ton. The only incorrect part of that statement is that the lowest transportation rate that we get in that country amounts to nearly \$120 per ton instead of \$83.

The report goes on:

The total annual cost of freight for the Yukon basin is therefore probably between \$4,500,000 and \$5,000,000, or nearly 50 per cent of the value of the entire gold output. * *

The miners in the Tanana region have taken out \$74,000,000 in gold by hard work, and they paid one-half of all of it, or \$37,000,000, in freight in less than 10 years. Now, if they have paid 50 per cent of \$74,000,000 in freight, and you build a road, even if it costs \$35,000,000, upon that freight basis alone it will be paid for in 10 years.

Mr. SAMUEL W. SMITH. Will the gentleman allow a ques-

tion?

Mr. WICKERSHAM. Certainly. Mr. SAMUEL W. SMITH. Are there any oil fields in Alaska?

Mr. WICKERSHAM. We do not know. It is thought there are, but there has not been sufficient work done to show.

This official statement goes on:

This official statement goes on:

The data at hand seems to justify the conclusion that Alaska's annual expenditure for transportation of supplies and equipment is between \$7,000,000 and \$8,000,000. * * * The great tax on the mining industry of Alaska caused by the present system of transportation is strikingly illustrated by the fact that the annual freight bill—much, to be sure, paid indirectly—for every white man, woman, and child living in inland Alaska and on Seward Peninsula is over \$350. * * If these estimates are correct the amount paid for freight in the placer mining camps of Alaska is equal to nearly half of the value of the annual gold production. The freight charges are reflected in the high cost of all supplies and of labor.

All of this clearly indicates why only the richest placer ground is being mined and suggests that the present industrial advancement of inland Alaska is small when compared with that which will take place when railway communication with tidewater has decreased the cost of operating.

These excessive freight charges prevent the opening of the mines in the interior of Alaska. Only the bonanzas can be worked, while the greater areas of low-grade ground await the coming of cheaper transportation and lower freight rates. The amount of gold which has been taken out of that region, as large as it is, is small in comparison to what the country will produce under better transportation conditions. Given a railroad from the coast to the Tanana River, with interstate com-merce control of transportation rates of freight and passenger rates, the Fairbanks country will produce 10 times the amount of placer gold that has heretofore been produced there, and will open her quartz mines for a still greater production for an indefinite future.

Now permit me to give you some exact figures concerning the freight rates which are charged the people of Alaska by this dominating transportation trust which controls them.

THE NORTHERN NAVIGATION FREIGHT RATES.

I shall only present two freight tariffs, one affecting the interior rivers, and the other upon the Alaska Syndicate railroad and over its Alaska steamship line to Puget Sound. These are the lines which we are now obliged to patronize. When the Senate committee conducted its hearings upon the Alaska railway bill I filed a copy of the rate sheet of the Northern Navigation Co., in connection with the Alaska Steamship Co. and the Pacific Coast Steamship Co., for rates charged between Seattle and San Francisco and the Yukon and Tanana River points. That rate sheet will be found on page 637 of the Senate hearings. I call your special attention to it. Fairbanks is the central point in that entire country. It is the distributing point for all freight, passengers, and mail. An inspection of this tariff sheet for the transportation of freight to the interior of Alaska will show that it provides a flat rate from Seattle and San Francisco to Fairbanks of \$60 per ton. That does not include the transfer charges from the Alaska Steamship Co.'s steamer at St. Michael to the Northern Navigation Co.'s boats. On first glance it would not appear that that rate is so excessive, even for all-water transportation, but upon a more careful examination you are led to inspect what is called a "list of exceptions" on the back of the tariff sheet. It is provided in the "list of exceptions" that all commodities mentioned in the list take the flat rate of \$60 per ton, plus the percentage of such rate shown opposite each article on the list of exceptions. Here is a statement showing the flat rate per ton, the additional percentage of exceptions, and the real rate per ton paid by the shipper.

Northern Navigation Co. in connection with Alaska Steamship Co. and Pacific Coast Steamship Co. [Freight tariff from Seattle or San Francisco to Fairbanks, Alaska, via St. Michael.]

	Flat rate per ton.	Additional percentage on exceptions.	Rate per ton.
Automobiles Boats and canoes Burial cases Cash registers Cigars, not corded. Special contract.

Machinery

and the second of the second o	
Weight of machinery—	Rate per ton.
Under 2,000 pounds	\$60, 00
2,000-4,000 pounds	66.00
4.000-6.000 pounds	69.00
6.000-8.000 pounds	73, 50
8,000-10,000 pounds	78, 00
10.000-12,000 pounds	82.50
12,000-14,000 pounds	87, 00
14,000-16,000 pounds	91, 50
16,000-18,000 pounds	96, 00
18,000-20,000 pounds	100, 50
20,000-22,000 pounds	105. 00
22,000-24,000 pounds	109, 50
24,000-26,000 pounds	114.00
26,000-28,000 pounds	118, 50
28,000-30,000 pounds	123, 00
30,000-32,000 pounds	127, 50
32,000-34,000 pounds	182, 00
34,000-36,000 pounds	136. 50
36,000-38,000 pounds	141.00
38,000-40,000 pounds	145, 50

The first article mentioned in the list of exceptions is automobiles, boxed or crated, and upon that class of freight the shipper pays 200 per cent additional, which makes the rate charged \$180 per ton upon automobiles, and this will be charged either by weight or measurement, as the Transportation Trust shall determine, and the transfer charge at St. Michael will be added. Following automobiles come bicycles, with a 50 per cent additional charge, or \$90 per ton. Boats and canoes, 150 per cent additional, or \$150 per ton. Burial cases, 100 per cent additional, or \$120 per ton, weight or measurement; cash registers, 100 per cent additional, or \$120 per ton; clothing and robes, 50 per cent additional, or \$90 per ton; and so on down

But when it comes to mining machinery the rates mount up more rapidly. Our mines require much heavy machinery-such as boilers, engines, and hoists-and for this class of freight the extra rate is all the way from \$6 to \$85 a ton additional. Notice that on this class of freight the rate ranges from the lowest, or \$60 per ton, to the highest, or \$145.50 per ton. The average freight rate into the Tanana interior over the Northern Navigation Line, in connection with the Auska Symulcate steamers, is more than \$125 per ton, or, as it is more graphically put by the Geological Survey, it amounts to more than \$350 per annum for every white man, woman, and child in the Territory.

The minority report innocently says the Yukon Basin "is gation Line, in connection with the Alaska Syndicate steamers,

The minority report innocently says the Yukon Basin "is already served by water transportation," and passes the matter with that remark, as if it was satisfactory to the minority members. I assume that the minority members understood the situation in the Tanana Valley and along the Yukon and Tanana Rivers when they approved that transportation system, but I earnestly protest that that country can not be developed when its shippers are obliged to pay from \$60 to \$180 per ton for the freight brought into the country, or a freight rate which in the aggregate amounts to 50 per cent of the total output of its mines and is equal to \$350 per capita for each man, woman, and child in the country.

THE SIAMESE TWIN TRANSPORTATION COMPANIES.

The Northern Navigation Co., which carries the freight from St. Michael to Dawson, 1,600 miles up the Yukon River and 275

miles up the Tanana River, is a Siamese twin with the Northern Commercial Co., both being owned by the Sloss interests in San Francisco, who also own the Alaska Packers' Association, the Alaska Fish Trust. The Northern Commercial Co. owns large mercantile establishments at every landing along the Yukon and Tanana Rivers. The Northern Navigation Co. carries all the merchandise for the Northern Commercial Co., as well as for the independent merchant in the Yukon interior. It is not under the control of the Interstate Commerce Commis sion, since the freight is entirely carried by water. For this reason the navigation company gives the commercial company the lowest rate the traffic will bear, while it charges the common energy, the independent merchant, its competitor, the highest rate the traffic will bear. That system has lasted for 15 years in the Yukon interior, is the rule to-day, and has resulted in bankruptcy to every merchant who has attempted to establish a store in the Tanana or Yukon interior. It has resulted in giving the Northern Commercial Co. a monopoly in the sale of all groceries, mercantile supplies, and mining machinery sold in that region.

ANOTHER SIAMESE TWIN.

While I am on this point, I call the attention of the House to the fact that the Alaska Syndicate railroad, the Copper River & Northwestern Railway, down the Copper River, carries the ore produced by the Kennecott Copper Mines Co., also owned by the Alaska Syndicate, in connection with the Alaska Steamship Co., also owned by the Kennecott Copper Mines Co., also owned by the Alaska Syndicate, in connection with the Alaska Steamship Co., also owned by the Kennecott Copper Mines Co., also owned by the Alaska Syndicate, in connection with the Alaska Steamship Co., also owned by the Alaska Syndicate, in connection with the Alaska Steamship Co., also owned by the Alas ship Co., also owned by the Alaska Syndicate, to the Tacoma Smelter, also owned by the Alaska Syndicate. Mr. LINDBERGH. Are the passenger rates in proportion?

Mr. WICKERSHAM. The passenger rates are in proportion. No man knows Alaska better than Dr. Brooks. No man has given better service to the people of Alaska and to the people of the United States than the man who has charge of the Alaska branch of the Geological Survey. He is unprejudiced, is a good man in every respect, and thoroughly competent to speak of matters in Alaska. If this House would consider the statements made by Dr. Brooks in his official reports, which I can not read, because I have not the time, you would have no hesitation or doubt as to the duty which you should perform in voting on this bill.

Now, I place a good deal of stress on this Siamese-twin cor-poration method of doing business on the Yukon River, because these two big interests—the Sloss interest, of San Francisco, and the Alaska Syndicate in New York—largely control all the transportation of Alaska. They have duplicate companies in the commercial interests

Mr. MANAHAN. Is there any connection between the two

groups?

Mr. WICKERSHAM. Yes. That enables the transportation companies to charge independent miners in the country as much as they please and still do their own company no damage. It enables the company to charge merchants as high as they likeand they do charge \$180 a ton-and they get their own freight at a low rate. It enables them to charge a competitor about as much as he can make in the matter of profit, and thereby take his business away from him, and it thereby enables the Alaska Syndicate and copper business to destroy all competition.

Mr. MANAHAN. I meant to ask if there was any connection between the copper syndicate twin and the commercial transpor-

Mr. WICKERSHAM. There is. I will be able to give some evidence about that, but not as much as I would like to, because there is not enough of it in the record, but they work together in every respect.

Mr. TOWNSEND. Will the gentleman yield?

Mr. WICKERSHAM. Certainly. Mr. TOWNSEND. Who are the individuals at the New York end of it? The gentleman spoke of the Sloss interest in San Francisco controlling the navigation on the Yukon from San Francisco up to that point.

Mr. WICKERSHAM. No; from San Francisco to St. Michael is controlled by the Alaskan syndicate. It controls rates at sea, but the Northern Navigation Co. controls the inland river rates. The syndicate is composed of Morgan & Co., Guggenheim, and

Close Bros. That has all been gone over.

The opposition made to this bill by the gentlemen from Oklahoma is interesting from this point of view, for none of these Siamese-twin corporations could exist for one moment in the

progressive State of Oklahoma.

Section 12 of article 9 of the Oklahoma constitution reads as follows:

Sec. 12. No railroad company shall ship within this State any article or commodity manufactured, mined, or produced by it or under its authority or which it may own, in whole or in part, or in which it may have any interest, direct or indirect, except such articles or commodity as may be necessary to and intended for use in the conduct of its business as a common carrier.

If the Alaska syndicate transportation lines, in connection with its Copper River & Northwestern Railway Co., should undertake to do this kind of business in the State of Oklahoma, under that constitutional provision, and should undertake there to carry freight for a Siamese-twin corporation, as these Alaska corporations do, the Siamese-twin connection would be promptly and rudely severed by the meat ax of the Oklahoma constitu-Such a system is vicious and in violation of every principle of just government and honest trade. From the viewpoint of the constitution of Oklahoma, adopted by the people of that progressive State, that which the minority report recommends Congress to do for Alaska is denounced and forbidden; that which the minority report denounces in unmeasured scorn is approved in Oklahoma and reserved by the fundamental law as among the most sacred rights of the people.

No government control is ever exercised over freight rates in the interior of Alaska. The millions of dollars of excessive rates that shippers are obliged to pay these transportation pirates prevents the development of Alaska. The rates are so excessive and the business is so manipulated by rebates and private contracts that independent merchants can not exist there. These transportation carriers—the Northern Navigation Co., with its mercantile Siamese twin; the Northern Commercial Co. and the Copper River & Northwestern Railway, with its mining Siamese twin; the Kennecott Copper Mining Co., whose ore it carries, are able to destroy every competitor and take their business or mine by charging the mercantile or mining competitor excessive rates equal to the profits which its twin wishes to make on merchandise or mining. And yet we find this infamous scheme for building monopoly and destroying competition calmly approved by the minority report.

THE FAIRBANKS-CHITINA LINE.

Fairbanks is the upriver end of the Northern Navigation Co.'s steamer line; Chitina, on the Copper River Railroad, is the point where travel and freight from that railroad leaves the line for the interior. Fairbanks and Chitina are connected by a wagon road built by the United States, and the more money the Government expends upon the wagon road the more the stage line which uses it charges the people of Alaska to travel on it. In 1906, when the road was first established, it cost a traveler \$125 to ride on the Orr Stage Line from Fairbanks to Valdez, a distance of 365 miles, but in 1908 this stage line was taken over by the one or both of these big transportation companies as a connecting link between them, and the terminal was changed from Valdez to Chitina, a point only 310 miles distant from Fairbanks. Notwithstanding the lessening of the distance, the rate was increased from \$125 to \$135 to Chitina. The Alaska Syndicate Railroad then taxes the traveler \$17.50 additional to get to Cordova where he meets the steamer, making his total passenger fare \$152.50, as against the original \$125 for the same service—an increase of 22 per cent.

Here is a receipt for money which I paid to the Orr Stage Co. for baggage from Fairbanks to Chitina, a distance of 310 miles. It is offered to show what this transportation monopoly makes the people of Alaska pay—at the rate \$1,000 per ton—for baggage, in addition to the \$135 for fare, over the national road, which the United States built, and over which it permits the Alaska Syndicate to fix rates of transportation without limit.

Trip No. 11. Consignee, Judge Wickersham, Chitina-Fairbanks, November 7, 1912. Ed. S. Orr & Co. (Inc.), Fairbanks-Valdez Stage Line.

Description of article.	Weight.	Rate.	Amount.
1 trunk, 1 valise	173 80		
	93	€0.50	\$46.50

Paid, Nov. 7, 1912. J. R. Fowle, agent.

Mr. Chairman and gentlemen of this House, we pay at the rate of \$1,000 a ton for taking our light freight and baggage over that wagon road, because the Guggenheims have charge of transportation on it.

Mr. COOPER. How long a distance is that?
Mr. WICKERSHAM. Three hundred and ten miles.
Mr. MADDEN. How did they get charge of it?
Mr. WICKERSHAM. By building all of the road houses along the line and owning and controlling the stage line over it.

Mr. MADDEN. Why does the Government allow anybody to take charge of this road?

Mr. WICKERSHAM. That is what I am putting up to you

Mr. MADDEN. Who is responsible for it?

Mr. WICKERSHAM. You are. I do not mean you personally, but I mean the House of Representatives.

Mr. MADDEN. How?

Mr. WICKERSHAM. Because it does not take charge of fixing rates

Mr. MADDEN. Does anybody pretend to say that the executive officials of the Government, charged with the expenditure of millions of dollars for building private highways, have the audacity to turn that highway after it is built over to some private enterprise and then not be charged with the responsibility for neglect of duty?

Mr. WICKERSHAM. They did not turn it over in that

sense.

Mr. MADDEN. The gentleman does not mean to assume that the House of Representatives is responsible for the failure of the executive branch to perform this duty?

Mr. WICKERSHAM. Yes, I do; because the executive branch has nothing to do with fixing the rates and the House has. Mr. HUMPHREY of Washington. Mr. Chairman, will the

gentleman yield?

Mr. WICKERSHAM. Yes.
Mr. HUMPHREY of Washington. There is a Government road built in British Columbia running from Ashcroft, about the same distance as this road. Does the gentleman know the relative rates charged on the Government road in British Columbia and this road?

Mr. WICKERSHAM. No; I do not. Mr. HUMPHREY of Washington. I was in hopes that the gentleman did.

Mr. LEVY. Will the gentleman yield? If you build the railroad, would not that kill these excessive high freight rates?

Mr. WICKERSHAM. At present the only means of trans-

portation into the interior of Alaska—
Mr. LEVY. If you build a Government railroad, that would kill the high-price freight rates that they have upon this line, would it not?

Mr. WICKERSHAM. I think so; yes.

RATES OVER THE COPPER RIVER & NORTHWESTERN RAILWAY.

At present the only means of transportation to the interior of Alaska from the southern harbors is over the Copper River & Northwestern Railway, the Alaska Syndicate road, extending from Cordova, on one of the beautiful harbors of Prince William Sound, eastward 25 or 30 miles to the Copper River, and thence up the canyon of the Copper River to Chitina. The stage line from Fairbanks connects with the Copper River & Northwestern Railway at Chitina. During six months of the year this is the route to the interior. At Fairbanks connection is made with the Northern Navigation Co.

A COMPARISON BETWEEN THE ALASKA SYNDICATE RATES IN ALASKA AND TRANSCONTINENTAL RAILWAY RATES.

I want to call the attention of the House to the rates charged on the Copper River & Northwestern Railroad, which belongs to the Guggenheim-Alaska Syndicate Co., a road only 196 miles from one end of it to the other. See what they charge for rates:

Alaska rates over Copper River & Northwestern Railroad from Cordova to Chitina, 131 miles.

Hay	20, 00
Hardware	34. 00
Mining machinery	34. 00
Coal	7, 00
Lumberper M feet	
Alaska steamship rates from Seattle to Cordova, 1,236 mile	8.
	Per ton.
Grain and feed	\$11.00
Hardware	20.00

Mining machinery _____ Transcontinental rates, Chicago or New York to Seattle, 3,184 miles. Per ton

Grain and feed, from Chicago

Hay, from Chicago

Hardware, from New York

Mining machinery, from New York

Coal, from Chicago \$15.00 22.00 35.00 30.00 8.80

From Cordova to Chitina it is 131 miles. It is a mining country above Chitina, and hardware and mining machinery, grain and feed, hay, lumber, coal, and live stock are all necessary freight over the road. For transportation over this 131 miles the Alaska Syndicate Co. charges, for grain and feed, \$25 per ton; hay, \$20 per ton; hardware, \$34 per ton; mining machinery, \$34 per ton; lumber, \$11 per thousand feet; coal, \$7 per ton; live stock, per car—on horses, \$200; cattle, \$180; hogs, \$160; and sheep, \$160.

These rates are transcontinental rates. It costs only \$15 a ton to ship grain and feed from Chicago to Seattle, while the

Alaska Syndicate taxes the people of Alaska \$25 a ton for 131 miles. It costs \$22 a ton to ship hay from Chicago to Seattle and \$20 a ton from Cordova to Chitina.

But the real difficulty comes with hardware and mining machinery. They serve a really distinct mining country, where hardware and mining machinery are necessary to development. For these classes of freight the Alaska Syndicate railroad charges \$34 a ton, or 27 cents per mile, for the haul of 131 miles from Cordova to Chitina. The rate from New York to Seattle on hardware is \$35 per ton, while it is only \$30 a ton on mining machinery. If the transcontinental rate was charged at the Alaska rate it would amount to \$859.68 per ton. They charge \$7 a ton for coal from Cordova to Chitina, while the transcontinental lines charge only \$8.80 from Chicago to Seatthe. And so it is with live stock and all other necessary freight for this mining country. The local rate is 10 times more in proportion for the same freight transportation than railroads in the United States charge.

Nor is this all—it is only a good beginning. You have seen that the freight from Cordova to Chitina, 131 miles, is the same or greater than the total transcontinental rate. The Alaska Syndicate owns the Alaska Steamship Co. and carries the freight from Seattle to Cordova on these steamers before it is transferred to their railroad and carried into the interior 131 miles. From Seattle to Cordova they charge an additional amount of \$12 a ton on hardware, \$15 a ton on mining machinery, \$11 a ton on grain and feed, \$20 a ton on hay, and \$8 a ton on coal. So that the Alaska miner pays freight at Chitina on grain and feed, \$36 a ton; upon hay, \$40 a ton; upon hardware, \$46 a ton; upon mining machinery, \$49 a ton; and upon coal, \$15 a ton, being the two local rates added. This is the highest freight rate paid anywhere in American territory. There is no limit upon the amount which this great syndicate may, charge the people of Alaska for freight upon their steamers, for they carry only local freight at sea from Seattle to their wharf at Cordova, and in that way evade any control of the Interstate Commerce Commission.

Add the freight from Seattle to Cordova by boat, the railroad freight from Cordova to Chitina, and the freight from Chitina to Fairbanks by stage or by any conveyance which the shipper may employ, and it amounts to confiscation. No independent concern can do business in the interior of Alaska with the Northern Commercial Co. and its Northern Navigation Co. twin at that end of the line, and with the Alaska Syndicate charging 25 times the transcontinental rate for its brief 131 miles, and both these in charge of the stage line connecting Chitina with Fairbanks.

We pay a freight rate of \$34 a ton for carrying mining machinery and \$34 for hardware over this line for a distance of 131 miles. Now, from New York to Seattle over the transcontinental lines, this same machinery is carried a distance of 3,184 miles for hardware \$35 a ton and for mining machinery \$30 a ton.

Mr. MADDEN. Will the gentleman permit one question in connection with the dialogue we had a moment ago?

Mr. WICKERSHAM. Yes.

Per ton.

Mr. MADDEN. Did the gentleman, knowing the facts with reference to the excessive charges there, ever introduce a bill to change the rate?

Mr. WICKERSHAM. The gentleman never has, for the very good reason there never was the slightest sympathy for the Territory of Alaska until Woodrow Wilson became President. [Applause on the Democratic side.] Now, over this road from Cordova to Chitina, a distance of 131 miles, we pay the same rate which is paid from New York to Seattle on the same identical machinery and hardware. Nor is this all. We not only pay \$34 upon these commodities for this 131 miles of road, but we have to take those commodities from Seattle to Cordova. We can not get a through rate. You can not get through rates upon goods shipped upon any railroad in Alaska. The steamship companies will only take your freight from Seattle or San Francisco to the dock at Cordova. The contract from Seattle or San Francisco to Cordova is a contract for a shipment upon water, and does not come under control of the Interstate Commerce Commission. When you get the freight to the railroad in Cordova, you have to pay the rates approved by the Interstate Commerce Commission over the railroad; but that commission has no control over the steamship companies' rates from Seattle or San Francisco to Alaska, and there is no local control whatever over either the water or railroad rates.

I have shown the connection between the rates on the Yukon and Tanana Rivers, the rates over the connecting line between Fairbanks and Chitina, the rates on the Copper River & North-western Road and the Alaska Syndicate twin transportation line, the Alaska Steamship Co., for the purpose of demonstrat-

Grain and feed

ing to this House that there is no possibility of any independent business in the interior of Alaska unless we get an independent transportation line which will deliver freight there at competitive rates. There is no competition now; it is an inso-

lent monopoly.

Let us look at a new feature of this transportation question for a moment. I have attempted to explain to the House that the Northern Commercial Co., on the Yukon and Tanana Rivers, through its ownership of its own line of steamers under the corporate name of the Northern Navigation Co., is able to monopolize the whole mercantile business of that region as well as all the transportation business. It has been enormously profitable to this company, first, because it had a monopoly of the transportation, and, second, by reason of its monopoly of the transportation it has had a monopoly of all the mercantile business in the country, which it manages through its stores at every steamboat landing for 2,000 miles along the Yukon and Tanana Rivers. Its intimate relationship with the Alaska Syndicate line is well shown by their joint tariff rates, their joint management of the connecting line from Fairbanks to Chitina, and their joint control and management of the lines to the mouth of the Yukon River and from the White Pass Railway line down the Yukon to the interior, via Dawson.

There is no competition at all. The Alaska Syndicate controls the transportation to Alaska and in Alaska, and it manipulates the rates with water transportation and controls it in such a way as to exclude the control of the Interstate Commerce

Commission.

Now, I want to call attention to another thing. Syndicate is very largely controlled by the Guggenheims. The Guggenheims are not railroad men. They are not engaged in railroad exploitation anywhere except as it becomes a part of their mining operations. The Guggenheims are the greatest mining trust in the world, and I expressed an admiration for their greatness a while ago. They control all the smelters on the Pacific coast. They control all the ore carried from Alaska to those smelters. They control the railroad up the Copper River to their great copper field, and they fix the rates. Now, I want to call attention to those rates and why they are fixed as they are.

Mr. FESS. Will the gentleman yield? Mr. WICKERSHAM. I do not want to be bothered, if the gentleman will excuse me.

Mr. FESS. I would like to know why the Interstate Com-

merce Commission has not control over that?

Mr. WICKERSHAM. Because it has no jurisdiction on transportation carried by water, but only on railroads. They do not carry by railroad, but by water. If they used the railroads the Government would have power over them. They opposed the application of the interstate-commerce laws to Alaska down to the last minute.

Permit me to call your attention to the excessive rates fixed by the Alaska Syndicate for carrying ore out of the Copper River country over its line of railroad and its ore-carrying steamship line—the Alaska Steamship Co. At page 616 of the Senate hearings on the Alaska railway bill will be found a copy of the Alaska Syndicate's ore rate sheet No. 1. It is marked "The rate sheet of the Copper River & Northwestern Railway Co. in connection with the Alaska Steamship Co.," which are, of course, mere divisions of the Alaska Syndicate investments in Alaska. This ore tariff sheet fixes the rate of transportation from all points on this line of road in Alaska to their Tacoma smelter on Puget Sound.

The Guggenheim Copper Trust owns the Tacoma smelter, and all the copper from Alaska is carried in its boats to this smelter for reduction. The freight rate is based upon the value of the ore as given by this smelter on reduction of the ore.

Freight rate from points on the Copper River & Northwestern Railroad to Tacoma Smeilter, Tacoma, Wash.

[Rates in cents per ton of 2,000 pounds, on value of ore at Tacoma Smeiter.]

	Actual value per ton of 2,000 pounds not to exceed-								
To Tacoma from—	\$25	\$40	\$50	\$65	\$80	\$200	\$300	\$400	\$500
Alaganik. Brenner Chitina. Kotsina Strelna.	575 985	750 1,150			1, 250 1, 650				1,970 2,530
Chokosna Moose Lake Long Lake Porphyry McCarthy Kennicott.	1,100	1,400	1,700	2,050	2, 250	2,450	2,910	3,140	3,370

This table and the one following show the rates on carload lots, but on less than carload lots the rate is very much higher:

Table showing general average rates.

RI to \$25 \$26 to \$40 \$41 to \$50 \$51 to \$65 \$61 to \$65 \$61 to \$30 \$61 to \$200 \$201 to \$200 \$201 to \$200 \$401 to \$500	Per ton. \$11,00 14,00 17,00 20,50 22,50 24,50 29,10 31,40 33,70	Per cent. 2 72 2 46.9 2 37.7 2 35.8 2 31 2 21, 2 2 12 2 9.1 2 7.37

¹ General average rate 30½ per cent total value.

² Of the total value.

In addition to the freight rate deducted at the Tacoma smelter there is a smelter charge of \$3.75 per ton, and the trust then takes the product at 3 cents a pound, or \$60 per ton, less than the market price. Of course this system of robbery is based upon monopoly and the fact that Congress is asleep while the trust is awake and active. Will Congress awake and perform its duty?

The Alaska Syndicate mines at Kennecott embrace about 4,000 acres and contain a copper deposit of unrivaled richness and magnitude. This area was obtained from the United States at \$5 per acre, and the Alaska Syndicate has United States patent for title. The ore is of beautiful peacock blue and is 75 per cent copper, with some values in gold. At one time this ore deposit occupied a solid vein in the mountain high above its present position. As the ages were on more and more of the rock holding the vein was undermined, and the ore fell into the canyon where it now lies. When the Alaska Syndicate bought it for \$5 an acre from the United States this immense deposit of highgrade ore, quarried and ready for shipment, lying in this gorge was of the value of more than \$25,000,000. The vein yet remaining in place is of great extent and unknown depth, so that

it really represents one of the great copper mines of the world. But it may be asked, Why does the shipper not patronize another line of railroad, another line of ore-carrying boats, or another smelter, where he can get better rates? The answer to that is: There is no other line of railroad; there is no other line of ore-carrying boats; there is no other smelter. The miner of Alaska and those who are obliged to transport mining machinery or anything else for the development of the country are entirely at the mercy of a single transportation monopoly,

headed by the Alaska Syndicate.

In 1910 copper to the extent of \$230,000 was mined in Alaska. In 1911 it had increased to nearly \$3,000,000; in 1912 it had increased to \$4,904,000, and it is expected to increase or diminish at the caprice or interest of the Copper Trust. Every dollar of all that ore was taken out by the Guggenheims and carried either to their Tacoma smelter or shipped to New Jersey, to one or the other of their smelters. No other person or corporation has mined or can mine copper in Alaska.

The opposition to our effort to relieve Alaska from this monopoly taunts us with the fact that there is but one copper mine in the interior of Alaska which is producing. That is undoubtedly true, and the reason for it is that the great Copper Trust, the American Smelting & Refining Co., of which the Guggenheims are masters, has used all the force and brutality of the Alaska Syndicate and its various transportation lines to present any Syndicate and its various transportation lines to prevent any other mine from being opened in that country except by themselves. There will not be any other copper mine opened there except by the Copper Trust, however rich and extensive the copper property may be, until the Government shall take hold of the situation with a strong hand and undo the monopoly which now exists there. Nowhere has monopoly so firm a hold on the undereload natural recourses of a country as the Alexander Strong undeveloped natural resources of a country as the Alaska Syndicate (Guggenheim Copper Trust) has upon the undeveloped copper resources of Alaska.

There is no power in the people of Alaska, nor by a combination of small interests, to compete with the Alaska Syndicate and its allied interests in Alaska. Unless this bill shall pass and its ailied interests in Alaska. Unless this bill shall pass the syndicate will continue to be supreme in the Territory of Alaska, and will continue to gather to its owners the undeveloped resources of the country at Government prices. Shall the Government or the Guggenheims control Alaska? If this House shall refuse to pass this bill and, on the contrary, shall go back to the old system of the open door in handing out the resources. of Alaska, it will be but a short time until they will all belong to the Alaska Syndicate, or at least all that it wishes to obtain,

There is no power in Alaska to restrain the entire monopoly of its resources by the Alaska Syndicate—there is none anywhere except in Congress itself. If you shall refuse to exercise that power in accordance with the highly patriotic policy announced in his message by President Wilson, your refusal means to aid the Alaska Syndicate in its campaign to further monopolize the resources of the Territory which the Constitution places under your charge as its guardian. Will you aid in its protection or permit monopoly to take it with your silent connivance?

GOVERNMENT OWNERSHIP.

Some of the opponents of this bill object to it on the ground that it establishes Government ownership in Alaska, which they seem to fear more than they do Guggenheim ownership. Upon its face the bill authorizes the President to locate and construct a railroad in Alaska from one of its southern harbors to its great interior waterways. The bill creates a mortgage upon the public lands of Alaska as security for bonds to be issued in the sum of \$35,000,000. The President is authorized to sell the bonds and with the proceeds obtained therefrom to build the railroad. The bonds are to run for a series of years and are to be secured, not only by the public lands of Alaska but upon the property of the railroad itself. It is provided that 50 per cent of all the sales of public land in the Territory of Alaska shall be deposited in a sinking fund for the payment of the bonds when due.

Of course, the credit of the United States stands behind the transaction, because the public domain in Alaska belongs to the United States and the expenditure is to be met from a sale of the But that seems a better plan than to give the lands to a private corporation and also a monopoly in transportation. Substantially the bill creates a plan for mortgaging Alaska, its resources, and its people to secure the money with which to build this road, but, of course, if they fail, which they can not,

the Government must pay.

It will readily be seen that upon the face of the transaction it differs but little from the efforts heretofore made by Congress to develop other new territories. Congress appropriated millions of acres of the public domain in the West and South, and gave them as a bonus to private corporations to enable them to build trunk-line railroads for the development of those terri-There is no difference in principle between those appropriations of the public funds and public lands and the one under discussion, except that in this instance Congress acts more wisely, because it subjects the lands to be used for the building of the Alaska road to a mortgage upon which it procures the money, and with that money builds the road. In the meantime Congress will sell these lands to our own people, and thus we will have the land and the Government will have the railroad. Under the old system Congress made millionaires out of impecunious speculators, like those now roosting on the gallery rails of this House and crying out against this bill.

So far as the bill under discussion is concerned, there is no purpose in it to establish a system of Government ownership in Alaska or to acquire the railroads now constructed there. The purpose of the bill is to connect the Alaskan seaboard with the navigable rivers in the interior, and to build and operate a standard-gauge trunk line of railroad over the route. The bill provides that the President may either lease or operate this

AN ALASKA NAVAL BASE,

Under its constitutional grants of power Congress has authority to establish a naval base on any one of the great harbors in southern Alaska, and to erect such forts, public buildings, arsenals, dockyards, and other structures needed for the general welfare and protection of the United States. Under this constitutional authority Congress has the power to appropriate money, not only to pay for all these necessary public buildings and structures, but to build a railroad in connection therewith to any coal fields where fuel may be obtained for the use of the Army, the Navy, or other public use. Congress has the power under these constitutional provisions to extend that railroad from the seaboard to the great interior river waterways for the extension of trade and commerce and the general welfare and development of the territory there owned by the United States. Under its general authority " dispose of and make all needful rules and regulations respecting the territory or other property belonging to the United States Congress has authority to create a mortgage upon the public lands of Alaska, and to provide for the payment of that mortgage out of the sale of the lands, and to use the proceeds for the purpose of building the railroad in question. These questions have been determined affirmatively by the Supreme Court of the United States so many times that it is not necessar; to cite authorities, thou (204 U. S., 24-33) is in point. to cite authorities, though the case of Wilson v. Shaw

It follows that "Government ownership," so far as it affects the location and construction of the railroad in question, is a constitutional power possessed by Congress. It is the Juty of Congress to exercise its constitutional powers whenever a duty arises which requires it to do so. It is the duty of Congress to legislate in and for the development of the Territory of Alaska, and the time has now arrived in the development of the Territory of Alaska when we must either have "Government ownership" or "Guggenheim ownership," and it is now for the House to choose which it will take.

Under the constitutional power to provide for the common defense and general welfare, to borrow money, to maintain an Army and Navy, and to perform acts necessary for the protection of the country, Congress may, and when necessary its duty is, to establish a naval base on one of those great Alaskan har-It is necessary to do that at this moment, and this bill is

the beginning of such an establishment.

Since the pillars of Hercules guided the first frail raft from the Mediterranean into the Atlantic the active scenes of maritime civilization have taken place on the Atlantic Ocean. Columbus extended their activities to the New World the civilized nations of the Old were gathered along the European shores of the Atlantic. As people in the New World increased in number and erected new nations there, their hardy pioneers crossed the great deserts to the Pacific and built cities along its shores. California was made a State overnight without having

worn the swaddling clothes of a Territory.

Trade and commerce have now gone into the Pacific; new lines of trade and travel have been established from our American shores to Yokohama, Shanghai, Hongkong, and the harbors of the Indian Sea. Our alliances with these Asiatic millions are becoming more fixed and valuable to us, and rapidly the scene of the world's activities in trade and commerce is changing from the Atlantic to the Pacific. Certainly the trade and commerce of the United States will be greater over the Pacific than over the Atlantic. Our trade relations with the Orient have so far been pleasant, agreeable, and profitable, but as our Nation is rapidly becoming the great maritime and commercial power in the Pacific we must make cautious provision for protecting that trade and commerce from unfair encroachment. It is the part of wisdom and it is your constitutional duty to make provision for the protection of our coasts in case of war with any of our neighbors on the Pacific. Congress has already spent millions of dollars in building forts, arsenals, dockyards, and other defensive works upon the Pacific, upon the Hawaiian Islands, and at Manila. But none of these are of value without the Navy. We need and must have such a navy upon the Pacific that no enemy will dare to attack us, and we will therefore always be at peace. There can be no navy without coal, and there is no naval coal on the Pacific coast except in Alaska.

In the hearings upon this bill before the Senate Committee on Territories naval officers were invited to be present, and their testimony was taken at some length in respect to quantity and quality of the coal needed by the Pacific Fleet and the price to be paid therefor. This testimony was not repeated in the House hearings, but will be found in full in the Senate hearings, beginning on page 290, where there are also long extracts from the testimony of the Secretary of the Navy, given before the House Naval Committee in February, 1912, in which the Secretary speaks authoritatively and officially in respect to the quality of the coal in Alaska and the quantity of coal needed on the Pacific coast.

Now, I want to call attention to the fact that the rate for carrying ore in Alaska is fixed on the value of the ore in the Tacoma smelter. If you had ore on the line of this road you would have to transport it to Tacoma, because that is the only smelter that reduces copper; you would have to transport it on the Alaska steamship boats, and on their railroads, and finally they fix the value of the ore at their own smelter.

Mr. MANAHAN. Wherein would the building of a railroad break the control of their ore-carrying steamship companies? Granting the monopoly of the syndicate on the ore business, wherein would the building of the railroad alone by the Government break the control of that syndicate in the matter of charging by water and charging by smelting, and in the other re-

spects?

Mr. WICKERSHAM. Well, that is a very serious question; but if a railroad were built from Valdez to the copper region it would give the independent copper men in that country a chance for independent shipments. There is a new smelter in British Columbia. The Alaska ore could be shipped to that smelter, but there would have to be an independent railroad to get it out, and there would have to be an independent shipment on the sea down to the smelter. If the Government would build

a railroad from Valdez to that common point and afford the copper people an independent outlet for their copper, there would be plenty of boats to take the copper to where some chance of

competition exists, but there is none there now.

Mr. GARRETT of Texas. Mr. Chairman, will the gentleman

yield?

The CHAIRMAN. Does the gentleman yield?

Mr. WICKERSHAM. Certainly.
Mr. GARRETT of Texas. The exerbitant rates that the gentleman is discussing are fixed, are they, wholly in the Territory of Alaska?

Mr. WICKERSHAM. Yes. Mr. GARRETT of Texas. Who controls and fixes those rates? Have you a railroad commission in Alaska?

Mr. WICKERSHAM. No. sir; there is nothing in Alaska in the way of a rate-fixing body except the Alaska Syndicate [laughter], which controls the rates in that Territory.

Mr. GARRETT of Texas. Have you any authority up there

anywhere by which that situation can be remedied?

Mr. WICKERSHAM. I said a moment ago that only a year ago we got a writ of mandamus from the Supreme Court of the United States to compel the Interstate Commerce Commission to take jurisdiction. But the Interstate Commerce Commission has no control over water rates. That is the trouble.

Mr. McGUIRE of Oklahoma. Mr. Chairman, will the gentle-

man vield?

Mr. WICKERSHAM. Yes.

Mr. McGUIRE of Oklahoma. Have the Interstate Commerce Commission taken any action or have they fixed any schedule

Mr. WICKERSHAM. Yes; they have fixed the rates that I am talking to you about. They fixed them at that rate because nobody objected. Nobody is in a position to object, because if you fight their railroad rates and ship over their roads later they will take it out of you on the water rates and then again at the smelter. They have a chance at you in so many other ways where they now have a monopoly that no shipper dares to protest. But if we had some independent outlet from that country and some independent ore-carrying boats by which we could reach an independent smelter, our miners would have some chance to secure results. Now, what does this amount to? It amounts to so much that the Alaska Syndicate spent \$20,000,000 in building a railroad to their Kennicott mines. Those are the greatest copper mines in the world. That is a copper region. There are immense deposits of copper there, but the syndicate people have been able to get title to all portions of it which they wish, through the monopoly which they exercise over freight rates and the smelting of the ore.

Mr. SCOTT. What mileage does that cover?

Mr. WICKERSHAM. One hundred and ninety-six miles on the railroad.

Mr. SCOTT. Does that carry it to Chitina?

Mr. WICKERSHAM. That covers the whole line from Cordova to Kennicott. A new line of 160 miles of road would cover the whole situation. It would be sufficient to give competition with the Alaska Syndicate road. That is why we want two railroads in the bill. We want a railroad built from Valdez out to this copper region, so there may be an independent outlet for the copper independents. Then we want a railroad from Seward through the great Susitna Valley into the interior.

Mr. McGUIRE of Oklahoma. I should like to ask the gentle-

man whether he is familiar with the acreage of copper mines

that this company owns?

Mr. WICKERSHAM. I am—only in a general way.

Mr. McGUIRE of Oklahoma. And the supposed acreage not owned by the company, but by the Government and by other

persons?

Mr. WICKERSHAM. There was some testimony taken on that subject before one of the Senate committees, and at that time it was admitted that the Alaska Syndicate had title to 3.240 acres of this copper land at Kennecott. I am told that since then they have acquired title to a large area on Prince William Sound; and wherever a bit of copper shows up that is of any value they sit right there until they get it away from the man for a song, and they usually sing the song themselves.

But it may be asked, Why does not the miner patronize another line of railroad, another steamboat company, and an-

other smelter? The answer is, There is no other line of railread; there is no other line of ore-carrying boats; there is no other smelter. Everything in the way of transportation which is worth having is owned by the Alaska Syndicate, and if it is not owned by them it is controlled by them.

If the House would have some committee inquire into these matters and secure the exact facts, it would be of great benefit

to the House, to the country, and to Alaska.

Mr. MADDEN. Will the gentleman yield?

Mr. WICKERSHAM, Yes.
Mr. MADDEN, If the syndicate owns all of this country, what is the use of building a railroad there, to turn what is left over to those people who own or control everything there?

Mr. WICKERSHAM. The syndicate does not own all of this country

Mr. MADDEN. I thought the gentleman said it did. Mr. WICKERSHAM. I said it owned everything that was of any known value at this time.

Mr. MADDEN. Then there is nothing left.

Mr. WICKERSHAM. The gentleman is mistaken. There is much left.

Mr. TOWNER. Will the gentleman yield for a question? Mr. WICKERSHAM, Yes,

Mr. TOWNER. I understood the gentleman to say a moment ago that you ought to have two routes, and one of those would be a route connecting the port of Valdez with the copper re-

Mr. WICKERSHAM. Yes.

Mr. TOWNER. Does the gentleman think this bill would authorize the building of such a railroad?

Mr. WICKERSHAM. Undoubtedly.

Mr. TOWNER. I should like to know where the language is that authorizes it.

Mr. WICKERSHAM. It authorizes the President to locate such a route.

Mr. TOWNER. No; it authorizes the President to locate it,

with two objects in view, and only two.

Mr. WICKERSHAM. Yes.
